***List of cases accepted for opposition purposes as shown in Journal 2026/028 published on  
10 July 2026 .***

Class 9:

Computer software; downloadable computer software; computer programs; cybersecurity software; information security software; network security software; cloud security software; artificial intelligence software; machine learning software; large language model (LLM) software; generative artificial intelligence software; data analytics software; data security software; data loss prevention (DLP) software; cloud access security broker (CASB) software; secure service edge (SSE) software; secure access service edge (SASE) software; zero trust network access (ZTNA) software; identity security software; identity governance software; data classification software; data discovery software; mobile device security software; operational technology (OT) security software; industrial control system (ICS) security software; supply chain risk management software; third-party risk management software; cyber resilience software; security awareness and training software; business intelligence software; cyber intelligence software; threat intelligence software; breach intelligence software; digital risk protection software; attack surface management software; exposure management software; security orchestration and automation software; security information and event management software; identity and access management software; privileged access management software; endpoint protection software; extended detection and response software; network detection and response software; security operations software; governance, risk and compliance software; vulnerability management software; digital forensics software; software for monitoring, analysing, classifying, securing and managing networks, systems, devices, applications, users, identities, domains, cloud environments and digital assets; downloadable software platforms; recorded software; computer hardware; computer peripherals; electronic security apparatus and instruments. Artificial intelligence platforms; AI model management software; GPU cluster management software; cloud computing software; infrastructure management software for cloud and hybrid cloud environments; data centre infrastructure management software (DCIM), datacentre management software; high-performance computing software; infrastructure management software; orchestration software for artificial intelligence environments. Network access control (NAC) software; domain name system (DNS) visibility software; DNS monitoring software; DNS analytics software; DNS security software; domain reputation analysis software.

Class 35:

Wholesale, retail, distributorship and value-added distribution services relating to software, computer hardware, information technology products, cybersecurity products, artificial intelligence products, cloud services and telecommunications products; procurement services for third parties; software licensing administration services; business consultancy relating to digital transformation, information technology, artificial intelligence and cybersecurity; business management services relating to technology products and services; commercial advisory services relating to technology and cybersecurity markets; marketing, promotion and reseller services relating to software, hardware and technology services.

Class 37:

Installation, deployment, commissioning, maintenance, repair and support of computer hardware, data centre infrastructure; datacenter infrastructure, artificial intelligence infrastructure, high-performance computing systems, servers, storage systems, networking equipment, edge computing infrastructure and information technology infrastructure; installation and

maintenance of computer systems; installation and maintenance of network infrastructure; technical support services relating to information technology hardware and infrastructure.

Class 38:

Telecommunications services; electronic transmission of data; secure transmission of data; provision of secure communications services; provision of access to computer networks and telecommunications networks; managed network connectivity services; managed wide area network (WAN) services; software-defined wide area network (SD-WAN) services; virtual private network (VPN) services; secure remote access services; secure communications services for enterprises; transmission of cybersecurity data and threat intelligence information; provision of telecommunications connections to cloud computing environments; network communications services; provision of access to online platforms, databases and software applications; communications services for cybersecurity monitoring and management; advisory and consultancy services relating to telecommunications, network connectivity and secure communications.

Class 42:

Software as a Service (SaaS); Platform as a Service (PaaS); cybersecurity services; managed cybersecurity services; managed detection and response services; threat intelligence services; cyber intelligence services; breach intelligence services; digital risk protection services; attack surface management services; continuous threat exposure management services; identity security services; identity governance services; privileged access management services; data security services; data classification services; data discovery services; data loss prevention services; cloud access security broker services; secure service edge services; secure access service edge services; zero trust security services; operational technology security services; industrial control system security services; third-party risk management services; cyber resilience services; security awareness services; managed security services; managed cloud security services; computer security consultancy; information technology consultancy; artificial intelligence consultancy; cloud computing services; cloud security services; computer security monitoring services; computer security operations centre services; network monitoring services; security information and event monitoring services; threat hunting services; penetration testing services; vulnerability assessment services; digital forensic investigation services; incident response services; data analytics services; managed security operations centre (SOC) services; security orchestration services; cyber defence services; software development services; software integration services; software maintenance services; design, development, implementation and hosting of computer software; research relating to information technology, artificial intelligence, machine learning, cybersecurity and digital intelligence; providing temporary use of non-downloadable software for cybersecurity, artificial intelligence, compliance, risk management, network management, data analysis, automation and digital investigations. Artificial intelligence infrastructure design services; datacentre design services; design and architecture of AI factories; design of high-performance computing environments; design of cloud computing infrastructure; infrastructure-as-a-service (IaaS); design of GPU computing environments; design and development of artificial intelligence platforms; technical consultancy relating to artificial intelligence infrastructure, datacentres, cloud computing and high-performance computing;

***List of cases accepted for opposition purposes as shown in Journal 2026/028 published on 10 July 2026 .***

managed artificial intelligence services; artificial intelligence model hosting services; artificial intelligence infrastructure management services; cloud infrastructure management services. Network access control (NAC) services; domain name system (DNS) visibility services; DNS monitoring services; DNS analytics services; DNS classification services; DNS security services; malicious domain detection and analysis services; domain reputation analysis services.

Class 45:

Security services; cyber intelligence services; cyber threat investigation services; breach intelligence services; fraud investigation services; digital risk protection services; online brand protection services; identity protection services; online monitoring services for security purposes; investigation of cybercrime, fraud, phishing, impersonation and malicious online activity; cyber threat actor profiling services; open-source intelligence (OSINT) services; cyber intelligence analysis services; monitoring of exposed credentials and compromised accounts; monitoring of data breaches and exposed information; digital identity protection services; online impersonation investigation services; brand abuse investigation services; phishing investigation services; domain abuse investigation services; online reputation monitoring services; security advisory services relating to digital threats, cyber threats and online risks; takedown support services relating to malicious, fraudulent or infringing online content; monitoring of digital assets and online environments for security and risk management purposes.

**UK00004407941** 26 June 2026  
(9, 41)

## Mark 1

## Mark 2

Application for a series of 2 marks.

Class 9:

Smartphone app for horse riders. Incorporating GPS algorithm to track and guide a rider within the arena to enable their trainer to coach them in real time as they ride. A separate app enabling trainers to add the digital floorplan to a lesson or exercise and adding audio coaching to that plan such that the app can release the correct audio to accompany the rider as they ride the movements of the exercise. A digital platform including a marketplace where trainers can advertise and sell exercises, dressage tests or lessons to a global user base. BLE Bluetooth beacons which assist in tracking the rider within the school.

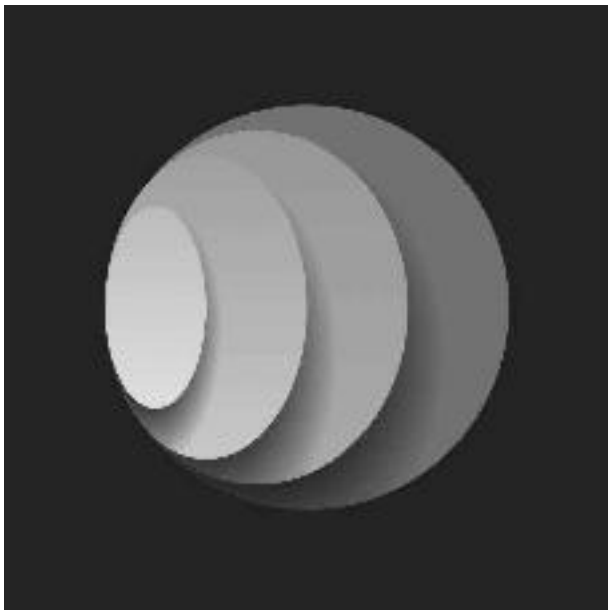

Class 41:

Training/coaching services.

## LIVED VALUE

“Lived Value” is Empact’s proprietary term for the value customers or citizens actually experience in real life when engaging with an organisation, product, service or AI-enabled interaction. It will be used for Empact’s consulting services, diagnostic methods, assessment tools and maps to the existing Lived Value Index™, which assess customer trust, outcomes, experience and commercial value. Registration is sought to protect “Lived Value” as a distinctive identifier of Empact’s methodology and services. There appears to be no other.

Class 35:

Business consulting; Strategic business consultancy; Consultancy relating to business management and organisation.

Application for a series of 2 marks.

Class 9:

Artificial intelligence computer software; computer software applications for use with artificial intelligence; downloadable computer programs and software using artificial intelligence for data analysis; software applications to collect, organise and curate data in efficient ways to allow integration with AI models, agents and software applications including techniques involving graph algorithms; software applications to facilitate communication between AI applications and other deterministic software applications and tools; software to facilitate communication between AI applications; software to facilitate communication between AI applications and humans; downloadable computer software and programs for using language models; downloadable computer software for developing and operating artificial intelligence-based applications; downloadable software used for training and simulating artificial intelligence models; downloadable software for application and database integration; downloadable software for use as an application programming interface (API); downloadable computer software and programs for machine learning; downloadable computer software and programs for natural language processing, generation, understanding, reasoning, and analysis; downloadable computer software and programs for detecting, recognizing, processing, analyzing, understanding, creating, generating, enhancing, and/or editing text, voice, speech, audio, images, graphics, and/or video; downloadable computer software and programs for conversion of text and data files into software code, for detecting, recognizing, processing, analyzing, understanding, generating and/or editing software code, and for multilingual text and speech recognition, translation, and transcription; downloadable computer software and programs for sharing datasets for the purpose of machine learning, predictive analytics, and building language and image models, for developing and implementing artificial neural networks, for simulation environments for the purpose of testing artificial intelligence agents, algorithms, or programs, and for using, customizing, fine-tuning, and adapting artificial intelligence models; downloadable computer software and programs for building, using, and deploying autonomous agents, semi-autonomous agents, and intelligent agents; downloadable computer software and programs for task automation and workflow orchestration; downloadable software for drafting, summarizing, designing, generating, creating, editing and publishing documents, charts, written content, spreadsheets, presentations, and emails; downloadable computer search engine software; downloadable software in the nature of cloud- and edge-computing software using artificial intelligence for use in industry-specific software development and machine learning; downloadable augmented reality (AR) and virtual reality (VR) software for AI-assisted interaction, simulation,

***List of cases accepted for opposition purposes as shown in Journal 2026/028 published on 10 July 2026 .***

and training; downloadable computer software and programs for data processing, encryption, anonymization, and privacy-preserving machine learning; downloadable computer software and programs for multi-modal processing and understanding of text, audio, image, and video; downloadable computer software and programs for generating synthetic data and synthetic training environments; downloadable computer software and programs for retrieval-augmented generation, and knowledge graph construction.

**Class 35:**

Advertising; business management, organization and administration; office functions; business consultancy; business management and organization consultancy; assistance, advisory services and consultancy with regard to business planning, business analysis, and business management; consultancy and advisory services in the field of business strategy; business development consulting services; advertising and marketing; dissemination of advertising for others via the internet; business management of data centers for others.

**Class 41:**

Providing online electronic publications, not downloadable; educational services, namely, organizing and conducting conferences, seminars, classes, and workshops in the fields of artificial intelligence, machine learning, information technology (IT), business process automation, prompt engineering, project management, and software development; providing online news, information and commentary in the fields of artificial intelligence, machine learning, information technology (IT), business process automation, prompt engineering, project management, and software development; organizing educational and entertainment conferences in the field of artificial intelligence, machine learning, information technology (IT), business process automation, prompt engineering, project management, and software development; providing online non-downloadable publications in the nature of journals, blogs and articles in the field of artificial intelligence, machine learning, information technology (IT), business process automation, prompt engineering, project management, and software development; training services in the field of artificial intelligence, machine learning, information technology (IT), business process automation, prompt engineering, project management, and software development.

**Class 42:**

Artificial intelligence autonomous agent advisory services; providing implementing patterns for technical and behaviour integration for artificial intelligence autonomous agents in the workplace; technology consultation in the field of artificial intelligence autonomous agents; software as a service [SaaS] featuring artificial intelligence platforms; platform as a service [PaaS], namely, providing artificial intelligence software platforms; providing product development and engineering services in the field of artificial intelligence; providing behavioural science and design services in the field of artificial intelligence; artificial intelligence software customisation services; artificial intelligence software consultancy services; artificial intelligence software programming and implementation; IT services, technical support, assistance and advisory services relating to artificial intelligence autonomous agent software; design, research, development, programming, implementation, installation, updating, modification, customisation, configuration, programming, maintenance, monitoring, repair and engineering

of artificial intelligence autonomous agent software: providing a website featuring non-downloadable software using artificial intelligence for conducting tasks with artificial intelligence autonomous agents; research and development services in the field of artificial intelligence, autonomous agents, computer science and machine learning; research, design and development of computer programs and software; providing computer software consulting services; technical support services, namely, troubleshooting in the nature of diagnosing and repairing computer software problems; forward deployed engineering services in the field of artificial intelligence; computer systems integration services; design, development, testing, deployment, monitoring, and maintenance of production artificial intelligence systems; integration of artificial intelligence models with enterprise data, software applications, APIs, tools, controls, and business workflows; software engineering services for developing custom AI applications, AI agents, model evaluation frameworks, benchmarking tools, reliability testing systems, and AI governance controls; providing online non-downloadable computer software for developing and operating artificial intelligence-based applications; providing online non-downloadable software used for training and simulating artificial intelligence models; application service provider featuring application programming interface (API) software; providing online non-downloadable software and computer programs for using language models; providing online non-downloadable software and computer programs for machine learning; providing online non-downloadable software and computer programs for natural language processing, generation, understanding, reasoning, and analysis; providing online non-downloadable software and computer programs for detecting, recognizing, processing, analyzing, understanding, creating, generating, enhancing, and/or editing text, voice, speech, audio, images, graphics, and/or video; providing online non-downloadable software and computer programs for conversion of text and data files into software code, for detecting, recognizing, processing, analyzing, understanding, generating and/or editing software code, and for multilingual text and speech recognition, translation, and transcription; providing online non-downloadable software and computer programs for sharing datasets for the purpose of machine learning, predictive analytics, and building language and image models, for developing and implementing artificial neural networks, for the purpose of testing artificial intelligence agents, algorithms, or programs, and for using, customizing, fine-tuning, and adapting artificial intelligence models; providing online non-downloadable software and computer programs for task automation and workflow orchestration; providing online non-downloadable software and computer programs for building, using, and deploying autonomous agents, semi-autonomous agents, and intelligent agents; providing online non-downloadable software and computer programs for drafting, summarizing, designing, generating, creating, editing and publishing documents, charts, written content, spreadsheets, presentations, and emails; provision of search engines for the internet; providing a website featuring a media aggregator and search engine for internet content; computer services, namely, providing search engines for obtaining data, images, audio and video on a global computer network; providing customized on-line web pages featuring user-defined information, which includes search engines and on-line web links to other web sites; providing online non-downloadable cloud computing software using artificial intelligence for use in industry-specific software development and machine learning; software

**PulseWinery**

Class 9:

Artificial intelligence software for viticulture and winemaking; downloadable computer software for vineyard monitoring, grape-harvest management and winemaking process control; software for managing fermentation, ageing, blending and bottling of wine; software for processing vineyard and winery sensor, satellite and drone data; edge-computing software for

on-device agricultural and winery data inference; blockchain software; software for recording, tracking, verifying and authenticating the provenance and authenticity of agricultural and wine products; tamper-evident provenance software; downloadable digital authentication certificates; downloadable mobile applications for viticulture, winemaking and product authentication; computer hardware for agricultural and winery data processing.

**Class 35:**

Supply-chain management services; track-and-trace services for the commercial management of the supply chain of agricultural and wine products; inventory management; data analytics services for viticulture and winery businesses; business management; business advisory services relating to wine-growing and winemaking operations; business information services; collection and systematisation of vineyard and winery business data; business consultancy services.

**Class 42:**

Software as a service (SaaS) and platform as a service (PaaS) featuring software for viticulture, winemaking production control and wine provenance; design and development of computer software for the viticulture and winemaking industries; cloud computing services for agricultural, viticultural and winery data; providing online non-downloadable software for tracking, tracing, verifying and authenticating the provenance and authenticity of agricultural and wine products; authentication of products and data by technological and cryptographic means; blockchain-as-a-service (BaaS); electronic data storage; quality control and quality-assurance testing; scientific and technological consultancy in the fields of viticulture and oenology; computer programming for the agricultural and wine-growing industries.

**Class 44:**

Viticulture services; vineyard management consultancy; agricultural and horticultural services relating to grape-growing; advisory services relating to vine health and plant diseases; oenological and winemaking advisory services; provision of information relating to viticulture, vineyard management and winemaking; agronomic advisory services for wine-growing.

**Class 45:**

Verification of the authenticity of wine and agricultural products; authentication services for verifying the genuineness and origin of goods; anti-counterfeiting consultancy and verification services; providing authentication of personal and product identification information.

**AgroIntelAI.com LTD**

**UK00004394954** 30 May 2026  
(9, 10, 35, 42, 44)

**Class 9:**

Software: Artificial intelligence software for agriculture and livestock monitoring; edge-computing software; software for on-device and in-sensor artificial-intelligence inference; software for processing and analysing biosensor and agricultural sensor telemetry; software implementing layered sensor-edge-cloud data architectures with confidence-banded inference escalation; embedded and firmware software for sensor edge gateways and wearable biosensor devices; software for cryptographic signing and verification of sensor-originated data; software for anonymised aggregation of sensor data across sites; software for processing satellite and drone imagery for agricultural purposes; downloadable mobile applications for agricultural and livestock monitoring. Hardware: Edge-computing devices; edge gateway apparatus; computer hardware for processing and analysing sensor data; data-processing apparatus; electronic edge-inference modules and processors; electronic sensors and electronic sensor modules for agricultural and livestock monitoring; wireless data transmitters and receivers; low-power wide-area network (LPWAN) communication apparatus; telemetry transmitters; computer hardware incorporating artificial-intelligence inference accelerators; computer hardware.

**Class 10:**

Wearable veterinary biosensors; veterinary monitoring apparatus and instruments; veterinary diagnostic apparatus and instruments; wearable apparatus for monitoring physiological and biomarker data of animals; microneedle sampling devices for veterinary use; interstitial-fluid sampling apparatus for veterinary use; electronic apparatus for the continuous monitoring of livestock health.

**Class 35:**

Data analytics services for agricultural and livestock businesses; business management; business advisory services; business information services; collection and systematisation of agricultural and livestock sensor data; business consultancy services.

**Class 42:**

Artificial intelligence software for agriculture and livestock monitoring; edge-computing software; software for on-device and in-sensor artificial-intelligence inference; software for processing and analysing biosensor and agricultural sensor telemetry; software implementing layered sensor-edge-cloud data architectures with confidence-banded inference escalation; embedded and firmware software for sensor edge gateways and wearable biosensor devices; software for cryptographic signing and verification of sensor-originated data; software for anonymised aggregation of sensor data across sites; software for processing satellite and drone imagery for agricultural

purposes; edge gateway computer hardware; downloadable mobile applications for agricultural and livestock monitoring.

**Class 44:**

Livestock monitoring and animal-health information services; veterinary information services and veterinary clinical-decision-support information services; agricultural and crop monitoring advisory services; advisory services relating to crop health and plant diseases; provision of information relating to agriculture, horticulture and animal husbandry; agronomic advisory services.

Application for a series of 4 marks.

**Class 9:**

Energy control devices; charging appliances for rechargeable equipment; electricity storage apparatus; ultracapacitors for energy storage; supercapacitors for energy storage; electrical storage batteries; solar batteries; solar battery chargers; photovoltaic apparatus for generating electricity; photovoltaic cells; solar energy collectors for generating electricity; solar panels; solar panels for electricity generation; solar cells; batteries; battery charging equipment; battery chargers; battery monitors; chargers for electric vehicles; charging stations for electric vehicles; electric vehicle charging points; electric vehicle charging monitoring apparatus; electrical charge controllers; electric charging cables; remote monitoring apparatus and systems; apparatus for monitoring electrical energy consumption; energy meters for tracking and monitoring energy usage; smart meters; energy regulators; energy management system apparatus; hardware and software for energy management systems; electric control devices for energy management and energy management systems; home energy management system hardware and software; home energy management systems for monitoring and controlling domestic energy usage and/or supply; heating control devices; controllers and thermostats for heat pumps and heat pump installations; software, software platforms and software applications, all in relation to electricity storage apparatus; software, software platforms and software applications, all in relation to electrical storage batteries, solar batteries, solar battery chargers, photovoltaic apparatus for generating electricity, photovoltaic cells, solar energy collectors for generating electricity, solar panels and solar cells; software, software platforms and software applications, all for use with heating and heating systems; software, software platforms and software applications, all for use with heat pumps; software, software platforms and software applications, all in relation to batteries, battery chargers and battery charging; software, software platforms and software applications, all in relation to chargers for electric vehicles, charging stations for electric vehicles and electric vehicle charging points; software, software platforms and software applications, all for use with electric vehicle charging monitoring apparatus and electrical charge controllers; software, software

platforms and software applications, all in relation to electric vehicle charging; parts and fittings for all of the aforesaid goods.

**Class 11:**

Apparatus and installations for lighting, heating, cooling, steam generating, cooking, drying, ventilating, water supply and sanitary purposes; solar heating apparatus and installations; solar energy powered heating apparatus; solar water heaters; solar heat collection panels; solar collectors for heating; solar panels for use in heating; solar heating panels; thermal storage apparatus for heating; heat pumps; heat pumps for heating systems; heat pumps for energy processing; air-source heat pump water heaters; boilers for use in heating systems; hot water tanks for use in heating systems; air-conditioning apparatus and installations; air cooling apparatus and instruments; electric fans; cooling fans; parts and fittings for all of the aforesaid goods.

**Class 35:**

Retail and wholesale services and online retail and wholesale services, all in relation to energy control devices, charging appliances for rechargeable equipment, electricity storage apparatus, ultracapacitors for energy storage, supercapacitors for energy storage, electrical storage batteries, solar batteries, solar battery chargers, photovoltaic apparatus for generating electricity, photovoltaic cells, solar energy collectors for generating electricity, solar panels, solar panels for electricity generation, solar cells, batteries, battery charging equipment, battery chargers, battery monitors, chargers for electric vehicles, charging stations for electric vehicles, electric vehicle charging points, electric vehicle charging monitoring apparatus, electrical charge controllers, electric charging cables, remote monitoring apparatus and systems, apparatus for monitoring electrical energy consumption, energy meters for tracking and monitoring energy usage, smart meters, energy regulators, energy management system apparatus, hardware and software for energy management systems, electric control devices for energy management and energy management systems, home energy management system hardware and software, home energy management systems for monitoring and controlling domestic energy usage and/or supply, heating control devices, controllers and thermostats for heat pumps and heat pump installations, software and software platforms and software applications all in relation to electricity storage apparatus, software and software platforms and software applications all in relation to electrical storage batteries, solar batteries, solar battery chargers, photovoltaic apparatus for generating electricity, photovoltaic cells, solar energy collectors for generating electricity, solar panels and solar cells, software and software platforms and software applications all for use with heating and heating systems, software and software platforms and software applications all in relation to electric vehicle charging monitoring apparatus and electrical charge controllers, software and software platforms and software applications all in relation to chargers for electric vehicles, charging stations for electric vehicles and electric vehicle charging points, software and software platforms and software applications all for use with electric vehicle charging monitoring apparatus and electrical charge controllers, software and software platforms and software applications all in relation to electric vehicle charging, apparatus and installations for lighting purposes, heating purposes, cooling purposes, steam generating purposes, cooking purposes, drying purposes, ventilating purposes, water supply and sanitary purposes, solar heating apparatus and installations and parts and fittings therefor, solar energy powered heating apparatus, solar water heaters, solar heat collection panels, solar collectors for

## AO SOLAR

Class 9:

***List of cases accepted for opposition purposes as shown in Journal 2026/028 published on 10 July 2026 .***

Energy control devices; charging appliances for rechargeable equipment; electricity storage apparatus; ultracapacitors for energy storage; supercapacitors for energy storage; electrical storage batteries; solar batteries; solar battery chargers; photovoltaic apparatus for generating electricity; photovoltaic cells; solar energy collectors for generating electricity; solar panels; solar panels for electricity generation; solar cells; batteries; battery charging equipment; battery chargers; battery monitors; chargers for electric vehicles; charging stations for electric vehicles; electric vehicle charging points; electric vehicle charging monitoring apparatus; electrical charge controllers; electric charging cables; remote monitoring apparatus and systems; apparatus for monitoring electrical energy consumption; energy meters for tracking and monitoring energy usage; smart meters; energy regulators; energy management system apparatus; hardware and software for energy management systems; electric control devices for energy management and energy management systems; home energy management system hardware and software; home energy management systems for monitoring and controlling domestic energy usage and/or supply; heating control devices; controllers and thermostats for heat pumps and heat pump installations; software, software platforms and software applications, all in relation to electricity storage apparatus; software, software platforms and software applications, all in relation to electrical storage batteries, solar batteries, solar battery chargers, photovoltaic apparatus for generating electricity, photovoltaic cells, solar energy collectors for generating electricity, solar panels and solar cells; software, software platforms and software applications, all for use with heating and heating systems; software, software platforms and software applications, all for use with heat pumps; software, software platforms and software applications, all in relation to batteries, battery chargers and battery charging; software, software platforms and software applications, all in relation to chargers for electric vehicles, charging stations for electric vehicles and electric vehicle charging points; software, software platforms and software applications, all for use with electric vehicle charging monitoring apparatus and electrical charge controllers; software, software platforms and software applications, all in relation to electric vehicle charging; parts and fittings for all of the aforesaid goods.

**Class 11:**

Apparatus and installations for lighting, heating, cooling, steam generating, cooking, drying, ventilating, water supply and sanitary purposes; solar heating apparatus and installations; solar energy powered heating apparatus; solar water heaters; solar heat collection panels; solar collectors for heating; solar panels for use in heating; solar heating panels; thermal storage apparatus for heating; heat pumps; heat pumps for heating systems; heat pumps for energy processing; air-source heat pump water heaters; boilers for use in heating systems; hot water tanks for use in heating systems; air-conditioning apparatus and installations; air cooling apparatus and instruments; electric fans; cooling fans; parts and fittings for all of the aforesaid goods.

**Class 35:**

Retail and wholesale services and online retail and wholesale services, all in relation to energy control devices, charging appliances for rechargeable equipment, electricity storage apparatus, ultracapacitors for energy storage, supercapacitors for energy storage, electrical storage batteries, solar batteries, solar battery chargers, photovoltaic apparatus for generating electricity, photovoltaic cells, solar energy collectors for generating electricity, solar panels, solar panels for electricity

generation, solar cells, batteries, battery charging equipment, battery chargers, battery monitors, chargers for electric vehicles, charging stations for electric vehicles, electric vehicle charging points, electric vehicle charging monitoring apparatus, electrical charge controllers, electric charging cables, remote monitoring apparatus and systems, apparatus for monitoring electrical energy consumption, energy meters for tracking and monitoring energy usage, smart meters, energy regulators, energy management system apparatus, hardware and software for energy management systems, electric control devices for energy management and energy management systems, home energy management system hardware and software, home energy management systems for monitoring and controlling domestic energy usage and/or supply, heating control devices, controllers and thermostats for heat pumps and heat pump installations, software and software platforms and software applications all in relation to electricity storage apparatus, software and software platforms and software applications all in relation to electrical storage batteries, solar batteries, solar battery chargers, photovoltaic apparatus for generating electricity, photovoltaic cells, solar energy collectors for generating electricity, solar panels and solar cells, software and software platforms and software applications all for use with heating and heating systems, software and software platforms and software applications all for use with heat pumps, software and software platforms and software applications all in relation to batteries, battery chargers and battery charging, software and software platforms and software applications all in relation to chargers for electric vehicles, charging stations for electric vehicles and electric vehicle charging points, software and software platforms and software applications all for use with electric vehicle charging monitoring apparatus and electrical charge controllers, software and software platforms and software applications all in relation to electric vehicle charging, apparatus and installations for lighting purposes, heating purposes, cooling purposes, steam generating purposes, cooking purposes, drying purposes, ventilating purposes, water supply and sanitary purposes, solar heating apparatus and installations and parts and fittings therefor, solar energy powered heating apparatus, solar water heaters, solar heat collection panels, solar collectors for heating, solar panels for use in heating, solar heating panels, thermal storage apparatus for heating, heat pumps and parts and fittings therefor, heat pumps for heating systems, heat pumps for energy processing, air-source heat pump water heaters, boilers for use in heating systems, hot water tanks for use in heating systems, air-conditioning apparatus and installations, air cooling apparatus and instruments, electric fans and cooling fans; advertising; marketing and promotional services; organisation, operation and supervision of loyalty programmes and of sales and promotional incentive schemes; presentation of goods on communication media, for retail purposes; provision of space on a website for advertising goods and services of others; providing business information via a website; information, advisory and consultancy services in relation to all of the aforesaid.

**Class 37:**

Installation, maintenance, servicing and repair of energy control devices, charging appliances for rechargeable equipment, electricity storage apparatus, ultracapacitors for energy storage, supercapacitors for energy storage, electrical storage batteries, solar batteries, solar battery chargers, photovoltaic apparatus for generating electricity, photovoltaic cells, solar energy collectors for generating electricity, solar panels, solar panels for electricity generation, solar cells, batteries, battery charging equipment, battery chargers, battery monitors, chargers for electric vehicles, charging stations for electric vehicles, electric
