KAIZEN ENERGY

Class 4:

Fuels; biofuels; heating oil; renewable fuels; waste heat biomass fuels; pellets and briquettes; energy sources, namely electricity, gas, solar and thermal energy; oils and greases for domestic, commercial and industrial use.

List of cases accepted for opposition purposes as shown in Journal 2026/013 published on 27 March 2026 .

Class 6:

Metal pipes and fittings for heating installations; valves and connectors for district heating networks; metal heat exchangers; metal manifolds for heating systems; metal storage tanks for thermal energy; metal flanges and couplings for pipelines.

Class 11:

Heating installations; district heating systems; heat exchangers; boilers; apparatus for steam generation; solar thermal collectors; heat pumps; radiators and pipes for heating installations; control apparatus for heating systems; combined heat and power (CHP) units; substations for district heating networks. .

Class 35:

Retail services relating to energy, gas, gaseous fuels, oil, solar heat, thermal heat, electricity and fuels and provision of specialist business operations services for management of metering equipment; procurement of contracts concerning oil, thermal heat, electricity and gas supply; business management; business administration; office functions; billing services; energy usage auditing; cost analysis and tariff consultancy for heating and energy services; business consultancy relating to energy procurement and district heating solutions; demand-side management services; information, consultancy and advisory services relating to the foregoing.

Class 36:

Financial consultancy relating to energy supply contracts; brokerage of energy supply agreements; derivative services related to energy commodities; financial consultancy in the field of energy markets; risk management services for energy trading; financing of energy infrastructure projects; consultancy on energy investment strategies; consultancy, information and advisory services relating to all of the aforesaid services.

Class 37:

Construction, installation, repair and maintenance services; construction and servicing of district heating networks; installation, repair and maintenance services for electrical, gas, gaseous fuels, oil, solar heat, thermal heat and fuels apparatus, infrastructures and installations; installation of energy supply apparatus; construction, installation fitting, repair and maintenance of buildings and pipelines; fitting, repair and maintenance services for apparatus or installations supplying electricity, oil, solar and thermal heat and gas; installation and servicing of engineering systems; central heating installation; heating equipment repair; installation of heating apparatus; routine servicing of heating apparatus; energy contracting services namely supply of electricity, oil, solar and thermal heat and gas to a selected point of use; pipeline construction and maintenance; supervision of installation and maintenance of a solar heating network, of solar heating installations, information relating to the installation of solar power; installation and maintenance of heat substations and heat exchangers; construction and maintenance of district heating pipelines; consultancy, information and advisory services relating to all the aforesaid services.

Class 39:

Supply, storage, metering, transmission, distribution, delivery and transportation of energy, gas, gaseous fuel, electricity, thermal heat, oil and fuels; transport; distribution and supply of energy, including heat, steam, and electricity; delivery of thermal energy for district heating; packaging, storage and delivery of goods; energy, gas, gaseous fuels, oil, electricity, thermal heat

and fuels distribution; distribution of energy for heating and cooling buildings; district heating distribution services; remote monitoring of energy distribution; load balancing services; consultancy, information and advisory services relating to all the aforesaid services.

Class 40:

Production of energy; electricity generation; thermal heat generation; production of fuel, gas and oil; production of heat and steam for district heating; heat generation and cogeneration services; rental of heating apparatus; production of solar energy; waste-to-energy conversion services; water treatment for heating systems; biomass energy production; geothermal energy generation; purification and conditioning of water for district heating; recycling of waste for energy recovery; consultancy, information and advisory services relating to all of the aforesaid services. .

Class 42:

Metering services; engineering and design services for heating and energy systems, district heating systems, and pipeline construction; technical consultancy in the field of energy efficiency; monitoring and analysis of energy consumption; development of sustainable energy solutions; software as a service (SaaS) for energy monitoring and optimisation; consultancy in the field of energy-saving; engineering, environmental protection consultancy; technical project studies and technical research in the field of solar power; engineering and technical analysis, research and expertise in the field of energy; design, maintenance, updating and installation of computer software in the fields of energy and sustainable development; technical and engineering consultancy relating to installations for the production, storage, distribution and supply of energy; petroleum and natural gas prospecting; drafting of construction plans in the field of energy, in particular for gas-burner terminals, gas transport networks and installations for the storage of natural gas; surveys (geological-), research and development of new products in the field of energy for others; technical advice and engineering consultancy for the management of industrial installations operated using all kinds of energy, management of installations for the storage of natural gas and networks for the distribution and supply of gas or electricity; industrial and technical research and analysis (technical project studies), relating to home automation equipment and smart networks (energy supply networks using information technology to enhance the adequacy of supply and demand of energy); quality control consisting of technical reports on installations, measures and progress; technical studies and analysis and diagnostics (engineering) for the setting up of installations for the supply and/or production and/or distribution of energy, namely electricity, gas, solar and thermal energy, heat and water; studies, research and surveying in the fields of energy, the environment and sustainable development; technical consultancy and information relating to energy and the control thereof; technical information and consultancy relating to installations operating with the assistance of energy of all kinds; technical expertise relating to the generation of electrical, wind, solar, hydraulic, geothermal, thermal, climatic and renewable energy; design and optimisation of district heating networks; consultancy on integration of renewable energy into heating systems; feasibility studies for heat recovery and cogeneration projects; consultancy, information and advisory services relating to all the aforesaid services. .

YUNO ENERGY HEAT

Class 4:

Fuels; biofuels; heating oil; renewable fuels; waste heat biomass fuels; pellets and briquettes; energy sources, namely electricity, gas, solar and thermal energy; oils and greases for domestic, commercial and industrial use.

Class 6:

Metal pipes and fittings for heating installations; valves and connectors for district heating networks; metal heat exchangers; metal manifolds for heating systems; metal storage tanks for thermal energy; metal flanges and couplings for pipelines.

Class 11:

Heating installations; district heating systems; heat exchangers; boilers; apparatus for steam generation; solar thermal collectors; heat pumps; radiators and pipes for heating installations; control apparatus for heating systems; combined heat and power (CHP) units; substations for district heating networks. .

Class 35:

Retail services relating to energy, gas, gaseous fuels, oil, solar heat, thermal heat, electricity and fuels and provision of specialist business operations services for management of metering equipment; procurement of contracts concerning oil, thermal heat, electricity and gas supply; business management; business administration; office functions; billing services; energy usage auditing; cost analysis and tariff consultancy for heating and energy services; business consultancy relating to energy procurement and district heating solutions; demand-side management services; information, consultancy and advisory services relating to the foregoing.

Class 36:

Financial consultancy relating to energy supply contracts; brokerage of energy supply agreements; derivative services related to energy commodities; financial consultancy in the field of energy markets; risk management services for energy trading; financing of energy infrastructure projects; consultancy on energy investment strategies; consultancy, information and advisory services relating to all of the aforesaid services.

Class 37:

Construction, installation, repair and maintenance services; construction and servicing of district heating networks; installation, repair and maintenance services for electrical, gas, gaseous fuels, oil, solar heat, thermal heat and fuels apparatus, infrastructures and installations; installation of energy supply apparatus; construction, installation fitting, repair and maintenance of buildings and pipelines; fitting, repair and maintenance services for apparatus or installations supplying electricity, oil, solar and thermal heat and gas; installation and servicing of engineering systems; central heating installation; heating equipment repair; installation of heating apparatus; routine servicing of heating apparatus; energy contracting services namely supply of electricity, oil, solar and thermal heat and gas to a selected point of use; pipeline construction and maintenance; supervision of installation and maintenance of a solar heating network, of solar heating installations, information relating to the installation of solar power; installation and maintenance of heat substations and heat exchangers;

construction and maintenance of district heating pipelines; consultancy, information and advisory services relating to all the aforesaid services.

Class 39:

Supply, storage, metering, transmission, distribution, delivery and transportation of energy, gas, gaseous fuel, electricity, thermal heat, oil and fuels; transport; distribution and supply of energy, including heat, steam, and electricity; delivery of thermal energy for district heating; packaging, storage and delivery of goods; energy, gas, gaseous fuels, oil, electricity, thermal heat and fuels distribution; distribution of energy for heating and cooling buildings; district heating distribution services; remote monitoring of energy distribution; load balancing services; consultancy, information and advisory services relating to all the aforesaid services.

Class 40:

Production of energy; electricity generation; thermal heat generation; production of fuel, gas and oil; production of heat and steam for district heating; heat generation and cogeneration services; rental of heating apparatus; production of solar energy; waste-to-energy conversion services; water treatment for heating systems; biomass energy production; geothermal energy generation; purification and conditioning of water for district heating; recycling of waste for energy recovery; consultancy, information and advisory services relating to all of the aforesaid services. .

Class 42:

Metering services; engineering and design services for heating and energy systems, district heating systems, and pipeline construction; technical consultancy in the field of energy efficiency; monitoring and analysis of energy consumption; development of sustainable energy solutions; software as a service (SaaS) for energy monitoring and optimisation; consultancy in the field of energy-saving; engineering, environmental protection consultancy; technical project studies and technical research in the field of solar power; engineering and technical analysis, research and expertise in the field of energy; design, maintenance, updating and installation of computer software in the fields of energy and sustainable development; technical and engineering consultancy relating to installations for the production, storage, distribution and supply of energy; petroleum and natural gas prospecting; drafting of construction plans in the field of energy, in particular for gas-burner terminals, gas transport networks and installations for the storage of natural gas; surveys (geological-), research and development of new products in the field of energy for others; technical advice and engineering consultancy for the management of industrial installations operated using all kinds of energy, management of installations for the storage of natural gas and networks for the distribution and supply of gas or electricity; industrial and technical research and analysis (technical project studies), relating to home automation equipment and smart networks (energy supply networks using information technology to enhance the adequacy of supply and demand of energy); quality control consisting of technical reports on installations, measures and progress; technical studies and analysis and diagnostics (engineering) for the setting up of installations for the supply and/or production and/or distribution of energy, namely electricity, gas, solar and thermal energy, heat and water; studies, research and surveying in the fields of energy, the environment and sustainable development; technical consultancy and information relating to energy and the control thereof;

List of cases accepted for opposition purposes as shown in Journal 2026/013 published on 27 March 2026 .

technical information and consultancy relating to installations operating with the assistance of energy of all kinds; technical expertise relating to the generation of electrical, wind, solar, hydraulic, geothermal, thermal, climatic and renewable energy; design and optimisation of district heating networks; consultancy on integration of renewable energy into heating systems; feasibility studies for heat recovery and cogeneration projects; consultancy, information and advisory services relating to all the aforesaid services. .

Class 1:

Fuel for atomic piles; Fissionable material for nuclear energy; isotopes of tritium; isotopes of plutonium; isotopes of Uranium; isotopes of Thorium; Chemicals for use in the neutralization of radioactive substances; Graphites for nuclear energy; Chemical components for producing a radio-labelled monoclonal antibody for industrial or scientific use; Fissionable chemical elements; Fuel elements for nuclear reactors; Moderating materials for nuclear reactors; Radioactive elements for laboratory use.

Class 9:

Computer hardware and software for use in the management of energy plants; electrical apparatus and instruments, namely, Geiger-Muller counters, ionization chambers, proportional counters, scintillation counters, and photomultiplier tubes; radiation detectors; Dosimeters and dosimetry readers; Electrical eddy current test equipment for inspecting heat exchange tubes in nuclear system heat exchangers; monitor for the detection and measurement of airborne radioactivity; Radiation-measuring instruments; Radiation detectors; Radiation gauges used for measuring the physical properties of materials; Radiation sensing apparatus.

Class 11:

Reactors, that is industrial chemical plants; nuclear reactors; nuclear cogeneration plants; nuclear moderation fuel treatment plants; Tritium Cycle Plant; Energy generation power plants; Energy storage plants; Component parts for nuclear reactors; nuclear installations; modular nuclear installations and reactors; nuclear generators; nuclear reactors; nuclear power plant installations; installations for processing nuclear fuel and nuclear moderating material; apparatus for desalination; apparatus for synthetic fuel and hydrogen production; and parts and fittings for the aforesaid.

Class 35:

Energy usage management; Provision of information, advice, and consultancy in relation to energy efficiency; Procurement services, namely, procurement of contracts for others for the purchase of energy; Information in the field of nuclear energy, namely, the business operation of nuclear power plants and the efficiency of nuclear energy, provided via a website; Management and business consulting services in the field of nuclear energy; Procurement, namely, purchasing power plant components for others; Regulatory submission management, namely, assisting others in preparing and filing applications for new nuclear power plants with governmental regulatory bodies; Business consulting services in the field of management of nuclear power plants; Business consulting services in the field of management of the design, licensing, operation, maintenance, and decommissioning of nuclear power plants; Business consulting services; business consulting services in the field of nuclear power and technology; public advocacy to promote awareness in the field of nuclear energy; government advocacy, namely, promoting new and emerging nuclear technology; promoting the benefits of nuclear technology and nuclear energy to governments and professionals in the energy industry; promoting the use of synthetic fuels and hydrogen generated using nuclear power; promoting the use of nuclear power for water desalination; and consultancy, information, and advisory services in relation to all the aforesaid.

Class 37:

Plant construction, installation, maintenance, and construction project management and consulting services for businesses in the energy production and transmission sector; Installation of reduced carbon and carbon-free energy generation equipment; Consulting services in the field of repair, maintenance, and refueling of nuclear energy power plants; Consulting services in the field of construction and implementation of nuclear power plants construction, installation, servicing, renovation, repair, and maintenance of nuclear installations, nuclear generators, nuclear reactors, nuclear power plant installations, modular nuclear installations, and modular nuclear reactors; construction, installation, servicing, renovation, repair, and maintenance of installations for processing nuclear fuel and nuclear moderating material; construction, installation, servicing, renovation, repair, and maintenance of energy production plants and machines; construction, installation, servicing, renovation, repair, and maintenance of power generating apparatus and installations; construction management services; industrial cleaning services for nuclear installations, nuclear plants, and nuclear facilities; hazardous waste clean-up services.

Class 40:

Energy generation services; Production of energy; Provision of information, advice, and consultancy in relation to the production and generation of energy; Providing a website

List of cases accepted for opposition purposes as shown in Journal 2026/013 published on 27 March 2026 .

featuring information in the field of nuclear energy generation; treatment of materials; recycling of waste and trash; production and generation of energy; production and generation of energy by nuclear power plants; hazardous waste treatment and management services; industrial toxic waste disposal; nuclear waste treatment; decontamination of nuclear waste and nuclear plants; nuclear fuel reprocessing; nuclear fuel recycling; conversion of nuclear fuels; rental of generators; rental of equipment for energy production and generation; processing and refinement of fuel materials; desalination of water; recycling of radioactive waste; purification of gases.

Class 41:

Educational services, namely, developing curriculum and training materials for others in the field of operation, maintenance, refueling, and calibration of nuclear power plants; Training services in the field of operation, maintenance, refueling, and calibration of nuclear power plants; Consulting services in the field of training personnel for the operation, maintenance, refueling, and calibration of nuclear power plants.

Class 42:

Technological consulting services in the field of energy generation; Technical consultation in the field of environmental science, engineering services; design for others in the field of energy engineering; testing of energy products for others; Technological planning and consulting services in the field of reduced carbon and carbon-free energy resources; Research in the field of energy; Consulting services in the nature of scientific research, energy generation, and safety testing of nuclear power plants and other energy sources; Consulting services in the field of refueling and calibrating nuclear power plants; Nuclear engineering; Designing plant components and equipment for nuclear power plants; design of nuclear installations, nuclear power plants, modular nuclear installations, and modular nuclear reactors; design of equipment and parts and fittings for nuclear installations, nuclear power plants, modular nuclear installations, and modular nuclear reactors; Providing a website featuring information in the field of nuclear energy research; Providing a website featuring information on the design of nuclear power plants; Providing a website featuring information on the research, development, design, and testing of nuclear reactors; development and engineering services in the fields of energy production, nuclear energy and nuclear technology; research and development of technology in the field of nuclear energy; designing for others and testing of energy products; designing and testing of new products for others; Measurement evaluations in the personnel radiation dosimetry field.

Class 45:

Risk assessment services in relation to the nuclear production of energy, the storage of nuclear materials, the operation of nuclear facilities, nuclear decontamination programs; creation and licensing of intellectual property rights in relation to power generation.

NEXTPOWER

International priority date claimed:
28 October 2025 (UNITED STATES OF AMERICA)

Class 6:

Metal structures for mounting and supporting solar panels, photovoltaic modules, and photovoltaic cells, namely, solar tracking systems; metal hardware, namely, solar panel mounts.

Class 7:

Solar trackers, namely, driving motors, other than for land vehicles, for positioning of photovoltaic modules relative to the sun, and replacement parts therefor; solar tracking systems comprised of electric motors for machines for positioning of photovoltaic modules relative to the sun to maximize collection of solar energy; solar-tracking systems consisting of machine motors and gears for automatically positioning of photovoltaic modules relative to the sun; solar trackers for solar photovoltaic electric power generation systems comprised of motors, gears, and drives for orienting solar panels.

Class 9:

Ground-mounted solar tracker systems comprised primarily of photovoltaic modules that are rotationally positioned to optimize solar energy collection; solar panels for production of electricity; photovoltaic installation apparatus, namely, solar modules for production of electricity, solar thermal and electric receivers, tracking mechanisms and concentrating optics, and control algorithms; robotics systems for cleaning large-scale solar sites; balance of Systems (BoS) solar photovoltaic equipment, namely, electrical connectors; electrical components in the nature of combiner boxes, junction boxes, and terminal boxes;

List of cases accepted for opposition purposes as shown in Journal 2026/013 published on 27 March 2026 .

automated electronic surveillance devices that can be deployed in utility solar fields to gather evidence or intelligence in remote locations; electronic video surveillance installations, comprising of antennas, switchers, monitors, and recorders for management of electronic video surveillance installations to monitor equipment conditions in utility solar fields; electronic video surveillance products, namely, electronic components of security systems; autonomous stationary camera for utility-scale solar plants to detect hazardous and danger conditions, namely, fires, smoke, and heat; autonomous stationary camera to be used in security, reconnaissance, surveillance, access control, and first responder situations at utility-scale solar plants; Balance of Systems (BoS), namely, electrical connectors and photovoltaic systems that convert sunlight into electric and thermal energy, and related parts therefor.

Class 12:

Autonomous robotic vehicles for inspection of solar facilities; autonomous robotic vehicles for inspection and maintenance of solar plants.

Class 42:

Inspection, testing, and troubleshooting of utility-scale solar and battery storage systems; design and engineering services of solar energy production facilities, namely, planning, layout, mapping, geographic, surveys, site testing, and foundation, racking and electrical balance of systems design; design of solar photovoltaic systems, namely, design and planning of solar-tracking systems; drafting and development of photovoltaic systems including solar trackers; engineering services in the field of solar-tracking systems; utility solar power plant inspection services, namely, inspection of utility solar power plants via an unmanned teleoperated autonomous land vehicle; detection and reporting of anomalies on utility solar farms identified by an unmanned teleoperated autonomous land vehicle.

Scientific, research, surveying, measuring, detecting, testing and inspecting apparatus and instruments; apparatus and instruments for recording, transmitting, storing, reproducing or processing data; computer software and hardware; calculating devices; storage media; computers and computer peripheral devices; data processing equipment; scientific instruments; electronic components; laboratory instruments; downloadable and recorded software platforms; computer programmes for data processing; data and image processing software for making three dimensional models; data processing programs; data sets, recorded or downloadable; downloadable computer software for the transmission of data; recorded data files; software for the analysis of scientific data; software for the analysis of time series data; downloadable and recorded software for collecting, collating, analysing, interpreting and reporting on data; downloadable and recorded software platforms for collecting, collating, analysing, interpreting and reporting on data; computer hardware, electrodes, sensors being component parts of scientific instruments for investigating materials and molecules, optical sensors, electrochemical sensors, temperature sensors, capacitive sensors, acoustic sensors, light sensors, fluorescence sensors, flow sensors, liquid sensors,

level sensors, motion sensors, position sensors, pH sensors, conductivity sensors, spectroscopy sensors, chemical phase sensors, optofluidic waveguide sensors, droplet sensors, physical state sensors, phase change sensors, pressure sensors, probes for scientific purposes, laboratory equipment being scientific instruments for investigating materials and molecules, laboratory equipment, namely, microfluidic chips, syringe pumps, pressure controllers, microvalves, micropumps, droplet generators, capillaries and tubing, manifolds and reservoirs, microscopes, spectroscopy equipment and spectrometers, centrifuges, pH meters, chromatography equipment, high-performance liquid chromatography (HPLC) equipment, gas chromatography equipment, liquid chromatography equipment, infrared spectroscopy equipment, atomic absorption spectroscopy equipment, atomic emission spectroscopy equipment, mass spectrometry equipment, laboratory equipment for testing biophysical properties, laboratory equipment for generating data readouts relating to biophysical properties of molecules and materials, electrical circuits, electronic circuits, lasers not for medical purposes, lasers for computing, lasers being component parts of scientific instruments for investigating materials and molecules, lasers for measuring molecular properties, lasers for measuring properties of materials, lasers for creating optical readouts, and lasers for measuring olfactory and gustatory properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, optical fibers, oscilloscopes and control interfaces for computers and for scientific instruments; apparatus and instruments for recording, transmitting, storing, reproducing or processing data; computer hardware; recorded and downloadable computer software, namely software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software for use with biological computers for measuring properties of molecules and materials and characterising molecules and mixtures based on those properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses; recorded and downloadable computer software, namely, software embedded computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software for use in biocomputing for measuring properties of molecules and materials and characterising molecules and mixtures based on those properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in materials science for collecting, collating, analysing and interpreting data relating to properties of molecules and materials and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses; recorded and downloadable computer software, namely software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in collecting, collating, analysing and interpreting data relating to smell, taste and touch;

***List of cases accepted for opposition purposes as shown in Journal 2026/013 published on
27 March 2026 .***

recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in collecting, collating, analysing and interpreting data obtained from chemical and electrical inputs; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in collecting, collating, analysing and interpreting data relating to biological material; recorded and downloadable graphical user interface and dashboard computer software, namely, software for displaying data relating to molecules, materials, liquids, liquid interactions, molecular characterisation, sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, and material characterisation and software for displaying data obtained from scientific instruments; recorded and downloadable application programming interface (API) software and operating systems software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics ; recorded and downloadable computer platform software, namely, software for collecting, collating, analysing and interpreting data; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in collecting, collating, analysing and interpreting data collected through sensory input; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in testing materials and liquids; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in classification of chemicals; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in real-time processing of information at a high bandwidth and low latency; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in the development of foods, pharmaceuticals and materials; recorded and

downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in decoding, analysing and interpreting molecular behaviour; recorded and downloadable computer software, including embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in laboratory and artificial intelligence-driven research; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in mapping complex materials; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in molecular testing; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in identifying ingredient replacement in products, new product development and contamination testing; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in detection and classification of chemicals; recorded and downloadable computer software, namely, software embedded into computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics and standalone software, for use in predicting the effects of chemicals and efficacy of pharmaceuticals; calculating machines; blank electronic storage media; computers and computer peripheral devices; data processing equipment; scientific instruments, namely, optical sensors, electrochemical sensors, temperature sensors, capacitive sensors, acoustic sensors, light sensors, fluorescence sensors, flow sensors, liquid sensors, level sensors, motion sensors, position sensors, pH sensors, conductivity sensors, spectroscopy sensors, chemical phase sensors, optofluidic waveguide sensors, droplet sensors, physical state sensors, phase change sensors, pressure sensors, probes for scientific purposes,, laboratory equipment, namely, microfluidic chips, syringe pumps, pressure controllers, microvalves, micropumps, droplet generators, capillaries and tubing, manifolds and reservoirs, microscopes, spectroscopy equipment and spectrometers, centrifuges, pH meters, chromatography equipment, high-performance liquid chromatography (HPLC) equipment, gas chromatography equipment, liquid chromatography equipment, infrared spectroscopy equipment, atomic absorption spectroscopy equipment, atomic emission spectroscopy equipment, mass spectrometry equipment, laboratory equipment for testing biophysical properties, laboratory equipment for generating data readouts relating to biophysical properties of molecules and materials and sensory classification, being the classification

List of cases accepted for opposition purposes as shown in Journal 2026/013 published on 27 March 2026 .

of materials and molecules based on how they are perceived by human senses, electrical circuits, electronic circuits, lasers not for medical purposes, optical fibers, oscilloscopes and control interfaces for computer hardware, biological computers, scientific instruments, liquid computers, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics, all for collecting data relating to liquids, liquid interactions and material characterisation; electronic components of computer hardware, biological computers, liquid computers, scientific instruments, lab instruments for handling liquids, high-performance liquid chromatography (HPLC) equipment, and robotics, namely, microfluid chips, syringe pumps, pressure controllers, microvalves, micropumps, droplet generators, capillaries and tubing, manifolds and reservoirs, microscopes, spectroscopy equipment and spectrometers, centrifuges, pH meters, chromatography equipment, high-performance liquid chromatography (HPLC) equipment, gas chromatography equipment, liquid chromatography equipment, infrared spectroscopy equipment, atomic absorption spectroscopy equipment, atomic emission spectroscopy equipment, mass spectrometry equipment, laboratory equipment for testing biophysical properties, laboratory equipment for generating data readouts relating to biophysical properties of molecules and materials and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, all being electronic components of computer hardware, sensors, electronic laboratory equipment, electronic circuits, lasers, optical fibers, oscilloscopes and control interfaces; all of the aforesaid also for use in relation to artificial intelligence, machine learning, reservoir computing and data collection, compilation, processing and verification.

Class 35:

Data management; data processing; computerised data verification; compilation of data; data collection services; electronic data processing; data processing, systematisation and management; compilation of information onto computer databases; collating of data in computer databases; collection and systematisation of information into computer databases; compilation of statistical data for use in scientific research; data management, namely, compiling information relating to biocomputing, materials science, biological material into computer databases; business data management services, namely, data processing services for the purposes of business data research and business data analysis; data management, namely, compiling information obtained from chemical, electrical and sensory inputs into computer databases; data management, namely, compiling information into computer databases relating to testing materials and liquids, classification of chemicals, development of foods, pharmaceuticals and materials, molecular behaviour, laboratory and artificial intelligence-driven research, mapping complex materials, molecular testing, ingredient replacement in products, new product development, contamination testing, data relating to smell, taste and touch, detection and classification of chemicals, and predicting the effects of chemicals and efficacy of pharmaceuticals; data processing; computerised data processing relating to biocomputing, materials science, biological material; computerised business data verification, namely, verifying the accuracy of business data; compilation of business data for business purposes; business data collection for business purposes; electronic data processing; compilation and systematisation of data relating to biocomputing, materials science, and biological material into computer databases; data

processing and systematisation of business data into computer databases; data processing and systematisation into computer databases of data obtained from chemical and electrical inputs, and sensory inputs; compilation of information onto computer databases; information, advisory and consultancy services relating to all of the aforesaid.

Class 42:

Scientific and technological services and research and design relating thereto; industrial analysis, industrial research and industrial design services; quality control and authentication services; design and development of computer hardware and software; data mining; electronic data storage; technical data analysis; development of data programs; database design and development; programming of data processing equipment; compilation of data-processing programs; data conversion of electronic information; preparation of data processing programmes; maintenance of data processing software; design of data processing apparatus; development of data processing apparatus; testing of electronic data processing systems; software engineering; software design; software research; software development; software creation; software customisation services; computer software rental; computer hardware development; hardware design; computer hardware rental; computer hardware design; customized design of computer hardware; providing online, non-downloadable software; providing temporary use of non-downloadable software; providing temporary use of non-downloadable computer software; providing online non-downloadable platform software; providing online, non-downloadable software for reviewing data; providing online, non-downloadable software for the analysis of scientific data; providing online, non-downloadable software for the analysis of time series data; scientific and technological services relating to biocomputing, materials science, biological material and research and design relating thereto, namely research in the fields of artificial intelligence, machine learning, reservoir computing, biocomputing, materials science and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses; scientific and technological services relating to training of machine learning models and design of computers, scientific instruments, biocomputers and liquid computers that have machine learning capacity; scientific and technological services, namely, development of molecules and chemical formulations and scientific research and design relating thereto; scientific and technological research in the field of smell and taste and research and design of new products, scientific instruments and computing systems relating thereto; scientific and technological research in the field of raw and derived data, algorithms and encoding and decoding of information, and design of new products, scientific instruments and computing systems relating thereto; scientific and technological research in the field of application in real-time processing and design of new products and computing systems relating thereto; scientific and technological research services relating to sensor fusion and research and design of new products, scientific instruments and computing systems relating thereto; scientific and technological research services relating to chemical and electrical inputs, and sensory inputs and research and design of new products, scientific instruments and computing systems relating thereto; scientific and technological research relating to testing materials and liquids, to classification of chemicals, to development of foods, pharmaceuticals and materials, to decoding, analysing and interpreting molecular behaviour, to laboratory and artificial

intelligence-driven research, to mapping complex materials, to molecular testing, to ingredient replacement in products, new product development and contamination testing, to interpreting data relating to smell, taste and touch, to detection and classification of chemicals, and to predicting the effects of chemicals and efficacy of pharmaceuticals and design of new products, scientific instruments and computing systems relating thereto; technical engineering services in the nature of industrial analysis, industrial research and industrial design services; quality control for others; authentication of data relating to biocomputing, materials science, biological material; authentication of data for the purposes of training machine learning models; authentication of data obtained from chemical and electrical inputs, and sensory inputs; authentication of data relating to testing materials and liquids, to classification of chemicals, to development of foods, pharmaceuticals and materials, to decoding, analysing and interpreting molecular behaviour, to laboratory and artificial intelligence-driven research, to mapping complex materials, to molecular testing, to ingredient replacement in products, new product development and contamination testing, to interpreting data relating to smell, taste and touch, to detection and classification of chemicals, and to predicting the effects of chemicals and efficacy of pharmaceuticals; design and development of computer hardware and software; data mining; electronic data storage; technical data analysis relating to biocomputing, materials science, biological material; technical analysis of data obtained from chemical and electrical inputs, and sensory inputs; technical analysis of data relating to testing materials and liquids, to classification of chemicals, to development of foods, pharmaceuticals and materials, to decoding, analysing and interpreting molecular behaviour, to laboratory and artificial intelligence-driven research, to mapping complex materials, to molecular testing, to ingredient replacement in products, new product development and contamination testing, to interpreting data relating to smell, taste and touch, to detection and classification of chemicals, and to predicting the effects of chemicals and efficacy of pharmaceuticals; development of computer data programs; development of computer data programs in the nature of application programming interfaces (APIs); database design and development; programming of data processing equipment; design and providing temporary use of computer data programmes for compilation of data relating to biocomputing, materials science, biological material; design and providing temporary use of computer data programmes for compilation of data obtained from chemical and electrical inputs, and sensory inputs; design and providing temporary use of computer data programmes for compilation of data relating to testing materials and liquids, to classification of chemicals, to development of foods, pharmaceuticals and materials, to decoding, analysing and interpreting molecular behaviour, to laboratory and artificial intelligence-driven research, to mapping complex materials, to molecular testing, to ingredient replacement in products, new product development and contamination testing, to interpreting data relating to smell, taste and touch, to detection and classification of chemicals, and to predicting the effects of chemicals and efficacy of pharmaceuticals; design and providing temporary use of computer data programmes for compilation of data for the purposes of training of machine learning models; data conversion of electronic information; preparation of data processing programmes, namely, development of computer software, including software platforms, for technical data analysis relating to biocomputing, materials science, biological material; preparation of data processing programmes, namely,

development of computer software for technical analysis of data obtained from chemical and electrical inputs, and sensory inputs; preparation of data processing programmes, namely, development of computer software for technical analysis relating to testing materials and liquids, to classification of chemicals, to development of foods, pharmaceuticals and materials, to decoding, analysing and interpreting molecular behaviour, to laboratory and artificial intelligence-driven research, to mapping complex materials, to molecular testing, to ingredient replacement in products, new product development and contamination testing, to interpreting data relating to smell, taste and touch, to detection and classification of chemicals, and to predicting the effects of chemicals and efficacy of pharmaceuticals; design and development of computer data processing programmes for the purposes of training of machine learning models; preparation of data processing programmes, namely, development of computer software for the development of molecules and chemical formulations, and for analysing smell and taste, for analysing raw and derived data, and encoding and decoding of information; maintenance of data processing software; design of data processing apparatus; development of data processing apparatus, namely computer hardware design; testing of electronic data processing systems; software engineering; software design; software research; software development; software creation; software customisation services; rental of computer software, including software platforms, for collecting, collating, analysing and interpreting data in the field of artificial intelligence, machine learning, reservoir computing, biocomputing, materials science, molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses; rental of computer software, including software platforms, for training of machine learning models, for analysis of data obtained from chemical and electrical inputs, and sensory inputs, for testing materials and liquids, for classification of chemicals, for development of foods, pharmaceuticals and materials, for decoding, analysing and interpreting molecular behaviour, for laboratory and artificial intelligence-driven research in the field of artificial intelligence, machine learning, reservoir computing, biocomputing, materials science, scientific instruments, molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, for mapping complex materials, for molecular testing, for identifying and testing ingredient replacement in products, new product development and contamination testing, for interpreting data relating to smell, taste and touch, for detection and classification of chemicals, and for predicting the effects of chemicals and efficacy of pharmaceuticals; rental of computer software for the development of molecules and chemical formulations, for analysing smell and taste, for analysing raw and derived data in the field of biocomputing and materials science, including data relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, developing algorithms and encoding and decoding of information, for application in real-time processing of data in the field of biocomputing and materials science, including data relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, and for sensor fusion, namely the combination of information from multiple sensors; computer hardware development; computer

List of cases accepted for opposition purposes as shown in Journal 2026/013 published on 27 March 2026 .

hardware rental; computer hardware design; customized design of computer hardware; providing online, non-downloadable software, including software platforms, for data analysis relating to biocomputing, materials science, biological material; providing online, non-downloadable cloud-, web- and browser-based software for analysis of data obtained from chemical and electrical inputs, and sensory inputs, for testing materials and liquids, for classification of chemicals, for development of foods, pharmaceuticals and materials, for decoding, analysing and interpreting molecular behaviour, for laboratory and artificial intelligence-driven research in the field of artificial intelligence, machine learning, reservoir computing, scientific instruments, biocomputing and materials science, including research relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, for mapping complex materials, for molecular testing, for ingredient replacement in products, new product development and contamination testing, for interpreting data relating to smell, taste and touch, for detection and classification of chemicals, and for predicting the effects of chemicals and efficacy of pharmaceuticals; providing online, non-downloadable software for the development of molecules and chemical formulations, for analysing smell and taste, for analysing raw and derived data in the field of biocomputing and materials science, including data relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, developing algorithms and encoding and decoding of information, for application in real-time processing of data in the field of biocomputing and materials science, including data relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, and for sensor fusion, namely the combination of information from multiple sensors; providing online, non-downloadable software, including software platforms, for training of machine learning models, for analysis of data obtained from chemical and electrical inputs, and sensory inputs; providing online, non-downloadable software, including software platforms, for testing materials and liquids, for classification of chemicals, for development of foods, pharmaceuticals and materials, for decoding, analysing and interpreting molecular behaviour, for laboratory and artificial intelligence-driven research in the field of biocomputing and materials science, including research relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, for mapping complex materials, for molecular testing, for ingredient replacement in products, new product development and contamination testing, for interpreting data relating to smell, taste and touch, for detection and classification of chemicals, and for predicting the effects of chemicals and efficacy of pharmaceuticals; providing online, non-downloadable software being software platforms for testing materials and liquids, for classification of chemicals, for development of foods, pharmaceuticals and materials, for decoding, analysing and interpreting molecular behaviour, for laboratory and artificial intelligence-driven research in the field of biocomputing and materials science, for mapping complex materials, for molecular testing, for ingredient replacement in products, new product development and contamination testing, for interpreting data relating to smell, taste and touch, for detection and classification of chemicals, for analysing, interpreting, collating,

processing, reporting and reviewing data related to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, and for predicting the effects of chemicals and efficacy of pharmaceuticals and application programming interfaces (APIs); providing online, non-downloadable software, including software platforms, for hosting machine learning models; providing temporary use of online non-downloadable software, including software platforms, for data analysis relating to biocomputing, materials science, biological material; providing online, non-downloadable cloud-, web- and browser-based software for analysis of data obtained from chemical and electrical inputs, and sensory inputs, for testing materials and liquids, for classification of chemicals, for development of foods, pharmaceuticals and materials, for decoding, analysing and interpreting molecular behaviour, for laboratory and artificial intelligence-driven research in the field of artificial intelligence, machine learning, reservoir computing, biocomputing, scientific instruments and materials science, including research relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, for mapping complex materials, for molecular testing, for ingredient replacement in products, new product development and contamination testing, for interpreting data relating to smell, taste and touch, for detection and classification of chemicals, and for predicting the effects of chemicals and efficacy of pharmaceuticals; providing temporary use of online non-downloadable software for the development of molecules and chemical formulations, for analysing smell and taste, for analysing raw and derived data in the field of biocomputing and materials science including data relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, developing algorithms and encoding and decoding of information, for application in real-time processing of data in the field of biocomputing and materials science, including data relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, and for sensor fusion, namely the combination of information from multiple sensors; providing temporary use of online non-downloadable software, including software platforms, for training of machine learning models, for analysis of data obtained from chemical and electrical inputs, and sensory inputs; providing temporary use of online non-downloadable software, including software platforms, relating to testing materials and liquids, to classification of chemicals, to development of foods, pharmaceuticals and materials, to decoding, analysing and interpreting molecular behaviour, to laboratory and artificial intelligence-driven research in the field of artificial intelligence, machine learning, reservoir computing, biocomputing and materials science, including research relating to molecular properties, material properties and sensory classification, being the classification of materials and molecules based on how they are perceived by human senses, to mapping complex materials, to molecular testing, to ingredient replacement in products, new product development and contamination testing, to interpreting data relating to smell, taste and touch, to detection and classification of chemicals, and to predicting the effects of chemicals and efficacy of pharmaceuticals; providing temporary use of online non-downloadable software, including software platforms, for hosting machine learning models; all of the aforesaid also

List of cases accepted for opposition purposes as shown in Journal 2026/013 published on 27 March 2026 .

relating to artificial intelligence, machine learning, reservoir computing and data collection, compilation, processing and verification; information, advisory and consultancy services in the field of artificial intelligence, machine learning, reservoir computing and scientific research and technological design and development involving data collection, compilation, processing and verification.

YOVA

Class 29:
Plant-based and dairy-free alternatives to dairy products; dairy substitutes; milk substitutes; plant-based milk beverages; almond milk, oat milk, soy milk, coconut milk, cashew milk, and other nut- or grain-based milk beverages; flavoured plant-based milk drinks; plant-based yoghurts and yoghurt alternatives; cultured non-dairy yoghurts; vegan cheese; cheese substitutes; plant-based cream and creamers; non-dairy cooking creams; desserts of substitutes of dairy products; plant-based mousses; dessert toppings; dips made from plant-based ingredients; hummus; vegetable- and nut-based spreads; plant-based butters and butter substitutes; desserts made primarily from plant-based bases as dairy substitutes; desserts made primarily from dairy alternative bases; frozen desserts made from plant-based ingredients as substitutes of dairy products; non-dairy frozen yoghurts.

Class 30:
Dairy-free sauces and condiments; plant-based sauces; salad dressings; chutneys; plant-based mayonnaise; cheese-style sauces; béchamel-style sauces; gravy substitutes; sweet dips; dessert toppings; non-dairy custards; ice cream substitutes; sorbets; frozen confections made from dairy substitutes; plant-based puddings and mousses.

Class 32:
Non-alcoholic beverages; plant-based beverages; smoothies; fruit- and vegetable-based beverages; cold-pressed juices; turmeric shots; ginger shots; vitamin-enriched shots; energy drinks not for medical purposes; isotonic beverages; vitamin-

enriched drinks; nutritionally enhanced waters; sparkling beverages made with water; non-alcoholic drinks containing adaptogens, vitamins, or minerals; fermented beverages (non-alcoholic, not being beers).
