computer peripheral devices; downloadable computer software for accessing, browsing, and searching online databases, audio, video, and multimedia content, games, software applications, software application marketplaces; cloud-connected and voice-controlled smart audio speakers with virtual personal assistant capabilities; downloadable computer programs and downloadable computer software for machine-learning based language and speech processing software; voice-controlled information devices; downloadable computer chatbot software for simulating conversations; downloadable computer software for use as an application programming interface (API); wireless handheld devices; downloadable voice-enabled software applications for personal information management; wireless controllers to monitor and control the functioning of other electronic devices; downloadable computer software programs for developing computer software applications; downloadable computer software for use to connect and control internet of things (IoT) electronic devices; downloadable computer software using artificial intelligence (AI) for the production of speech, text, images, video, sound, and code; downloadable speech to text conversion software; downloadable computer software used for controlling wireless handheld devices, gaming devices, and toys; downloadable computer software for use in retail store operation and ordering services for a wide variety of consumer goods, namely, to facilitate e-commerce transactions; downloadable home automation and home device integration software; downloadable voice command and recognition software; downloadable computer software for building, managing, updating, developing, training, evaluating, and monitoring generative user experiences powered by machine learning, deep learning, and artificial intelligence; downloadable software for machine learning and deep learning; downloadable computer software for the development of software to manage, connect, and operate internet of things (IoT) electronic devices; downloadable wireless communication software for voice, audio, video, and data transmission; downloadable computer software for accessing, monitoring, tracking, searching, saving, and sharing information; downloadable software development kits (SDKs) consisting of downloadable computer software development tools for the development of voice service delivery and natural language understanding technology across global computer networks, wireless networks, and electronic communications networks; downloadable computer software used for controlling stand-alone voice controlled information and personal assistant devices; downloadable computer software for a generative AI powered application using natural language processing to generate answers within the scope of connected data repositories; downloadable computer software for use in the creation, deployment, and utilization of artificial intelligence software applications; downloadable personal vehicle integration software; downloadable personal assistant software; chatbots, digital assistants, natural language processors, and expert systems; downloadable computer software for multimodal machine-learning based language, text, speech, image, video, code, and sound processing software; downloadable computer software using artificial intelligence for machine learning and deep learning for facilitating interaction, communication and actions between humans and artificial intelligence chatbots; downloadable computer software for developing, running and analyzing algorithms that are able to learn to analyze, classify, and take actions in response to exposure to data; downloadable computer software for accessing, browsing and searching online databases; downloadable chatbot software for providing information from searchable indexes and

databases of information, including text, music, images, videos, software algorithms, mathematical equations, electronic documents, and databases; downloadable computer software for connecting, operating, integrating, controlling, and managing networked consumer electronic devices via wireless networks; downloadable chatbot software for simulating conversations, analyzing images, sound and video, summarizing text, creating content, generating code, brainstorming, trip planning, and answering queries.

Class 35:

Advertising and marketing services, namely, promoting the goods and services of others; promoting the goods and services of others by organizing content of business information provided over a global computer network and other electronic and communications networks according to user preferences; promoting the goods and services of others by providing, searching, browsing and retrieving information, sites, and other resources available on global computer networks and other electronic and communications networks for others and providing consumer product information for the purpose of assisting with the selection of general consumer merchandise to meet the consumer's needs; providing information and news in the field of business, namely, information and news on current events and on economic, legislative, and regulatory developments as it relates to and can impact businesses; providing consumer information and related news in the field of entertainment, arts and literature, lifestyle and personal growth, education and child development, travel, business and finance, science and technology, politics and government, health and physical fitness, medicine, sports, weather, law, vehicles and transportation, real estate, fashion and design, food and cooking, home decorating, music and cinema, and history; providing information, news, and commentary in the field of politics, providing information in the field of government affairs, and providing consumer information relating to a wide variety of products; providing consumer information via voice-controlled automated inquiries, namely, providing an online automated consumer information resource database for searching, locating, rating and providing directions for the purchase, consumption and use of a wide range of consumer products, services and information over a global communications network.

Class 38:

Telecommunications services, namely, transmission of images, text, video and audio, and data via telecommunications networks, wireless communications networks, and the internet; computer services, namely, providing access to databases featuring news and information in the fields of artificial intelligence, machine learning, large language models, natural language processing, and software development; telecommunication services, namely, electronic transmission of streamed and downloaded audio, video and multimedia content files via computer and other communications networks; telecommunication access services; audio broadcasting and transmission for others of educational and entertainment digital media; delivery of messages by electronic transmission; electronic transmission of information and data.

Class 41:

Entertainment services, namely, providing on-line prerecorded continuing audio programs in the field of entertainment information relating to motion pictures, music, television programs, books, educational multimedia presentations, movies, sporting goods, toys, games, electronics, entertainment videos and DVDs, and other household and consumer goods; providing

List of cases accepted for opposition purposes as shown in Journal 2025/027 published on 04 July 2025 .

on-line computer games and on-line interactive children's stories; providing information, reviews and personalized recommendations in the field of entertainment; entertainment services, namely, providing temporary use of non-downloadable chatbots and virtual assistants; provision of information in the field of entertainment; providing educational and entertainment information in the fields of software, artificial intelligence, augmented reality, generative artificial intelligence, artificial general intelligence, chatbots, commerce, business, entertainment, and software development via a website; providing an on-line non-downloadable entertainment database, namely, providing online non-downloadable on-demand digital games provided on demand via voice activated requests, providing online non-downloadable movies, and providing television shows; providing educational and entertainment information in the fields of business, commerce, entertainment, artificial intelligence, software, generative artificial intelligence, artificial general intelligence, large language models, software development, natural language processing, machine learning, chatbots, and augmented reality; providing information relating to entertainment and education provided online from a computer database or a global computer network relating to movies, motion pictures, documentaries, films, television programs, graphic works, animation, and multimedia entertainment presentations; entertainment services, namely, providing online non-downloadable clips of prerecorded audio, visual, and audiovisual works via wireless networks in the field of movies, television, musicals, recreational activities, sports, sporting events, sports instruction, leisure activities, educational and entertainment tournaments, sports and entertainment gaming, dance, art, cultural or educational exhibitions, membership clubs, radio, comedy shows, sports, educational and entertainment contests, educational and entertainment games, educational and entertainment festivals, museums, parks, concerts, cultural events, publishing, animation, fashion, current events, news, technology, and animation; virtual environments in which users can interact with chatbots and virtual assistants for entertainment purposes provided by a website; providing information, news, non-downloadable articles, and commentary in the field of entertainment information relating to movies, television, audiovisual works, music, audio works, books, theatre, literary works, sporting events, recreational activities, leisure activities, tournaments, art, dance, musicals, cultural or educational exhibitions, sports instruction, membership clubs, radio, comedy, contests, visual works, games, gaming, festivals, museums, parks, cultural events, concerts, publishing, animation, current events, and multimedia presentations; providing an on-line non-downloadable entertainment database, namely, providing online non-downloadable music, and other online non-downloadable digital text, online non-downloadable audio recordings, and online non-downloadable video files all featuring entertainment information in the nature of sports and entertainment books, sports and entertainment magazines, sports and entertainment news, and general sports and entertainment information; providing an on-line non-downloadable searchable database in the nature of on-demand and online non-downloadable audio recordings, video recordings, and audiovisual content, all in the field of sports and entertainment, available through the internet, telecommunications networks, and wireless telecommunications networks.

Class 42:

Software as a service (SaaS) featuring computer software for use in retail store operation and ordering services for a wide variety of consumer goods, namely, to facilitate e-

commerce transactions; software as a service (SaaS) services featuring software for use in database management; software as a service (SaaS) services, namely, hosting software for use by others for use providing an online database featuring a wide range of general interest information via the internet; providing internet search engines; providing online non-downloadable software using artificial intelligence for the production of human speech and text; providing online non-downloadable chatbot software for simulating conversations; software as a service (SaaS) services featuring software applications for a generative AI powered application using natural language processing to generate answers within the scope of connected data repositories; computer software development in the field of mobile applications; computer software consultation services for developing software applications; providing information from searchable indexes and databases of information, including databases, text, images, videos, music, software algorithms, mathematical equations, and electronic documents; application service provider (ASP) services featuring software for controlling, integrating, operating, connecting, and managing voice controlled information devices, namely, cloud-connected and voice-controlled smart consumer electronic devices and electronic personal assistant devices; providing customized computer searching services, namely, searching and retrieving information at the user's specific request via the internet; providing online non-downloadable software for natural language processing, generation, understanding and analysis; Software as a service (SaaS) featuring computer software for others to use for the development of software applications; hosting of third party digital content in the nature of photos, videos, text, data, images, web sites, and other electronic works on the internet; software as a service (SaaS) services featuring software using artificial intelligence for machine learning and deep learning for building conversational query systems and digital assistants; computer services, namely, providing search platforms to allow users to request and receive content, text, visual works, audio works, audiovisual works, literary works, data, files, documents, and electronic works; technical support and consultation services for developing applications, namely, providing technical advice and information concerning the development of computer software applications and consulting services thereof; computer services, namely, providing search platforms to allow users to request and receive photos, videos, text, data, images, and electronic works; providing temporary use of online non-downloadable internet browser software; software as a service (SaaS) services featuring software using artificial intelligence for indexing, integrating, and retrieving data for both internal applications and external communication; providing online non-downloadable software for multi-modal artificial intelligence and machine-learning based language, text, sound, code, video, image, speech, and sound processing software; providing online non-downloadable software for machine learning and deep learning; providing online non-downloadable software for use in large language models and artificial intelligence; software as a service (SaaS) featuring computer software for accessing, browsing, and searching online databases, audio, video and multimedia content, games, and software applications, software application marketplaces; providing online non-downloadable software for processing speech, text, sound, code, videos, images, and sound input; providing online non-downloadable software for generating speech, text, sound, code, videos, images, and sound output; computer services, namely, creating and hosting an on-line website community for registered users to engage in social

***List of cases accepted for opposition purposes as shown in Journal 2025/027 published on
04 July 2025 .***

networking; software as a service (SaaS) featuring computer software for connecting, operating, integrating, controlling, and managing networked consumer electronic devices, home climate devices and lighting products via wireless networks; providing online non-downloadable software for use in the creation, deployment, and utilization of artificial intelligence software applications; providing online non-downloadable software for creating generative models; providing temporary use of online non-downloadable computer software and hosting online web facilities to enable users to access computer software and download computer software; providing temporary use of online non-downloadable software for facilitating multi-modal natural language, speech, text, sound, code, videos, images, and sound input; software as a service (SaaS) featuring computer software for use as an application programming interface (API); software as a service (SaaS) featuring computer software for others to use for the development of software to manage, connect, and operate internet of things (IoT) electronic devices; providing temporary use of on-line non-downloadable software and applications for accessing streaming audio and video files, games, social networks, text files, and multimedia files; application service provider (ASP) featuring software for use in database management; platform as a service (PaaS) featuring computer software platforms for use in database management; design and development of computer hardware and computer software; software as a service (SaaS) featuring computer software for accessing, monitoring, tracking, searching, saving, and sharing information on topics of general interest; application service provider (ASP) featuring application programming interface (API) software for the streaming, storage, and sharing of video games, content, data and information; platform as a service (PaaS) services featuring computer software platforms for the development and operation of chatbots, digital assistants, natural language processors, and expert systems; software as a service (SaaS) featuring computer software used for controlling stand-alone voice controlled information and personal assistant devices; providing online non-downloadable software for machine-learning based language and speech processing software.

Class 45:

Online social networking services; providing on-line computer databases and on-line searchable databases in the field of social networking; personal concierge services for others comprising making requested personal arrangements and reservations and providing customer-specific information to meet individual needs; providing a searchable database featuring audio, video and audiovisual content available through the Internet, telecommunications networks and wireless telecommunications networks in the field of online social networking; security services for the protection of property and individuals, namely, home security services for the protection of people and tangible property, and personal security services for the protection of people and tangible property.

controllers to monitor and control the functioning of other electronic devices; downloadable computer software programs for developing computer software applications; downloadable computer software for use to connect and control internet of things (IoT) electronic devices; downloadable computer software using artificial intelligence (AI) for the production of speech, text, images, video, sound, and code; downloadable speech to text conversion software; downloadable computer software used for controlling wireless handheld devices, gaming devices, and toys; downloadable computer software for use in retail store operation and ordering services for a wide variety of consumer goods, namely, to facilitate e-commerce transactions; downloadable home automation and home device integration software; downloadable voice command and recognition software; downloadable computer software for building, managing, updating, developing, training, evaluating, and monitoring generative user experiences powered by machine learning, deep learning, and artificial intelligence; downloadable software for machine learning and deep learning; downloadable computer software for the development of software to manage, connect, and operate internet of things (IoT) electronic devices; downloadable wireless communication software for voice, audio, video, and data transmission; downloadable computer software for accessing, monitoring, tracking, searching, saving, and sharing information; downloadable software development kits (SDKs) consisting of downloadable computer software development tools for the development of voice service delivery and natural language understanding technology across global computer networks, wireless networks, and electronic communications networks; downloadable computer software used for controlling stand-alone voice controlled information and personal assistant devices; downloadable computer software for a generative AI powered application using natural language processing to generate answers within the scope of connected data repositories; downloadable computer software for use in the creation, deployment, and utilization of artificial intelligence software applications; downloadable personal vehicle integration software; downloadable personal assistant software; chatbots, digital assistants, natural language processors, and expert systems; downloadable computer software for multimodal machine-learning based language, text, speech, image, video, code, and sound processing software; downloadable computer software using artificial intelligence for machine learning and deep learning for facilitating interaction, communication and actions between humans and artificial intelligence chatbots; downloadable computer software for developing, running and analyzing algorithms that are able to learn to analyze, classify, and take actions in response to exposure to data; downloadable computer software for accessing, browsing and searching online databases; downloadable chatbot software for providing information from searchable indexes and databases of information, including text, music, images, videos, software algorithms, mathematical equations, electronic documents, and databases; downloadable computer software for connecting, operating, integrating, controlling, and managing networked consumer electronic devices via wireless networks; downloadable chatbot software for simulating conversations, analyzing images, sound and video, summarizing text, creating content, generating code, brainstorming, trip planning, and answering queries.

Class 35:

Advertising and marketing services, namely, promoting the goods and services of others; promoting the goods and services of others by organizing content of business information

provided over a global computer network and other electronic and communications networks according to user preferences; promoting the goods and services of others by providing, searching, browsing and retrieving information, sites, and other resources available on global computer networks and other electronic and communications networks for others and providing consumer product information for the purpose of assisting with the selection of general consumer merchandise to meet the consumer's needs; providing information and news in the field of business, namely, information and news on current events and on economic, legislative, and regulatory developments as it relates to and can impact businesses; providing consumer information and related news in the field of entertainment, arts and literature, lifestyle and personal growth, education and child development, travel, business and finance, science and technology, politics and government, health and physical fitness, medicine, sports, weather, law, vehicles and transportation, real estate, fashion and design, food and cooking, home decorating, music and cinema, and history; providing information, news, and commentary in the field of politics, providing information in the field of government affairs, and providing consumer information relating to a wide variety of products; providing consumer information via voice-controlled automated inquiries, namely, providing an online automated consumer information resource database for searching, locating, rating and providing directions for the purchase, consumption and use of a wide range of consumer products, services and information over a global communications network.

Class 38:

Telecommunications services, namely, transmission of images, text, video and audio, and data via telecommunications networks, wireless communications networks, and the internet; computer services, namely, providing access to databases featuring news and information in the fields of artificial intelligence, machine learning, large language models, natural language processing, and software development; telecommunication services, namely, electronic transmission of streamed and downloaded audio, video and multimedia content files via computer and other communications networks; telecommunication access services; audio broadcasting and transmission for others of educational and entertainment digital media; delivery of messages by electronic transmission; electronic transmission of information and data.

Class 41:

Entertainment services, namely, providing on-line prerecorded continuing audio programs in the field of entertainment information relating to motion pictures, music, television programs, books, educational multimedia presentations, movies, sporting goods, toys, games, electronics, entertainment videos and DVDs, and other household and consumer goods; providing on-line computer games and on-line interactive children's stories; providing information, reviews and personalized recommendations in the field of entertainment; entertainment services, namely, providing temporary use of non-downloadable chatbots and virtual assistants; provision of information in the field of entertainment; providing educational and entertainment information in the fields of software, artificial intelligence, augmented reality, generative artificial intelligence, artificial general intelligence, chatbots, commerce, business, entertainment, and software development via a website; providing an on-line non-downloadable entertainment database, namely, providing online non-downloadable on-demand digital games provided on demand via voice activated requests, providing online non-downloadable movies, and providing

List of cases accepted for opposition purposes as shown in Journal 2025/027 published on 04 July 2025 .

television shows; providing educational and entertainment information in the fields of business, commerce, entertainment, artificial intelligence, software, generative artificial intelligence, artificial general intelligence, large language models, software development, natural language processing, machine learning, chatbots, and augmented reality; providing information relating to entertainment and education provided online from a computer database or a global computer network relating to movies, motion pictures, documentaries, films, television programs, graphic works, animation, and multimedia entertainment presentations; entertainment services, namely, providing online non-downloadable clips of prerecorded audio, visual, and audiovisual works via wireless networks in the field of movies, television, musicals, recreational activities, sports, sporting events, sports instruction, leisure activities, educational and entertainment tournaments, sports and entertainment gaming, dance, art, cultural or educational exhibitions, membership clubs, radio, comedy shows, sports, educational and entertainment contests, educational and entertainment games, educational and entertainment festivals, museums, parks, concerts, cultural events, publishing, animation, fashion, current events, news, technology, and animation; virtual environments in which users can interact with chatbots and virtual assistants for entertainment purposes provided by a website; providing information, news, non-downloadable articles, and commentary in the field of entertainment information relating to movies, television, audiovisual works, music, audio works, books, theatre, literary works, sporting events, recreational activities, leisure activities, tournaments, art, dance, musicals, cultural or educational exhibitions, sports instruction, membership clubs, radio, comedy, contests, visual works, games, gaming, festivals, museums, parks, cultural events, concerts, publishing, animation, current events, and multimedia presentations; providing an on-line non-downloadable entertainment database, namely, providing online non-downloadable music, and other online non-downloadable digital text, online non-downloadable audio recordings, and online non-downloadable video files all featuring entertainment information in the nature of sports and entertainment books, sports and entertainment magazines, sports and entertainment news, and general sports and entertainment information; providing an on-line non-downloadable searchable database in the nature of on-demand and online non-downloadable audio recordings, video recordings, and audiovisual content, all in the field of sports and entertainment, available through the internet, telecommunications networks, and wireless telecommunications networks.

Class 42:

Software as a service (SaaS) featuring computer software for use in retail store operation and ordering services for a wide variety of consumer goods, namely, to facilitate e-commerce transactions; software as a service (SaaS) services featuring software for use in database management; software as a service (SaaS) services, namely, hosting software for use by others for use providing an online database featuring a wide range of general interest information via the internet; providing internet search engines; providing online non-downloadable software using artificial intelligence for the production of human speech and text; providing online non-downloadable chatbot software for simulating conversations; software as a service (SaaS) services featuring software applications for a generative AI powered application using natural language processing to generate answers within the scope of connected data repositories; computer software development in the field of mobile applications; computer software

consultation services for developing software applications; providing information from searchable indexes and databases of information, including databases, text, images, videos, music, software algorithms, mathematical equations, and electronic documents; application service provider (ASP) services featuring software for controlling, integrating, operating, connecting, and managing voice controlled information devices, namely, cloud-connected and voice-controlled smart consumer electronic devices and electronic personal assistant devices; providing customized computer searching services, namely, searching and retrieving information at the user's specific request via the internet; providing online non-downloadable software for natural language processing, generation, understanding and analysis; software as a service (SaaS) featuring computer software for others to use for the development of software applications; hosting of third party digital content in the nature of photos, videos, text, data, images, web sites, and other electronic works on the internet; software as a service (SaaS) services featuring software using artificial intelligence for machine learning and deep learning for building conversational query systems and digital assistants; computer services, namely, providing search platforms to allow users to request and receive content, text, visual works, audio works, audiovisual works, literary works, data, files, documents, and electronic works; technical support and consultation services for developing applications, namely, providing technical advice and information concerning the development of computer software applications and consulting services thereof; computer services, namely, providing search platforms to allow users to request and receive photos, videos, text, data, images, and electronic works; providing temporary use of online non-downloadable internet browser software; software as a service (SaaS) services featuring software using artificial intelligence for indexing, integrating, and retrieving data for both internal applications and external communication; providing online non-downloadable software for multi-modal artificial intelligence and machine-learning based language, text, sound, code, video, image, speech, and sound processing software; providing online non-downloadable software for machine learning and deep learning; providing online non-downloadable software for use in large language models and artificial intelligence; software as a service (SaaS) featuring computer software for accessing, browsing, and searching online databases, audio, video and multimedia content, games, and software applications, software application marketplaces; providing online non-downloadable software for processing speech, text, sound, code, videos, images, and sound input; providing online non-downloadable software for generating speech, text, sound, code, videos, images, and sound output; computer services, namely, creating and hosting an on-line website community for registered users to engage in social networking; software as a service (SaaS) featuring computer software for connecting, operating, integrating, controlling, and managing networked consumer electronic devices, home climate devices and lighting products via wireless networks; providing online non-downloadable software for use in the creation, deployment, and utilization of artificial intelligence software applications; providing online non-downloadable software for creating generative models; providing temporary use of online non-downloadable computer software and hosting online web facilities to enable users to access computer software and download computer software; providing temporary use of online non-downloadable software for facilitating multi-modal natural language, speech, text, sound, code, videos, images, and sound input; software as a service (SaaS) featuring

List of cases accepted for opposition purposes as shown in Journal 2025/027 published on 04 July 2025 .

computer software for use as an application programming interface (API); software as a service (SaaS) featuring computer software for others to use for the development of software to manage, connect, and operate internet of things (IoT) electronic devices; providing temporary use of on-line non-downloadable software and applications for accessing streaming audio and video files, games, social networks, text files, and multimedia files; application service provider (ASP) featuring software for use in database management; platform as a service (PaaS) featuring computer software platforms for use in database management; design and development of computer hardware and computer software; software as a service (SaaS) featuring computer software for accessing, monitoring, tracking, searching, saving, and sharing information on topics of general interest; application service provider (ASP) featuring application programming interface (API) software for the streaming, storage, and sharing of video games, content, data and information; platform as a service (PaaS) services featuring computer software platforms for the development and operation of chatbots, digital assistants, natural language processors, and expert systems; software as a service (SaaS) featuring computer software used for controlling stand-alone voice controlled information and personal assistant devices; providing online non-downloadable software for machine-learning based language and speech processing software.

Class 45:

Online social networking services; providing on-line computer databases and on-line searchable databases in the field of social networking; personal concierge services for others comprising making requested personal arrangements and reservations and providing customer-specific information to meet individual needs; providing a searchable database featuring audio, video and audiovisual content available through the Internet, telecommunications networks and wireless telecommunications networks in the field of online social networking; security services for the protection of property and individuals, namely, home security services for the protection of people and tangible property, and personal security services for the protection of people and tangible property.
