The mark consists of five abstract polygonal outline devices arranged horizontally. From left to right: (1) a three-sided polygonal ring formed by an outer perimeter with three rounded apices and three mid-side inward cusps, and an inner perimeter of a concave three-sided polygon, creating a continuous annular device of uniform width; (2) a quadrilateral polygonal ring formed by an irregular outer perimeter with convex and concave distortions along each side and softened corners, together with an inner quadrilateral outline with inwardly curved sides, creating a continuous annular form; (3) a decagonal polygonal ring approximating a circle, with an outer perimeter comprising ten rounded convex nodes and an inner perimeter with corresponding inward curvature, producing a circular impression formed by multiple polygonal arcs; (4) a quatrefoil-like polygonal ring, the outer perimeter composed of four convex lobes alternating with concave recesses of irregular depth, paired with an inner quatrefoil outline of corresponding curvature, producing an abstract ornamental device; (5) a cross-shaped polygonal ring with four rounded lobes extending outward, joined by concave junctions, together with an inner cross outline of corresponding concave form, creating an annular cross-floral device. The mark is presented in black and white; colour is not claimed as a feature of the mark.

Class 9:

Downloadable software and mobile applications using artificial intelligence for personality insight, professional self-development, cultural-fit evaluation, and professional social networking; downloadable software for psychometric assessment and career guidance; all of the aforesaid excluding software for logistics, supply chain optimisation, or financial transaction processing.

Computer software for managing digital content access, entitlement, and monetization; downloadable software development kits (SDKs) for implementing access control, dynamic pricing decisions, subscription management and revenue optimization across digital properties; application programming interface (API) software for real-time entitlement management, conversion and revenue optimization; computer software using reinforcement learning and large language models for monetization strategy optimization; edge computing software for access and monetization decisions; computer software for implementing dynamic pricing; software for detecting, classifying, managing and monetizing human and non-human traffic; software for automated content access negotiation with AI agents and bot traffic; computer software for unified human and machine monetization orchestration; software for access rules and business logic execution; software for implementing Zero Trust access principles for digital content; computer software featuring LLM agents for revenue growth recommendations and strategy automation; computer software for managing content lifecycle monetization; software for automated negotiation and pricing of digital content access; computer software for e-commerce, affiliate and advertising based access control, pricing and monetization; software for managing API rate limiting and usage-based billing; .

Class 35:
Business data analysis services relating to content monetization and revenue optimization; analysis of user behavior patterns, content consumption, and engagement metrics for pricing strategy development; business intelligence services based on actual or modelled user behavior and content interaction; data processing services for enriching customer and traffic data for

monetization purposes; automated business intelligence services using machine learning to identify revenue opportunities and optimize customer lifetime value; providing business intelligence through automated recommendation systems derived from real-time user activity, pricing signals and engagement metrics; data processing services for real-time monetization decisions and access control; compilation and analysis of human and bot traffic patterns for commercial licensing and monetization purposes; analysis of content lifecycle value degradation for monetization timing; business process automation for access control and revenue workflows; providing actionable monetization insights through AI-powered analytics, advisory and predictive modeling; business consultation services regarding subscription retention and churn reduction strategies; business process automation services for monetization workflows; business services for optimizing total addressable market through dynamic pricing strategies; business intelligence services for usage optimization and seat management; analysis of product inventory access patterns for pricing optimization.

Class 36:
Financial data analysis and reporting services relating to subscription, monetization optimization and pricing strategies; financial information processing for usage-based access models and dynamic pricing systems; automated financial analysis services relating to content monetization strategies and subscription lifecycle management; financial information services for tracking and analyzing bot traffic monetization and machine access revenues; providing financial information regarding revenue performance, customer lifetime value, and monetization metrics; financial analysis services using machine learning for pricing optimization; financial information for digital monetization and access control strategies".

Class 38:
Providing access management to platforms and portals on the internet for content monetization; electronic transmission of access control decisions via edge networks and content delivery systems; providing access to cloud-based monetization, entitlement, and revenue optimization databases and APIs; data transmission and data caching services between content delivery networks, identity providers, billing and payment platforms, analytics systems and other third-party services; provision of real-time access control and monetization signals at network edge locations; electronic data interchange services for monetization platform integrations with external systems; transmission of machine learning model outputs and LLM agent recommendations for pricing decisions; providing access to distributed decision-making infrastructure for content monetization; electronic transmission of bot negotiation protocols and automated access authorization data; provision of real-time access control signals between content servers and client devices; providing access to distributed decision-making infrastructure for content monetization.

Class 42:
Software as a service (SaaS) for digital content monetization, access control, and revenue optimization; platform as a service (PaaS) featuring computer software platforms for orchestrating monetization decisions across human and machine traffic; cloud computing services featuring machine learning and LLM agents for real-time access decisioning, revenue maximization and predictive analytics; providing temporary use of non-downloadable software for managing unified human and bot traffic monetization; providing temporary use of non-

***List of cases accepted for opposition purposes as shown in Journal 2025/038 published on

Cherrelle Newnes

UK00004262129 10 September 2025
(9, 16, 35, 41)

The mark consists of the word "SHOWBILL" in bold, uppercase black letters, with a stylised "S" featuring a curved theatrical flourish. The letters are set in a modern sans-serif typeface. The letters "UK" appear in a handwritten script in the upper right corner of the final letter "L". Below the word "SHOWBILL" is the tagline "Your Front-Row Guide to the Stage" in sentence case. The entire design appears on a yellow background in the shape of a horizontal theatre ticket, incorporating a stylised Union Jack motif in the top-left corner.
