

INTRODUCTION

This 'Catchwords' Index is intended to be used as an aid to finding particular terms in the U1S rather than as a substitute to use of the U1S itself. Reference should be made to the U1S itself to ascertain the exact wording (and hence the true scope) of a term whose code is suggested by a catchword and the indexing rules which apply.

Attention is *particularly* drawn to those U1S codes marked '+', or '*'.

- a) In the case of those codes marked '+', the scope of the corresponding U1S term is modified by an excluding reference directing some subject matter ostensibly within the scope of the term elsewhere, and/or indexing practice within the section containing the term is modified by an indexing note. Before applying such a code, the U1S itself *must* be consulted to ascertain the true scope of the term and/or the indexing practice to be followed.
- b) Codes marked * relate to those terms appearing in Schedule 3 of U1S. The codes S30-- may *only be applied under the terms of* Schedule 3. The other codes so marked appear in Schedule 2 as well as in Schedule 3, and may be applied under the terms of *either* Schedule 2 *or* Schedule 3. Terms may only be applied under Schedule 3 to certain UK Key headings. Before applying such a term, reference should be made to paragraphs 6.1-6.3 of the introduction to U1S.

The Index will be updated periodically as circumstances permit. In order that any existing errors may be corrected, users are asked to notify Classification and Documentation Division of the Patent Office of any that they notice.

The Patent Office does not guarantee the accuracy of its publications or data records nor undertake any responsibility for errors or omissions or their consequences.

Enquiries on the Index should be directed to:
