Complaints Procedure

The Patent Office is committed to improving its standard of service.

If things go wrong, we need to know.

If you wish to complain about the quality of service you have received from us and cannot resolve the problem with the person you have been dealing with in the Patent Office please write to:

Paul Hartnack
Chief Executive
The Patent Office
PO Box No 49
Cardiff Road
Newport
South Wales NP9 1YU

Tel No 01633 814500
Fax No 01633 814504

email: Box49@patent.gov.uk

Your complaint will be acknowledged promptly and you will receive a reply within 10 working days.

The Patent Office is committed to the principles of the Citizen's Charter.

National Security

Attention is drawn to the provisions of section 23 of the Patents Act 1977 which provides that no application for a patent for ANY invention may be made abroad by a person resident in the United Kingdom, without permission from the comptroller, unless application for a patent for the same invention has first been made in the United Kingdom, and six weeks have elapsed from the date of such application and no directions prohibiting publication or communication have been given or all such directions have been cancelled. Requests for permission from the comptroller to make an application abroad should be made even if for example such an application is required by contract with a foreign firm. Requests will be facilitated by explicitly addressing them "For attention in Room G.R70".

Normally the written authority required by section 23 will be posted from Newport on the same day that the request is received. If this degree of urgency does not suffice a telephone enquiry should first be made to 01633 813558.

The Patent Office Search & Advisory Service

Searches in London

In response to continued demand, the Search & Advisory Service will conduct "while you wait" online searches and provide general advice on searching at 25 Southampton Buildings, Chancery Lane.

This service will be available by appointment only. If you wish to make an appointment, please contact:

Specifications on Sale in London

Current Specifications available for sale at the London Front Office during the week commencing 21 October 1998 are in the range GB 2323510 - GB 2324450.

Abstracts

Weekly classified abstract pamphlets are being published at the same time as the corresponding patent specifications or as soon as possible thereafter.

Information Retrieval Services

Publications and services available include The Classification Key, Abridgments and Abstracts, Name Index, Selected Patent Specification Service, Subject Matter Tabulation service and Classification Manuals. Additional particulars are given in this journal in the last issue of each month.

Indexes used in this Journal

The head notes to some of the indexes in this Journal include examples of entries appearing in the indexes. Where appropriate, component parts of the examples are preceded by a two-figure INID code (Internationally agreed Numbers for the Identification of bibliographic Data) and include two-letter country codes.

The codes are those of standards ST9 and ST3 respectively of the World Intellectual Property Organisation (WIPO) and more details are given quarterly in this Journal in the last issues in January, April, July and October.

Where an entry includes a name, then the entry is formatted according to standard ST20 of WIPO. Details of this standard are also given quarterly in the Journal in the last issue in January, April, July and October.

Proceedings under the Patents Act 1977

Applications for Patents Filed

Application Number Range

GB9818361.9 - GB9819011.9

This index sets out details of applications for patents filed in the application number range given above. The entries are arranged in alphabetical order according to the applicant's name. Where there are joint applicants, then the entry under the name of the first applicant sets out details of the application, including the names of the other applicants. The entries under the names of the other applicants are cross referenced to the entry for the first applicant.

Each entry in the index under the name of the (or the first) applicant provides the following information: the name(s) of the applicant(s); the title of the invention; the filing date of the application; any priority details; and the application number allotted to the application.

Where an application is requesting an early date under Section 8, 12, 15(4), or 37 of the Act, then the filing date of the earlier application is included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European Patent Application, then the application number, the publication number, and the date of filing of the PCT or EP application are included (see example 3).

The application number includes, at its end, a check digit. The full application number, including the check digit, should be quoted in all correspondence concerning proceedings in respect of an application up to the grant of a patent. When the application is published under Section 16(1) of the Act, it will be accorded to a seven-figure serial number. This should be used only when seeking to identify printed copies of the specification and its abstract and to make enquiries concerning entries in the Register of Patents.

These applications will not be available to the public for inspection or purchase until the date of publication under Section 16(1) of the Act. This date will be advertised in a subsequent issue of this Journal.

There follows three examples of entries for this index. The first example shows an entry under the name of the first applicant for an application having joint applicants, and includes an entry under the name of one of the other applicants. The second example shows an entry for a divisional application and includes priority details. The third example shows an application derived from a PCT application.

Applications published : Subject-Matter Index

GB2324234 - GB2324450

This index sets out details of applications in the above number range which are published under Section 16(1) as from the date of publication of this issue of the Journal. Printed copies of the applications, together with the front pages containing their abstracts and bibliographic and classification data, and copies of search report under section 17, are now available at £2.67 per copy (including postage) from The Patent Office (Sales), Concept House, Cardiff Road, Newport, South Wales NP9 1RH. These items are also available, but for a limited period only, to personal callers at 25 Southampton Buildings, London WC2A 1AY.

The index also includes applications in the above number range derived from applications under the Patent Cooperation Treaty (PCT) which have entered the UK national phase. Printed copies of the front page of these applications are similarly available together with English translations of those applications published under the PCT in a language other than English.

Each entry in the index provides the following information: the publication number; the application number; the date on which the application was filed at the Office; the name(s) of the applicant(s) and the country of incorporation; the abstract title; any priority details; the United Kingdom Classification Heading(s) assigned to the application; and the International Patent Classification assigned to the application.

Where an application is requesting an early date under Section 8, 12, 15(4), or 37 of the Act, then the application number and the date of filing of the earlier application are included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European Patent application, then the application number, the date of filing, the publication number and the date of publication of the PCT or EP application are included (see example 3).

In the index, the entries are grouped in ascending publication number order according to the UK Classification Headings. The UK Heading is given at the beginning of each group. Where an application has been classified in a supplementary (or secondary) Heading, then the entry under the primary Heading includes details of the application and the entry under the supplementary Heading is in the form of a cross reference to the primary Heading (see example 4).

The publication number is the seven figure number given to an application when it is published and by which it will be recorded on the Register of Patents. Printed copies of each application will also be identified by the publication number, followed by the document type "A". This identification should be quoted in full when ordering copies. However, for all proceedings up to grant of a patent, the application number originally assigned should be used.

There follows four examples of entries for this index. The first does not include any information on priorities, earlier applications, or PCT or EP applications. The second and third include priority information. In addition, the second includes information carried for a divisional application, and the third includes information

carried for an application derived from a PCT application. The fourth example shows an entry under a supplementary Heading.

Applications published: Name Index

This index lists, in alphabetical order, the names of applicants and inventors for the applications the publication of which is announced in this issue of the Journal. The entry under the name of the applicant sets out the details of the application including the name of any inventor who is not also an applicant. Where an inventor is also an applicant, the name appears in the index only as an applicant. Where there are joint applicants, details of the application are given only for the entry under the name of a first applicant, the entries under the names of the other applicants being cross referenced to the entry for the first applicant. Where an inventor is not also an applicant, the entry under the name of the inventor is cross referenced to the entry of the applicant, or the first applicant in the case of joint applicants.

Each entry under the name of the (or the first) applicant provides the following information: the name(s) of the applicant(s); the country of incorporation; the names of inventors who are not also applicants; the UK Classification Headings accorded to the

application; and the publication number of the application. There follows three examples of entries for this index. The first example shows the entry for an application having two joint applicants and an inventor who is not also an applicant, the second shows the entry for the other applicant.

Patents granted: Number Index

Patents whose grant is indicated in the index below take effect for the purposes of all provisions of the Act subsequent to Section 25(1) as from the date of publication of this issue of the Journal. Printed copies of the corresponding specifications of the patents identified by the publication number listed, and followed by the letter "B", are now available for sale at £4.04 per copy (including postage). These items are available from The Patent Office (Sales), Concept House, Cardiff Road, Newport, South Wales NP9 1RH and, for a limited period only, to personal callers at 25 Southampton Buildings, London WC2A 1AY.

This index lists the granted patents in ascending publication number order. Each entry in the index provides the following information: the publication number; the application number; the date on which the application was filed at the Office; the name(s) of the proprietor(s) and the country of incorporation; the name(s) of the inventor(s); the title of the invention; any priority details; the United Kingdom Classification Heading(s) assigned to the application; and the International Patent Classification assigned to the application.

Where an application is requesting an early date under Section 8, 12, 15(4), or 37 of the Act, then the application number and date of filing the earlier application are included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European patent application, then the application number, the date of filing, the publication number, and the date of publication of the PCT or EP application are included (see example 3).

There follows three examples of entries for this index. The first does not include any information on priorities, earlier applications, or PCT or EP applications. The second and third include priority information. In addition, the second includes information carried for a divisional application, and the third includes information carried for an application derived from a PCT application.

Patents granted:**Name Index**

This index lists, in alphabetical order, the names of proprietors and inventors for patents whose grant is announced in this issue of the Journal. The entry under the name of the proprietor sets out the details of the patent including the name of any inventor who is not also a proprietor. Where an inventor is also a proprietor, the name appears in the index only as a proprietor. Where there are joint proprietors, details of the patent are given only for the entry under the name of a first proprietor, the entries under the names of the other proprietors being cross referenced to the entry for the first proprietor. Where an inventor is not also a proprietor, then the entry under the name of the inventor is cross referenced to the entry for the proprietor, or the first proprietor in the case of joint proprietors.

Each entry under the name of the (or the first) proprietor provides the following information: the name(s) of the proprietor(s); the country of incorporation; the names of inventors who are not also proprietors; the UK Classification Headings accorded to the patent; and the publication number of the patent.

There follows three examples of entries in this index. The first example illustrates the case where there is a single proprietor who is also the inventor. The second example illustrates the case where there is a single proprietor and an inventor who is not also a proprietor, and includes the entry for the inventor. The third example illustrates the case where there are joint proprietors and an inventor who is not also a proprietor, and includes the entries for the other proprietors and the inventor.

European Patents granted

Grants mentioned in EPO Bulletin No 98/43 dated 21 October 1998

This index lists, in ascending publication number order, European patents designating the United Kingdom as a Contracting State, which have been granted under Article 97 of the European Patent Convention as of the date of the EPO Bulletin mentioned above. For each entry in this index, the first item is the publication number of the European application and the second item is the application number. The item (NOT ENGLISH) is used to indicate when the language of publication is French or German, and the last item is the name(s) of the proprietor(s). For patents having a publication language of French or German, an English translation must be filed if the patent is to continue to be effective in the UK.

There follows an example of an entry for this index.

CAM IL MONDO DEL BAMBINO S.P.A.

The above EP(UK) patent was advertised in the Official Journal (Patents) No.5702 dated 19th August 1998 as granted by the European Patent Office (EPO) with effect from that date. The grant was however subsequently deleted by the EPO in European Patent Bulletin No.41/1998 dated 7th October 1998. The patent was withdrawn at the EPO on 4th August 1998.

Translations filed: European Patents

This index lists European Patents designating the United Kingdom as a Contracting State, for which a translation has been filed under Section 77(6)(a). The entries are arranged in blocks in order of date on which the filing of the translation was entered in the Register. Within each block, the entries are arranged in ascending publication number order with the application number, the date on which grant took effect in the UK, and the name of the proprietor given against each publication number.

There follows an example of an entry in the index.

European Patents void

This index lists European Patents designating the United Kingdom as a Contracting State, which were published in French or German and for which an English translation has not been filed within the period prescribed by the Patents Rules. In accordance with Section 77(7), they are therefore treated as always having been void. The patents are listed in ascending publication number order. Against each publication number is the corresponding application number and the date of the European Bulletin in which grant by the EPO was announced.

There follows an example of an entry in the index.

Section 8

Determination before Grant of UK

Entitlement

Reference under Section 8(1)

Reference filed

GB 9813278.0 MEDICAL RESEARCH COUNCIL Male contraceptive. Reference filed on 20 August 1998 by The Victoria University of Manchester.

Section 12

Determination of Foreign Entitlement

Reference under Section 12(1)

Reference filed

EP 0702653 DAVID S SMITH PACKAGING LIMITED Protector element. Reference filed on 8 January 1998 by Corrugated Plastic Products Limited.

Section 13

Mention of Inventor

Application for Inventor to be mentioned under Section 13(1)

Application allowed

GB 2311173 XIABIN BAI XIBIN ZHANG An electric generator.

Pursuant to a decision of the Comptroller dated 18 September 1998 the application under Section 13(1) filed on 27 August 1998 was allowed and the following three persons were added as inventors:

Bin Wang, Nianguo Ye and Hongchang Ren.

Application under Section 13(3) for a Person not to be mentioned as Inventor

Application filed

EP 0702653 DAVID S SMITH PACKAGING LIMITED Protector element. Application filed on 14 August 1998 by Corrugated Plastic Products Limited.

Section 27

Amendment of Specification after Grant

Specification(s) Amended

The date included in the entry is the effective date of amendment.

EP 0539688 MITSUBISHI DENKI KABUSHIKI KAISHA Compound semiconductor device and production method therefor 25 September 1998.

EP 0655338 MITSUBISHI DENKI KABUSHIKI KAISHA Color thermal printer 25 September 1998.

GB 2297852 HIROHISA, TANAKA NISSHINBO INDUSTRIES INC Method for controlling driving of a ram of hydraulic cylinder of a hydraulic press equipment 25 September 1998.

Section 28

Restoration of Ceased Patents

This list relates to applications for the restoration of ceased patents. For further information contact 01633 814656 for UK patents or 01633 814564 for European patents (UK). The date included with each entry is the effective date the application was filed, withdrawn, refused or allowed.

Application for restoration filed

24 September 1998

EP 0507846 COGEDIB S.A.R.L. BUILDING BLOCK FOR CEMENT-FREE ASSEMBLY.

30 September 1998

GB 2278134 CONSTRUCTION SPECIALTIES INC Floor installation.

Application for restoration allowed

28 September 1998

EP 0022672 ORACSTAR (1997) LTD Improved valve assembly, valve seat insert therefor and method of mounting said valve seat in a tap.

EP 0538015 BURTIS, WARREN A Grout tool

29 September 1998

28 September 1998

GB 2261869 ROBERTSON, ALEXANDER R Cable management.

Section 29

Surrender of Patent

Offer to surrender accepted by the Comptroller

The effective date of surrender of the patent is the date of this Journal.

GB 2259975 MONOCON INTERNATIONAL REFRATORIES LIMITED Metallurgical dart.

Section 30

Transactions in Patents and Applications

This list relates to unpublished applications and shows changes to the applicant's name or to the ownership of the application. For further information contact 01633 814630.

Section 46 Licences of Right

Licence of Right Endorsement under Section 46(1)

The patents listed below have been endorsed Licences of Right in the Register with effect from the dates specified. Annual fees on these patents are payable at half the full rate and any person is entitled as of right to a licence under any such patent.

Any person who claims that the proprietor or the patent is, or was at the time of entry, precluded by a contract in which the claimant is interested from granting licences under the patent may, within 2 months after the making of the relevant entry, apply to the Comptroller for cancellation of the entry. For further information contact 01633 814656.

Proceedings under EC Regulations 1768/92 and 1610/96 (Supplementary Protection Certificates for Medicinal Products and Plant Protection Products, respectively)

These entries include details of all proceedings relating to Supplementary Protection Certificates. Applications for Supplementary Protection Certificates are numbered in a single yearly sequence commencing SPC/GB93/001 covering both medicinal and plant protection products and the same number is retained for the granted certificate. Proceedings are open to public inspection but the granted certificate is not separately published.

The entries are grouped in categories according to the type of proceedings. Within each category the entries are arranged in alphabetical order according to the name of the applicant for, or holder of, the certificate and provide the following information; the name and address of the applicant or holder; the product in respect of which the certificate has been applied for or granted; the product type; ie. "Medicinal" or "Plant Protection"; the number and date of the first authorisation under Directive 65/65/EEC or Directive 81/851/EEC to place the product on the market as a medicinal product in the United Kingdom or the number and date of the first authorisation under Article 4 of Directive 91/414/EEC or an equivalent provision of national law to place the product on the market as a plant protection product in the United Kingdom; where relevant, the country; number and date of the first authorisation to place the product on the market in the European Community; the number and title of the basic UK patent or European patent (UK) which protects the product; and the number of the application or certificate.

The entries will also state as appropriate: the filing date of the application; the date of grant or rejection of the application; the maximum period of the granted certificate; the effective period of the certificate on entry into force; and the date of lapse or invalidity of the certificate.

There follows three examples of entries under these proceedings. The first relates to a new application for a certificate based on a European patent designating the United Kingdom and having first authorisation of the product in the United Kingdom. The second example relates to a certificate granted based, once again, on a European patent designating the United Kingdom but with the first product authorisation in the EEC in Denmark. The third refers to a certificate entering into force based on a United Kingdom patent with first product authorisation in the EEC in Belgium.

The Science Reference and Information Service

25 Southampton Buildings, London WC2A 1AW

The British Library Science Reference and Information Service (SRIS) is the national library for patents, and for modern science, technology and commerce. SRIS is open for reference to any member of public. A reader's pass is not required.

SRIS has reading rooms at two main sites, Holborn and Aldwych, with literature grouped by subject. Enquiries are welcome by telephone, fax, post or email as well as from personal callers. The Library offers a range of special services providing patent, business, scientific, technical and environmental information, and online searching of computerised databases. Photocopying services are also available. A charge is made for some services. Details of free and priced services are available in the reading rooms, from the Library's Marketing and Public Relations Section at the address above (tel: 0171-412 7473, fax: 0171-412 7947, email: sris-customer-services@bl.uk), or from the Library's World Wide Web site: <http://portico.bl.uk/sris/>.

Holborn Reading Rooms

25 Southampton Buildings, London WC2A 1AW

This site houses the main SRIS reading room and the Business Information reading room. The Foreign Patents reading room is located on the lower ground floor of Chancery House opposite 25 Southampton Buildings.

The main SRIS reading room houses the literature of physics, chemistry, engineering, technology and business plus the British and international patents, trade marks and designs collection (much material is on open access). The reading room also offers reader access to CD-ROM databases covering these subject areas. Some abstract journals and patents, older books on industrial property law and trade literature are kept in 'vaults' below the reading room. Individual items can be fetched from the vaults on demand, but readers who need to use larger quantities of these materials will be issued with a special pass.

Earlier volumes of periodicals and patent specifications are in remote store and normally available for consultation within two hours.

The very extensive foreign patents, trade marks and designs collection is largely on open access in the reading room on the lower ground floor of Chancery House.

Aldwych Reading Room

9 Kean Street, London WC2B 4AT

The Aldwych reading room houses the literature of the life sciences and technologies, medicine, earth sciences, astronomy and pure mathematics. Books and recent issues of periodicals are on open shelves or available within minutes. The reading room also offers reader access to CD-ROM databases covering these subject areas. Earlier volumes of periodicals are in remote store, normally available for consultation within two hours.

TRADE MARK ASSISTANT

If you are currently responsible for trade mark work - then we would like to hear from you.

We are a small trade mark firm situated in Guildford and looking for help with our trade mark work worldwide. This is a busy office and needs someone flexible and responsible. Experience in dealing with this type of work will be all important, rather than qualifications.

If you are interested, please write to Sally Schupke, Chancery Trade Marks, 40a Castle Street, Guildford, Surrey GU1 3UQ with CV.

Don't waste money on research

An estimated 30% of all European research and development is wasted on trying to develop something that already exists. You could save untold time and money by making proper use of the vast amount of technical information available in published patents.
