List of cases accepted for opposition purposes as shown in Journal 2026/031 published on 31 July 2026 .

Mark 3

Mark 4

Application for a series of 4 marks.

Class 4:

Electrical energy; electrical energy from renewable sources; electrical energy from solar power; electrical energy from wind power; electricity; energy (electrical –); none of the aforesaid goods to be sourced from fossil fuels.

Class 6:

Metal structures for solar panel mounting systems; metal cable trays; metal pylons for electricity lines; metal towers for wind turbines; metal frames for solar panels; metal supports for photovoltaic installations; metal building materials for construction of energy installations; metal containers for battery energy storage systems; prefabricated metal buildings for housing electrical plant and equipment; metal enclosures for electrical apparatus; metal cable management systems; parts and fittings for all the aforesaid goods.

Class 7:

Generators; electricity generators; solar power generators; electric power generators; electric power supplies [generators]; uninterruptible power supplies [machines] for the production of electrical energy; power installations [generators]; emergency power supply generators; power supply apparatus [generators]; wind turbines; wind-powered electricity generators; wind power installations; wind energy converters; turbines for the production of power; machines for the production of electricity from renewable sources; pumps for energy installations; machines for use in the production, transmission, distribution, supply and conservation of energy; parts and fittings for all the aforesaid goods.

Class 9:

Inverters used in solar power production; accumulators for photovoltaic power; photovoltaic installations for producing electricity [photovoltaic power plants]; solar panels for electricity production; solar energy collectors for electricity production; crystalline silicon solar power cells; modules for photovoltaic power production; solar panels for the production of electricity; solar panels for production of electricity; electric power converters; batteries; solar batteries; photovoltaic apparatus for converting solar radiation to electrical energy; solar cells for electricity production; inverters for power supply; electric power controllers; electric power units; photovoltaic apparatus and installations for producing solar electricity; electric power supply units; solar panels; electric power distribution machines; power cables; power units [batteries]; solar modules; solar cells; power meters; power wires; solar cell panels; power stabilisers; power controllers; electricity distribution boxes, consoles and boards, junction boxes, electric branch boxes, electric transformers, electric converters; branch and distribution boxes, connectors and switches, conductors, electrical cables, conduits; power transformers for amplification; electronic power transformers; power relays; power packs [batteries]; radio-frequency power meters; uninterruptible power supply apparatus [battery]; voltage stabilizing power supply; power connectors; power banks; power adapters; solar wafers; power modules; voltage regulators for electric power; high-voltage power supplies; solar battery chargers; power amplifiers; electric power distribution apparatus; uninterruptible electrical power supplies; electrical power distribution blocks; photovoltaic solar modules; electric battery chargers; battery charging equipment; electricity storage apparatus; solar panel arrays; grids for batteries; connections for electric lines; electric connections; connections for electric cables; electrical cables for use in connections; plug connections [electric]; panels for the connection of electricity; electrical connection boxes; connection boxes [electricity]; earth connections; connection blocks [electric cable]; connection cables; connecting electrical cables; splices for electrical transmission lines; connection units (electric –); electricity connectors; electrical cable connectors; terminals [electricity]; electrical terminals; electrical wiring installations; electrical storage batteries; battery charge devices; power capacitors; battery cables; battery chargers; auxiliary battery packs; regulated power supply apparatus; lithium batteries; electric batteries; electrical power control apparatus; electronic power supplies; battery packs; distribution boxes for electrical power; storage cells [electric]; uninterruptable power supply apparatus; ultracapacitors for energy storage; energy regulators; solar batteries for industrial use; inverters [electricity]; electricity inverters; photovoltaic apparatus for producing electricity; battery energy storage systems; lithium-ion battery cells for energy storage; battery management systems; energy storage apparatus comprising batteries; large-scale battery storage systems for electricity; electrical apparatus for monitoring battery energy storage systems; electric accumulators for storing renewable energy; electric power monitoring apparatus; switchgear; electrical switchboards; transformers [electricity]; electric transformers; high-voltage transformers; step-up transformers; step-down transformers; electrical substations; grid connection apparatus; electrical grid monitoring apparatus; smart grid apparatus; electricity meters; smart meters; electric current rectifiers; electric voltage converters; electric power line communication apparatus; electrical cable connectors for wind turbines; electrical control apparatus for wind energy installations; apparatus for controlling and distributing electricity in data centres; power distribution

List of cases accepted for opposition purposes as shown in Journal 2026/031 published on 31 July 2026 .

units for data centres; uninterruptible power supply apparatus for data centres; computer hardware for data centres; computer servers; computer network servers; data processing apparatus; data storage apparatus; computer hardware for managing energy distribution; software for energy management; software for monitoring and controlling battery energy storage systems; software for monitoring renewable energy installations; software for managing electricity grids; software for energy trading; software for data centre management; software for managing power distribution; software for modelling and forecasting energy production; software for the monitoring and management of solar power installations; software for monitoring wind turbine performance; downloadable software applications for energy management; fuel cells; fuel cell stacks; fuel cell membranes; electrical apparatus for hydrogen energy systems; parts and fittings for all the aforesaid goods.

Class 11:

Cooling systems for battery energy storage systems; thermal management apparatus for battery energy storage; heat exchangers for use in power production; heat recovery systems; parts and fittings for all the aforesaid goods.

Class 19:

Non-metallic building materials for construction of energy installations; roof covering elements [building materials, not of metal] for solar thermal and photovoltaic collectors; non-metallic rigid pipes for construction of pipelines; concrete structures for battery energy storage enclosures; non-metallic frames for solar panels; non-metallic structures for housing electrical plant; parts and fittings for all the aforesaid goods.

Class 35:

Business management [in the field of energy]; business management relating to installations for renewable energy production; business management relating to solar installations; promoting public awareness of the need for energy conservation; business management of projects relating to renewable energy; business project management; business project management services for construction projects; management of business projects [for others]; business management relating to wind energy installations; business management relating to battery energy storage systems; business management consultancy in the field of energy; business administration of energy companies; business administration of utilities companies; business development services in the field of renewable energy; business management of power production projects; business advisory services relating to the establishment and operation of independent power producer businesses; commercial information and advice for consumers in the field of energy supply; marketing and promotional services in the field of renewable energy; promoting public awareness of the benefits of renewable energy; business management consultancy relating to grid infrastructure projects; business management and administration of electricity supply companies; meter reading for billing purposes; billing services in the field of energy; retail services in connection with the sale of energy; information, advisory and consultancy services relating to all the aforesaid; none of the aforesaid services to be provided in relation to energy sourced from fossil fuels.

Class 36:

Financial services; financial consultancy in the energy and power sectors; financing of development projects; project finance; financing of renewable energy projects; financing of solar energy

installations; financing of wind energy installations; financing of battery energy storage projects; financing of grid infrastructure projects; financial services relating to energy trading; financial advisory services in the field of renewable energy investment; arranging of finance for energy development projects; credit services; raising of capital in the field of energy; investment services in the field of renewable energy; financial management of energy assets; financial evaluation and analysis of energy projects; insurance services relating to energy installations; information, advisory and consultancy services relating to all the aforesaid.

Class 37:

Construction services; building services; maintenance and repair of solar power installations; installation of solar powered systems; construction, repair, maintenance, servicing, refurbishment and dismantling of power plants; installation, repair, maintenance and servicing of power-producing apparatus, machines and installations; construction of power plants; construction of utility solar installations; installation of utilities in construction sites; site preparation [construction]; construction; construction supervision of civil engineering projects; engineering, namely construction and installation of networks and plants in the field of energy and hydrogen supply; development of land [construction]; recharging of batteries; recharging of batteries and accumulators; installation of non-residential solar panel power systems; construction of renewable energy installations; construction of solar farms; construction of wind farms; construction of wind turbines; installation of energy systems; installation of wind energy systems; construction of battery energy storage systems; installation of battery energy storage systems; maintenance and repair of battery energy storage systems; construction of electrical grid infrastructure; installation of onshore electrical grid systems; construction of electrical substations; installation of high-voltage power lines; installation of underground power cables; maintenance and repair of electricity grid infrastructure; maintenance and repair of wind turbines; maintenance and repair of power production equipment; construction of pipelines for energy transmission; construction project management in the field of energy; demolition of buildings and structures for redevelopment of energy sites; laying of cables; cable laying and installation services; erection of overhead power lines; erection of pylons; civil engineering and demolition; decommissioning of industrial plant; dismantling of industrial plant; dismantling of industrial equipment; dismantling of machinery; dismantling of power lines; demolition of buildings; demolition of structures; civil engineering demolition; demolition services; decommissioning services; dismantling services; information, advisory and consultancy services relating to all the aforesaid.

Class 38:

Providing access to platforms for energy trading on the internet; electronic transmission of data relating to energy usage; providing access to data relating to energy supply and distribution via the internet; data centre interconnection services; provision of telecommunications connectivity services for data centres.

Class 39:

Storage of energy and fuels; electricity storage; storage of electricity; storage of electrical plant; power supply and distribution; energy distribution; distribution of renewable energy; supply of electricity; electricity supply services; electricity distribution and supply; electricity supply and distribution; distribution of electricity from solar installations;

List of cases accepted for opposition purposes as shown in Journal 2026/031 published on 31 July 2026 .

distribution of electricity from wind installations; transportation, distribution and supply of electricity; distribution of energy via power grids; management of electricity distribution networks; management of energy supply networks; distribution of electricity produced from renewable sources; transmission of electrical power; transmission of electricity through national grids; transmission of electricity through local distribution networks; supply and distribution of electricity to domestic, commercial, and industrial consumers; supply and distribution of electricity to data centres; storage of battery energy; advisory services relating to electricity distribution; leasing the use of power lines to third parties for the transmission of electricity; energy supply services; power supply services; supply of energy to consumers; distribution of electricity as an energy supplier; distribution of electricity as an independent power producer; distribution of power; advisory services relating to energy supply; information, advisory and consultancy services relating to all the aforesaid.

Class 40:

Production of electricity from solar energy; production of electrical power from renewable sources; production of energy for domestic and industrial use from renewable sources including solar, wind and hydrogen; production of power; production of energy by power plants; energy (production of –); production of energy; energy production; production of renewable green energy; production of green energy; production of energy; electricity production; producing electricity; production of electricity; production of electricity for supply to data centres; electricity generators (rental of –); rental of electricity generators; production of electricity from wind energy; production of electricity from battery energy storage systems; production of power as an independent power producer; production of electricity for supply to the national grid; production of electricity for supply to consumers; energy production consultancy; rental of power producing equipment; rental of generators; custom production of electricity for third parties; provision of information relating to the production of electricity; recycling of used batteries; treatment of materials; recovery of materials from batteries; processing of waste batteries for recycling purposes; decontamination of hazardous materials; treatment of batteries; recovery of metals and other materials from batteries; sorting and separating battery components for the purpose of recycling; treatment of hazardous materials; handling of used batteries and transformation of waste; destruction of waste; extraction of metals and other materials from batteries for reuse; waste recycling services; decontamination of hazardous materials; land decontamination; information, advisory and consultancy services relating to all the aforesaid.

Class 42:

Design of energy and power systems; technological analysis relating to energy and power needs of others; technical design and technical planning of solar installations; technical consultancy and planning for the implementation of solar installations; project studies and project management services; planning services in relation to the installation of solar panels; planning services in relation to renewable energy installations; planning services in relation to commercial solar installations; project studies and preparation of reports relating to solar energy and renewable energy; development of industrial processes; industrial process development; development of energy and power management systems; development of power assemblies; drafting and development of photovoltaic systems; conducting technical project studies for construction projects; construction

design; preparation of reports relating to technical project studies for construction projects; technical project studies in the field of construction; engineering project studies; technical project planning; design planning; development of construction projects; technical design and planning of power stations; design and development of regenerative energy generation systems; design of solar energy installations; design of solar energy apparatus; preparation of project analysis studies; technological project studies; studies (technical project –); technical project studies; conducting research and technical project studies relating to the use of natural energy; design and development of wind energy systems; design and development of battery energy storage systems; technical consultancy in the field of renewable energy; technical consultancy in the field of energy storage; engineering services relating to energy installations; engineering services relating to grid infrastructure; feasibility studies in the field of renewable energy; environmental impact assessment services; environmental consultancy relating to energy projects; energy auditing; co-location services for data centres; scientific research in the field of renewable energy; research and development in the field of battery energy storage technology; research and development in the field of grid technology; design and planning of onshore and offshore electrical grid systems; technical design and planning of electrical substations; industrial design services; technical consultancy relating to the planning and development of electricity networks; geological surveying and analysis for energy project sites; land surveying for energy installations; preparation of environmental impact reports for energy projects; energy efficiency consultancy; research in the field of energy; research in the field of energy conservation; technical consultancy relating to independent power production; consulting on and conducting feasibility studies relative to demolition, decommissioning, dismantling and decontamination; information, advisory and consultancy services relating to all the aforesaid.
