Mark 2

Mark 3

Mark 4

Application for a series of 4 marks.

The word 'Brent' does not form part of the mark; it will be replaced according to the name of the borough being accredited and licensed to use the mark. The name 'Brent' is also being used to illustrate the colour combinations featured in the mark and to provide the full impression of the mark used by licensees (accredited boroughs). In addition, the black coloured backgrounds in Mark 2 and Mark 4 do not form part of the mark, they have been used merely to provide a contrast so that the words 'Brent: A Nature Borough' are visible.

electrical power distribution units; electrical power transfer switches; electronic controls for server racks and data center cooling units; enclosures, cabinets and racks for computer servers and electrical and electronic equipment; fan trays for cooling of telecommunication devices; electronic controllers for fire pumps; electronic thermostat regulating devices for control of heat; climate control and cooling systems for telecom and data communication equipment, consisting of thermostats for cooling equipment and a programmable logic controller (plc); inverters; microprocessor based hardware and software used to monitor and control cooling and air handler units for data centers and other computer and telecommunications equipment applications; electronic monitoring devices for fire pumps; power line conditioners; power line conditioning equipment, namely, line filters, transformers, amplifiers; electric power conversion devices; electric power converters; electrical power distribution units; power dividers, namely, electric switches; power supplies; power switches; rectifiers; regulating apparatus for electric power; electric regulating apparatus for the operation of power systems; regulators for phase shifting of communication signal regulators for phase shifting of electronic signals; remote electrical power control switches; remote controllers for power supplies; server rack monitoring systems, namely, microprocessor based hardware and software used to monitor the status of electronic and electrical equipment in a server rack; computer server racks; computer server racks incorporating integrated cooling units; electric luminescent display panels; software for data center infrastructure configuration and management; testing apparatus not for medical purposes, namely, testing apparatus for batteries; automatic transfer switches (ats); transformers; uninterruptible electrical power supplies; voltage regulators; voltage surge protectors; voltage surge suppressors; voltmeters.

Class 11:

Air handlers for cooling data centers; cooling units and systems comprised of cooling units and air conditioners for computer server racks and computer data centers; cooling units for computers and computer rooms; air conditioning condensers for use in cooling data centers, computer rooms and other computer and electronic equipment applications; dehumidifiers for use in cooling data centers, computer rooms and other computer and electronic equipment applications.

Class 37:

Installation, maintenance and repair of data center cooling systems; installation, maintenance and repair of power generating, computer and telecommunications equipment; installation, maintenance and repair of computer room air conditioning (crac) systems; installation, repair and maintenance of batteries; installation, repair and maintenance of electrical power systems; installation, repair and maintenance of batteries and fuel cells for electrical power systems; maintenance and preventive maintenance services of air conditioning for data centers and computer rooms; installation of electrical power systems for computer and telecommunications network applications for others.

Class 40:

Custom manufacture of equipment for data centers; manufacture of electrical power switches and controllers for computer and telecommunications network applications to the order and/or specification of others; custom manufacture of power solutions for network applications; manufacture

of power supplies for computing, communications, and industrial equipment applications to order and/or specification of others; custom manufacture of electrical power solutions for network applications; custom manufacture of power supplies for computing, communications, and industrial equipment applications; manufacture of electrical power solutions for network applications for others; manufacture of power supplies for computing, communications, and industrial equipment applications for others.

Class 42:

Air conditioning maintenance assessment services for the performance and reliability of air conditioning systems for data centers and computer rooms; battery monitoring and testing; consulting services in the field of design and engineering of electrical and battery back-up power systems for data centers, computer rooms and other commercial and industrial facilities; design of electrical and battery back-up power systems for computer and telecommunications network applications for others; engineering services, namely, technical project planning and design engineering for others in the fields of electrical and battery back-up power systems, computer networks and telecommunications projects; electrical engineering services, namely, providing technical analysis, testing, studies, recommendations and drafting plans relating to the safety, efficiency, performance and reliability of electrical equipment and power systems; electrical and battery back-up power systems and data center computer and telecommunications equipment engineering services; engineering services, namely, providing technical assessment of the performance, reliability, maintenance and configuration of data center and commercial and industrial facility electrical and battery back-up power systems; engineering services, namely, providing technical assessment of the performance, reliability, maintenance and configuration of data center cooling systems; remote monitoring of the functioning and use of data center and computer room electrical equipment, electrical and battery back-up power systems, and data center and computer room heating, ventilating and air conditioning apparatus; technical consultation in the fields of engineering of electrical and battery back-up power systems; design for others of equipment for data center facilities.
