05 June 2026 .***

The mark consists of a three-dimensional character design of a stylized duck wearing an astronaut spacesuit. The duck has a rounded head with a beak and eyes, enclosed in an astronaut helmet with a clear visor. The word “FundPark” appears in stylized lettering across the front of the helmet. On the chest of the spacesuit is a triangular emblem containing the letters “AI”. The spacesuit includes segmented armor-like detailing on the shoulders, torso, arms, and legs, along with circular and linear design elements running down the front of the torso and legs. A utility belt with a central buckle and two flexible tubes is positioned around the waist. The character stands upright in a frontal pose with arms slightly away from the body.

Class 14:

Charms for key chains; Key chains comprised of split rings with decorative fobs or trinkets; Key rings comprised of split rings with decorative fobs or trinkets; Badges of precious metal; Clocks and watches, electric; Non-monetary coins.

Class 28:

Stuffed toys; Divot repair tools being golf accessories; Golf bags, with or without wheels.

WORLDRIDE

Description of the Mark: The mark consists of the word 'WORLD RIDE' rendered in a three-dimensional, bevelled font with a polished metallic appearance. Design Elements: The lettering is constructed with clean, geometric lines. Positioned at the upper right curve of the letter 'O' is a proprietary light-flare element consisting of a brilliant white core emitting radiant pink and purple rays. This light source is an intentional, source-identifying

***List of cases accepted for opposition purposes as shown in Journal 2026/023 published on
05 June 2026 .***

feature of the mark. Visual Effects and Shading: The lettering features a complex gradient of rose-gold, silver, lavender, white and black to create a reflective, multi-tonal metallic finish. High-contrast highlights and deep shading define the 3D bevelled edges. The subtle drop shadowing visible in this representation is used solely to define the periphery of the mark against the white background for the purposes of this application; these shadows do not form part of the mark. These radiant light effects and metallic gradients are primary features of the mark, designed to resolve into a cohesive finish across different scales. Colour Claim and Background: The colours rose-gold, silver, lavender, pink, purple, white, and black are claimed as a feature of the mark. The white background shown in the representation is for illustrative purposes only and does not form part of the mark.

Class 41:

Providing on-line non-downloadable video content; Providing online music, not downloadable; Providing digital sound recordings, not downloadable, from the internet.

UK00004377259 22 April 2026
(41)

Description of the Mark: The mark consists of the words 'FIRE RAIN' rendered in a highly stylized, three-dimensional font with a polished metallic appearance. Design Elements: The lettering is constructed with clean, geometric lines and tightly compressed kerning. The letter 'A' in 'RAIN' is a unique, custom-designed geometric triangular form. The letter 'I' in 'RAIN' features a translucent, hollowed-out effect to simulate a drop of rain. Positioned at the apex of the letter 'I' in 'FIRE' and at the summit of the letter 'A' in 'RAIN' are proprietary light-flare elements, each consisting of a brilliant white core emitting radiant pink and purple rays. These light sources are intentional, source-identifying features of the mark. Visual Effects and Shading: The lettering features a complex gradient of rose-gold, silver, lavender, white and black to create a reflective, multi-tonal metallic finish. High-contrast highlights and deep shading define the 3D bevelled edges, while the hollowed-out 'I' utilises thin, luminous outlines. The subtle drop shadowing visible in this representation is used solely to define the periphery of the mark against the white background for the purposes of this application; these shadows do not form part of the mark. These radiant light

List of cases accepted for opposition purposes as shown in Journal 2026/023 published on 05 June 2026 .

effects and metallic gradients are primary features of the mark, designed to resolve into a cohesive finish across different scales. Colour Claim and Background: The colours rose-gold, silver, lavender, pink, purple, white, and black are claimed as a feature of the mark. The white background shown in the representation is for illustrative purposes only and does not form part of the mark.

EXPERIAN AGENT OPERATING SYSTEM

Class 9:

Downloadable artificial intelligence software for autonomous decision-making, planning, and execution of tasks; software platforms for coordinating multiple AI agents; downloadable artificial intelligence software for autonomous decision-making, investigation and execution of tasks; downloadable software platforms providing a trusted operating layer for artificial intelligence agents featuring identity management, access control, data security and compliance guardrails; downloadable software for orchestration and coordination of multiple AI agents across data, models and workflows; machine learning and deep learning software; downloadable software for fraud detection, identity verification, credit risk assessment, marketing optimisation, business analytics and operational automation; downloadable software for model governance, explainability, audit trails, monitoring and policy enforcement; downloadable application programming interfaces (APIs) and software development kits (SDKs) for building and integrating agent-based artificial intelligence systems; downloadable workflow automation and robotic process automation software incorporating artificial intelligence.

Class 35:

Business process automation services using artificial intelligence; provision of business analytics and decision support services; business data analysis and decision support services provided by autonomous AI systems; automated investigation and analysis of business data; business risk assessment services using artificial intelligence in the fields of fraud, identity and credit; marketing analysis and campaign optimisation using artificial intelligence; provision of business insights and strategy execution through agent-based artificial intelligence systems; business operational efficiency and workflow optimisation services; all the aforesaid including human-in-the-loop validation for complex or high-impact decision-making.

Class 36:

Credit assessment and scoring, credit bureau, credit consultancy, credit agency, credit screening, credit history reporting services using artificial intelligence; credit account management services using artificial intelligence; credit strategy advisory and optimisation services using artificial intelligence; prospect analysis and customer profiling services using artificial intelligence; financial risk assessment services using artificial intelligence; provision of creditworthiness evaluations and reports using artificial intelligence; fraud detection services relating to credit applications using artificial intelligence; analysis of financial data for credit risk and lending decisions using artificial intelligence; providing financial insights and decision support services using artificial intelligence; autonomous artificial intelligence agents for investigation, analysis, orchestration and optimisation of credit and financial risk workflows.

Class 42:

Software as a Service (SaaS) featuring artificial intelligence platforms for autonomous agents; Platform as a Service (PaaS) featuring artificial intelligence platforms for autonomous agents; design and development of agentic AI systems; cloud-based AI services; providing temporary use of non-downloadable software for workflow automation; Software as a

Service (SaaS) featuring artificial intelligence platforms enabling autonomous agents to investigate, orchestrate and optimise workflows; Platform as a Service (PaaS) for the development, deployment and integration of agentic artificial intelligence systems; providing temporary use of non-downloadable software featuring a trusted agentic operating layer incorporating identity management, access control, data security, compliance controls and governance monitoring; design and development of artificial intelligence systems incorporating composable architectures allowing integration of proprietary, third-party and client-built AI agents; cloud computing services for enabling interoperable multi-agent systems across enterprise environments; development and hosting of software for agent-native decisioning in the fields of fraud, identity, credit risk, marketing, analytics, operations and governance; providing temporary use of non-downloadable software for model risk management, explainability, audit trail generation and policy enforcement in artificial intelligence systems; consultancy, advisory and information services relating to the design, implementation and governance of artificial intelligence and agent-based systems.

Class 45:

Fraud prevention services and fraud detection services using artificial intelligence; identity theft prevention services and identity theft detection services using artificial intelligence; identity and age verification services using artificial intelligence; personal identity validation services; authentication of personal identity information; verification of personal data using artificial intelligence, for security and compliance purposes; monitoring of personal and identity information using artificial intelligence, to detect fraud and misuse; provision of information and advisory services relating to fraud prevention and identity protection; investigation of fraudulent activities using artificial intelligence relating to identity and personal data; compliance monitoring services using artificial intelligence, relating to identity verification and fraud prevention; Investigation, analysis and monitoring of identity and fraud-related risks using autonomous artificial intelligence agents.
