Scientific and technological services as well as research and
design services relating thereto; industrial analysis, industrial
research and industrial design services; quality control and
authentication services; design and development of computers
and software; consultant services on cybersecurity and
ethical hacking; cybersecurity services, namely, restricting
unauthorized access to computer systems; breach response
services, in particular incident response (IR) triage and
investigation, optimization of assistance, recovery, remediation
and processing operations; threat mitigation services, in
particular threat research, penetration testing, ethical hacking,
simulation, analysis and evaluation of the visibility of attack
surfaces, intelligence with respect to organized cyber-threats,
and safety awareness training; cloud computing security
consultancy, in particular secure cloud computing migration,
cloud computing security assessment, roadmap compliance,
data protection and infrastructure protection; cybersecurity
services in the nature of restricting unauthorized access to
computer systems; computer programming consultancy in the
field of cybersecurity; computer security consultancy with
respect to digitization and penetration testing of computers
and networks for assessing information security vulnerability;
technology consultancy in the field of cybersecurity; software
as a service (SaaS) services featuring software for managing
cybersecurity risk detection and the response to such risks;
computer Platform as a Service (PaaS); provision of non-
downloadable computer programs for detecting and preventing
malware, intrusions and other cyber threats, for network
defense and for monitoring, assessing and implementing
improvements in the field of company network, infrastructure

Class 7:
Machines relating to vacuum treatment; machine tools, in particular vacuum treatment installations; vacuum coating installations and vacuum stripping installations; mechanical tools (mechanical construction) for all types of surface treatment, in particular tools (mechanical construction) for physical and chemical cleaning, structuring or removal of layers and mechanical processing (in particular of substrates to be coated in a vacuum installation); coating machines of all types, in particular coating machines for production of thin films; coating installations (machines) of all types, in particular evaporation installations, electron beam evaporators, ion beam installations, ion beam cathodic sputtering installations, PVD, CVD, PECVD installations, cathodic sputtering installations and plasma sputtering installations; machines for changing

the surfaces of objects; installations for manufacturing semiconductors, integrated circuits, collectors (electric); machines for the manufacture of surface layers on instruments of all kinds, in particular spectacle lenses, contact lenses, mirrors, optical or electrical filters, architectural glass, solar cell substrates or solar cell modules, display substrates or modules, in particular computer screens, illumination layers, organic light-emitting diodes; parts of machines for vacuum treatment installations, namely cathodic sputtering cathodes, plasma sputtering installations, cathodic sputtering targets, cathodic sputtering shields, cathodic sputtering masks, vacuum metallization filaments, vacuum metallization shuttles, ceramic crucibles, substrate supports and gas introduction systems.

Class 9:
Electronic devices and instruments for regulating, controlling, and monitoring; electronic devices and instruments for the controlling and treatment of surfaces; optical, electric, magnetic, spectroscopic sensors; measuring and control devices, namely for measuring the growth of layers or the removal of coatings in thin-film processing installations; optical controllers and devices for measuring layer thickness of crystal oscillators, scientific instruments, namely chip media cleaners for the surface cleaning of electronic components, plasma cleaning units for the pre-treatment of substrates which are to be coated in a vacuum installation or in support of coating processes; laboratory devices and instruments, namely thin film technology accessories, in particular sputtering cathodes, plasma sources, sputtering targets, sputtering shields, sputtering masks, vacuum coating filaments, vacuum coating shuttles, ceramic crucibles, substrate carriers, and gas introduction systems; computer programs, in particular for regulating, controlling, and monitoring surfaces and surface treatments; vacuum measuring devices; sputtering cathodes; quartz crystals for measuring layer thickness.

Class 37:
Industrial assembly, installation, implementation, and maintenance of vacuum devices and vacuum generation installations of all kinds.

Class 40:
Surface treatment; surface coatings for tools, for electronic and optical components, and for precision construction parts; coating services for tools, for electronic and optical components, and for precision construction parts; wear protection (materials treatment) and functional coating services for tools and precision components, including pre- and post-treatment.
