Nemi Labs

Class 9:
Downloadable software using artificial intelligence for analysing biological and health data; downloadable software for identifying biological mechanisms from health data; downloadable medical software for health risk assessment; downloadable software for generating personalised health reports; downloadable software for predicting health outcomes.

Class 42:
Scientific research in the field of health; medical and biological research; research and development of methods for analysing biological samples; scientific analysis of biological and health data; software as a service (SaaS) for analysing biological and health data; platform as a service (PaaS) for health data analysis; providing temporary use of non-downloadable software using artificial intelligence for health assessment; design and development of software for health data analysis; design and development of computer models for predicting health outcomes; laboratory research services in the field of metabolism, hormones and inflammation.

Class 44:
Medical services; health assessment services; telemedicine services; medical consultation services; medical testing for diagnostic or treatment purposes; medical advisory services; health counselling; mental health services; psychological counselling; psychological assessment services; provision of information relating to health and wellbeing; personalised health and lifestyle advice; nutrition advice; dietary advice; medical analysis services for the diagnosis and treatment of persons; provision of health reports based on biological test results.

Olyrian

International priority date claimed:
13 August 2026 (EUROPEAN UNION INTELLECTUAL PROPERTY OFFICE (EUIPO))

Class 1:
Chemical substances, chemical materials and chemical preparations, and natural elements; Chemicals for use in industry and science; active chemical ingredients for use in the manufacture of pharmaceuticals; radioactive elements for scientific purposes; radioactive materials for scientific use; chemical preparations and reagents for scientific, research and laboratory use; chemical reagents, other than for medical or veterinary purposes; chemical test paper; chemical reference materials; chemical substances for analysis in laboratories; testing reagents and diagnostic substances, all other than for medical or veterinary purposes; diagnostic chemicals; diagnostic preparations and diagnostic reagents for scientific purposes; laboratory testing kits for research purposes; panels of reagents for scientific and research use; chemicals, compounds, reagents and diagnostic preparations, all for scientific and research use, for the analysis and identification of nucleic acid sequences, nucleic acids, genetic materials, infectious agents and pathogens; nucleic acids for scientific purposes; DNA primers; polymerases

and buffers for scientific and research use; reagents and kits for the isolation, purification and extraction of DNA and RNA; substances for extracting nucleic acids from biological specimens; DNA and RNA extraction controls; genomic reagents for scientific and research use; reagents and chemical preparations for the identification and characterization of cells; dyes and stains for the identification and characterization of cells; viability dyes; laser excitable dyes; flow cytometry reagents; reagents for blood coagulation analysis, clinical chemistry testing, hematology analysis, urinalysis and genetic research, all for scientific and research use; immunoassay reagents; control serum and standard serum for scientific and research use; control preparations and calibrating fluids for laboratory instruments; calibrating solutions for scientific use; quality control materials and reference control materials for scientific use; hematology control materials for scientific use; lysing reagents; diluents; proteins for analytical and laboratory purposes.

Class 5:
Pharmaceutical, medical and veterinary preparations and articles; sanitary preparations and articles for medical purposes; biological preparations for medical and diagnostic purposes; biological tissues for medical purposes; cultures of microorganisms for medical and veterinary use; chemical preparations and reagents for medical and veterinary purposes; chemical preparations for medical diagnostic purposes; clinical diagnostic reagents; diagnostic preparations and materials for medical and veterinary purposes; immunoassay reagents for medical use; diagnostic test kits for medical purposes; medical diagnostic test strips; medical test strips for monitoring blood glucose and blood ketone levels; reagents and kits for medical diagnostic use, including reagents for genetic testing; reagents for bacteria analysis; reagents for clinical and laboratory analysis, including blood, hematology, coagulation, immunoassay, and urinalysis, erythrocyte, leukocyte and protein testing; reagents for flow cytometry for medical use; reagents for disease detection, cancer prediction and drug sensitivity testing; diluents for medical and diagnostic use; lysing solutions and reagents for medical use; hemolytic solutions; sample preparation kits for medical diagnostic use; control materials, calibrating solutions and standard sera for medical diagnostic purposes; biochemical control sera and standard sera for medical purposes; quality control materials and reference materials for medical diagnostic purposes; cleaning, cleansing, disinfecting and sanitizing preparations for medical purposes; detergents for medical purposes; medical assays for testing of body fluids; serums.

Class 9:
Scientific research and laboratory apparatus and instruments; scientific research and laboratory apparatus and instruments for the analysis of biological samples, bodily fluids and tissues; clinical chemistry analyzers; molecular diagnostic instruments; genetic analyzers; hematology analyzers; immunoassay analyzers; blood screening instruments; particle analyzers; particle counters; cell counters; flow cytometers; laboratory robots; automated laboratory instruments and equipment for sample preparation, handling and analysis; bio identification apparatus for the analysis of nucleic acid sequences, nucleic acids, genetic materials, infectious agents and pathogens; molecular diagnostic sensors for the analysis of nucleic acid sequences, nucleic acids, genetic materials, infectious agents and pathogens; molecular diagnostic systems comprised of sequencers, spectrometers, sensors and computers for the analysis of nucleic acid sequences, nucleic acids, genetic materials, infectious agents and pathogens; gene amplification analyzers; sequencers; spectrometers; flow cytometers for scientific and laboratory use; laboratory apparatus for nucleic acid purification and sample preparation; thermocyclers; instruments for sample preparation and thermocycling; laboratory sample preparation instruments for scientific purposes; laboratory sample preparation instruments; laboratory sample extraction instruments; laboratory apparatus and accessories for scientific use, in particular laboratory centrifuge buckets and adapters, automated laboratory positioners, laboratory specimen tube racks, laboratory specimen tube rack inserts, test tube rack holders, laboratory storage devices in the nature of cap mats, laboratory plate seal rollers and seals therefor, well plates, lids for well plates, reagent and solvent reservoirs, pipette tips, probes, laboratory cassettes for specimen processing and storage, cell culture flask adapters, disposable plastic bioreactors for cell culturing, microfluidic plates, lids for microfluidic plates, reagent holding trays and sample containers for in vitro diagnostic use; furniture especially made for laboratories; measuring, detecting, monitoring and control apparatus; detectors; signaling and monitoring equipment; apparatus and instruments for recording, transmitting, reproducing or processing sound, images or data; computer hardware; computer hardware for medical diagnostic systems; computer peripheral devices; computer monitors; printers for use with computers; loudspeakers; data storage media; data recording media; downloadable and recorded software; downloadable and recorded computer software, namely operating system software, for use with laboratory and diagnostic apparatus and instruments; downloadable and recorded software for the automation, operation, monitoring and control of laboratory and diagnostic systems; downloadable and recorded software for data collection, management, analysis and reporting; laboratory information management software; downloadable and recorded workflow and sample management software; downloadable and recorded clinical decision support software; downloadable and recorded artificial intelligence software for data analysis; downloadable and recorded software for managing projects, laboratory workflows, and data, for use for scientific, diagnostic, and research purposes; downloadable and recorded application software; downloadable and recorded computer software for medical diagnostic systems; downloadable and recorded software for processing diagnostic data; downloadable and recorded software for remote monitoring and control of diagnostic instruments; downloadable and recorded communications software for hospitals and medical institutions; downloadable and recorded computer software for electromedical apparatus; downloadable and recorded software for patient data integration, care pathway management, digital health data aggregation, clinical workflow orchestration and interoperability of medical and diagnostic systems; downloadable and recorded application programming interface [API] software; downloadable and recorded software for secure exchange of healthcare data; downloadable and recorded mobile applications for accessing, viewing, transmitting, managing and analyzing medical, diagnostic and laboratory information; data management systems, comprising computer hardware and recorded or downloadable software, for laboratory and diagnostic use; software interfaces and integration tools in the nature of recorded or downloadable computer software; downloadable and recorded content; digital instructional and teaching materials; digital publications, pamphlets, manuals, brochures, books, booklets, newsletters, flyers and posters; digital medical journals; digital medical books; digital

advertising materials; digital three dimensional models for educational purposes; downloadable and recorded virtual and augmented reality software; audio, video and signaling apparatus; photographic, optical and electroacoustic apparatus; vibrotactile communication equipment; telecommunications apparatus; downloadable electronic publications; teaching apparatus and instruments; downloadable and recorded computer software for medical training purposes.

Class 10:
Electromedical, medical, dental and veterinary apparatus and instruments; testing apparatus and instruments for medical purposes; diagnostic apparatus and instruments for medical purposes; measuring apparatus and instruments for medical purposes; medical diagnostic apparatus and instruments; medical diagnostic instruments for in vitro diagnostic testing and analysis; laboratory equipment for use in the field of medical diagnostics; point of care diagnostic apparatus and instruments; apparatus for medical analysis; medical diagnostic analyzers for the analysis of bodily fluids; tubes for collecting and transferring samples of blood and other bodily fluids for medical and diagnostic use; sample delivery devices for use with diagnostic test cards, namely, medical tubes for collection and transfer of bodily fluid for introducing biological samples into in vitro diagnostic test cards; blood testing apparatus; blood analyzing apparatus and instruments for medical diagnostic purposes; blood cell analyzers; blood coagulation analyzers; blood pretreatment apparatus and instruments; non invasive blood analyzing apparatus and instruments; non invasive blood vessel monitor; occult blood analyzing apparatus and instruments; blood collecting devices; blood sampling tubes; pipettes for medical purposes; needles for medical purposes; apparatus for drawing blood; blood glucose monitors; blood glucose sensors; blood ketone monitors; blood ketone sensors; immunochemical analyzing apparatus and instruments; immunological testing apparatus and instruments; immunoassay apparatus and instruments; genetic testing apparatus and instruments; bacteria analyzing apparatus and instruments; infrared spectroscopic analyzing apparatus and instruments; apparatus and instruments for automated microbial identification and susceptibility testing for medical purposes; chemistry analyzers for medical purposes; immunoassay analyzers for medical purposes; hematology analyzers for medical purposes; automated blood banking analyzers; automated sample handling and testing equipment for medical diagnostic use; sample preparation devices for medical diagnostic use; flow cytometers for medical diagnostic use; clinical laboratory analyzers for the analysis of biological samples and bodily fluids for medical purposes; apparatus and instruments for medical diagnostic use, in particular analyzers for the analysis of biological samples and bodily fluids; veterinary diagnostic analyzers for the analysis of biological samples and bodily fluids; medical diagnostic devices and systems, including hand held meters, lancets, test strips and control solutions; urinalysis apparatus and instruments; urine cell analyzing apparatus and instruments; urinary particle analyzing apparatus and instruments; urine pretreatment apparatus and instruments; furniture adapted for medical use; medical functional and work clothing, headgear and footwear; cases and bags especially made for medical apparatus, equipment and instruments; apparatus and equipment for recording, processing, storing and reproducing medical data; lasers for medical purposes.

Class 16:
Stationery; instructional and teaching materials, except apparatus; printed matter, in particular publications, pamphlets, manuals, brochures, books, booklets, newsletters, flyers and posters; medical journals; medical books; printed instructional materials; printed advertising materials; three-dimensional models for educational purposes, except apparatus.

Class 25:
Clothing; footwear; headwear; parts and accessories for all the aforesaid goods.

Class 35:
Business management, organization and administration; business consultancy and advisory services; business consulting and efficiency advisory services for laboratories, clinics and healthcare providers and related businesses; business management services; business management, business planning and strategic business services, for others; management of laboratories and clinics for others; provision of business statistical information relating to medical matters; office machines and equipment rental; job and personnel placement; hiring of employees as temporary workers; consultancy and advisory services relating to personnel placement; arranging and providing of temporary staff; providing computer databases through the internet for purposes of conducting transactions, namely, for material ordering, inventory management and maintenance, and for generation of related business reports for clinical and medical laboratories; compilation and systemization of medical data and information in computer databases for business purposes; collection of business data obtained from medical, clinical and laboratory apparatus and instruments, and providing business information derived therefrom; providing computer databases through the internet for purposes of material ordering, inventory management and maintenance for clinical and medical laboratories; business management and business administration of digital health platforms for others; business management of online platforms for coordination of laboratory, diagnostic and healthcare services; medical billing; compilation of medical examination reports; compilation of statistical data relating to medical research; advertising for others in the field of medical and laboratory technology; demonstration of medical, electromedical and laboratory apparatus and instruments; sales promotion for medical, electromedical and laboratory apparatus and instruments and for services for healthcare providers; arranging, organizing and conducting of trade shows, events and commercial exhibitions for medical, electromedical and laboratory apparatus and instruments and for services for healthcare providers; arranging, organizing and conducting of virtual trade shows, events and commercial exhibitions for medical, electromedical and laboratory apparatus and instruments and for services for healthcare providers; promoting public awareness and advocacy in the field of health; providing online marketplaces for sellers of data processing programs and software applications, for providers of software as a service (SaaS) in relation to medical data and information, for providers of medical consultancy for laboratories, medical facilities and clinics and for providers of medical advisory services on the operation of laboratory and medical apparatus and equipment; administration of customer loyalty programs; administration of incentive award programs. online retail store services featuring laboratory apparatus and instruments and their parts, fittings, and accessories therefor and software sold therewith, reagents and chemical preparations, and laboratory consumables.

Class 36:

Financial, monetary and banking services; financial management services relating to medical institutions; insurance services; warranty claims administration services; real estate services.

Class 37:
Construction of medical and laboratory establishments; installation, maintenance and repair of medical apparatus and instruments; installation, maintenance and repair of laboratory apparatus and instruments; installation, maintenance and repair of apparatus and instruments for clinical laboratory tests; installation, maintenance and repair of measuring and testing apparatus and instruments and their parts; installation maintenance and repair of electronic machines, apparatus and instruments and their parts; installation, maintenance and repair of computers and computer peripheral equipment; installation, maintenance and repair of data processing apparatus and instruments; providing information relating to the installation, maintenance and repair of medical apparatus and instruments; providing information relating to the installation, maintenance and repair of laboratory apparatus and instruments; providing information relating to installation, maintenance and repair of laboratory apparatus and instruments; providing information relating to installation, maintenance and repair of measuring or testing apparatus and instruments and their parts; providing information relating to installation, maintenance and repair of electronic machines, apparatus and instruments and their parts; provision of information relating to the installation, maintenance and repair of computers and computer peripheral equipment; providing information relating to the installation, maintenance and repair of data processing apparatus and instruments; technical support services in the nature of troubleshooting of problems with medical and laboratory apparatus and instruments; technical support services in the nature of troubleshooting of computer hardware problems; providing information relating to the maintenance and repair of medical and laboratory apparatus and instruments.

Class 38:
Providing user access to digital platforms, portals and online networks in the field of medical, diagnostic and laboratory information; transmission of medical, diagnostic and laboratory data via computer networks and the internet; electronic exchange of messages and data between healthcare providers, laboratories, patients, medical devices and diagnostic systems; providing online forums and communication platforms in the field of digital health; secure transmission of healthcare data; telecommunication services for digital health platforms; providing access to databases; wireless transfer of data via the internet; transmission of information and data via computer networks, online services and the internet; electronic data transmission; providing voice communication services over the internet; rental of telecommunications equipment.

Class 41:
Education and training in the field of medical and laboratory apparatus; training in the use of laboratory equipment and diagnostic instruments; arranging and conducting workshops and seminars in the field of medical and laboratory apparatus; organization of conferences in the field of medical science; arranging, organizing and conducting of conferences, congresses, symposiums and workshops in the field of medical, electromedical and laboratory apparatus, equipment and instruments and in the field of services for healthcare providers; arranging and conducting of colloquiums, conferences, congresses and symposiums; conducting workshops and seminars for laboratories, clinics, healthcare providers and related businesses in the field of laboratory equipment and diagnostic instruments to improve laboratory quality, performance and efficiency; publication of periodicals and books; publication of medical books and manuals (handbooks); providing online electronic publications, not downloadable, including instruction sheets and manuals for in vitro diagnostic instruments and laboratory automation systems; rental and presentation of films for educational purposes; rental of audio and visual equipment; museum services; sporting and cultural activities.

Class 42:
Scientific and technological services and research and design relating thereto; research and development, for others, in the field of information technology and medical technology, physics, chemistry and mechanical engineering; engineering, planning, consultancy and technical monitoring services in these fields; material testing; medical research; laboratory research, analysis and testing services; biochemical, toxicological and other analytical laboratory testing services for scientific research purposes; diagnostic testing services for scientific research purposes relating to human or animal health; immunodiagnostic testing services for scientific research purposes; testing, inspection, measuring, analysis, evaluation and research of pharmaceutical preparations and diagnostic reagents; product development for laboratory and diagnostic equipment; development of medical diagnostic tests for others; design and development of medical diagnostic apparatus and reagents; providing online non-downloadable software for providing medical diagnostic information; design of graphical user interfaces; provision of non-downloadable graphic design templates; provision of computer software components for user interfaces; data analysis services; cloud computing services; development and generation of databases; development and generation of websites; computer programming; computer programming in the medical field; leasing of data processing programs; design, development, programming, installation, implementation, maintenance and updating of computer software; design of information and data processing systems; rental of computer software; configuration of computer software; customization of computer software; rental of computers; computer software consultancy; rental of information technology products and installations; platform as a service [PaaS]; providing online non-downloadable computer software; providing online non-downloadable software for assisting in clinical practice; providing online non-downloadable software for clinical decision support and operational decision support; providing online non-downloadable software for use in providing health care information; providing online non-downloadable software for use in capture and analysis services to improve patient care; providing online non-downloadable computer software for use as programming interfaces (API); providing online non-downloadable software for use with clinical diagnostic instruments to analyze and interpret data and generate reports; providing online non-downloadable software for connecting laboratories to a proprietary computer network providing laboratory test data; providing online non-downloadable software for connecting laboratories to computer networks providing laboratory test data; providing a web based software platform for integration of medical, diagnostic, laboratory and patient generated data; providing a web based software platform for laboratory and diagnostic equipment information management, monitoring and analysis in the field of in vitro diagnostics; software

as a service (SaaS) services; software as a service (SaaS) services featuring software for managing medical data and information; software as a service (SaaS) services featuring software for managing data and information in the field of in vitro diagnostics; providing a web based software platform for data management, monitoring and analysis in the field of medical diagnostics; hosting, managing, developing, and maintaining applications, software, and web sites related to medical diagnostic instruments and systems; providing temporary use of non-downloadable software and applications for monitoring medical diagnostic instruments and managing data from medical diagnostic instruments; software as a service (SaaS) services featuring software for collecting, managing, storing, analyzing and reporting biological information, and for managing projects, laboratory workflows and data, for scientific, diagnostic and research purposes; software as a service (SaaS) services featuring software for data analysis for laboratory, scientific, research and medical use; software as a service (SaaS) services featuring artificial intelligence software for managing and analyzing data from laboratory and diagnostic instruments; software as a service (SaaS) services featuring software for clinical decision support; software as a service (SaaS) services featuring software for patient engagement, care coordination, care pathway management, remote patient monitoring, appointment and case management, and interoperability of healthcare systems; providing temporary use of non-downloadable software for secure exchange, aggregation, harmonization and interoperability of healthcare data; hosting online platforms for digital health, laboratory and diagnostic services; development and hosting of digital health platforms for others; scientific analysis and evaluation services; analysis of data obtained from clinical, laboratory, measuring and testing apparatus and instruments, and providing scientific information derived therefrom; providing information about clinical laboratory tests; providing information about quality control in the field of laboratory testing; scientific consulting services in the field of laboratory operation and automation; consulting services in the field of laboratory testing, diagnostics, and laboratory processes and standards scientific research in the field of laboratory equipment and instruments; technological advice relating to laboratory apparatus and instruments; providing technical support services relating to medical and diagnostic laboratory instruments and systems, in vitro diagnostic laboratory instruments, laboratory automation systems, and medical and laboratory related software and hardware; computer services, including remote data management for medical diagnostic instruments, remote management of medical and laboratory diagnostic systems, and monitoring and reporting on the performance and errors of medical and laboratory diagnostic instruments; providing an online network environment featuring technology that enables users to share data in the field of medical diagnostics; providing information about quality control; testing, authentication and quality control; monitoring of medical devices and equipment and clinical facilities with the support of communication technology; technical advice relating to the performance or operation of computers; providing online support services for computer program users; remote monitoring of computer systems and computer programs; rental of storage areas of internet servers; providing information in the field of rental of storage areas of internet servers; design and control services of internet servers; rental of storage areas in storage devices of servers for computer communication; providing information in the field of rental of storage areas in storage devices of servers for computer communication; online remote monitoring, maintenance and repairing of medical apparatus and instruments; online remote monitoring of apparatus and instruments for clinical laboratory tests; online remote monitoring of laboratory apparatus and instruments; online remote monitoring of computers and computer peripheral equipment; providing remote electronic troubleshooting services for laboratories; providing operational monitoring services for medical diagnostic instruments and laboratory equipment; providing computer software technical support services in the field of medical apparatus and instruments; technical support services in the nature of troubleshooting of computer software problems with laboratory apparatus and instruments; IT security and data protection services; consultancy in the field of data processing relating to the use of hardware and software; technical consultancy for medical facilities and clinics; interior design services; design of laboratory and medical apparatus and instruments; technical consultancy with regard to medical health; consultancy and professional assistance services relating to medical apparatus and instruments; rental of laboratory apparatus and instruments; rental of measuring and testing apparatus and instruments and their parts; design of medical facilities and clinics; scientific analysis of data in the field of laboratory testing.

Class 44:
Medical services; veterinary services; medical diagnostic testing services; medical treatment services; medical care; telemedicine services; medical clinic services; medical advisory services relating to the operation of medical and laboratory apparatus and equipment; arranging medical examinations; medical testing for diagnostic or treatment purposes; medical information services; medical information in the field of in vitro diagnostic testing; providing healthcare information in the field of in vitro diagnostic testing; medical analysis services for in vitro diagnostic tests; medical diagnostic reporting services in the field of in vitro diagnostic testing; medical examinations and tests; laboratory analysis in the field of medicine; medical laboratory services; clinical laboratory services; medical counselling; providing information relating to health and healthcare; providing information in the field of medical analysis and diagnosis; providing an online computer database in the field of medical analysis and diagnosis; providing an internet website for medical professionals and medical patients featuring medical and laboratory information; providing an internet website for medical professionals featuring medical and laboratory information; remote medical consultation services; providing medical information and diagnostic information via digital platforms; providing online health assessment information for medical purposes; medical monitoring services in the field of chronic disease management and preventive healthcare; providing healthcare information for patients and healthcare professionals via digital platforms; rental of medical equipment and installations; rental of medical facilities; rental of sanitary equipment and installations; hygienic care for human beings.

Provision of financial services by means of a global computer network or the internet; Financial services provided over the telephone and by means of a global computer network or the internet; Electronic processing of payments via a global computer network; Financial management services provided via the Internet; Financial information services provided by access to a computer database; Electronic banking via a global computer network [internet banking]; Information services relating to finance, provided on-line from a computer database or the Internet; Provision of financial information by way of computer terminals; Financial management via the Internet; Financial services provided via the Internet; Processing payments for the purchase of goods and services via an electronic communications network.

Class 42:
Artificial intelligence consultancy; Consultancy relating to software design and development; Consultancy in the design and development of computer hardware; Computer hardware (Consultancy in the design and development of -); Design and development of energy management software; Software design and development; Technology consultation in the field of artificial intelligence; Advisory and consultancy services relating to the design and development of computer hardware; Consultancy in the field of technological design; Research in the field of artificial intelligence technology; Consultancy in the field of software design; Consultancy relating to the design and development of computer software programs; Consultancy relating to the design and development of computer programs; Design and development of computer software for logistics; Design, development and implementation of software; Design and development of medical technology; Consultancy services in the field of technological development; Design and development of networks; Design and development of software for website development; Design consultancy; Design and development of software for database management; Engineering design and consultancy; Design and development of databases; Design and development of computer software architecture; Design and development of prostheses; Design and development of engineering products; Design and development of computer software for use with medical technology; Design and development of computer software; Computer software design and development; Platforms for artificial intelligence as software as a service [SaaS]; Consultancy relating to the design and development of computer database programs; Research, development, design and upgrading of computer software; Design and development of data processing software; Research in the field of artificial intelligence; Engineering consultancy relating to design; Database design and development; Design and development of software for inventory management; Design and development of data retrieval software; Design and development

of computer software for logistics, supply chain management and e-business portals; Design and development of computer software for supply chain management; Design and development of electronic database software; Technical consultancy relating to product development; Professional consultancy relating to industrial design; Design and development of electronic data security systems; Design and development of driver software; Design and development of Internet security programs; Advisory and information services relating to the design and development of computer hardware; Design and development of industrial products; Design and development of word processing software; Design and development of computer software for process control; Design and development of computer software for others; Design and development of virtual reality software; Design and development of telecommunications networks; Design and development of image processing software; Design and development of testing and analysis methods; Design and development of multimedia products; Design and development of energy distribution networks; Design and development of software in the field of mobile applications; Product design and development; Design and development of computer hardware architecture; Design and development of endoprostheses; Design, development and programming of computer software; Design and development of computer hardware; Design and development of data processing systems; Technological design services; Design and development of data output systems; Design and development of firmware systems; Design and development of computer databases; Consultancy and information services relating to the design, programming and maintenance of computer software; Design and development of computer software for evaluation and calculation of data; Design and development of computer database software; Software as a service [SaaS] featuring computer software platforms for artificial intelligence; Scientific design services; Computer system design and development; Software development; Development of software; Design and development of software for importing and managing data; Design and development of computer hardware for the manufacturing industry; Design and development of computer hardware and software; Design and development of software for control, regulation and monitoring of solar energy systems; Technological consultancy; Design and development of diagnostic apparatus; Design and development of software for instant messaging; Design and development of data display systems; Design and development of operating system software; Design and development of operating software for cloud computing networks; Technical consultancy in the design of machinery for electronic circuitry manufacture; Consultancy and information services relating to computer software design; Consultancy relating to the creation and design of websites; Software development services; Design and development of data storage systems; Design and development of data processing programs; Design and development of data entry systems; Consultancy services relating to design; Design and development of new technology for others; Research and development services in the field of engineering; Design and development of computer software for vehicle simulation; Consultancy relating to the creation and design of websites for e-commerce; Design, maintenance, development and updating of computer software; Design and development of computer hardware for the manufacturing industries; Engineering services relating to machine tool design; Development of software for communication systems; Providing information about the design and development of computer software, systems and networks; Advisory services in the field of product development and quality improvement of software; Consultancy services relating to interior design; Computer-aided engineering design services; Design of software; Software design; Development and testing of software; Consultancy relating to pharmaceutical research and development; Advisory and information services relating to the design and development of computer peripherals; Design and development of data processing apparatus; Design and development of computer firmware; Design and development of computer game software; Engineering design services; Design and development of consumer products; Consultancy relating to the design of packaging; Industrial engineering design services; Technical planning and technical project management for the development of lighting equipment; Advisory services relating to computer software design; Providing information about the design and development of computer software; Providing information about the design and development of computer hardware and software; Consultancy relating to software for communication systems; Technical data analysis; Technical data analysis services; Technological analysis services; Provision of security services for computer networks, computer access and computerised transactions; Information services relating to the application of computer networks; Information services relating to the development of computer networks; Consultancy services relating to computer networks; Computer network services; Computer programming services for electronic data security; Computer services for the analysis of data; Authentication services (control) of data transmitted via telecommunications; Providing temporary use of non-downloadable computer software for shipment processing over computer networks, intranets and the internet; Consultancy and information services relating to computer system integration; Computer services concerning electronic data storage; Consultancy services relating to computer networks using mixed software environments; Providing artificial intelligence computer programs on data networks; Providing temporary use of non-downloadable computer software for tracking freight over computer networks, intranets and the internet; Providing search engines for obtaining data via communications networks; Computer programming services for data processing; Advisory and information services relating to computer software; Authentication services; Data security services; User authentication services using technology for e-commerce transactions; Providing user authentication services using biometric hardware and software technology for e-commerce transactions; Cloud-based data protection services ; Data duplication and conversion services, data coding services; Consultancy and information services relating to software maintenance; Consultancy and information services relating to software rental; Data decryption services; Data security services [firewalls]; Design services relating to data processing systems; User authentication services using blockchain technology; Design services relating to data processing test tools; Design services relating to data processing tools; Providing user authentication services using single sign-on technology for online software applications; Application service provider services; Data encryption services; Development services relating to data processing systems; Design services relating to data transmission test tools; Providing online information about industrial analysis and research services; Data security consultancy; Technical advisory services relating to data processing.

Class 45:
Political research and analysis; Identity validation services; Identity verification; Providing authentication of personal identification information [identification verification services];

Company registration services; Domain name registration services; Pre-employment background screening; Pre-employment background investigation services; Regulatory compliance auditing; Legal compliance auditing; Copyright management consultancy; Consultation in relation to data protection compliance; Vetting services; Advisory services relating to the preparation of standards.
