Class 9:

Computer software for use in creating, editing, importing, exporting, publishing and sharing videos, digital movies and multimedia content; downloadable computer software applications for creating animated GIF files; downloadable digital media content being self-created pictures; downloadable computer software to enhance the interaction of texts, audios, graphics, still images and moving pictures; interactive software based on artificial intelligence; downloadable computer programs for use in connection with transcribing, annotating, and visualizing oral and written communications; downloadable digital media content being visual stories; coloring and drawing computer programs featuring learning activities of creative expression for children; computer software for authorizing access to databases; downloadable computer software for generating images from text using artificial intelligence [AI]; computer hardware and software for graphic design applications, art generation and cartooning; data processing programs for computer aided design editing; interactive computer systems; interactive computer software; computer software to enhance the audio-visual capabilities of multimedia applications, namely, for the integration of text, audio, graphics, still images and moving pictures; downloadable multimodal artificial intelligence software for processing text, image, audio and video data; downloadable software for ai-powered search and information retrieval; downloadable software development kits (sdks) for artificial intelligence applications; downloadable software for large language model training and inference; downloadable software for autonomous artificial intelligence agents; downloadable software for coordinating and executing tasks using artificial intelligence; downloadable computer software for artificial intelligence, machine learning and natural language processing; artificial intelligence apparatus, namely, artificial intelligence and machine learning software;

artificial intelligence software for analysis; downloadable computer chatbot software for simulating conversations; downloadable computer programs and computer software for creating and generating text; computer software to maintain, operate, and manage computer systems; computer software for use in providing multiple user access to a global computer network; computer programs for editing images, sound and video; computer programs and software for image processing; voice processing systems; downloadable computer application software for neural networks, deep learning and natural language processing; downloadable database management software applications; data processing software; computer software for authorising access to data bases; security software powered by ai; downloadable multimedia file; downloadable animation; software for tablet computers; animation software; virtual and augmented reality software for ai-driven applications; virtual reality models software; computer software used to enhance the capabilities and features of other software and non-downloadable online software; apparatus, instruments and computer software for management of customer service; training software; recorded and downloadable computer software; downloadable computer programs for office use in the nature of creating, downloading, uploading, designing, modifying, reproducing, transmitting and sharing images, graphics, fonts, photographs, text, videos and data; downloadable computer software for use in artificial intelligence applications, namely, generalist multi-agent systems; downloadable computer software for use in artificial intelligence applications, namely developing, configuring, deploying and managing multi-agent workflows across various domains; downloadable computer software for orchestrating and managing autonomous multiple ai agents; downloadable computer software for enabling autonomous multiple ai agent systems to perform complex tasks; downloadable computer software for enabling the tracking of the progress of multiple ai agents; downloadable computer software for coordinating specialized ai agents to perform tasks such as web navigation, file management, code generation, and task execution; downloadable computer software for development tools for creating and integrating multiple ai agents.

Class 41:

Post-production services being special effects animation services for videos, audio contents, digital media and films; provision of on-line non-downloadable works of art for use in interactive video games for entertainment purposes; providing entertainment services in the form of movies, television programs and music videos via an interactive web site; interactive on-line entertainment services; entertainment services in the nature of creation, development and production of television programming; screenplay writing; instruction in the writing of computer programs; providing online electronic publications, not downloadable; education and training services; organization of competitions [education or entertainment]; organization of exhibitions for cultural or educational purposes; presentation of live performances; entertainer services; film production, other than advertising films; providing on-line music, not downloadable; providing on-line videos, not downloadable; providing films, not downloadable, via video-on-demand services; entertainment services; entertainment information; recreation information; arranging and conducting of online concerts in virtual environments; arranging and conducting of seminars in virtual environments; art exhibitions using virtual reality; art exhibitions; educational services; electronic publication of information on a wide range of topics, including

***List of cases accepted for opposition purposes as shown in Journal 2026/036 published on
04 September 2026 .***

online and over a global computer network; instruction services; production of animated cartoons; providing of training.

Class 42:

Hosting multimedia entertainment content; hosting digital content on the internet; platform as a service [PaaS] featuring software platforms for the transmission of images, audiovisual contents, video contents and messages; providing temporary use of non-downloadable software to enable content providers to track multimedia content; development of application software for delivery of multimedia content; hosting online web facilities for others for sharing online content; design and development of computer programs, software and mobile applications for others for distribution of multimedia contents; rental of memory space on servers for sharing digital contents on the internet; creating, hosting and maintaining web sites that allow users to upload, post, search for, share and view photos, videos and written content; providing temporary use of on-line non-downloadable software using artificial intelligence for machine-human interaction; interactive hosting services which allow the users to publish and share their own content and images online; artificial intelligence as a service [AIaaS] featuring software using artificial intelligence for human interaction and text analysis; AI as a service [AIaaS] featuring software using artificial intelligence for machine-human interaction; digital content creation services being creation of digital animation for films, video and computer programs; digital content creation being creation of digital special effects for multimedia applications; AI as a service [AIaaS] featuring software using artificial intelligence for model creation, integration, management and optimization; AI as a service [AIaaS] featuring software using artificial intelligence for generating, manipulating and displaying images, illustrations, charts and graphs for general business use; AI as a service [AIaaS] featuring software using artificial intelligence for writing custom algorithms and implementing algorithms into dataflows; provision of temporary use of online non-downloadable software using artificial intelligence to control software tools; provision of temporary use of non-downloadable computer software for the creation and production of digital animated and non-animated designs and characters for access and use in virtual online extended reality environments; software as a service [saas] featuring multimodal artificial intelligence platforms; software as a service [saas] featuring software for autonomous artificial intelligence agents; application programming interface (api) services for artificial intelligence systems; platform as a service [paas] featuring software platforms for deploying and hosting artificial intelligence models; providing online non-downloadable software for large language model training and inference; software as a service [saas] featuring software for coordinating and automating tasks using artificial intelligence; artificial intelligence as a service [aiaas]; software as a service [saas]; platform as a service [paas]; computer software technical support services; design, maintenance, rental and updating of computer software; software development in the framework of software publishing; development and testing of computer software; computer software consultancy; development, updating and maintenance of software and database systems; data security services; design and development of programs for data processing; technical advisory services relating to data processing; research, development, design and upgrading of computer software; information technology [it] consultancy; information technology support services [troubleshooting of software]; computer security consultancy; design, and development of computer software; research and

development in the field of artificial intelligence; computer programming; installation of computer software; application service provider (asp) services, namely, hosting computer software applications of others; application service provider (asp) relating to software to enable or facilitate the uploading, downloading, streaming, posting, displaying, blogging, linking, sharing or otherwise; providing temporary use of online non-downloadable operating software for accessing and using a cloud computing network; platforms for artificial intelligence as software as a service [saas]; design, development of integrated software platforms based on artificial intelligence; providing software as a service [saas] for enabling others to upload and manage data for determining and predicting patterns in data; providing software as a service [saas] for enabling others to upload and manage data for machine learning and deep learning processes; providing artificial intelligence computer programmes on the internet; providing technical information and consulting in the field of big data analytics, machine learning, or artificial intelligence; provision of on-line support services for computer program users; technical support services relating to computer software and applications; providing online non-downloadable software for creating and generating text; providing on-line non-downloadable software for artificial intelligence processing, namely, generalist multi-agent systems; providing on-line non-downloadable software for use in artificial intelligence applications, namely developing, configuring, deploying and managing multi-agent workflows across various domains; providing on-line non-downloadable software for orchestrating and managing autonomous multiple ai agents; providing on-line non-downloadable software for enabling autonomous multiple ai agent systems to perform complex tasks; providing on-line non-downloadable software for enabling the tracking of the progress of multiple ai agents; providing on-line non-downloadable software for coordinating specialized ai agents to perform tasks such as web navigation, file management, code generation, and task execution; providing on-line non-downloadable software for creating and integrating multiple ai agents.
