**TRADE MARKS ACT 1994  
IN THE MATTER OF APPLICATION NUMBER 3250658  
BY HELEN ROSEMARY BROWN  
TO REGISTER THE FOLLOWING TRADE MARK IN CLASS 30:**

**mouth wateringly special**

**TRADE MARKS ACT 1994  
IN THE MATTER OF APPLICATION NUMBER 3250658  
BY HELEN ROSEMARY BROWN  
TO REGISTER THE FOLLOWING TRADE MARK IN CLASS 30:**

## **mouth wateringly special**

### **Background**

1. On 16 August 2017 Helen Rosemary Brown ('the applicant') applied to register the above mark for goods in class 30 as listed in Annex A of this decision.
2. On 25 August 2017, the Intellectual Property Office ('IPO') issued an examination report in response to the application. In that report, an objection was raised under section 3(1)(b) of the Trade Marks Act 1994 ('the Act') which read as follows:

*"The application is not acceptable in Class 30. There is an objection under Section 3(1)(b) of the Act as the mark is devoid of any distinctive character. This is because the expression 'mouth wateringly special' merely serves a promotional and laudatory function e.g. the average consumer would perceive the expression 'mouth wateringly special' as a laudatory message with the purpose of highlighting a positive attribute of the goods being offered.*

*It is considered that the average consumer, when greeted with the sign 'mouth wateringly special' would not attribute any trade mark significance to the expression and would instead merely perceive the sign as a promotional intimation that the food products provided by the applicant are better than the average product and have an incredible taste.*

*As a result, I feel the mark is non-distinctive for the goods applied for in Class 30 and therefore would fail to function as a Trade Mark for these goods"*

3. On 8 September 2017 the applicant responded saying that she could not accept our decision as the same mark had already been accepted and registered in class 35<sup>1</sup> for the *retailing* of food, and the expression implied the same message in both classes. She went on to say that the message intended is that the products are of better quality, content and taste. The examiner was not persuaded by these arguments and so wrote to the applicant on 11 September 2017, maintaining the objection. Following this, the applicant requested an *ex parte* hearing.
4. At the hearing, which was attended by the applicant's husband Mr Brown, I explained why the objection had been raised i.e. that the average consumer would perceive the expression 'mouth wateringly special' as indicating that the goods are mouth-wateringly

---

<sup>1</sup> 3226567 'mouthwateringly special'; here, the words 'mouth' and 'wateringly' are conjoined but this is unlikely to be seen as adding distinctive character

tasty and/or delicious and so would not give it any trade mark significance. Mr Brown referred to the Registrar's earlier acceptance of an identical mark in class 35, reiterating points made by Mrs Brown in her written submissions. In response to Mr Brown's submissions regarding the earlier acceptance, I emphasised the difference between the two applications. The registered mark was for retail services and this would affect the assessment of the distinctive character of the mark. You would not describe *services* as being mouth wateringly delicious in the way that you would describe foodstuffs as being so. I maintained the objection and refused the application at the hearing, confirming this in writing on 10 October 2017.

5. Following my refusal, the applicant, who was unhappy with our decision, wrote on 10 October 2017 asking why we had registered signs such as '*Papa Johns - Better Ingredients - Better Pizza*' (3225117) and the Specsavers mark – *SHOULD'VE* (3175246). The applicant also criticised the highly subjective nature of the way in which trade marks are examined and went on to ask about the procedure for appealing against an *ex parte* decision. I responded to the applicant on the same day, explaining why we had accepted the marks referred to and provided a further explanation of the appeals procedure.
6. On 9 November 2017, the applicant submitted a form TM5 requesting a statement of the reasons for the decision. I am now asked under section 76 of the Act and rule 69 of the Trade Marks Rules 2008 ('the Rules') to state in writing the grounds of my decision and the materials used in arriving at it. No formal evidence has been put before me for the purposes of demonstrating acquired distinctiveness. Therefore I only have the *prima facie* case to consider.

### **The Law**

7. Section 3(1) of the Act reads as follows:

*3.-(1) The following shall not be registered -*

*(a) ...*

*(b) trade marks which are devoid of any distinctive character,*

*(c) ...*

*(d) ...*

*Provided that, a trade mark shall not be refused registration by virtue of paragraph (b), (c) or (d) above if, before the date of application for registration, it has in fact acquired a distinctive character as a result of the use made of it."*

### **The relevant legal principles - section 3(1)(b)**

8. The Court of Justice of the European Union ('CJEU') has emphasised the need to interpret the grounds for refusal of registration listed in Article 3(1) of Directive

2008/95/EC ('the Directive', being the codified version of the original Directive 89/104/EEC) and Article 7(1) of Council Regulation (EC) No 207/2009 ('the Regulation', being the codified version of original Council Regulation 40/94), in the light of the general interest underlying each of them (Case C-37/03P, *Bio ID v OHIM*, para 59 and the case law cited there and, e.g. Case C-273/05P *Celltech R&D Ltd v OHIM*).

9. The general interest to be taken into account in each case must reflect different considerations according to the ground for refusal in question. In relation to section 3(1)(b) (and the equivalent provisions referred to above upon which section 3(1)(b) is based) the Court has held that "...*the public interest... is, manifestly, indissociable from the essential function of a trade mark*" (Case C-329/02P *Satelliten Fernsehen GmbH v OHIM 'SAT.1'*). The essential function thus referred to is that of guaranteeing the identity of the origin of the goods or services offered under the mark to the consumer or end user by enabling him, without any possibility of confusion, to distinguish the product or service from others which have another origin (see paragraph 23 of the above mentioned judgment). Marks which are devoid of distinctive character are incapable of fulfilling that essential function. Moreover, the word 'devoid' has, in the UK at least, been paraphrased as meaning 'unpossessed of' from the perspective of the average consumer.
10. Section 3(1)(b) must include within its scope those marks which, whilst not designating a characteristic of the relevant goods and services (i.e. not being necessarily descriptive), will nonetheless fail to serve the essential function of a trade mark in that they will be incapable of designating origin. In terms of assessing distinctiveness under section 3(1)(b), the CJEU provided guidance in *Koninklijke KPN Nederland NV v Benelux Merkenbureau (Postkantoor)* C-363/99 where, at paragraph 34, it stated:

*"A trade mark's distinctiveness within the meaning of Article 3(1)(b) of the Directive must be assessed, first, by reference to those goods or services and, second, by reference to the perception of the relevant public, which consists of average consumers of the goods or services in question, who are reasonably well informed and reasonably observant and circumspect (see inter alia Joined Cases C-53/01 to C-55/01 Linde and Others 5 [2003] ECR I-3161, para 41, and Case C-104/01 Libertel [2003] ECR I-3793, paras 46 and 75)."*
11. So the question of a mark being devoid of any distinctive character is assessed by reference to the goods and/or services applied for, and by reference to the perception of the average consumer for those goods and/or services. I should also add that being 'devoid of any distinctive character' does not represent an objective standard, but is based upon an assessment which concludes that the sign presented for registration is 'unpossessed' of distinctive character from the perspective of the average consumer. Since, in the relevant authorities' assessment, the sign is unpossessed of distinctive character (this has been, in turn, paraphrased as being 'origin-neutral' as distinct from 'origin-specific'), the sign is not considered capable of performing the essential function of a trade mark.
12. In applying that assessment to this case, it is important that I am convinced that the objection applies to all the goods and services applied for. If there are goods and

services specified which are free of objection under section 3(1)(b), then they must be allowed to proceed. In CJEU Case C-239/05 *BVBA Management, Training en Consultancy v Benelux-Merkenbureau*, the question being referred to the court was whether the Directive, on which the Act is based, must be interpreted as meaning that the competent authority is required to state its conclusion separately for each of the individual goods and services specified in the application. The court answered (paragraph 38), saying that the competent authority was required to assess the application by reference to individual goods and services. However, where the same ground of refusal is given for a category or group of goods or services, the competent authority may use only general reasoning for all the goods and services concerned. This guidance by the European authorities has been applied and interpreted in relation to the approach taken by the relevant UK authorities and which can be found in Tribunal Practice Notice ('TPN') 1/2012 headed 'Partial Refusals'.

13. In addition to considering the objection in respect of all the goods claimed I then need to assess whether promotional slogans can fulfil the function of a distinctive trade mark. Following from the CJEU guidance on cases such as *Sykes Enterprises v OHIM (Real People Real Solutions)* [2002] ECR II-5179, there had been a tendency to assume that promotional statements cannot possess the necessary distinctive character to indicate trade origin. This sort of assessment was based on the assumption that consumers are not in the habit of regarding slogans as trade marks, but instead regard them as purely promotional, non-distinctive material. Following the CJEU decision in Case C-398/08P *Audi AG v OHIM ('Vorsprung Durch Technik')* we now know that this is only part of the consideration that must be made. In paragraph 44 of that decision, the Court stated:

*"... while it is true... that a mark possesses distinctive character only in so far as it serves to identify the goods or services in respect of which registration is applied for as originating from a particular undertaking, it must be held that the mere fact that a mark is perceived by the relevant public as a promotional formula, and that, because of its laudatory nature, it could in principle be used by other undertakings, is not sufficient, in itself, to support the conclusion that the mark is devoid of distinctive character."*

14. It is also a well-established principle these days that the Registrar's role in examination will involve a full and stringent examination of the facts, underlying the Registrar's frontline role in preventing the granting of undue monopolies, see, to that effect, CJEU Case C-51/10 P, *Agencja Wydawnicza Technopol sp. z o.o. v OHIM* [2011] ECR I 1541. Whilst this case was, technically speaking, in relation only to section 3(1)(c) or its equivalent in European law, the principle about the 'prevention of undue monopolies' must hold good whether section 3(1)(b) and/or (c) applies.

### **Application of legal principles - section 3(1)(b)**

15. In arriving at my decision, I first have to identify who the average consumer for the goods covered by the application is. The specification covers a very wide range of edible products in class 30. Some are 'everyday' foodstuffs and beverages such as tea and cocoa, whilst others are more unusual such as e.g. 'Japanese arrowroot powder' and 'Korean traditional pressed sweets'. For both the former and latter types of foods, I

consider it reasonable to assume the relevant consumer to be the general public. The level of consumer attention for the 'everyday' low cost goods covered by the application is likely to be low. Regarding the more unusual goods, supermarkets now stock a wide range of unusual foods from overseas which once may have only been available in specialist shops. Television shows and magazines give information on many International cuisines leading consumers to become familiar with such cuisines and their unusual ingredients. Therefore although the level of consumer attention may be slightly higher for the more unusual goods, it would not constitute the high level of attention given to the purchase of highly specialised, high cost goods.

16. I now have to decide whether the sign applied for, used in relation to the goods claimed, would be seen as one which lacks any capacity *prima facie* to distinguish the products of one trader from those of another. I must consider the perception of the average consumer when seeing the words 'mouth wateringly special' in normal and fair use in relation to the goods claimed. Taking into account the fact that all of the goods claimed are those to be eaten or drunk I feel that the objection is valid in respect of all the goods. Some of the goods are the finished product which can be eaten immediately and could be considered to be mouth wateringly special. The objection would be equally valid in relation to those goods which are ingredients for the finished product, as when seeing these words on such goods, consumers are likely to consider that these ingredients would make the finished product mouth wateringly special. One must be aware that the test is one of immediacy or first impression, as confirmed in the decision of *Real People Real Solutions* referred to above, where it was stated:

*"a sign which fulfils functions other than that of a trade mark is only distinctive for the purposes of Article 7(1)(b) of Regulation No 40/94 if it may be perceived immediately as an indication of the commercial origin of the goods or services in question, so as to enable the relevant public to distinguish, without any possibility of confusion, the goods or services of the owner of the mark from those of a different commercial origin."*

17. To make any assessment, it is necessary to start with a linguistic analysis of the words appearing in the mark in order to assess whether or not it is capable of performing the essential function of a trade mark. And although it is important that any assessment of distinctiveness takes into account the mark's totality, it is also necessary to take into account the meaning of the individual parts of the mark.
18. The mark applied for consists of the phrase 'mouth wateringly special'. The Merriam-Webster online dictionary defines 'mouth wateringly' as being an adverb of the verb 'mouth watering' which itself means "*arousing the appetite; tantalizingly delicious or appealing*". One of the definitions of the word 'special' in that same dictionary is "*distinguished by some unusual quality; especially: being in some way superior*".
19. Used in respect of the goods intended for protection, I do not believe that consumers would perceive the phrase 'mouth wateringly special' as being anything other than a claim to those goods being of a superior quality, reflected in the fact that they will make one's mouth water. In this application, the sign appears in plain word type and has no stylisation, device elements or unusual grammatical juxtaposition to give it any

distinctive character. It is highly unlikely that the words alone would indicate, to consumers, the trade origin of the goods.

20. The objection in the original report stated that the mark was unacceptable because it sent a promotional and laudatory message. Although I consider the examiner was correct in raising an objection against this mark on the grounds of non-distinctiveness I do not think it was appropriate to base that objection around the promotional nature of the mark. In the *Audi* decision (referred to in paragraph 13 above), the Court acknowledged that the fact that a slogan-type mark carries a promotional message does not, by itself, constitute a basis for refusal i.e. a slogan can still denote commercial origin even if it is simultaneously performing a promotional purpose. In paragraph 47 of that decision, the court confirmed that characteristics such as having a number of meanings, being a play on words, or being perceived of as imaginative, surprising and/or unexpected are, as a rule, likely to endow a sign with distinctive character (whilst also noting that such characteristics are not essential pre-requisites for a finding of distinctive character). The message to be taken from such comments is that one should avoid deeming a sign as being devoid of any distinctive character simply because it performs a promotional function.
21. I have to decide whether the mark, which could be considered a promotional statement, has any qualities which could raise this promotional message into a distinctive indicator of trade origin. It is clear from the comments of the Court that where a sign (whether used in a promotional capacity or not) possesses 'originality' and 'resonance', and is capable of being remembered because of qualities arising from *inter alia* word-play, imagination, creativity or unexpectedness, then it cannot be considered to be completely devoid of distinctive character. Having made a full semantic analysis of this sign, without pre-conception or pre-emption, and taking into account all known and relevant surrounding circumstances, I do not consider it to have any of the qualities that would enable this sign to be seen as a trade mark. The mark is not, in any way, imaginative, surprising or unexpected. Used on or in respect of foodstuffs and beverages, it merely informs one that they are 'mouth wateringly special'. In this respect, I have considered the comments made by the Appointed Person in BL O-353-10 *BRING THE WORLD CLOSER* where, at page 15, the following is stated:

*"The expression... is caught by the exclusion from registration in section 3(1)(b) because it is liable to be perceived and remembered by the relevant average consumer as nothing more than an origin-neutral statement about the [goods] concerned. It appears to me to involve no verbal manipulation or engineering of the kind which, in other cases, has been recognised as sufficient to turn explanatory phraseology into a sign possessed of a distinctive character."*
22. I do not believe that the sign in question has any features that would render it memorable in the eyes of the consumer. I consider it to be nothing more than a positive message about the mouth-watering qualities of the goods it is intended for use in respect of, and so the objection raised against the mark is valid.
23. When considering the objection, I also have to consider whether this objection applies to all the goods claimed (see paragraph 12 above). In this case the goods are all those

which are to be eaten or drunk, and so the phrase 'mouth wateringly special' could reasonably be applied to any and all of them. Therefore the objection applies to all the goods covered by the application.

**24. Section 3(1)(c)**

The examiner only raised an objection under Section 3(1)(b) of the Act and it was this objection that was discussed at the hearing and addressed in this decision. However, given the nature of the mark, it could be argued that an objection under Section 3(1)(c) would also have been appropriate. Section 3(1)(c) of the Act states that mark "*which consist exclusively of signs or indications which may serve, in trade, to designate the kind, quality, quantity, intended purpose, value, geographical origin, the time of production of goods or of rendering of services, or other characteristics of goods or services*" shall not be registered. At paragraph 18 I undertook a linguistic analysis of the words appearing in the mark, and from the dictionary definitions of the words it is clear that they can be seen as indicating a descriptive of a quality of the goods, i.e. those goods which are mouth wateringly special. Therefore, on consideration, I feel that an objection under Section 3(1)(c) would have been appropriate. However, the fact that such an argument may have been appropriate does not detract from the validity of the 3(1)(b) objection under which the mark has been refused.

**Conclusion**

25. Having assessed the mark applied for, and taking into account relevant case law, I do not believe the mark to have any distinctive character. In this decision, I have considered all the papers filed and submissions made. For the reasons given above, the application is refused under section 3(1)(b) in relation to all of the goods claimed.
