

O-0806-26

TRADE MARKS ACT 1994

UK TRADE MARK APPLICATION NO. 3898100

IN THE NAME OF EVOLUT HOLDINGS PTE. LTD.

TO REGISTER

BBACK

FOR GOODS IN CLASS 5

AND

OPPOSITION NO.443318 THERETO

BY

BOUNCE BACK DRINKS LIMITED

BACKGROUND AND PLEADINGS

The Application

1. Evolut Holdings Pte. Ltd. (“**the Applicant**”) applied to register the following as a trade mark in the UK (“**the Application**”):

BBACK (word mark)

Filing date: 6 April 2023

Applied-for Goods:

Class 5: *Dietary supplements prepared from herbal extract; Dietary supplements prepared from fruit extract; Dietary supplements prepared from vegetable extract; Nutritional supplements prepared from fruit extract; Nutritional supplements prepared from vegetable extract; Nutritional supplements prepared from herbal extract.*

The Opposition

2. Bounce Back Drinks Limited (“**the Opponent**”) filed an opposition against the Application on 29 September 2023. The opposition is based on grounds under **sections 5(2)(b), 5(3) and 5(4)(a)** of the Trade Marks Act 1994 (“**the Act**”).
3. The claims under **sections 5(2)(b) and 5(3)** rely on the Opponent’s four registered UK trade marks below (“**the Earlier Trade Marks / Mark 1 – Mark 4**”). The specifications of Marks 1 – 4 are lengthy and are set out in full in the **Annex** at the end of this Decision.

“Mark 1” - No. 3310914

BOUNCE BACK / BOUNCEBACK (series of 2)

Filing Date: 15 May 2018

Registered: 10 August 2018

Class 32 beverage goods, including *Beverages containing vitamins; Powders for effervescing beverages; Powders for the preparation of beverages*

“Mark 2” - No. 3358314

Filing Date: 4 December 2018

Registered: 26 April 2019

Class 32 beverage goods, including *Beverages containing vitamins; Powders for effervescing beverages; Powders for the preparation of beverages*

“Mark 3” - No. 3406532

BOUNCE BACK / BOUNCEBACK (series of 2)

Filing Date: 13 June 2019

Registered: 6 September 2019

Class 5 goods – including *Vitamin and mineral food supplements*

“Mark 4” - No. 3601441

Filing Date: 26 February 2021

Registered: 6 August 2021

Class 5 goods – including *Vitamin and mineral food supplements*

Class 32: beverage goods, including *Beverages containing vitamins; Powders for effervescing beverages; Powders for the preparation of beverages*

4. All three grounds are directed against all of the Applicant's goods.
5. For the Section 5(2)(b) and 5(3) grounds, the Opponent relies on all of the goods specified in Classes 5 and 32 under the Earlier Marks.
6. Under **section 5(2)(b)** it is claimed that the applied-for mark “BBACK” is similar to the Marks 1 – 4, on the basis it is “simply a common abbreviation of the Earlier Marks” and, and that all of the applied-for goods in Class 5 are identical or similar to the Classes 5 and 32 goods under the Earlier Marks, and that these factors give rise to a likelihood of confusion on the part of the consumer as to the source of the goods or services.
7. Under **section 5(3)** the claim is that the Opponent's trade mark had a reputation in the UK in respect of all of goods relied on and that use of the Applicant's trade mark, without due cause, would take unfair advantage of, or be detrimental to, the distinctive character or the repute of the Opponent's trade mark.
8. **Section 5(4)(a)** is based on the Opponent's claimed entitlement to unregistered trade mark rights, resulting from use in the course of trade throughout the UK, since 9 July

2014, of the signs BOUNCEBACK, BOUNCE BACK and “B” (“**the Opponent’s Signs**”) in relation to “dietary and nutritional supplements and beverages” (“**the Opponent’s Goods**”) and sale thereof (“**the Opponent’s Services**”) such that the Opponent acquired goodwill and that use of the Application was liable to be prevented by virtue of the law of passing off.

Applicant’s defence

9. The Applicant submitted a notice of defence, including a counterstatement denying all of the grounds. It denied that the Applicant’s mark is similar to any of the Opponent’s marks; it denied (in its counterstatement) that the applied-for goods are similar to any of the goods under the four earlier registrations (though this position changed by the time of the hearing); it denied any likelihood of confusion; it denied any misrepresentation and put the Opponent strict proof of its claimed reputation and goodwill and the asserted consequent types of damage.

Representation, papers filed and hearing

10. The Applicant is represented by Bird & Bird LLP. The Opponent is represented by Lincoln IP.¹ During the evidence rounds, only the Opponent filed evidence. The Applicant requested an oral hearing, which took place before me by video conference on 28 July 2025. Allan Poulter of Bird & Bird attended on behalf of the Applicant, having filed a helpful skeleton argument in advance of the oral hearing. This decision is taken based on my close reading of the papers filed and the submissions made at the oral hearing.

STATUTORY PROVISIONS

11. Sections of the Act applicable to this decision are set out below:

Section 5 Relative grounds for refusal of registration.

(1) [...]

1 Initially by Harper McLeod LLP.

- (2)** A trade mark shall not be registered if because—
- (a)** [...]
- (b)** it is similar to an earlier trade mark and is to be registered for goods or services identical with or similar to those for which the earlier trade mark is protected, there exists a likelihood of confusion on the part of the public, which includes the likelihood of association with the earlier trade mark”.
- (3)** A trade mark which is identical with or similar to an earlier trade mark, shall not be registered if, or to the extent that, the earlier trade mark has a reputation in the United Kingdom and the use of the later mark without due cause would take unfair advantage of, or be detrimental to, the distinctive character or the repute of the earlier trade mark.”
- (3A)** Subsection (3) applies irrespective of whether the goods and services for which the trade mark is to be registered are identical with, similar to or not similar to those for which the earlier trade mark is protected.]
- (4)** A trade mark shall not be registered if, or to the extent that, its use in the United Kingdom is liable to be prevented—
- (a)** by virtue of any rule of law (in particular, the law of passing off) protecting an unregistered trade mark or other sign used in the course of trade, where the condition in subsection (4A) is met,

....

A person thus entitled to prevent the use of a trade mark is referred to in this Act as the proprietor of an “earlier right” in relation to the trade mark.

- (4A)** The condition mentioned in subsection (4)(a) is that the rights to the unregistered trade mark or other sign were acquired prior to the date of application for registration of the trade mark or date of the priority claimed for that application.

5A Grounds for refusal relating to only some of the goods or services

Where grounds for refusal of an application for registration of a trade mark exist in respect of only some of the goods or services in respect of which the trade mark is applied for, the application is to be refused in relation to those goods and services only.

12. Each of Marks 1 – 4, relied on by the Opponent, constitutes an “earlier trade mark” for the purposes of section 5 since they were all filed before the application date of the

contested Application.² Since the Opponent's Earlier Trade Marks had been registered for less than five years at the filing date of the Application, the use conditions set out in section 6A of the Act are not engaged and the Opponent may rely on all of the specified goods under the Earlier Marks.

13. Nonetheless, the section 5(3) ground requires evidence of use to bear out the Opponent's claimed reputation, which is asserted in respect of the whole scope of its registered goods. Additionally, the section 5(4)(a) ground requires evidence of relevant actionable goodwill associated with the unregistered marks (the Opponent's Signs) in relation to the goods and services claimed. **The Relevant Date** for assessing the existence or strength of both the claimed reputation and goodwill is the filing date of the contested Application, namely **6 April 2023**. Although the Opponent's statement of grounds does not expressly claim enhanced distinctive character for the purposes of its section 5(2)(b) claims, since it has filed evidence of use and has claimed reputation and goodwill, I shall summarise and evaluate the evidence having in mind that it may serve all three of those ends. For this reason, I begin with my consideration of the Opponent's evidence.

THE EVIDENCE

14. The Opponent's evidence is given in a witness statement of Vandana Vijayan Pillai, dated 4 March 2024, along with Exhibits VVP1 – VVP10. Ms Pillai has been the Innovation Director of the Opponent since 2015. She explains that the Opponent has developed and produced restorative drinks containing vitamins, minerals, amino acids and prebiotics to help the body recover its natural balance and replenish lost nutrients allowing a person to wake up feeling refreshed following a night of socialising. Despite the great extent of the Opponent's registered goods, as set out in the Annex at the end of this Decision, it is clear from the evidence that these canned drinks are the only goods marketed by the Opponent and the sole foundation for assessing enhanced distinctive character, reputation and goodwill.

2 Section 6 of the Act.

15. Ms Pillai states that the products were first launched in the UK in 2015, that the Bounce Back mark is its core brand, first introduced in the UK in January 2015. Its colour “B” logo (Mark 2) was introduced in January 2018 and the black and white logo (Mark 4) in July 2020. The business has expanded and, at the date of the witness statement, the products were offered for sale through UK retailers including Asda and Costco. **Exhibit VVP1** shows photographs of the cans of drinks on shelves in Asda and Costco at numerous stores across the UK, alongside promotional information highlighting the replenishing nature and content of the drink.

16. However, Ms Pillai states that the Opponent's products have been sold in Asda and Costco only since July and December 2023 respectively. The evidence of retail through those stores is therefore not relevant to the assessment of reputation (or enhanced distinctive character or goodwill), since it arises from after the Relevant Date.
17. The Opponent's drinks can be bought online through Amazon. **Exhibit VVP4** shows images of the Opponent's vendor stall on Amazon, but the evidence includes no information about when the goods were first offered for sale on Amazon, so it is not clear that any were sold before the Relevant Date.
18. The witness states that the current website bouncebackdrinks.com has been live since August 2021 and that previous versions of the website used the bounce back name since 2015,³ and the colour B logo since 2019. The website gives details of product range, and stockists. An example of the use of the Mark 1 and Mark 4 on the website is shown below.

19. No information is provided about the number of visitors to the Opponent's website before the Relevant Date (or since), but as at March 2024, the Opponent had 1,100 subscribers to its newsletter. Most significantly, it has been possible to buy the Opponent's products directly from its website only since September 2023, which is after the Relevant Date.⁴

³ (It is not fully clear to me how these years align with the witness statement reference at paragraph 13 to the previous existence of bouncebackdrinks.co.uk since 2019.)

⁴ Paragraph 3 of the witness statement.

Promotion

20. At paragraph 8 of her witness statement Ms Pillai sets out the sums spent on promotion of the Opponent's goods in the UK from 2020. These are as follows:

year to March 2021 - £20,484

year to March 2022 - £43,390

year to March 2023 - £153,618

21. The witness states that the investment in promoting bounce back products has included advertising campaigns online, including social media, in-store tasting sessions on public sampling events, and press coverage of the opponent's goods in various magazines and newspapers including the Daily Express, the Telegraph, Daily Star, and the Herald. **Exhibit VVP5** aims to support the account of the promotional activities, but the evidence again suffers from its timeline. As at the date of the witness statement (March 2024) the products had been offer for promotional samples across 27 Costco stores. However, as has been established, the Opponent's goods appeared in Costco stores only in December 2023, after the Relevant Date, although a short article, on betterretailing.com, within Exhibit VVP8, is dated 15 December 2022 and announces the wholesale listing of the Opponent's raspberry drinks at 5 of Costco's sites.
22. Evidence of media coverage from before the Relevant Date is very limited. An article dated 16 November 2021, seemingly in a publication called Convenience Store, shows the Opponent's canned drinks, in tropical and raspberry flavours, where Mark 4 (which of course includes Mark 1) is prominently presented. The article gives some details of the vitamin and mineral content of the drinks, as developed by the founders who have a background in biochemistry. However, no information is provided about the reach or distribution of the Convenience Store article. Although, the evidence also shows a similarly informative and promotional article in the Yorkshire Times, that article is dated 30 October 2023, so cannot assist in establishing reputation at the Relevant date. Likewise, an article in the Herald is dated 15 November 2023. Advertising via Meta is also shown; this is undated, but refers to "as seen in The Sun, The Scotsman, The Herald", which suggests that the Meta adverts are from after the Relevant Date. In any event, no information is provided about the reach or distribution of the Meta adverts.

23. **Exhibit VVP9** shows Bounce Back Drinks as achieving a Trustpilot rating of Excellent, with 47 of the 48 reviews giving 5 stars. However, the only review shown is dated 10 January 2024, so the picture at the Relevant Date is not known.
24. Ms Pillai also states that (at March 2024) the numbers of followers on social media were as follows: Facebook – over 2800; Instagram – 5,261; X – 173; TikTok – 114 followers and 1331 likes. These numbers do not reveal the position at the Relevant Date, and nor are they anyway high numbers.
25. The Opponent had a stall the National Convenience Show in Birmingham in 2021, which is the largest of its kind in the UK and brings together suppliers, wholesalers and retailers within the convenience retail sector, regularly attracting over 25,000 visitors. The opponent also won a Scottish EDGE Award in December 2019, Receiving an award of £50,000. In 2022, the opponent was shortlisted as finalists in the following awards: World Beverage Innovation Awards 2022: Best Health and Wellness Drink; Nourish Awards 2022: Health Drinks, Shots & Soft Drinks; Great British Food Awards 2022: Health Boost, Health and Well-Being.
26. **Exhibit VVP10** shows two letters of attestation as to the good reputation of Bounce Back Drinks and the quality of their drink ingredients. The letters are dated March 2024 and one is from an independent adviser experienced in the drinks sector, and the other from the CEO of Scottish EDGE.

Revenue

27. At paragraph 9 of her witness statement Ms Pillai sets out the total revenue of bounce back-branded goods in the UK from 2020. Revenue so far as the Relevant Date was as follows:
- year to March 2021 - £3,608
- year to March 2022 - £146,171
- year to March 2023 - £205,508

The evidence from the years up to the Relevant Date does not set out the numbers of goods sold, or through what outlets, in which towns or cities. From the bare total revenue numbers, adding the figures together and dividing by the £1.50 offer price per can, shown in the Asda photograph, it would appear the number of cans sold in the three years up to the Relevant Date is fewer than 150,000 cans. It is not clear if the revenue figures are based on the price of the goods sold to the end consumer or the price to intermediary retailers (or a mix of both). But even if the number of cans sold is greater than my calculation, the revenue figures do not indicate thresholds supportive of enhanced distinctive character or reputation by the Relevant Date. I will return to give overall conclusions on enhanced distinctive character, reputation and goodwill at the relevant points in this Decision.

DECISION ON THE SECTION 5(2)(b) CLAIM

28. I will first consider whether the opposition succeeds based on the claim that the marks are similar and the applied-for goods are identical or similar such that there is a likelihood of confusion. The following standard summary of the principles applicable to the assessment of the likelihood of confusion was approved by the Supreme Court in *Iconix Luxembourg Holdings SARL v Dream Pairs Europe Inc & Anor* [2025] UKSC 25:

- (a) the likelihood of confusion must be appreciated globally, taking account of all relevant factors;
- (b) the matter must be judged through the eyes of the average consumer of the goods or services in question, who is deemed to be reasonably well informed and reasonably circumspect and observant, but who rarely has the chance to make direct comparisons between marks and must instead rely upon the imperfect picture of them he has kept in his mind, and whose attention varies according to the category of goods or services in question;
- (c) the average consumer normally perceives a mark as a whole and does not proceed to analyse its various details;

- (d) the visual, aural and conceptual similarities of the marks must normally be assessed by reference to the overall impressions created by the marks bearing in mind their distinctive and dominant components, but it is only when all other components of a complex mark are negligible that it is permissible to make the comparison solely on the basis of the dominant elements;
- (e) nevertheless, the overall impression conveyed to the public by a composite trade mark may, in certain circumstances, be dominated by one or more of its components;
- (f) and beyond the usual case, where the overall impression created by a mark depends heavily on the dominant features of the mark, it is quite possible that in a particular case an element corresponding to an earlier trade mark may retain an independent distinctive role in a composite mark, without necessarily constituting a dominant element of that mark;
- (g) a lesser degree of similarity between the goods or services may be offset by a greater degree of similarity between the marks, and vice versa;
- (h) there is a greater likelihood of confusion where the earlier mark has a highly distinctive character, either per se or because of the use that has been made of it;
- (i) mere association, in the strict sense that the later mark brings the earlier mark to mind, is not sufficient;
- (j) the reputation of a mark does not give grounds for presuming a likelihood of confusion simply because of a likelihood of association in the strict sense; and
- (k) if the association between the marks creates a risk that the public might believe that the respective goods or services come from the same or economically linked undertakings, there is a likelihood of confusion.

Comparison of the goods

29. Section 60A(1) of the Act provides that for the purpose of the Act goods and services are not to be regarded as being similar to each other on the ground that they appear in the same class under the Nice Classification, nor are they to be regarded as being dissimilar from each other on the ground that they appear in different classes.
30. When considering whether goods are similar, all the relevant factors relating to the goods should be taken into account. Those factors include, inter alia:⁵
- i. the physical nature of the goods;
 - ii. their intended purpose;
 - iii. their method of use / uses;
 - iv. who the users of the goods and services are;
 - v. the trade channels through which the goods reach the market;
 - vi. in the case of self-serve consumer items, where in practice they are found or likely to be found in shops and in particular whether they are, or are likely to be, found on the same or different shelves; and
 - vii. whether they are in competition with each other (taking into account how those in trade classify goods, for instance whether market research companies put them in the same or different sectors);
 - viii. whether they are complementary to each other. Complementary has been described as meaning that *“there is a close connection between them, in the sense that one is indispensable or important for the use of the other in such a way that customers may think that the responsibility for those goods lies with the same undertaking”*.⁶ Complementarity is an autonomous criterion capable of being the sole basis for the existence of similarity.⁷ Complementarity should be distinguished from ‘use in combination’, where goods are merely used together, whether by choice

5 See *Canon*, Case C-39/97, paragraph 23; and *British Sugar PLC v James Robertson & Sons Ltd.*, [1996] R.P.C. 281 – the “*Treat*” case

6 *Boston Scientific Ltd v OHIM*, Case T-325/06, paragraph 82

7 *Kurt Hesse v OHIM*, Case C-50/15 P

or convenience (e.g. bread and butter; or wine and wine glasses⁸) but are not essential or important to one another's use such that they would be assumed to share source.

31. I bear in mind too that when interpreting terms in a specification that it is "*necessary to focus on the core of what is described [... and that] trade mark registrations should not be allowed such a liberal interpretation that their limits become fuzzy and imprecise*", although "*where words or phrases in their ordinary and natural meaning are apt to cover the category of goods in question, there is equally no justification for straining the language unnaturally so as to produce a narrow meaning which does not cover the goods [and services] in question*".⁹
32. Where goods in the specification of one party's mark are included in a broader term from the other party's specification, those goods are considered to be identical: see *Gérard Meric v OHIM*, Case T-133/05, paragraph 29.

My approach on similarity of the goods

33. In its Form TM7 Notice of Opposition, the Opponent asserted that all the goods in Classes 5 and 32 covered by the Earlier Marks are identical or similar to the Applied-for Goods. The Class 5 specification of UK Trade Mark Registration No. 3406532 appears to cover every good in that class so clearly not all the goods are either identical or similar. However, by the time of hearing, the Applicant admitted that the Applied-for Goods (*Dietary and Nutritional supplements prepared from herbal, fruit or vegetable extract*) are identical to the dietary and nutritional supplements in Class 5 (covered by the Marks 3 and 4). I also find that there is similarity between the Applied-for Goods and the Opponent's *Beverages containing vitamins* and *Water enhanced with minerals* in Class 32 covered by Marks 1, 2 and 4. Vitamins or minerals are contained within those beverages and they may be an alternative to the applied-for goods supplied in tablet or powder form. There are therefore at least elements of competition, shared users and purpose.

8 As Daniel Alexander Q.C. noted as the Appointed Person in *Sandra Amalia Mary Elliot v LRC Holdings Limited*, BL-0-255-13 - "*It may well be the case that wine glasses are almost always used with wine – and are, on any normal view, complementary in that sense – but it does not follow that wine and glassware are similar goods for trade mark purposes.*"

9 *YouView TV Ltd v Total Ltd* [2012] EWHC 3158 (Ch), paragraphs 11 - 12

34. I do not consider it necessary to present a thoroughgoing analysis in respect of each of the specified terms. This is because, as I explain below, it is my view that even in respect of identical goods the marks themselves are not sufficiently similar to sustain an objection under section 5(2)(b) of the Act.

The average consumer and the nature of the purchasing act

35. Trade mark questions, including the likelihood of confusion, must be viewed through the eyes of the average consumer of the goods or services in question. The word “average” here denotes that the person is typical.¹⁰ The average consumer is deemed to be reasonably well informed and reasonably observant and circumspect.
36. It is therefore necessary to determine who is the average consumer of the respective goods or services, and how the consumer is likely to select those goods. It must be borne in mind that the average consumer’s level of attention is likely to vary according to the category of goods or services in question.¹¹
37. The parties’ similar or identical goods comprise dietary and nutritional supplements prepared from herbal, fruit or vegetable extract, Vitamin and mineral food supplements, Beverages containing vitamins, Water enhanced with mineral. The average consumer of these goods will be a member of the general public. The goods are likely to be marketed in supermarkets, convenience stores, health food shops and pharmacies. They may also be bought online where the consumer will select the goods having viewed relevant webpages. The selection of the goods is therefore primarily visual, although I do not discount that aural considerations may play a part by way of word-of-mouth recommendations.
38. The parties’ goods are not particularly costly and purchasing will not require an overly considered thought process, beyond identifying ingredient content and strength – typically no more than a medium level of attention.

10 *Hearst Holdings Inc, Fleischer Studios Inc v A.V.E.L.A. Inc, Poeticgem Limited, The Partnership (Trading) Limited, U Wear Limited, J Fox Limited*, [2014] EWHC 439 (Ch), paragraph 60

11 *Lloyd Schuhfabrik Meyer & Co. GmbH v Klijsen Handel BV*, Case C-342/97

Comparison of marks

39. The Applicant's Mark will be perceived as a single word, involving a recognisable ordinary English word "BACK" preceded by an additional letter "B". Mr Poulter submitted that the distinctive and dominant element of the Applicant's Mark is the "BB" element. I do not accept that submission, but the double B misspelling is part of the overall impression of the single word mark applied for.
40. The Opponent's Marks 1 and 3 are a series of marks. Section 41(2) of the Trade Marks Act 1994 provides as follows:
- "(2) A series of trade marks means a number of trade marks which resemble each other as to their material particulars and as to matters of a non-distinctive character not substantially affecting the identity of the trade mark."
41. In view of the above provision, I find that the presentation of the second of the marks in the series as a single conjoined word "BOUNCEBACK", does not substantially affect the identity of the mark. Accordingly, the Earlier Trade Marks 1 and 3 comprise two recognisable ordinary English words "BOUNCE" and "BACK", albeit that the second mark in the series is presented as a single conjoined word. I reject the Opponent's submission that the dominant and distinctive element of the Earlier Trade Marks is "BACK". I find that the two words form a unitary phrase, whose meaning will be readily understood. Since the word BOUNCE is the longer of the two words and comes first, I find that it may be considered more dominant than the word BACK, but only marginally so, given the unitary impression of the marks.
42. The Opponent's Earlier Marks 2 and 4 are these figurative marks:

43. The overall impression of both Marks 2 and 4 derives from their large B devices and the stacked words “BOUNCE BACK”. The devices are large and at the top of the marks, but the words naturally draw the eye too. In Mark 2, I find that the paler hue of the yellow and lighter blue parts of the B tend to lower the visual draw, in favour of the word element. Mark 4 is registered in black and white and may therefore be used in any other colour. The double layer composition of the B device in Mark 4 is more visually arresting, though any dominance that may be attributed to the device is very marginal. The colour scheme and stylisation of the B devices contributes to the overall impression of the device element of the marks.

Visual comparison

44. Consumers will perceive each of the various marks as a whole. Arguably the stronger point of visual comparison between the textual elements of the Earlier Marks is the conjoined version of Marks 1 and 3, on the basis that both present as single words - BBACK vs BOUNCEBACK. The repetitive “BB” element at the beginning of the Applicant’s Mark is unconventional and is not present in the Earlier Trade Marks. Moreover, the “BOUNCE” element does not feature in the Applicant’s Mark. The Applicant’s Mark has half as many letters and the differing lengths of the marks BBACK and BOUNCEBACK is obvious. In my view, the Applicant’s Mark is similar to Marks 1 and 3 to a low degree. In this conclusion I do not overlook that in the separated version of the Earlier Marks (the first in the series) the second word is BACK, which alone is visually closer to BBACK. Nonetheless, the marks must be assessed as wholes and the additional word and BB elements still apply.

45. In Marks 2 and 4 the textual elements are separated, the word BOUNCE sitting above the word BACK. The differences with regard to the double BB and BOUNCE again arise. Moreover, whereas Marks 2 and 4 feature prominent and distinctively stylised devices, the Applicant's Mark features no figurative device. In my view, the Applicant's Mark is similar to Marks 2 and 4 to a low degree.

Aural comparison

46. Mr Poulter submitted that "the "B" device element of the Earlier Trade Marks would be perceived as a logo referring to "BOUNCE BACK" and the "B" element would not be enunciated, as is apparent from the Witness Statement and Evidence." I accept that submission. The Earlier Marks will be pronounced as "BOUNCE BACK". Mr Poulter submitted that Applicant's Mark is short and would be pronounced by consumers as "be back", arguing that the parties' marks are aurally dissimilar. I accept that the Applicant's Mark may be pronounced Be Back, but find that it may also be pronounced as BACK. In either instance the parties' marks share the same syllable, notwithstanding the addition of the different first syllable "Bounce". I find that aurally, the Applicant's Mark is similar to Earlier Trade Marks, but to a degree that is no more than medium.

Conceptual comparison

47. The Opponent claims that the parties' marks "cover essentially the same wording, that is, in the case of the [Earlier Trade Marks] the wording "BOUNCEBACK" and in the Opposed Mark an abbreviation of this, being 'BBACK'". Mr Poulter submitted that "this is plainly wrong and not supported by any evidence" and that "BBACK is not an abbreviation of BOUNCEBACK." The Opponent also claims that the Opposed Mark is identical to the Earlier Trade Marks "as they are identical in the element that the average consumer will see as a badge of origin, that is the word 'BOUNCEBACK'". Mr Poulter responded that since the Applicant's Mark "does not include the word "BOUNCE", this assertion is factually incorrect, and the marks are clearly not identical (or similar)." The Opponent argues that the average consumer will likely believe that the 'the 'B' at the beginning of the Applicant's Mark stands for BOUNCE. Mr Poulter considered this to be a supposition that is not supported by evidence. He referred to the established principle of trade mark law that consumers do not dissect a mark but, instead, consider the mark as whole, and that, as such, consumers will perceive the contested mark as "BBACK"

and not break the mark up into separate elements. Mr Poulter submitted that to the extent that the applied-for Mark is dissected by consumers (which the Applicant submits is not the correct assessment), the most likely interpretation is “Be Back”. He argued that the ‘B’ could equally refer to any other word beginning with the letter ‘B’, such as, “brokeback”, “blowback”, “buyback”, “bareback”, “bring back” etc. The Applicant’s position is that the Opponent’s Earlier Marks connote the prospect of a consumer of the goods “bouncing back” to health or equilibrium, whereas the contested Mark has no meaning. I agree with the thrust of Mr Poulter’s submissions. The Opponent’s evidence in respect of its restorative drinks is not sufficiently strong to suggest that BBACK would naturally be perceived as an abbreviation for the phrase “bounce back”, or that that phrase is solidly associated with nutritional supplements (the applied-for goods) such that BBACK would carry the concept of bounce back. Since the applied-for mark has no immediately graspable concept, I find it may be considered conceptually dissimilar to the idea of a swift rebound carried in the Opponent’s Earlier Marks.

48. I do not overlook that Mr Poulter’s own submission is that BBACK may potentially stand for BE BACK or BRING BACK, and that those two phrases, like BOUNCE BACK, may have the capacity to suggest a restorative significance. However, I find that the average consumer would not be likely to immediately grasp any clear concept arising from “BBACK”. It is not enough that it could, potentially, signify BE BACK or BRING BACK, and that those pairings, could, potentially, on one construction, carry a message of restoration comparable to BOUNCE BACK. This does not give rise to an immediately graspable similar concept. I find that the most that can be reasonably found in favour of conceptually similarity is that both parties’ marks include the concept of “BACK”, one common definition of which may readily signify a return (though other common definitions include the rear side of a thing or body, or to give support of some sort). On this basis, there can be said to be some conceptual overlap between the parties’ marks, as well as an immediately graspable conceptual difference.

Distinctive Character of the Earlier Marks

49. The distinctive character of the earlier mark must be assessed, as, potentially, the more distinctive the earlier mark, either inherently or through use, the greater the likelihood of confusion.¹²

50. In *Lloyd Schuhfabrik*, the Court of Justice of the European Union (“**CJEU**”) stated that:

“22. In determining the distinctive character of a mark and, accordingly, in assessing whether it is highly distinctive, the national court must make an overall assessment of the greater or lesser capacity of the mark to identify the goods or services for which it has been registered as coming from a particular undertaking, and thus to distinguish those goods or services from those of other undertakings (see, to that effect, judgment of 4 May 1999 in Joined Cases C-108/97 and C-109/97 *Windsurfing Chiemsee v Huber and Attenberger* [1999] ECR I-2779, paragraph 49).

23. In making that assessment, account should be taken, in particular, of the inherent characteristics of the mark, including the fact that it does or does not contain an element descriptive of the goods or services for which it has been registered; the market share held by the mark; how intensive, geographically widespread and long-standing use of the mark has been; the amount invested by the undertaking in promoting the mark; the proportion of the relevant section of the public which, because of the mark, identifies the goods or services as originating from a particular undertaking; and statements from chambers of commerce and industry or other trade and professional associations (see *Windsurfing Chiemsee*, paragraph 51)”.

51. The Applicant submits that the Earlier Trade Marks are distinctive to a very low degree because, for the relevant goods in Classes 5 and 32, consumers would perceive the words “bounceback” or “bounce back” as references to the products providing the consumer with a “bounce back” effect which restores them to a previous, or healthier, state. This is a claim that is core to the Opponent’s business and marketing as shown

12 *Sabel* at [24]

in its evidence. In my view, while the Earlier Marks may be allusive in respect of *Beverages containing vitamins* and *Vitamin and mineral food supplements*, the phrase “Bounce Back” is not so generally associated with those goods so as to diminish the distinctive character of the words to the degree suggested by Mr Poulter. The words have a pleasing alliteration, and the Earlier Marks may be considered to have a medium degree of distinctive character, particularly where they include the figurative presentation of the B devices.

52. The distinctive character of a trade mark may be enhanced through its use, but having regard to the case law factors identified in *Lloyd Schuhfabrik*, the extent of use shown in the evidence, as I have considered earlier in this Decision, is insufficient to have enhanced the distinctiveness of the mark among the UK public, assessed at the Relevant Date. In reaching that conclusion, I note the great size of the UK market for the registered goods, and the modest level of sales by the Relevant Date. With regard to the factor of statements from trade, I do not find that the third-party witness statements, supportive of the Opponent, assist in determining the distinctive character of the earlier registered trade marks at the Relevant Date.
53. I find the distinctive character of the Opponent’s Earlier Marks in respect of its similar goods to be no more than medium.

Conclusion as to likelihood of confusion

54. I turn now to make a global assessment of likelihood of confusion if the parties’ marks were used concurrently in respect of their respective goods. This assessment takes account of my findings set out in the foregoing sections of this decision and of all of the various principles from case law outlined in my paragraph 28 above.
55. It requires a realistic appraisal of the net effect of the similarities and differences between the marks and the goods in issue, giving the similarities and differences as much or as little significance as the relevant average consumer would attach to them, noting that such a consumer is taken to be reasonably well-informed and reasonably observant and circumspect. The average consumer is a hypothetical person - a legal construct -

created to strike the right balance between the various competing interests including, on the one hand, the need to protect consumers and, on the other hand, the promotion of free trade in an openly competitive market.¹³

56. Confusion can be direct or indirect. Whereas direct confusion involves the average consumer mistaking one trade mark for the other, indirect confusion is where the average consumer realises that the trade marks are not the same but puts the similarity that exists between the trade marks/goods down to the responsible undertakings being the same or related.
57. The assessment of likelihood of confusion involves factoring in the potential for a greater degree of similarity (or identity) between the goods to offset a lesser degree of similarity between the marks. Another favourable factor is that the average consumer will typically exercise no more than a medium level of attention in the purchasing process. However, despite potentially or formally identical specified goods, I find that even paying a lower degree of attention, the average consumer will not confuse the marks. The applied-for Mark is half the length of the Earlier Marks and lacks any figurative device. These differences are likely to be noted visually, and there are clear aural differences in the opening sounds, and a clear conceptual difference. The Earlier Marks have a conceptual mental hook that will enable a reasonably well informed and reasonably circumspect and observant average consumer to not mix up the marks directly.
58. At the Relevant Date, the Earlier Marks had no more than a medium degree of distinctive character. In line with my analysis of conceptual similarity, I do not see a good basis why a consumer would conclude that the B, doubling the opening letters of applied-for single-word mark, is simply a substitute for “Bounce”, or that the applied-for mark is a related brand. I find that there is no proper basis for a finding of a likelihood indirect confusion.
59. **OUTCOME UNDER SECTION 5(2)(b):** The opposition under section 5(2)(b) fails.

13 *Comic Enterprises Ltd v Twentieth Century Fox Film Corporation* [2016] EWCA Civ 41, Kitchin LJ, particularly paragraph 34.

THE SECTION 5(3) CLAIM

60. This ground is also directed against all of the applied-for goods. The statutory provision is set out at my paragraph 11 above. The Opponent claims a reputation in respect of the entirety of its registered goods, though clearly the evidence relates solely to the use of the Earlier Marks in respect of canned drinks.
61. The relevant case law for section 5(3) can be found in the following judgments of the CJEU: *General Motors*, C-375/97, EU:C:1999:408; *Intel Corporation Inc. v CPM United Kingdom Ltd*, C252/07, EU:C:2008:655; *Adidas-Salomon & Anor v Fitnessworld Trading Ltd*, C-408/01, Page 34 of 61 EU:C:2003:582; *L'Oréal v Bellure*, C-487/07, EU:C:2009:378); and *Marks and Spencer v Interflora*, C-323/09, EU:C:2011:604.. The law appears to be as follows:
- (a) The reputation of a trade mark must be established in relation to the relevant section of the public as regards the goods or services for which the mark is registered; *General Motors*, paragraph 24.
 - (b) The trade mark for which protection is sought must be known by a significant part of that relevant public; *General Motors*, paragraph 26.
 - (c) It is necessary for the public when confronted with the later mark to make a link with the earlier reputed mark, which is the case where the public calls the earlier mark to mind; *Adidas Saloman*, paragraph 29 and *Intel*, paragraph 63.
 - (d) Whether such a link exists must be assessed globally taking account of all relevant factors, including the degree of similarity between the respective marks and between the goods/services, the extent of the overlap between the relevant consumers for those goods/services, and the strength of the earlier mark's reputation and distinctiveness; *Intel*, paragraph 42.
 - (e) Where a link is established, the owner of the earlier mark must also establish the existence of one or more of the types of injury set out in the section, or there is a

serious likelihood that such an injury will occur in the future; *Intel, paragraph 68*; whether this is the case must also be assessed globally, taking account of all relevant factors; *Intel, paragraph 79*.

- (f) Detriment to the distinctive character of the earlier mark occurs when the mark's ability to identify the goods/services for which it is registered is weakened as a result of the use of the later mark, and requires evidence of a change in the economic behaviour of the average consumer of the goods/services for which the earlier mark is registered, or a serious risk that this will happen in future; *Intel, paragraphs 76 and 77*.
- (g) The more unique the earlier mark appears, the greater the likelihood that the use of a later identical or similar mark will be detrimental to its distinctive character; *Intel, paragraph 74*.
- (h) Detriment to the reputation of the earlier mark is caused when goods or services for which the later mark is used may be perceived by the public in such a way that the power of attraction of the earlier mark is reduced, and occurs particularly where the goods or services offered under the later mark have a characteristic or quality which is liable to have a negative impact of the earlier mark; *L'Oréal v Bellure NV, paragraph 40*.
- (i) The advantage arising from the use by a third party of a sign similar to a mark with a reputation is an unfair advantage where it seeks to ride on the coat-tails of the senior mark in order to benefit from the power of attraction, the reputation and the prestige of that mark and to exploit, without paying any financial compensation, the marketing effort expended by the proprietor of the mark in order to create and maintain the mark's image. This covers, in particular, cases where, by reason of a transfer of the image of the mark or of the characteristics which it projects to the goods identified by the identical or similar sign, there is clear exploitation on the coat-tails of the mark with a reputation (*Marks and Spencer v Interflora, paragraph 74 and the court's answer to question 1 in L'Oréal v Bellure*).

62. The function and value of a trade mark are not confined to its being an indicator of origin of goods or services (which section 5(2)(b) safeguards); a trade mark can also convey messages, such as a promise or reassurance of quality or a certain image of, for example, lifestyle or exclusivity ('advertising function').¹⁴ Section 5(3) aims at protecting this advertising function and the investment made in creating a certain brand image by granting protection to reputed trade marks, irrespective of the similarity of the goods or services or of a likelihood of confusion, provided that it can be demonstrated that the use of the contested application without due cause would take unfair advantage of, or be detrimental to, the distinctive character or the repute of the earlier mark.

Reputation

63. A trade mark has a reputation within the meaning of section 5(3) if it was known to a significant part of the relevant public at the relevant date; the relevant public are those concerned by the products or services covered by the trade mark. There is no fixed percentage threshold which can be used to assess what constitutes a significant part of the public; it is proportion rather than absolute numbers that matters. Reputation constitutes a knowledge threshold, to be assessed according to a combination of geographical and economic criteria. All relevant facts are to be taken into consideration when making the assessment, in particular the market share held by the trade mark, the intensity, geographical extent and duration of its use, and the size of the investment made by undertaking in promoting it.¹⁵
64. The relevant public for the registered services is the UK public at large. In line with my earlier close account of the evidence, I find that it is insufficient to establish the required reputation attaching to the Earlier Marks as assessed at the Relevant Date. The soft drinks market in the UK is enormous, and even allowing for the narrower focus of a soft drink with restorative properties, I find that the level of sales – around £350k of revenue in the three years up to the Relevant Date – is not enough for a finding that the Earlier Marks were known to a significant part of the general public by that point. While I note that the promotional expenditure is stated to have exceeded £200k, and the Opponent

¹⁴ (judgment of 18/06/2009, C-487/07, L'Oréal, EU:C:2009:378)

¹⁵ See, for instance, ruling of Judge Hacon in *Burgerista Operations GmbH v Burgista Bros Limited* [2018] EWHC (IPEC),

had achieved some award recognition for its products, I am not satisfied that the Earlier Marks had achieved the knowledge threshold required for reputation according to the case law criteria mentioned above.

65. Since I find that the Opponent's evidence has not established the claimed reputation, which is a required component of section 5(3), it follows that the claim must fail. In the circumstances it is not necessary for me to consider whether the necessary mental link would arise, nor the claimed bases of damage. For the sake of completeness, however, in case I am wrong to conclude that the Earlier Marks lacked the necessary reputation, I find that the best that may be concluded on the most generous assessment is that the reputation was modest, and not strong enough to give rise to a mental link given the differences between the parties' marks.
66. **OUTCOME UNDER SECTION 5(3):** The claim under section 5(3) fails.

SECTION 5(4)(a) CLAIM

Applicable principles

67. In *Discount Outlet v Feel Good UK*, [2017] EWHC 1400 IPEC, Her Honour Judge Melissa Clarke, sitting as a Deputy Judge of the High Court, conveniently summarised the essential requirements of the law of passing off as follows:

"55. The elements necessary to reach a finding of passing off are the 'classical trinity' of that tort as described by Lord Oliver in the Jif Lemon case (*Reckitt & Colman Product v Borden* [1990] 1 WLR 491 HL, [1990] RPC 341, HL), namely **goodwill** or reputation; **misrepresentation** leading to deception or a likelihood of deception; and **damage** resulting from the misrepresentation. The burden is on the Claimants to satisfy me of all three limbs.

56. In relation to deception, the court must assess whether "*a substantial number*" of the Claimants' customers or potential customers are deceived, but it is not

necessary to show that all or even most of them are deceived (per *Interflora Inc v Marks and Spencer Plc* [2012] EWCA Civ 1501, [2013] FSR 21)."

68. **Goodwill:** The first element described in *Reckitt & Colman* refers to "goodwill or reputation", although case law has developed so as to distinguish between goodwill and "mere reputation" – the latter being insufficient alone to sustain a claim of passing off. To satisfy the first element of the tort, the Opponent is required to show that it has goodwill among UK consumers.

69. The best-known case as to the meaning of 'goodwill' is given in *IRC v Muller and Co's Margarine Limited* [1901] AC 217. At 223, Lord MacNaghten said:

"What is goodwill? It is a thing very easy to describe, very difficult to define. It is the benefit and advantage of the good name, reputation, and connection of a business. It is the attractive force which brings in custom."

70. In *Hart v Relentless Records*, Jacob J. (as he then was) stated his view that "the law of passing off does not protect a goodwill of trivial extent. one is looking for more than a minimal reputation."¹⁶ This does not mean that a small business is incapable of establishing goodwill - even though its goodwill may be modest, a business can protect signs which are distinctive of that business under the law of passing off. Thus in *Lumos Skincare Ltd v Sweet Squared Ltd*,¹⁷ the Court of Appeal upheld a claim for passing off based on the claimant's use of the mark "LUMOS" for around three years before the defendant's use of the same mark, even though sales volumes and turnover were modest.

71. While I have previously concluded that the evidence falls short of affording an enhanced distinctiveness or reputation for the registered trade marks, I am content to find that the Opponent's modest sales and turnover in the three years up to the Relevant Date may be enough give rise to goodwill in respect of vitamin-enriched canned drinks. I therefore

¹⁶ *Hart & Anor v Relentless Records* [2002] EWHC 1984 (Ch) [62]
¹⁷ [2013] EWCA Civ 590

proceed to consider the second element of the tort of passing off – the matter of misrepresentation.

72. Halsbury's Laws of England Vol. 97A (2021 reissue) contains guidance on establishing the likelihood of **misrepresentation** or deception, in particular, paragraph 636, in which it is noted (with footnotes omitted) that:

“Establishing a likelihood of deception generally requires the presence of two factual elements:

(1) that a name, mark or other distinctive indicium used by the claimant has acquired a reputation among a relevant class of persons; and

(2) that members of that class will mistakenly infer from the defendant's use of a name, mark or other indicium which is the same or sufficiently similar that the defendant's goods or business are from the same source or are connected.

While it is helpful to think of these two factual elements as two successive hurdles which the claimant must surmount, consideration of these two aspects cannot be completely separated from each other.

The question whether deception is likely is one for the court, which will have regard to:

(a) the nature and extent of the reputation relied upon,

(b) the closeness or otherwise of the respective fields of activity in which the claimant and the defendant carry on business;

(c) the similarity of the mark, name etc used by the defendant to that of the claimant;

(d) the manner in which the defendant makes use of the name, mark etc complained of and collateral factors; and

(e) the manner in which the particular trade is carried on, the class of persons who it is alleged is likely to be deceived and all other surrounding circumstances.

In assessing whether deception is likely, the court attaches importance to the question whether the defendant can be shown to have acted with a fraudulent intent, although a fraudulent intent is not a necessary part of the cause of action.”

73. The relevant test was set out by Morritt LJ in *Neutrogena Corporation and another v Golden Limited and another* [1996] RPC 473:

“There is no dispute as to what the correct legal principle is. As stated by Lord Oliver of Aylmerton in *Reckitt & Colman Products Ltd v Borden Inc* [1990] RPC 341 at page 407 the question on the issue of deception or confusion is: is it, on a balance of probabilities, likely that, if the appellants are not restrained as they have been, a substantial number of members of the public will be misled into purchasing the defendants’ [product] in the belief that it is the respondents’ [product].’ [my underlining]

The same proposition is stated in Halsbury’s Laws of England 4th Edition Vol. 48 para. 148. The necessity for a substantial number is brought out also in *Saville Perfumery Ltd v June Perfect Ltd* (1941) 58 RPC. 147 at page 175; and *Re Smith Hayden’s Application* (1945) 63 RPC 97 at page 101.”

74. Although they are different, the test for misrepresentation tends to have the same results as the test for confusion under trade mark law. In *Comic Enterprises Ltd v Twentieth Century Fox Film Corporation* [2016] EWCA Civ 41, Kitchin LJ considered the role of the average consumer in the assessment of a likelihood of confusion. Kitchin L.J. concluded:

“... if, having regard to the perceptions and expectations of the average consumer, the court concludes that a significant proportion of the relevant public is likely to be confused such as to warrant the intervention of the court then it may properly find infringement.”

75. Although this was an infringement case, the principles apply equally under 5(2): see *Soulcycle Inc v Matalan Ltd*, [2017] EWHC 496 (Ch). In *Marks and Spencer PLC v Interflora*, [2012] EWCA (Civ) 1501, Lewinson L.J. had previously cast doubt on whether the test for misrepresentation for passing off purposes came to the same thing as the test for a likelihood of confusion under trade mark law. He pointed out that it is sufficient for passing off purposes that “a substantial number” of the relevant public are deceived, which might not mean that the average consumer is confused. However, in the light of the Court of Appeal’s later judgment in *Comic Enterprises*, it seems doubtful whether the difference between the legal tests will (all other factors being equal) produce different outcomes. This is because they are both normative tests intended to exclude the particularly careless or careful, rather than quantitative assessments.
76. I find that, even proceeding on the basis that the Opponent enjoyed a measure of goodwill associated with the sign BOUNCE BACK in respect of vitamin-enriched canned drinks, there will be no misrepresentation. This conclusion takes into account that the goodwill is limited, the differences between the applied-for Mark and the Opponent’s sign and that the goods on which goodwill is founded are at best only similar to the nutritional supplement goods applied for in Class 5. Just as I found no likelihood of confusion, based even on identical goods under the registered Earlier Marks, I find no misrepresentation arises based on the unregistered trade mark rights claimed.
77. **OUTCOME UNDER SECTION 5(4)(a):** The opposition under section 5(4)(a) fails.
78. **OVERALL OUTCOME** The opposition fails overall and, subject to any successful appeal of this decision, trade mark application 3898100 may proceed to registration.

COSTS

79. The Applicant has been successful and is entitled to a contribution towards its costs, based upon the scale published in Tribunal Practice Notice 1/2023.

Considering the Notice of opposition and preparing the counterstatement £300

Considering / commenting on Opponent's evidence: £700

Preparing for and attending a hearing: £1000

TOTAL £2000

80. I order Bounce Back Drinks Limited to pay Evolut Holdings Pte. Ltd. the sum of £2000, to be paid within 21 days of the end of the period allowed for appeal or, if there is an appeal, within 21 days of the conclusion of the appeal proceedings (subject to any order of the appellate tribunal).

Dated this 4th day of September 2026

Matthew Williams

Registration date: 26 April 2019

Aerated fruit juices; Aerated juices; Aerated mineral waters; Aerated water; Aerated water (Preparations for making -); Aerated water [soda water]; Aerated waters; Alcohol free aperitifs; Alcohol free beverages; Alcohol free cider; Alcohol free wine; Alcohol-free beers; Ale; Ales; Aloe juice beverages; Aloe vera drinks, non-alcoholic; Aloe vera juices; Aperitifs, non-alcoholic; Apple juice beverages; Apple juice drinks; Barley wine [Beer]; Barley wine [beer]; Beer; Beer and brewery products; Beer wort; Beer-based beverages; Beer-based cocktails; Beers; Beers enriched with minerals; Beverages consisting of a blend of fruit and vegetable juices; Beverages consisting principally of fruit juices; Beverages containing vitamins; Beverages (Non-alcoholic -); Beverages (Preparations for making -); Beverages (Whey -); Bitter lemon; Black beer; Black beer [toasted-malt beer]; Blackcurrant cordial; Blackcurrant juice; Bock beer; Bottled drinking water; Bottled water; Brown rice beverages other than milk substitutes; Carbonated mineral water; Carbonated non-alcoholic drinks; Carbonated soft drinks; Carbonated water; Carbonated waters; Cider, non-alcoholic; Cocktails, non-alcoholic; Coconut juice; Coconut water; Coconut water as a beverage; Coconut water as beverage; Coconut-based beverages; Coffee-flavored ale; Coffee-flavored beer; Coffee-flavored soft drinks; Cola; Cola drinks; Colas [soft drinks]; Concentrated fruit juice; Concentrated fruit juices; Concentrates for making fruit drinks; Concentrates for making fruit juices; Concentrates for use in the preparation of soft drinks;

Concentrates used in the preparation of soft drinks; Condensed smoked plum juice; Cordials; Cordials [non-alcoholic]; Cordials (non-alcoholic beverages); Craft beer; Craft beers; Cranberry juice; Cream soda; De-alcoholised beer; De-alcoholised drinks; De-alcoholised wines; De-alcoholized beer; De-alcoholized drinks; De-alcoholized wines; Dilutable preparations for making beverages; Distilled drinking water; Douzhi (fermented bean drink); Drinking mineral water; Drinking spring water; Drinking water; Drinking water with vitamins; Drinking waters; Dry ginger ale; Effervescing beverages (Pastilles for -); Effervescing beverages (Powders for -); Energy drinks; Energy drinks containing caffeine; Energy drinks [not for medical purposes]; Essences for making beverages; Essences for making flavoured mineral water [not in the nature of essential oils]; Essences for making non-alcoholic beverages; Essences for making non-alcoholic beverages [not in the nature of essential oils]; Essences for making non-alcoholic drinks, not in the nature of essential oils; Extracts for making beverages; Extracts for making non-alcoholic beverages; Extracts of hops for making beer; Extracts of unfermented must; Flavor enhanced water; Flavored beer; Flavored beers; Flavored mineral water; Flavored waters; Flavoured beers; Flavoured carbonated beverages; Flavoured mineral water; Flavoured waters; Frozen carbonated beverages; Frozen fruit beverages; Frozen fruit drinks; Frozen fruit-based beverages; Frozen fruit-based drinks; Fruit beverages; Fruit beverages and fruit juices; Fruit beverages (non-alcoholic); Fruit drinks; Fruit extracts (Non-alcoholic -); Fruit flavored drinks; Fruit flavored soft drinks; Fruit flavoured carbonated drinks; Fruit flavoured drinks; Fruit flavoured waters; Fruit juice; Fruit juice bases; Fruit juice beverages; Fruit juice beverages (Non-alcoholic -); Fruit juice concentrates; Fruit juice drinks; Fruit juice for use as beverages; Fruit juices; Fruit nectars; Fruit nectars, nonalcoholic; Fruit nectars, non-alcoholic; Fruit smoothies; Fruit squashes; Fruit-based beverages; Fruit-based soft drinks flavored with tea; Fruit-flavored beverages; Fruit-flavored soft drinks; Fruit-flavoured beverages; Functional water-based beverages; Ginger ale; Ginger beer; Ginger juice beverages; Glacial water; Grape juice; Grape juice beverages; Grape must, unfermented; Grapefruit juice; Green vegetable juice beverages; Guarana drinks; Guava juice; Honey-based beverages (Non-alcoholic -); Hop extracts for manufacturing beer; Hop extracts for use in the preparation of beverages; Hops (Extracts of -) for making beer; Iced fruit beverages; Imitation

beer; India pale ales (IPAs); IPA (Indian Pale Ale); Isotonic beverages; Isotonic beverages [not for medical purposes]; Isotonic drinks; Isotonic non-alcoholic drinks; Juice drinks; Juice (Fruit -); Juices; Kvass [non-alcoholic beverage]; Kvass [non-alcoholic beverages]; Lager; Lagers; Lemon barley water; Lemon juice for use in the preparation of beverages; Lemon squash; Lemonade; Lemonades; Lime juice cordial; Lime juice for use in the preparation of beverages; Liqueurs (Preparations for making -); Lithia water; Low alcohol beer; Low calorie soft drinks; Low-alcohol beer; Low-calorie soft drinks; Malt beer; Malt syrup for beverages; Malt wort; Mango juice; Melon juice; Mineral enriched water [beverages]; Mineral water; Mineral water [beverages]; Mineral water (Non-medicated -); Mineral waters; Mineral waters [beverages]; Mixed fruit juice; Mixed fruit juices; Mixes for making sorbet beverages; Mung bean beverages; Must; Nectars (Fruit -), non-alcoholic; Non alcoholic aperitifs; Non-alcoholic beer; Non-alcoholic beer flavored beverages; Non-alcoholic beers; Non-alcoholic beverages; Non-alcoholic beverages containing fruit juices; Non-alcoholic beverages containing vegetable juices; Non-alcoholic beverages flavored with coffee; Non-alcoholic beverages flavored with tea; Non-alcoholic beverages flavoured with coffee; Non-alcoholic beverages flavoured with tea; Non-alcoholic beverages with tea flavor; Non-alcoholic carbonated beverages; Non-alcoholic cinnamon punch with dried persimmon (sujeonggwa); Non-alcoholic cocktail bases; Non-alcoholic cocktail mixes; Non-alcoholic cocktails; Non-alcoholic cordials; Non-alcoholic drinks; Non-alcoholic flavored carbonated beverages; Non-alcoholic fruit cocktails; Non-alcoholic fruit drinks; Non-alcoholic fruit extracts; Non-alcoholic fruit extracts used in the preparation of beverages; Non-alcoholic fruit juice beverages; Non-alcoholic fruit punch; Non-alcoholic grape juice beverages; Non-alcoholic honey-based beverages; Non-alcoholic malt beverages; Non-alcoholic malt drinks; Non-alcoholic malt free beverages [other than for medical use]; Non-alcoholic punch; Non-alcoholic punches; Non-alcoholic rice punch (sikhye); Non-alcoholic soda beverages flavoured with tea; Non-alcoholic sparkling fruit juice drinks; Non-alcoholic vegetable juice drinks; Non-alcoholic wine; Non-alcoholic wines; Non-carbonated soft drinks; Nut and soy based beverages; Nutritionally fortified beverages; Nutritionally fortified water; Oat-based beverages [not being milk substitutes]; Orange barley water; Orange juice; Orange juice beverages; Orange

juice drinks; Orange squash; Orgeat; Pale ale; Part frozen slush drinks; Pastilles for effervescing beverages; Pineapple juice beverages; Pomegranate juice; Porter; Powders for effervescing beverages; Powders for the preparation of beverages; Powders used in the preparation of coconut water drinks; Powders used in the preparation of fruit-based beverages; Powders used in the preparation of fruit-based drinks; Powders used in the preparation of soft drinks; Preparation for making non-alcoholic beverages; Preparations for making aerated water; Preparations for making beverages; Preparations for making liqueurs; Protein-enriched sports beverages; Quinine water; Ramune (Japanese soda pops); Red ginseng juice beverages; Rice-based beverages, other than milk substitutes; Root beer; Root beers; Root beers, non-alcoholic beverages; Saison beer; Sarsaparilla [non-alcoholic beverage]; Seltzer water; Shandy; Sherbet beverages; Sherbets [beverages]; Slush drinks; Smoked plum beverages; Smoked plum juice beverages; Smoothies; Smoothies containing grains and oats; Smoothies [fruit beverages, fruit predominating]; Smoothies [non-alcoholic fruit beverages]; Soda pops; Soda water; Soft drinks; Soft drinks flavored with tea; Soft drinks for energy supply; Sorbets [beverages]; Sorbets in the nature of beverages; Soy beverage; Soya-based beverages, other than milk substitutes; Soy-based beverages, not being milk substitutes; Sparkling water; Sports drinks; Sports drinks containing electrolytes; Spring water; Spring waters; Squashes [non-alcoholic beverages]; Still water; Still waters; Stout; Stouts; Syrup for making beverages; Syrup for making lemonade; Syrups for beverages; Syrups for lemonade; Syrups for making beverages; Syrups for making flavoured mineral waters; Syrups for making fruit-flavored drinks; Syrups for making non-alcoholic beverages; Syrups for making soft drinks; Syrups for making whey-based beverages; Syrups used in the preparation of soft drinks; Table water; Table waters; Tomato juice [beverage]; Tomato juice beverages; Tonic water; Tonic water [non-medicated beverages]; Unfermented preserved must; Vegetable drinks; Vegetable juice; Vegetable juices [beverage]; Vegetable juices [beverages]; Vegetable smoothies; Vegetable-based beverages; Vitamin enriched sparkling water [beverages]; Vitamin fortified non-alcoholic beverages; Water; Water enhanced with minerals; Water (Lithia -); Water (Seltzer -); Water-based beverages containing tea extracts; Watermelon juice; Waters; Waters [beverages]; Waters (Table -); Wheat beer; Whey beverages.

Series of 2 marks: BOUNCE BACK / BOUNCEBACK

Filing date: 15 May 2018

Registration date: 10 August 2018

Class 5: *Abrasive fluids for dental use; Abrasive pads for dental purposes; Abrasives (Dental -); Absorbent articles for personal hygiene; Absorbent cotton; Absorbent cotton for medical purposes; Absorbent cotton wadding; Absorbent cotton wool [for medical purposes]; Absorbent diapers of cellulose for pets; Absorbent diapers of paper for pets; Absorbent sanitary articles; Absorbent wadding; Acai powder dietary supplements; Acaricides; Acaricides for industrial purposes; Acetaminophen; Acetaminophen [for relief of pain]; Acetates for pharmaceutical purposes; Acids for pharmaceutical purposes; Acne cleansers [pharmaceutical preparations]; Acne cream [pharmaceutical preparations]; Acne creams [pharmaceutical preparations]; Acne medication; Acne medications; Acne treatment preparations; Aconitine; Activated charcoal for adsorption of toxins for medical purposes; Activated charcoal for medical use; Activated charcoal used as an antidote to poisons; Adhesive backed films for medical purposes; Adhesive band for medical use; Adhesive bandages; Adhesive bandages for skin wounds; Adhesive bands for medical purposes; Adhesive compositions for medical use; Adhesive dressing strips; Adhesive dressings; Adhesive films for medical use; Adhesive patches for medical purposes; Adhesive plaster; Adhesive plasters; Adhesive plasters for medical purposes; Adhesive skin patches for medical use; Adhesive strips for dentures; Adhesive strips for medical purposes; Adhesive tapes for medical purposes; Adhesives (Fly catching -); Adhesives for affixing prostheses; Adhesives for dental and dentistry use; Adhesives for dental use; Adhesives for dentures; Adjuvants for medical purposes; Adrenal hormone preparations; Adult diapers; Agricultural biopesticides; Agricultural pesticides; Air deodorants; Air deodoriser gel; Air deodoriser sprays; Air deodorisers; Air deodorising preparations; Air deodorizer; Air deodorizing preparations; Air freshener refills; Air freshener sprays; Air fresheners; Air purifying preparations; Air refresheners; Air*

sanitizers; Air-freshening preparations; Albumin dietary supplements; Albuminous foodstuffs for medical purposes; Albuminous preparations for medical purposes; Alcohol detoxifying agents; Alcohol for medicinal purposes; Alcohol for pharmaceutical purposes; Alcohol for topical use; Alcohol swabs for medical purposes; Alcohol-based antibacterial skin sanitizer gels; Aldehydes for pharmaceutical purposes; Algae removing preparations; Algaecide chemicals for swimming pools; Algaecide for swimming pools; Algaecides [chemicals for swimming pool maintenance]; Algicides; Algicides for agricultural use; Algicides for swimming pools; Alginate dietary supplements; Alginate solutions for pharmaceutical purposes; Alginate tablets for pharmaceutical purposes; Alginates for pharmaceutical purposes; Alkaline iodides for pharmaceutical purposes; Alkaloids for medical purposes; Alkaloids used as analgesics; Alkaloids used as antipyretics; Alkaloids used as stimulants; Alkaloids used for pharmaceutical purposes; All purpose deodorizing preparations for household, commercial or industrial use; Allergy capsules; Allergy medication; Allergy medications; Allergy relief medication; Allergy tablets; Alloys of precious metal for use in dentistry and dentistry technology; Alloys of precious metals as dental implants; Alloys of precious metals for dental purposes; Almond milk for pharmaceutical purposes; Almond oil for pharmaceutical purposes; Almonds (Milk of -) for pharmaceutical purposes; Aloe vera gel for therapeutic purposes; Aloe vera preparations for pharmaceutical purposes; Aloe vera preparations for therapeutic purposes; Aluminium acetate for pharmaceutical purposes; Amalgam for dental purposes; Amalgams (Dental -); Amalgams for dental purposes; Amalgams for dental use; Amino acid preparations for medical purposes; Amino acid preparations for medical use; Amino acid preparations for pharmaceutical use; Amino acid preparations for veterinary use; Amino acids for medical or veterinary purposes; Amino acids for medical purposes; Amino acids for veterinary purposes; Ammonia inhalants; Anaesthetic preparation for injection; Anaesthetic preparations; Anaesthetic preparations for inhalation; Anaesthetics; Analeptic stimulants; Analeptics; Analgesic balm; Analgesic preparations; Analgesics; Analgesics for medical use; Analgesics for pharmaceutical use; Androgen preparations; Anesthetics for non-surgical use; Anesthetics for surgical use; Angostura bark for medical purposes; Anhidrotics; Animal dips [preparations]; Animal flea collars; Animal repellent

formulations; Animal repellents; Animal semen for artificial insemination; Animal sperm; Animal washes; Animal washes [insecticides]; Anoretics; Antacid preparations; Antacids; Anthelmintics; Anti fly lotion; Anti-adhesion gels for use with wound drainage devices; Antiallergic medicines; Anti-allergy sprays; Antiarrhythmic agents; Antiarrhythmics; Antibacterial acne preparations; Antibacterial clay preparations; Anti-bacterial face washes (Medicated -); Antibacterial facial cleanser; Antibacterial gels; Antibacterial hand lotions; Antibacterial handwash; Antibacterial handwashes; Antibacterial lathering cleanser; Antibacterial mouthwashes; Anti-bacterial pharmaceutical preparations; Antibacterial pharmaceuticals; Antibacterial preparations; Anti-bacterial preparations; Antibacterial soap; Anti-bacterial soap; Antibacterial sprays; Antibacterial substances for medical purposes; Antibacterial substances for medical use; Antibacterials for pharmaceutical use; Antibiotic creams; Antibiotic dermatological products; Antibiotic food supplements for animals; Antibiotic handwash; Antibiotic ointments; Antibiotic preparations; Antibiotic tablets; Antibiotics; Antibiotics for detoxification purposes; Antibiotics for fish; Antibiotics for human use; Antibiotics for use in dentistry; Antibiotics for veterinary use; Antibiotics in the form of lotions; Antibodies; Anti-cancer drugs; Anticancer preparations; Anti-cancer preparations; Anti-cancer preparations from hormones and antagonists; Anti-cancer preparations of chemical origin; Anti-cancer preparations of microbial origin; Anti-cancer preparations of plant origin; Anticatarrhals for detoxification purposes; Anticavity mouth rinses for medical purposes; Anticavity mouthwash; Anticoagulants; Anticonvulsants; Anti-cough drops; Anticryptogamic preparations; Antidepressants; Anti-dermo-infectives; Antidiabetic pharmaceuticals; Anti-diabetic pharmaceuticals; Antidiabetic preparations; Anti-diabetic preparations; Antidotes; Antiemetics; Antiemetics for morning sickness; Anti-emetics obtained from chemical sources; Anti-emetics obtained from plant sources; Anti-emetics used for treating nausea; Anti-emetics used for treating vomiting; Antiepileptic drugs; Anti-epileptic pharmaceutical preparations; Antiflatulants; Antifungal antibiotics; Antifungal creams for medical use; Anti-fungal dermatological preparations for use on the nails; Antifungal medication; Antifungal preparations; Antigens; Antihemorrhoidal ointments; Antihemorrhoidal preparations; Antihemorrhoidal suppositories; Antihistamines; Anti-horsefly oils; Anti-horse-fly oils;

Antihypertensives; Anti-infective antibiotics; Anti-infective preparations; Anti-infective preparations for veterinary use; Anti-infective products for veterinary use; Anti-infectives; Anti-inflammatories; Anti-inflammatory analgesic plasters; Anti-inflammatory gels; Anti-inflammatory ointments; Anti-inflammatory preparations; Anti-inflammatory salves; Anti-inflammatory sprays; Anti-insect spray; Anti-insect sprays; Anti-itch creams; Anti-itch ointments; Anti-leprotic agents; Anti-malarials; Antimicrobial clay; Antimicrobial facewashes; Anti-microbial handwash; Antimicrobial mouthwashes; Anti-microbial preparations; Antimicrobial preparations for inhibiting microbiological decomposition; Antimicrobials for dermatologic use; Antimigraine drugs; Anti-motion sickness agents; Antimuscarinic antispasmodics; Anti-nauseants; Antineoplastic drugs; Anti-neoplastic preparations from hormones and antagonists; Anti-neoplastic preparations of chemical origin; Anti-neoplastic preparations of microbial origin; Anti-neoplastic preparations of plant origin; Antineoplastics; Anti-oxidant food supplements; Antioxidant pills; Anti-oxidant supplements; Antioxidants; Anti-oxidants comprising enzymes; Anti-oxidants derived from honey; Anti-oxidants for dietary use; Anti-oxidants for medicinal use; Anti-oxidants obtained from herbal sources; Anti-parasitic collars; Antiparasitic collars for animals; Anti-parasitic collars for animals; Antiparasitic preparations; Antiparasitic preparations for pets; Antiparasitic preparations from chemical sources; Antiparasitic preparations from plant sources; Antiparasitics; Antiparkinson agents; Antipyretic analgesics; Antipyretic drugs with sedative effect; Antipyretic preparations; Antipyretics; Anti-sarcoma preparations; Antiseizure drugs; Antiseptic body care preparations; Antiseptic cleansers; Antiseptic cotton; Antiseptic liquid bandages; Antiseptic mouthwashes; Antiseptic mouthwashes for rinsing; Antiseptic ointments; Antiseptic preparations; Antiseptic preparations for wound care; Antiseptic sprays in aerosol form for use on hard surfaces; Antiseptic sprays in aerosol form for use on the skin; Antiseptic washing preparations; Antiseptics; Antiseptics with prophylactic effect; Antiseptics with therapeutic effect; Antiserums for diagnostic purposes; Antispasmodics; Anti-syphilitics; Antitoxic sera; Antitoxins; Antituberculous drugs; Anti-tuberculous preparations; Antitumor drugs; Anti-tussive expectorants; Antitussives; Anti-uric preparations; Antivenins; Antivenom for the treatment of bites; Antivenom for the treatment of stings; Anti-viral agents; Antiviral antibiotics; Antiviral drugs for treating

HIV; Antiviral drugs for treating influenza; Antiviral preparations; Antiviral prodrugs; Antivirals; Appetite stimulant preparations; Appetite suppressant pills; Appetite suppressants; Appetite suppressants for medical purposes; Aquatic algaecide; Aquatic herbicides; Aquatic weed killers; Arachnicides; Arisaema roots for medical purpose; Arsenic detoxification agents for medical purposes; Arterial grafts; Artificial sweeteners adapted for diabetics; Artificial tea [for medicinal use]; Artificial tears; Aseptic cotton; Aspirin; Aspirin in tablet form; Asthma treatment preparations; Asthmatic tea; Astringents for medical purposes; Astringents for medical use; Astringents [pharmaceutical]; Athlete's foot lotions; Athletes' foot powders; Athlete's foot preparations; Attractants for pet animals; Autoantigens; Automobile deodorizers; Autonomic drugs; Autonomic drugs for medical purposes; Babies' creams [medicated]; Babies' diaper-pants; Babies' diapers; Babies' diapers [napkins]; Babies' diapers of cellulose or paper; Babies' diapers of paper; Babies' disposable diaper pants of cellulose; Babies' disposable diaper pants of paper; Babies' disposable napkins made of cellulose; Babies' disposable napkins made of paper; Babies' food; Babies' napkin-pants; Babies' napkin-pants [diaper-pants]; Babies' napkins; Babies' napkins [diapers]; Babies' napkins made of paper; Babies' nappies; Babies' nappies [paper or cellulose]; Babies' swim diapers; Baby diapers; Baby food; Baby foods; Bacteria fighting cleanser; Bacteria poisons; Bacteria removers; Bacterial poisons; Bacterial preparations for medical and veterinary use; Bacterial preparations for medical purposes; Bacterial preparations for veterinary purposes; Bactericides; Bacteriological culture mediums; Bacteriological cultures (Bouillons for -); Bacteriological cultures (Media for -); Bacteriological preparations for medical and veterinary use; Bacteriological preparations for medical purposes; Bacteriological preparations for pharmaceutical use; Bacteriological preparations for veterinary purposes; Balms for medical purposes; Balms for pharmaceutical purposes; Balsamic preparations for medical purposes; Bandages for dressings; Bandages for making casts; Bandages for skin wounds; Bandages for the oral cavity; Bandages for the prevention of blisters; Bandages (Hygienic -); Bandages (Menstruation -); Bands (Adhesive -), for medical purposes; Barium for X-ray use; Bark extract for medical use; Bark extract for nutraceutical use; Bark extract for pharmaceutical use; Bark extract for veterinary use; Bark for nutraceutical purposes; Bark powder for medical use; Bark powder for veterinary use; Barks for

pharmaceutical purposes; Barrier lotions for protection against poisonous plants; Barrier lotions for protection from toxic oils of poisonous plants; Bath preparations for medical purposes; Bath preparations, medicated; Bath salts for medical purposes; Bath (Therapeutic preparations for the -); Baths (Oxygen -); Baths (Salts for mineral water -); Bee pollen for nutraceutical use; Bee pollen for use as a dietary food supplement; Behaviour modifying chemicals for controlling pests; Belts for sanitary napkins [towels]; Benzol detoxification agents for medical purposes; Beta blockers; Beverages adapted for medicinal purposes; Beverages for infants; Bicarbonate of soda for pharmaceutical purposes; Biochemical preparations for medical use; Biochemical preparations for veterinary use; Biocides; Biological adjuvants for medical purposes; Biological fungicides; Biological herbicides; Biological implants; Biological indicators for monitoring sterilization processes for medical or veterinary purposes; Biological preparations for medical purposes; Biological preparations for the treatment of cancer; Biological preparations for veterinary purposes; Biological reagents for medical use; Biological reagents for veterinary use; Biological tissue cultures for medical purposes; Biological tissue cultures for veterinary purposes; Biological tissue for implantation; Biopharmaceuticals for the treatment of cancer; Biotechnological preparations for medical use; Bird repellants; Bismuth preparations for pharmaceutical purposes; Bismuth subnitrate for pharmaceutical purposes; Blood cleaners for detoxification purposes; Blood components; Blood for medical purposes; Blood plasma; Blood protein fractions; Blood substitutes; Blood tonics; Body creams for pharmaceutical use; Body creams [medicated]; Body gels for pharmaceutical use; Bonding and primer materials for dental purposes; Bone cement for medical purposes; Bone cement for surgical and orthopaedic purposes; Bone cement for surgical and orthopedic purposes; Bone cements for orthopaedic purposes; Bone cements for surgical purposes; Bone fillers consisting of living materials; Bone growth media consisting of biological materials for medical purposes; Bone void fillers consisting of natural materials; Bouillons for bacteriological cultures; Bowel evacuant preparations; Bracelets impregnated with insect repellent; Bread (Diabetic -) adapted for medical use; Bread products for diabetics; Breast-nursing pads; Breath refreshers for medical purposes; Breath-freshening chewing gum for medicinal purposes; Bromine for pharmaceutical purposes; Bronchial dilators;

Bronchodilating preparations; Bunion pads; Burn dressings; Burn relief medication; Burns (Preparations for the treatment of -); By-products of the processing of cereals for dietetic or medical purposes; By-products of the processing of cereals for medical purposes; Cachets for medicinal purposes; Cachets for pharmaceutical purposes; Cachou for pharmaceutical purposes; Caffeine preparations for medical use; Caffeine preparations for stimulative use; Calamine lotion; Calcium channel blockers; Calcium chews for medical use; Calcium fortified candy; Calcium supplements; Calcium tablets as a food supplement; Callouses (Preparations for -); Calomel; Calomel [fungicide]; Camphor for medical purposes; Camphor oil for medical purposes; Candy for medical purposes; Candy, medicated; Cantharides extract for pharmaceutical use; Cantharides (Powder of -); Cantharides preparations for medical use; Cantharides preparations for veterinary use; Capillary lotions (Medicated -); Capillary stabilizing agents for medical purposes; Capsules for medicines; Capsules for pharmaceutical purposes; Capsules made of dendrimer-based polymers, for pharmaceuticals; Capsules sold empty for pharmaceuticals; Car air freshener; Car air fresheners; Car deodorants; Carbolineum [parasiticide]; Cardiotonics; Cardiovascular agents for medical purposes; Cardiovascular drugs for use in treating hypertension; Cardiovascular drugs used in angina pectoris; Cardiovascular drugs used in myocardial infarction; Cardiovascular drugs used in treating arrhythmias; Cardiovascular drugs used in treating congestive heart failure (CHF); Cardiovascular drugs used in treating shocks; Cardiovascular pharmaceutical preparations; Cardiovascular pharmaceuticals; Cardiovascular preparations; Carpet deodorizers; Casein dietary supplements; Castor oil as a coating for pharmaceuticals; Castor oil for medical purposes; Castor oil [for medical purposes]; Cat repellents; Cattle washes; Cattle washes [insecticides]; Caustic pencils; Caustics for pharmaceutical purposes; Cedar wood for use as an insect repellent; Cells for medical use; Cellular function activating agents for medical purposes; Cellulose esters for pharmaceutical purposes; Cellulose ethers for pharmaceutical purposes; Cellulose for pharmaceutical purposes; Cellulose wadding for medical purposes; Cellulose wool for medical use; Cellwall synthesis inhibitors; Cement for animal hooves; Cements for dental prostheses; Central nervous system stimulants; Ceramic alloys used in dental crowns; Ceramic materials for dental use for fillings; Ceramic materials for

use as dental fillings; Ceramics for the construction of dentures; Ceramics for use in the reconstruction of dentures; Cerebral hemorrhage prophylactic agents; Charcoal for pharmaceutical purposes; Chemical adjuvants for medical purposes; Chemical conductors for electrocardiograph electrodes; Chemical conductors for use with ekg electrodes; Chemical conductors for use with electrocardiograph electrodes; Chemical contraceptive sponges; Chemical contraceptives; Chemical diagnostic reagents for medical use; Chemical pessaries; Chemical preparations for medical purposes; Chemical preparations for pesticidal purposes; Chemical preparations for pharmaceutical purposes; Chemical preparations for sanitary purposes; Chemical preparations for sanitary use; Chemical preparations for testing blood for medical purposes; Chemical preparations for the diagnosis of diabetes; Chemical preparations for the diagnosis of pregnancy; Chemical preparations for treating diseases affecting cereal plants; Chemical preparations for treating diseases affecting vine plants; Chemical preparations for treating mildew; Chemical preparations for treating phylloxera; Chemical preparations for treating wheat blight; Chemical preparations for treating wheat smut; Chemical preparations for use in dna analysis [medical]; Chemical preparations for veterinary purposes; Chemical preparations to treat mildew; Chemical preparations to treat wheat blight; Chemical preparations to treat wheat blight [smut]; Chemical preparations to treat wheat smut; Chemical reagents for medical or veterinary purposes; Chemical reagents for medical use; Chemical reagents for veterinary use; Chemical test reagents [medical]; Chemical test reagents [veterinary]; Chemically treated papers for use in the detection of fecal occult blood; Chemicals for pharmaceutical use; Chemico-pharmaceutical preparations; Chemotherapeutics; Chewing gum for medical purposes; Chilblain preparations; Chinese traditional medicinal herbs; Chinoline for medical purposes; Chloramphenicol preparations; Chlorine detoxification agents for medical purposes; Chloroform; Cholesterol reducers; Chondroitin preparations; Chromatic alginate dental impression material; Chromatographic supports for medical use; Cigarettes (Tobacco-free -) for medical purposes; Cinchona for medical purposes; Clay for pharmaceutical use; Clay for treating skin conditions; Clay for use in mud baths [health spas]; Cleaners [preparations] for sterilising dental instruments; Cleaners [preparations] for sterilising surgical instruments; Cleaning cloths

impregnated with disinfectant for hygiene purposes; Cleaning preparations (Contact lens -); Cleaning preparations for contact lenses; Cleaning solvents for removing adhesive plasters; Cleansing solutions for medical use; Clinical diagnostic reagents; Clinical medical reagents; Cloth diapers; Clothing (Deodorants for -) and textiles; Coca alkaloid preparations for medical use; Cocaine; Coconut oil for medical purposes; Cod liver oil; Cod-liver oil capsules; Cod-liver oil drops; Cold cream for medical use; Cold sore treatment preparations; Collagen for medical purposes; Collars for animals (Antiparasitic -); Collodion for pharmaceutical purposes; Collyrium; Colostrum supplements; Colouring reagents for detecting dental plaque; Combinations of calcium salts for pharmaceutical use; Complementary feed; Composite materials for dental and dental technical purposes; Composite materials for dental purposes; Composite materials for dental use; Compounds for sanitising eggs; Compounds for treating cancer; Compounds for treating correlated pulmonary syndromes; Compounds for treating respiratory diseases; Compresses; Compresses for use as dressings; Compression bandages [dressings]; Conductive lacquer for dental purposes; Conductive lacquers for dental use; Conductors (Chemical -) for electrocardiograph electrodes; Condurango bark for medical purposes; Confectionery for medicinal purposes; Constipation (Medicines for alleviating -); Contact lens cleaning preparations; Contact lens cleaning solutions; Contact lens disinfectants; Contact lens solutions; Contact lens wetting solutions; Contact lenses (Solutions for use with -); Contraceptive foams; Contraceptive preparations; Contraceptive sponges; Contraceptives (Chemical -); Contrast media for in vivo imaging; Contrast media for use in medical imaging; Contrast media for use with medical equipment; Contrast media for use with medical ultrasound apparatus; Contrast media for use with X-ray equipment; Contrasting agents for diagnostic ultrasound imaging; Cooling sprays for medical purposes; Cord blood; Cord blood for medical purposes; Corn and callus creams; Corn pads; Corn plasters; Corn remedies; Corn rings for the feet; Coronary artery bypass grafts; Corrosive agents for the surface treatment of teeth; Cotton for medical purposes; Cotton for medical use; Cotton sticks for medical purposes; Cotton swabs for medical purposes; Cotton swabs for medical use; Cotton wool for medical purposes; Cotton wool for medical use; Cotton wool for pharmaceutical purposes; Cotton wool for surgical use; Cotton wool in the form

of buds for medical use; Cotton wool in the form of sticks for medical use; Cotton wool swabs for medical use; Cough capsules; Cough drops; Cough medicine; Cough mixtures; Cough pastilles for medical use; Cough suppressants; Cough syrups; Cough tablets; Court plaster; Cream of tartar for pharmaceutical purposes; Creams for dermatological use; Creams (Medicated -) for application after exposure to the sun; Creams (Medicated -) for the feet; Creams (Medicated -) for the lips; Creosote for pharmaceutical purposes; Croton bark; Croton bark for medical purposes; Crude drugs; Crystals for therapeutic purposes; Culture media for medical use; Culture media for veterinary use; Cultures for medical use; Cultures for veterinary use; Cultures of microorganisms for medical and veterinary use; Cultures of microorganisms for medical or veterinary use; Curare; Curare for medical purposes; Cyclooxygenase inhibitors; Cytostatic drugs for medical purposes; Cytostatics for medical purposes; Cytostatics for pharmaceutical purposes; Dandruff (Pharmaceutical preparations for treating -); Decoctions for pharmaceutical purposes; Decoctions of medicinal herb; Decongestant capsules; Decongestant nasal sprays; Decongestants; Delivery agents in the form of coatings for tablets that facilitate the delivery of nutritional supplements; Delivery agents in the form of dissolvable films that facilitate the delivery of nutritional supplements; Dementholized peppermint oil for medical purposes; Demineralised water for medical purposes; Dental abrasives; Dental adhesives; Dental alloys; Dental amalgams; Dental amalgams of gold; Dental anaesthetics; Dental blanks; Dental bonding material; Dental cement; Dental cement for fillings; Dental cements; Dental ceramic material; Dental ceramics; Dental composite materials; Dental composites; Dental etching materials; Dental impression materials; Dental lacquer; Dental mastics; Dental materials for duplicating models of teeth; Dental materials for making models of teeth; Dental materials for packing the teeth; Dental materials for stopping the teeth; Dental porcelain materials; Dental preparations and articles; Dental preparations and articles, and medicated dentifrices; Dental preparations for disclosing plaque; Dental resin cements; Dental resin for temporary bridges, crowns and veneers; Dental resins; Dental restoration compounds; Dental rinse; Dental stone; Dental varnishes for sealing teeth; Dental veneers for use in dental restoration; Dental wax; Dental wax for the preparation of dental moulds; Dental waxes; Denture base materials; Dentures (Adhesives for -); Deodorants for

clothing; Deodorants for clothing and textiles; Deodorants for refrigerators; Deodorants for textiles; Deodorants for upholstery; Deodorants, other than for human beings or for animals; Deodorising room sprays; Deodorizers and air purifiers; Deodorizers for garbage disposals; Deodorizers for litter trays; Deodorizing preparations for carpets; Deodorizing preparations for household, commercial or industrial use; Deodorizing room sprays; Depuratives; Dermatological pharmaceutical products; Dermatological pharmaceutical substances; Dermatological preparations; Detergents for medical purposes; Dextrins for pharmaceutical use; Diabetic bread adapted for medical use; Diabetic fruit juice beverages adapted for medical purposes; Diabetic fruit juice beverages adapted for medical use; Diabetic fruit nectars adapted for medical purposes; Diabetic fruit nectars adapted for medical use; Diagnosis of pregnancy (Chemical preparations for the -); Diagnostic agents for medical use; Diagnostic agents for pharmaceutical use; Diagnostic biomarker reagents for medical purposes; Diagnostic chemical reagents for medical use; Diagnostic preparations and materials; Diagnostic preparations for medical and veterinary use; Diagnostic preparations for medical or veterinary purposes; Diagnostic preparations for medical purposes; Diagnostic preparations for veterinary purposes; Diagnostic preparations for veterinary use; Diagnostic radiopharmaceutical preparations; Diagnostic reagents for medical use; Diagnostic reagents for medicinal use; Diagnostic substances for medical use; Diagnostic testing materials for medical use; Diaper liners; Diaper-pants (Babies' -); Diapers [babies' napkins]; Diapers for babies; Diapers for incontinence; Diapers for incontinents; Diapers for pets; Diapers made of cellulose; Diapers made of paper; Diaphoretics; Diarrhea medication; Diastase for medical purposes; Diet capsules; Dietary and nutritional preparations; Dietary and nutritional supplements; Dietary fiber; Dietary fiber to aid digestion; Dietary fibre; Dietary food supplements; Dietary food supplements used for modified fasting; Dietary pet supplements in the form of pet treats; Dietary supplement drink mixes; Dietary supplement drinks; Dietary supplemental drinks; Dietary supplements; Dietary supplements and dietetic preparations; Dietary supplements and dietetic preparations containing CBD oil; Dietary supplements consisting of vitamins; Dietary supplements consisting primarily of calcium; Dietary supplements consisting primarily of iron; Dietary supplements consisting primarily

of magnesium; Dietary supplements for animals; Dietary supplements for controlling cholesterol; Dietary supplements for human beings; Dietary supplements for human beings and animals; Dietary supplements for humans; Dietary supplements for humans not for medical purposes; Dietary supplements for infants; Dietary supplements for medical use; Dietary supplements for pets; Dietary supplements for pets in the nature of a powdered drink mix; Dietary supplements promoting fitness and endurance; Dietary supplements with a cosmetic effect; Dietetic and nutritional preparations; Dietetic beverages adapted for medical purposes; Dietetic beverages for babies adapted for medical purposes; Dietetic confectionery adapted for medical purposes; Dietetic food adapted for medical use; Dietetic food adapted for veterinary use; Dietetic food preparations adapted for medical purposes; Dietetic food preparations adapted for medical use; Dietetic foods adapted for infants; Dietetic foods adapted for invalids; Dietetic foods adapted for medical purposes; Dietetic foods adapted for medical use; Dietetic foods for medicinal purposes; Dietetic foods for use in clinical nutrition; Dietetic foodstuffs for medical purposes; Dietetic infusions for medical use; Dietetic preparations adapted for medical use; Dietetic preparations for children; Dietetic products for invalids; Dietetic products for medical purposes; Dietetic substances adapted for medical use; Dietetic substances adapted for veterinary use; Dietetic substances for babies; Dietetic sugar for medical use; Dietetic sugar substitutes for medical use; Dietetic sweeteners for medical purposes; Digestants; Digestive enzymes; Digestives for pharmaceutical purposes; Digitalin; Dihydropyridine calcium channel blockers; Dill oil for medical purposes; Diluents for medical use; Disinfectant dressings; Disinfectant soap; Disinfectant swabs; Disinfectants; Disinfectants and antiseptics; Disinfectants for chemical toilets; Disinfectants for contact lenses; Disinfectants for dental apparatus and instruments; Disinfectants for household use; Disinfectants for hygiene purposes; Disinfectants for hygienic purposes; Disinfectants for medical apparatus and instruments; Disinfectants for medical instruments; Disinfectants for medical use; Disinfectants for sanitary purposes; Disinfectants for sanitary use; Disinfectants for swimming pools; Disinfectants for veterinary use; Disinfectants impregnated into tissues; Disinfecting handwash; Disposable adult diapers; Disposable babies' diaper-pants; Disposable babies' diapers of paper and cellulose; Disposable babies' napkins of

cellulose; Disposable babies' napkins of paper; Disposable baby diapers; Disposable diapers; Disposable diapers for incontinence; Disposable diapers of cellulose for babies; Disposable diapers of cellulose for incontinents; Disposable diapers of paper for babies; Disposable diapers of paper for incontinents; Disposable liners for babies' diapers; Disposable liners for incontinence diapers; Disposable liners of cellulose for napkins; Disposable napkins for incontinents; Disposable napkins made of paper for infants; Disposable napkins of cellulose for babies; Disposable napkins of cellulose for incontinents; Disposable napkins of paper for babies; Disposable napkins of paper for incontinents; Disposable nappies; Disposable nappies made of cellulose for babies; Disposable nappies made of cellulose for incontinents; Disposable nappies made of cellulose for infants; Disposable nappies made of paper for babies; Disposable nappies made of paper for incontinents; Disposable nappies made of paper for infants; Disposable nappy liners; Disposable pads for incontinence; Disposable pants of cellulose for holding a babies' napkin in place; Disposable pants of paper for holding a babies napkin in place; Disposable paper diapers; Disposable pet diapers; Disposable sanitizing wipes; Disposable swim diapers for babies; Disposable swim diapers for children and infants; Disposable training pants; Disposable training pants [diapers]; Disposable training pants of cellulose for infants; Disposable training pants of paper for infants; Disposable training pants of paper or cellulose; Dissolvable strips to stop bleeding from minor cuts and grazes; Diuretic pharmaceutical preparations; Diuretic preparations; Diuretics; Diuretics for detoxification purposes; DNA synthesis inhibitors; Dog lotions for veterinary purposes; Dog washes [insecticides]; Dogs (Repellents for -); Domestic biopesticides; Domestic pesticides; Donkey-hide gelatin (Ejiao) for Chinese medicinal use; Double sided adhesive tapes for medical use; Douching preparations for medical purposes; Dragees [medicines]; Dressing retention materials; Dressings for wounds; Dressings, medical; Dressings (Surgical -); Dried Chinese boxthorn fruits for Chinese medicinal use; Drinks (Medicinal -); Drug delivery agents; Drug delivery agents in the form of coatings for tablets that facilitate the delivery of pharmaceutical preparations; Drug delivery agents in the form of dissolvable films that facilitate the delivery of pharmaceutical preparations; Drug delivery agents in the form of edible wafers for wrapping powdered pharmaceuticals; Drug delivery

agents that facilitate the delivery of pharmaceutical preparations; Drug detoxifying agents; Drugs for medical purposes; Dry rot fungus (Preparations for destroying -); Dysmenorrhea treatment preparations; Ear bandages; Ear candles; Ear candles for therapeutic purposes; Ear drops; Ectoparasite repellents; Edible fish oils for medical purposes; Effervescent analgesic pharmaceutical preparations; Effervescent vitamin tablets; Egg sanitizing preparations; Elastic bandages [dressings]; Elastic dressings; Electrocardiograph electrodes (Chemical conductors for -); Electrodes (Chemical conductors for electrocardiograph -); Electrolyte drinks for medical purposes; Electrolyte replacement beverages for medical purposes; Electrolyte solutions for medical use; Electrolytes for medical use; Elixirs for calming the skin; Elixirs for eczema; Elixirs for preventing chills; Elixirs for preventing colds; Elixirs for preventing throat infections; Elixirs for psoriasis; Elixirs for relieving asthma; Elixirs for relieving chills; Elixirs for relieving colds; Elixirs [pharmaceutical preparations]; Embedding material for dental use; Emetics; Emmenagogues; Emollients for medical purposes; Empty capsules for pharmaceuticals; Endogenous antigens; Enema preparations; Enzyme dietary supplements; Enzyme preparations for medical purposes; Enzyme preparations for veterinary purposes; Enzymes for medical purposes; Enzymes for veterinary purposes; Epidermal growth factor preparations for the treatment of burns; Epsom salts; Ergot for pharmaceutical purposes; Erythromycin preparations; Esters for pharmaceutical purposes; Estrogen preparations; Ethanol for pharmaceutical purposes; Ethers for medical use; Ethers for pharmaceutical purposes; Ethical medicinal preparations; Eucalyptol for pharmaceutical purposes; Eucalyptus for pharmaceutical purposes; Evacuants; Evacuants [purgatives]; Evening primrose oil for medical use; Exogenous antigens; Expectorants; Extracts of hops for pharmaceutical purposes; Extracts of medicinal herbs; Extracts of medicinal plants; Eye bandages for medical use; Eye compresses; Eye drops; Eye lotions for medical use; Eye ointment for medical use; Eye pads for medical use; Eye patches for medical purposes; Eyepatches for medical purposes; Eye-washes; Fabric deodorisers; Fabric deodorizers; Face cream (Medicated -); Face scrubs (Medicated -); Fat emulsions for medical infusions; Fat emulsions for parenteral hyperalimentation; Febrifuges; Feed supplements for veterinary use; Feeding stimulants for animals; Feminine hygiene pads; Feminine hygiene products; Fennel

for medical purposes; Ferments for medical or veterinary use; Ferments for pharmaceutical purposes; Ferments (Milk -) for pharmaceutical purposes; Fertility enhancement preparations; Fiber (Dietary -); Fibre (Dietary -); Filled first aid kits; Filled syringes for medical purposes [containing pharmaceuticals]; First aid boxes sold filled; First aid dressings; First aid kits; First aid kits for domestic use; First-aid boxes, filled; First-aid kits; Fish meal for pharmaceutical purposes; Fish oil for medical purposes; Fissure sealant for dental and dental technical purposes; Fissure sealants for dental use; Fitness and endurance supplements; Fixing materials for dental purposes; Fixing materials for dental use; Flaxseed dietary supplements; Flaxseed for pharmaceutical purposes; Flaxseed meal for pharmaceutical purposes; Flaxseed oil dietary supplements; Flea collars; Flea exterminating preparations; Flea powders; Flea sprays; Flour for pharmaceutical purposes; Flowers of sulfur for pharmaceutical purposes; Flowers of sulphur for pharmaceutical purposes; Fly catching adhesive; Fly catching adhesives; Fly catching paper; Fly combating preparations; Fly destroying preparations; Fly glue; Fly paper; Fodder additives for medical purposes; Fodder supplements for veterinary purposes; Folic acid synthesis inhibitors; Food additives (Medicated -) for animals; Food esters for pharmaceutical purposes; Food for babies; Food for diabetics; Food for infants; Food for medically restricted diets; Food supplements; Food supplements consisting of amino acids; Food supplements consisting of trace elements; Food supplements for dietetic use; Food supplements for medical purposes; Food supplements for non-medical purposes; Food supplements for sportsmen; Food supplements for veterinary use; Food supplements in liquid form; Foodstuffs for diabetics [specially made for]; Foot balms (Medicated -); Foot care preparations for medical use; Foot creams (Medicated -); Foot perspiration (Remedies for -); Foot rot vaccines; Forestry (chemicals for -), [fungicides]; Forestry (chemicals for -), [herbicides]; Forestry (chemicals for -), [insecticides]; Forestry (chemicals for -), [parasiticide]; Formic aldehyde for pharmaceutical purposes; Freeze-dried food adapted for medical purposes; Freeze-dried meat adapted for medical purposes; Frostbite salve for pharmaceutical purposes; Fumigants; Fumigating pastilles; Fumigating sticks; Fumigating sticks as disinfectants; Fumigation preparations for medical purposes; Fungicidal fungal agents; Fungicidal preparations; Fungicides; Fungicides for agricultural use; Fungicides for

domestic use; Fungicides for horticultural use; Fungicides for killing vermin; Fungicides for medical use; Galactagogues; Gallic acid for pharmaceutical purposes; Gamboge for medical purposes; Ganoderma lucidum spore powder dietary supplements; Gas mixtures for medical use; Gases and gas mixtures for medical imaging use; Gases for dental use; Gases for medical purposes; Gastroenteric preparations; Gastrointestinal cleaning agents; Gastrointestinal preparations; Gauze; Gauze compresses; Gauze for dressings; Gauzes for use as dressings; Gelatin capsules for pharmaceuticals; Gelatine for medical purposes; Gels for dermatological use; General anaesthetics; General anesthetics; Genetic identity tests comprised of reagents for medical purposes; Gentian for pharmaceutical purposes; Germicidal detergents; Germicidal preparations [other than soap]; Germicides; Ginseng capsules for medical purposes; Ginseng for medicinal use; Glossy ganoderma for pharmaceutical purposes; Glucose dietary supplements; Glucose for medical purposes; Glucose for use as an additive to foods for medical purposes; Glucose preparations for medical purposes; Glue coated strips for use against vermin; Glue (Fly -); Glycerine for medical purposes; Glycerophosphates; Gold amalgam for dental purposes; Gold (Dental amalgams of -); Goulard water; Gravel as a digestive aid for birds; Greases for medical or veterinary purposes; Greases for medical purposes; Greases for veterinary purposes; Ground flaxseed fiber for use as a dietary supplement; Guaiacol for pharmaceutical purposes; Gum for medical purposes; Gummed taffeta plasters; Gummy vitamins; Gurjun balsam for medical purposes; Gurjun [gurjon, gurjan] balsam for medical purposes; Gypsum for dental purposes; Haematogen; Haemoglobin; Haemorrhoid preparations; Haemostatic pencils; Haemostatic preparations; Hair growth preparations (Medicinal -); Hair growth stimulants; Hand creams for medical use; Hand lotion (Medicated -); Hand-sanitizing preparations; Health food supplements for persons with special dietary requirements; Health food supplements made principally of minerals; Health food supplements made principally of vitamins; Heating patches for medical purposes; Heatstroke treating agents; Hematogen; Hemoglobin; Hemorrhoid preparations; Hemorrhoidal ointments; Hemostatic pencils; Hemostatics for medical purposes; Herb teas for medicinal purposes; Herbal anti-itch ointments for pets; Herbal beverages for medicinal use; Herbal compounds for medical use; Herbal creams for medical use;
