Complaints Procedure

The Patent Office is committed to providing high quality best value services.

If things go wrong we want to know.

If you wish to complain about the quality of service you have received from us and cannot resolve the problem with the person you have been dealing with or his/her manager, please write to:

Alison Brimelow
Chief Executive
The Patent Office
PO Box No 49
Cardiff Road
Newport
South Wales NP10 8YU

e-mail: box49@patent.gov.uk

Your complaint will be acknowledged within one working day and you will receive a full reply within 10 working days. If, in exceptional circumstances, we cannot meet this target, we will explain why and give you a new deadline.

If you have followed this procedure and are still not satisfied, you have the right to ask your MP to take up your complaint and our handling of it with the Parliamentary Commissioner for Administration (the "Ombudsman"). Your local Citizen's Advice Bureau will give you the address of your MP. You may get further advice from the Ombudsman's office at:

The Parliamentary Ombudsman
Office of the Parliamentary Commissioner for Administration
Millbank Tower
Millbank
London SW1P 4PU

Helpline: +44(0)20 7217 4163
Fax: +44(0)20 7217 4160
e-mail: opca-enqu@ombudsman.org.uk

The Office has developed a leaflet detailing all aspects of its complaints procedure: copies can be obtained by phoning our Central Enquiry Unit on 08459 500505.

National Security

Attention is drawn to the provisions of section 23 of the Patents Act 1977 which provides that no application for a patent for ANY invention may be made abroad by a person resident in the United Kingdom, without permission from the comptroller, unless application for a patent for the same invention has first been made in the United Kingdom, and six weeks have elapsed from the date of such application and no directions prohibiting publication or communication have been given or all such directions have been cancelled. Requests for permission from the comptroller to make an application abroad should be made even if for example such an application is required by contract with a foreign firm. Requests will be facilitated by explicitly addressing them "For attention in Room G.R70".

Normally the written authority required by section 23 will be posted from Newport on the same day that the request is received. If this degree of urgency does not suffice a telephone enquiry should first be made to +44(0)1633 813558.

Customer Service Standards

We believe it is important that customers should know what level of service they can expect from the Patent Office. Our specific standards, which have been drawn up in consultation with customers and staff, cover the major transactions carried out by each operational area of the Office. These standards are reviewed periodically to see if service levels can be improved upon.

Our guiding principles are that you may expect to:

- be treated fairly;
- be treated courteously; and
- get help from us with your application.

To achieve this we aim to:

- publish details of all the applications for Intellectual Property Rights (IPR) we accept, and publish major decisions which lay down new principles or reinforce existing ones for the grant and protection of IPR;
- always explain and give reasons for our decisions and give you the chance to challenge them;
- be positive and helpful to you; and
- staff our enquiry points from 09:00 to 17:00.

The standards, including performance against them for the quarter January to March 2000, are set out below. Performance will continue to be monitored with the results being updated quarterly. Those items marked * are reported against the previous standard which was in place until 31 March 2000.

*** Taiwan: Intellectual Property Rights Arrangement ***

There is now a reciprocal arrangement concerning intellectual property rights in the United Kingdom and Taiwan. Among other things this provides for a right of priority for a natural or legal person of Taiwan or the United Kingdom who has filed an application for a patent or a design in the UK, or an application for an invention patent, utility model or design patent in Taiwan.

The arrangement was signed on 20 March 2000. In order to give effect to the priority rights provisions in the United Kingdom Orders in Council are required to add Taiwan to the list of convention countries. Two such Orders (one each for patents and designs) will come into force on 24 May 2000. The Orders, Statutory Instrument Numbers 1114 and 1115, are available on the HMSO web pages at www.legislation.hmso.gov.uk/stat.htm.

In addition to the priority right provisions the arrangement allows for: the receiving of applications and granting of patents for inventions relating to new micro-organisms when filed by natural or legal persons of Taiwan or the United Kingdom; the recognition for the purpose of patent disclosure, of micro-organisms deposited in accordance with the relevant provisions applicable in the United Kingdom or Taiwan; and the extension of the protection conferred by a patent for certain technologies for a maximum of 5 years after the expiry of the normal, full term of that patent in accordance with the relevant provisions applicable in the United Kingdom or Taiwan.

If you have any queries about the arrangement please contact:

Specifications on Sale in London

Current Specifications available for sale at the London Front Office during the week commencing 24 May 2000 are in the range GB 2343353 - GB 2344042.

Abstracts

Weekly classified abstract pamphlets are being published at the same time as the corresponding patent specifications or as soon as possible thereafter.

Information Retrieval Services

Publications and services available include Classification Key, Catchwords Indexes, Abstracts, Divisional/Heading Allotment Index, Names of Applicants and Inventors, Selected Patent Specification Service, Subject Matter Tabulation Service, Subject-Matter File Lists, Classification Manuals and UK Classification of UK, EP and PCT Patent Specifications. Additional particulars are given in this Journal in the first issue of each month.

Indexes used in this Journal

The head notes to some of the indexes in this Journal include examples of entries appearing in the indexes. Where appropriate, component parts of the examples are preceded by a two-figure INID code (Internationally agreed Numbers for the Identification of bibliographic Data) and include two-letter country codes.

The codes are those of standards ST9 and ST3 respectively of the World Intellectual Property Organisation (WIPO) and more details are given quarterly in this Journal in the last issues in January, April, July and October.

Where an entry includes a name, then the entry is formatted according to standard ST20 of WIPO. Details of this standard are also given quarterly in the Journal in the last issue in January, April, July and October.

Proceedings under the Patents Act 1977

Applications for Patents Filed

Application Number Range

GB0008022.6 - GB0008569.6

This index sets out details of applications for patents filed in the application number range given above. The entries are arranged in alphabetical order according to the applicant's name. Where there are joint applicants, then the entry under the name of the first applicant sets out details of the application, including the names of the other applicants. The entries under the names of the other applicants are cross referenced to the entry for the first applicant.

Each entry in the index under the name of the (or the first) applicant provides the following information: the name(s) of the applicant(s); the title of the invention; the filing date of the application; any priority details; and the application number allotted to the application.

Where an application is requesting an early date under Section 8, 12,15(4), or 37 of the Act, then the filing date of the earlier application is included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European Patent Application, then the application number, the publication number, and the date of filing of the PCT or EP application are included (see example 3).

The application number includes, at its end, a check digit. The full application number, including the check digit, should be quoted in all correspondence concerning proceedings in respect of an application up to the grant of a patent. When the application is published under Section 16(1) of the Act, it will be accorded to a seven-figure serial number. This should be used only when seeking to identify printed copies of the specification and its abstract and to make enquiries concerning entries in the Register of Patents.

These applications will not be available to the public for inspection or purchase until the date of publication under Section 16(1) of the Act. This date will be advertised in a subsequent issue of this Journal.

There follows three examples of entries for this index. The first example shows an entry under the name of the first applicant for an application having joint applicants, and includes an entry under the name of one of the other applicants. The second example shows an entry for a divisional application and includes priority details. The third example shows an application derived from a PCT application.

Applications terminated after Publication under Section 16(1)

This index lists, according to the year of application and in ascending application number within each year, applications which have been withdrawn, treated as having been withdrawn, refused, or treated as having been refused, after publication under Section 16(1). Alongside each application is the related publication number.

Applications published : Subject-Matter Index

GB2343826 - GB2344042

This index sets out details of applications in the above number range which are published under Section 16(1) as from the date of publication of this issue of the Journal. Printed copies of the applications, together with the front pages containing their abstracts and bibliographic and classification data, and copies of search report under section 17, are now available at £2.67 per copy (including postage) from The Patent Office (Sales), Concept House, Cardiff Road, Newport, South Wales NP10 8QQ. These items are also available, but for a limited period only, to personal callers at Harmsworth House, 13-15 Bouverie Street, London EC4Y 8DP

The index also includes applications in the above number range derived from applications under the Patent Cooperation Treaty (PCT) which have entered the UK national phase. Printed copies of the front page of these applications are similarly available together with English translations of those applications published under the PCT in a language other than English.

Each entry in the index provides the following information: the publication number; the application number; the date on which the application was filed at the Office; the name(s) of the applicant(s) and the country of incorporation; the abstract title; any priority details; the United Kingdom Classification Heading(s) assigned to the application; and the International Patent Classification assigned to the application.

Where an application is requesting an early date under Section 8, 12, 15(4), or 37 of the Act, then the application number and the date of filing of the earlier application are included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European Patent application, then the application number, the date of filing, the publication number and the date of publication of the PCT or EP application are included (see example 3).

In the index, the entries are grouped in ascending publication number order according to the UK Classification Headings. The UK Heading is given at the beginning of each group. Where an application has been classified in a supplementary (or secondary) Heading, then the entry under the primary Heading includes details of the application and the entry under the supplementary Heading is in the form of a cross reference to the primary Heading (see example 4).

The publication number is the seven figure number given to an application when it is published and by which it will be recorded on the Register of Patents. Printed copies of each application will also be identified by the publication number, followed by the document type "A". This identification should be quoted in full when ordering copies. However, for all proceedings up to grant of a patent, the application number originally assigned should be used.

There follows four examples of entries for this index. The first does not include any information on priorities, earlier applications, or PCT or EP applications. The second and third include priority information. In addition, the second includes information carried

for a divisional application, and the third includes information carried for an application derived from a PCT application. The fourth example shows an entry under a supplementary Heading.

Applications Published: Name Index

This index lists, in alphabetical order, the names of applicants and inventors for the applications the publication of which is announced in this issue of the Journal. The entry under the name of the applicant sets out the details of the application including the name of any inventor who is not also an applicant. Where an inventor is also an applicant, the name appears in the index only as an applicant. Where there are joint applicants, details of the application are given only for the entry under the name of a first applicant, the entries under the names of the other applicants being cross referenced to the entry for the first applicant. Where an inventor is not also an applicant, the entry under the name of the inventor is cross referenced to the entry of the applicant, or the first applicant in the case of joint applicants.

Each entry under the name of the (or the first) applicant provides the following information: the name(s) of the applicant(s); the country of incorporation; the names of inventors who are not also applicants; the UK Classification Headings accorded to the

application; and the publication number of the application. There follows three examples of entries for this index. The first example shows the entry for an application having two joint applicants and an inventor who is not also an applicant, the second shows the entry for the other applicant.

Patents granted: Number Index

Patents whose grant is indicated in the index below take effect for the purposes of all provisions of the Act subsequent to Section 25(1) as from the date of publication of this issue of the Journal. Printed copies of the corresponding specifications of the patents identified by the publication number listed, and followed by the letter "B", are now available for sale at £4.04 per copy (including postage). These items are available from The Patent Office (Sales), Concept House, Cardiff Road, Newport, South Wales NP10 8QQ and, for a limited period only, to personal callers at Harmsworth House, 13-15 Bouverie Street, London EC4Y 8DP.

This index lists the granted patents in ascending publication number order. Each entry in the index provides the following information: the publication number; the application number; the date on which the application was filed at the Office; the name(s) of the proprietor(s) and the country of incorporation; the name(s) of the inventor(s); the title of the invention; any priority details; the United Kingdom Classification Heading(s) assigned to the application; and the International Patent Classification assigned to the application.

Where an application is requesting an early date under Section 8, 12, 15(4), or 37 of the Act, then the application number and date of filing the earlier application are included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European patent application, then the application number, the date of filing, the publication number, and the date of publication of the PCT or EP application are included (see example 3).

There follows three examples of entries for this index. The first does not include any information on priorities, earlier applications, or PCT or EP applications. The second and third include priority information. In addition, the second includes information carried for a divisional application, and the third includes information carried for an application derived from a PCT application.

Patents granted:**Name Index**

This index lists, in alphabetical order, the names of proprietors and inventors for patents whose grant is announced in this issue of the Journal. The entry under the name of the proprietor sets out the details of the patent including the name of any inventor who is not also a proprietor. Where an inventor is also a proprietor, the name appears in the index only as a proprietor. Where there are joint proprietors, details of the patent are given only for the entry under the name of a first proprietor, the entries under the names of the other proprietors being cross referenced to the entry for the first proprietor. Where an inventor is not also a proprietor, then the entry under the name of the inventor is cross referenced to the entry for the proprietor, or the first proprietor in the case of joint proprietors.

Each entry under the name of the (or the first) proprietor provides the following information: the name(s) of the proprietor(s); the country of incorporation; the names of inventors who are not also proprietors; the UK Classification Headings accorded to the patent; and the publication number of the patent.

There follows three examples of entries in this index. The first example illustrates the case where there is a single proprietor who is also the inventor. The second example illustrates the case where there is a single proprietor and an inventor who is not also a proprietor, and includes the entry for the inventor. The third example illustrates the case where there are joint proprietors and an inventor who is not also a proprietor, and includes the entries for the other proprietors and the inventor.

European Patents granted

Grants mentioned in EPO Bulletin No 00/21 dated 24 May 2000

This index lists, in ascending publication number order, European patents designating the United Kingdom as a Contracting State, which have been granted under Article 97 of the European Patent Convention as of the date of the EPO Bulletin mentioned above. For each entry in this index, the first item is the publication number of the European application and the second item is the application number. The item (NOT ENGLISH) is used to indicate when the language of publication is French or German, and the last item is the name(s) of the proprietor(s). For patents having a publication language of French or German, an English translation must be filed if the patent is to continue to be effective in the UK.

There follows an example of an entry for this index.

Translations filed: European Patents

This index lists European Patents designating the United Kingdom as a Contracting State, for which a translation has been filed under Section 77(6)(a). The entries are arranged in blocks in order of date on which the filing of the translation was entered in the Register. Within each block, the entries are arranged in ascending publication number order with the application number, the date on which grant took effect in the UK, and the name of the proprietor given against each publication number.

There follows an example of an entry in the index.

(Date of entry in Register) **15 DEC 1989**
 (11) EP0145872 (21) EP84111927.4
 (Effective date of UK grant) 20 Dec 1989

European Patents void

This index lists European Patents designating the United Kingdom as a Contracting State, which were published in French or German and for which an English translation has not been filed within the period prescribed by the Patents Rules. In accordance with Section 77(7), they are therefore treated as always having been void. The patents are listed in ascending publication number order. Against each publication number is the corresponding application number and the date of the European Bulletin in which grant by the EPO was announced.

There follows an example of an entry in the index.

Certificates of Registration issued

Week Ending 3 May 2000

The details of designs in this list as well as previously registered designs, are open to public inspection, details of which may be inspected without provision of a copy, free of charge at The Patent Office, Designs Registry, Newport, South Wales NP10 8QQ or at the London Front Office at Harmsworth House, 13-15 Bouverie St, London EC4Y 8DP.

Copies of the Designs Register entry and representations of the registered design may be obtained from the date on which the Certificate of Registration is issued (Grant Date), on payment of a fee of £5. Photographic copies, where reproduction is from a large or coloured specimen or a photograph that will not effectively photocopy, may be obtainable exceptionally at market price.

Alternatively the Register of Designs and registered representations may be inspected on The Patent Office web site at:

<http://www.patent.gov.uk>

Clicking on the Database Services button on the home page will display services available of which the following relate to Designs.

Design Status Information Service

Displays the Register entry for each design number input.

Designs Image Search Service

Displays all registered representations and a brief register extract for each registered design. Designs can be searched and examined by proprietor, classification or design number.

No fee is charged for the use of either of the above database services.

The British Library

The Science, Technology and Business collections of the British Library, including patents, are located at the new building in St Pancras, London. There are two patent reading rooms, one for British, European and Patent Co-operation Treaty patent documents and one for foreign patent documents. There are three other science and technology reading rooms in the same building.

Admission is only possible with a reader's pass which is obtained from the Library's Reader Admissions Office. Further details can be obtained from the web site (address below) or by contacting them directly:

Tel: +44(0)20 7412 7677

Fax: +44(0)20 7412 7794

e-mail: reader-admissions@bl.uk

The opening hours for the science reading rooms are:

Monday 10:00 - 20:00

Tuesday - Thursday 09:30 - 20:00

Friday - Saturday 09:30 - 17:00

Some patent documents are held in the reading rooms but a considerable number are held in the basement or in a remote store. Please note that it is not possible to order material for delivery from the remote store or the basement in the evenings or from the remote store on Saturday or Sunday. Material can be ordered in advance by contacting the Enquiry Desks.

The British Library's address is 96 Euston Road, London NW1 2DB, United Kingdom and it is located next to St Pancras Station and close to King's Cross and Euston Stations.
