Software for acoustic and vibration analysis, noise prediction, and acoustic design optimization; Software for multibody dynamics, mechanism simulation, and kinematic analysis; Software for fatigue, fracture, and damage tolerance analysis of materials and structures; Software for reactive flow simulation, and combustion modeling; Software for robotics simulation, motion planning, and control system design; Software for adaptive mesh generation, mesh refinement, and computational geometry; Software for uncertainty quantification, sensitivity analysis, and probabilistic design; Software for creating and managing digital twins of physical systems, assets, structures, and processes; Software for real-time physics simulation and rapid prototyping in virtual environments; Downloadable software for physics simulation for artificial intelligence and machine learning; Open-source software for building, training, and fine-tuning AI models for physics, chemistry, and engineering applications; Software development kits (SDKs) and application programming interfaces (APIs) for integrating physics-based Al simulation capabilities into third-party software; Software for machine learning, deep learning, reinforcement learning, natural language generation, statistical learning, supervised learning, unsupervised learning, and semi-supervised learning; Software for neural network architecture design, training, hyperparameter optimization, and deployment; Software for neural operator models, including advanced machine learning frameworks and physics-informed neural networks; Software for scientific machine learning, physics-constrained learning, and hybrid physics-machine learning modeling Software for Al model deployment, inference optimization, and edge computing for engineering and industrial applications; Software for distributed computing, high-performance computing (HPC), and cloud computing for scientific simulation and Al training; Software for controlling, monitoring, and automating manufacturing processes and manufacturing equipment; Manufacturing execution system (MES) software for managing production operations in factories and fabrication facilities; Software for supervisory control and data acquisition (SCADA) in manufacturing and industrial environments; Software for programmable logic controller (PLC) programming and industrial automation; Software for robotic process control, robotic path planning, and robotic workcell design in manufacturing; Software for computer numerical control (CNC) machine control, toolpath optimization, and adaptive machining; Software for additive manufacturing process control, including 3D printing, selective laser sintering, selective laser melting, directed energy deposition, and binder jetting; Software for injection molding process simulation, mold design, and mold flow analysis; Software for casting simulation, forging simulation, and forming process optimization; Software for welding process control, weld quality prediction, and joining technology optimization; Software for surface treatment process control, coating optimization, and corrosion prediction; Software for semiconductor manufacturing process control, including photolithography, etching, deposition, and ion implantation; Software for quality control and inspection in manufacturing, including statistical process control (SPC) and Al-based defect detection; Software for computer vision-based automated visual inspection of manufactured products, components, and assemblies; Software for dimensional metrology, coordinate measurement, and geometric dimensioning and tolerancing (GD&T) analysis; Software for factory layout design, production line balancing, and manufacturing facility planning; Software for production scheduling, capacity planning, and manufacturing resource planning; Software for automated work instruction generation, assembly sequence planning, and operator guidance; Software for creating neural representations of manufacturing processes from sensor, telemetry, and process data; Database management software for engineering and manufacturing data, including design files, simulation results, process parameters, quality records, and supply chain data; Software for automated integrated circuit layout generation, placement, routing, and physical verification using AI; Software for electromagnetic simulation of interconnects, packages, and signal integrity analysis; Software for power integrity analysis, IR drop simulation, and thermal analysis of integrated circuits; Software for inverse design of semiconductor devices, photonic devices, and optoelectronic devices using machine learning; Software for circuit synthesis, logic synthesis, and high-level synthesis using Al; Software for logistics planning, transportation optimization, and warehouse management in manufacturing; Software for atmospheric propagation modelling, optical turbulence prediction, and adaptive optics control; Software for sensor fusion, multi-sensor data integration, and situational awareness using physics-informed models; Software for water treatment process design, desalination system optimization, and environmental remediation planning; 3D scanning and metrology hardware for manufacturing quality control and reverse engineering.

Class 36:
Investment fund management services in the field of manufacturing, technology, and industrial enterprises; Investment advisory services in the fields of manufacturing technology, advanced manufacturing, and industrial transformation; Financial investment in the field of manufacturing companies, technology companies, and industrial enterprises; Venture capital services, namely, providing financing to manufacturing, engineering, and technology companies;

Financial analysis and consulting in the fields of manufacturing operations, technology investment, and industrial transformation.

Class 37:
Installation, maintenance, and repair of manufacturing equipment, including Al-controlled computer numerical control (CNC) machines, 3D printers, and robotic assembly systems; Installation, maintenance, and repair of manufacturing equipment, production lines, and factory automation systems; Installation, maintenance, and repair of industrial robots, computer numerical control (CNC) machines, 3D printers, and automated assembly systems; Cold spray deposition and repair services for metallic components; Construction and installation of manufacturing facilities, production lines, and factory infrastructure; Retrofit and modernization of existing manufacturing facilities with AI-based automation, sensing, and control systems.

Class 40:
Custom manufacturing services using automated and Al-controlled factories and production equipment, including computer numerical control (CNC) machining, additive manufacturing, 3D printing, injection molding, metal casting, metal extrusion, die casting, forging, stamping, sheet metal fabrication, printed circuit boards (PCB) fabrication and assembly, semiconductor packaging, and final unit assembly and test; Custom fabrication of products and components using AI-optimized manufacturing processes, including computer numerical control (CNC) machining, additive manufacturing, injection molding, metal casting, and printed circuit boards (PCB) fabrication; Custom semiconductor fabrication services, namely, fabrication of integrated circuits and application-specific integrated circuits (ASICs) using AI-optimized processes; Material processing services, namely, treating metals, polymers, and composites using Al-controlled manufacturing equipment; 3D printing and additive manufacturing services for industrial applications; Custom fabrication of products and components using computer numerical control (CNC) machining, additive manufacturing, injection molding, metal casting, extrusion, forging, stamping, and composite layup processes; Custom semiconductor fabrication services, namely, fabrication of integrated circuits, application-specific integrated circuits (ASICs), and electronic devices; Custom PCB fabrication, assembly, and electronic manufacturing services; Material processing services, namely, treating, machining, forming, and finishing metals, polymers, ceramics, composites, and other materials; 3D printing and additive manufacturing services for industrial, medical, and consumer applications; Surface treatment services, including coating, plating, heat treatment, and surface finishing of manufactured components; Assembly services for electronic, electromechanical, and mechanical products and subsystems; Custom chemical processing, formulation, and material synthesis services.

Class 42:
Design and development of artificial intelligence (Al) software; Software engineering services and software architecture consulting; Design and development of artificial intelligence software for engineering, manufacturing, and scientific applications; Providing non-downloadable software for developing Al models and applications in the field of manufacturing, physics and engineering; Providing non-downloadable software for machine learning, deep learning, natural language generation, statistical learning, supervised learning, un-supervised learning, data mining, and predictive analytics; Artificial intelligence as a service (AIAAS) featuring software for developing large Al models for use in the field of physics and engineering; Research in the field of artificial intelligence; Software engineering services; Providing non-downloadable software for controlling, monitoring, and automating manufacturing processes using artificial intelligence; Providing non-downloadable software for collecting, processing, and analyzing manufacturing process data and telemetry from instrumented production equipment; Providing non-downloadable software for manufacturing data analytics and AI-driven yield optimization; Providing non-downloadable software functioning as an Al engineering co-pilot or assistant for integration with design and engineering workflows; Providing non-downloadable integrated design environment (IDE) software combining design, simulation, and manufacturing planning; Providing non-downloadable software for product lifecycle management (PLM) using artificial intelligence; Providing non-downloadable software for developing, building, training, and deploying large Al models for physics, chemistry, biology, and engineering; Providing non-downloadable software for multiphysics simulation, including structural, thermal, fluid, acoustic, and electromagnetic analyses; Providing non-downloadable software for computational fluid dynamics, finite element analysis, and other numerical simulation methods accelerated by Al; Providing non-downloadable software for controlling, monitoring, and automating manufacturing processes and equipment; Providing non-downloadable manufacturing execution system (MES) software; Providing non-downloadable software for creating and managing digital twins of physical systems, manufacturing processes, production lines, factories, and assets; Providing non-downloadable software for quality control and inspection in manufacturing using Al and computer vision; Providing non-downloadable software for predictive maintenance of manufacturing equipment and industrial assets; Providing non-downloadable software for manufacturing process optimization, yield improvement, and waste reduction using Al; Providing non-downloadable software for production scheduling, capacity planning, and factory operations management; Artificial intelligence as a service (AlaaS) featuring software for physics simulation, engineering design, manufacturing optimization, and scientific computing; Platform as a service (PaaS) featuring software platforms for building, deploying, and managing AI models for engineering, manufacturing, and scientific applications; Application programming interface (API) services for providing access to physics-based simulation, engineering design tools, manufacturing process models, and scientific computing capabilities; Platform as a service (PaaS) featuring application programming interfaces for physics simulation, generative and inverse design, manufacturing control, quality inspection, supply chain analytics, and engineering data management; Providing non-downloadable software via an application programming interface for neural network-based physics simulation, engineering analysis, and manufacturing process optimization; Cloud computing services for scientific simulation, Al model training, engineering analysis, and manufacturing data processing; Data as a service (DaaS) featuring engineering simulation data, manufacturing process data, materials properties data, and supply chain data; Engineering services in the fields of mechanical, electrical, chemical, civil, nuclear, biomedical, environmental, and industrial engineering; Engineering services rendered using artificial intelligence software; Engineering consulting services in the fields of product design, manufacturing process optimization, design-

for-manufacturability, and industrial automation; Engineering consulting services in the field of semiconductor device design, integrated circuit layout, application-specific integrated circuit (ASIC) development, and electronic systems design; Engineering services for adapting product designs to automated and AI-controlled manufacturing processes; Professional engineering services for factory design, production line engineering, and manufacturing facility planning; Research and development services in the fields of artificial intelligence, machine learning, physics, chemistry, materials science, and engineering; Scientific research and technical consulting services in the fields of simulation, modeling, and computational science; Technical testing and quality assurance services for manufactured products, components, and materials; Design of computer-simulated models for engineering, manufacturing, and scientific purposes; Industrial design services for products, components, and systems.

Downloadable computer software and mobile applications featuring artificial intelligence for conversational interaction, virtual assistant functions, and business process automation. Downloadable artificial intelligence software for generative creation of text, images, video, 3D model authoring, computer code, and computer-aided design (CAD). Downloadable computer software featuring integrated development environments (IDEs) and graphical user interfaces (GUIs) for artificial intelligence-assisted creation of text, images, video, 3D model authoring, computer code, and computer-aided design (CAD). Downloadable computer software for creating, managing, and executing automated workflows and scheduled background processes. Downloadable software development tools, application programming interfaces (APIs), and downloadable software plugins for the integration of artificial intelligence chat interfaces and generative capabilities into third-party websites and software platforms. Downloadable software functioning as an artificial intelligence harness (namely, software for orchestrating, managing, and executing artificial intelligence models and workflows). Downloadable computer software functioning as an artificial intelligence engine for powering and integrating with enterprise resource planning (ERP) platforms, content publishing systems, and third-party software. Downloadable database management software for processing, storing, and querying multi-modal data, specifically including vector, graph, relational, and non-relational (NoSQL) databases. Downloadable software for executing retrieval-augmented generation (RAG) workflows and contextual data retrieval. Downloadable software for generating, managing, and querying knowledge graphs and vector embeddings. Downloadable software for the integration of artificial intelligence models with enterprise databases and quad-modal data architectures, specifically vector, graph, relational, and non-relational (NoSQL) databases. Downloadable computer software featuring integrated development environments (IDEs) and graphical user interfaces (GUIs) for interacting with, designing, and modifying artificial intelligence workflows and data pipelines. Downloadable computer software featuring interactive visual workspaces, canvases, and graphical control elements for the execution, review, and manipulation of generative artificial intelligence digital content and data outputs. Downloadable software development tools and integrated development environments (IDEs) for deployment on third-party websites and platforms. Computer hardware and computer server appliances pre-installed with artificial intelligence harness software (namely, software for orchestrating, managing, and executing artificial intelligence models and workflows), generative AI engines, and database management systems for on-premise workflow execution, contextual data processing, and automated content generation. Computer hardware for artificial intelligence applications, namely, integrated server appliances pre-configured to execute retrieval-augmented generation (RAG) pipelines, query vector embeddings, and generate text, images, video, 3D models, and computer code. Computer server appliances and data storage hardware featuring embedded software for operating quad-modal database architectures, specifically vector, graph, relational, and non-relational (NoSQL) databases, on proprietary enterprise data. Computer hardware, enterprise servers, and edge computing appliances pre-installed with software for local processing of knowledge graphs, executing background automated workflows, and hosting interactive artificial intelligence interfaces. Integrated computer hardware units pre-loaded with software engines for enterprise

data ingestion, real-time vectorization, and secure on-premise artificial intelligence model execution.

Class 42:
