Class 9:
Downloadable software, downloadable software in the nature of a mobile application, and downloadable computer software platforms for the creation and management of digital content and digital experience management, for keyword search marketing, keyword search management, and keyword search performance and website analytics, for providing an integrated set of technologies to support the composition, management, delivery and optimization of contextualized digital experiences, for allowing others to create, develop and manage software applications and websites, for allowing users to sell, buy, and market products and services online via a global computer network, for customizing e-commerce websites, for facilitating e-commerce transactions, and for catalog, customer, order, inventory, and supply chain management, for managing and integrating business rules, data, and information for enterprise business-to-business (B2B), business-to-consumer (B2C), and direct-to-consumer (D2C) commerce operations, using artificial intelligence (AI) for delivering and managing personalized digital commerce experiences, individualized search result rankings, and product information and recommendations, using AI and retrieval-augmented generation (RAG) for integrating large language models (LLMs) and AI agents to analyze, automate, and improve digital experience workflows through evaluation, management, distribution, website experimentation, website visitation experimentation, and the personalization of digital experiences, for creating, developing and managing marketing campaigns and projects and for providing non-downloadable software tools for team collaboration, digital asset management and coordination, and resource planning, using AI for agent orchestration, for agentic experimentation, for agentic content management, for agentic campaign marketing, for agentic digital asset management, for implementing multi-agent systems, for facilitating data-driven decision making, for streamlining and managing workflows, and for enabling users to create, configure, deploy, govern, automate, and scale AI-powered agents for use in marketing, content management, digital asset management, campaign management, and experimentation, for building, developing, testing, integrating, publishing, and deploying software applications, for accessing and browsing a database of software applications, for software application analytics, and for configuring, mapping, and managing transfers and syncs of data, for aggregating customer data, data analytics, data segmentation, data activation, content targeting, and behavioral targeting and segmentation, for collecting, aggregating, managing, automating, integrating, analyzing, reporting, sharing and tracking user search results and customer data and enabling marketing automation, for tracking website activity and managing, monitoring, tracking and optimizing the performance and effectiveness of software applications and websites, online marketing campaigns and keyword search performance, for content management, for automated content deployment, for providing customers and users with automated content recommendations, for automated product recommendations and for content and experience personalization, for developing and managing marketing campaigns and projects, sending automated messages through various online and media channels, sending automated messages to multiple recipients, sending personalized or targeted content or messages to users and customers, sending automated content recommendations through emails, sending automated personalized emails with content recommendations, sending machine-driven emails with content recommendations, personalization of user website and application experience and personalization for optimizing user online experience, for marketing automation, for aggregating and coordinating data from multiple online and media platforms and channels to develop and manage marketing campaigns, and for developing and managing marketing communications by sending automated messages to users and customers, for website analytics, website A/B testing, website multivariate testing, feature experimentation, website experimentation, experimentation in the nature of website funnel testing for conversion rate optimization, and website personalization, for measuring the impact of website changes on user behavior using statistical methods, for tracking websites, mobile websites, and software applications, in order to obtain user-related metrics, analytics and feedback that can be used to draw recommendations, strategy, insights, and predictions, for marketing automation and for aggregating and using data from multiple sources to send automated messages to targeted user segments for marketing purposes, for querying, processing, monitoring, measuring, storing, managing, tracking and analyzing data, for generating and processing streaming and batch data queries, for data analytics utilizing integrated data storage and query processing, for providing root cause analysis using artificial intelligence and machine learning, and for receiving and interpreting data expressions written using a simplified query language.

Class 42:
Platform as a service (PAAS) featuring computer software platforms for the creation and management of digital content and digital experience management; application service provider (ASP), namely, hosting a content management software platform for others; platform as a service (PAAS) featuring computer software platforms for keyword search marketing, keyword search management, and keyword search performance and website analytics; platform as a service (PAAS) featuring computer software platforms that provide an integrated set of technologies to support the composition, management, delivery and optimization of contextualized digital experiences; platform as a service (PAAS) featuring computer software platforms to allow others to create, develop and manage software applications and websites; platform as a service (PAAS) featuring computer software platforms that allow users to sell, buy, and market products and services online via a global computer network; platform as a service (PAAS) featuring computer software platforms for customizing e-commerce websites, for facilitating e-commerce transactions, and for catalog, customer, order, inventory, and supply chain management; platform as a service (PAAS) featuring computer software platforms for managing and integrating business rules, data, and information for enterprise business-to-business (B2B), business-to-consumer (B2C), and direct-to-consumer (D2C) commerce operations; platform as a service (PAAS) featuring software platforms using artificial intelligence (AI) for delivering and managing personalized digital commerce experiences, individualized search result rankings, and product information and recommendations; platform as a service (PAAS) featuring software platforms and providing temporary use of online non-downloadable software using artificial intelligence (AI) for integrating large language models (LLMs) and AI agents to analyze, automate, and improve digital experience workflows through evaluation, management, distribution, website experimentation, website visitation experimentation, and the personalization of digital experiences; platform as a service (PAAS) featuring software platforms and providing

temporary use of online non-downloadable software using retrieval-augmented generation (RAG) for integrating large language models (LLMs) and AI agents to analyze, automate, and improve digital experience workflows through evaluation, management, distribution, website experimentation, website visitation experimentation, and the personalization of digital experiences; platform as a service (PAAS) featuring computer software platforms for creating, developing and managing marketing campaigns and projects and for providing non-downloadable software tools for team collaboration, digital asset management and coordination, and resource planning; platform as a service (PAAS) featuring computer software platforms using artificial intelligence (AI) for agent orchestration, for agentic experimentation, for agentic content management, for agentic campaign marketing, for agentic digital asset management, for implementing multi-agent systems, for facilitating data-driven decision making, for streamlining and managing workflows, and for enabling users to create, configure, deploy, govern, automate, and scale AI-powered agents for use in marketing, content management, digital asset management, campaign management, and experimentation; platform as a service (PAAS) featuring computer software platforms for building, developing, testing, integrating, publishing, and deploying software applications, for accessing and browsing a database of software applications, for software application analytics, and for configuring, mapping, and managing transfers and syncs of data; software as a service (SAAS) featuring software for aggregating customer data, data analytics, data segmentation, data activation, content targeting, and behavioral targeting and segmentation; software as a service (SAAS) featuring software for collecting, aggregating, managing, automating, integrating, analyzing, reporting, sharing and tracking user search results and customer data and enabling marketing automation; application service provider (ASP) featuring software for tracking website activity and managing, monitoring, tracking and optimizing the performance and effectiveness of software applications and websites, online marketing campaigns and keyword search performance; software as a service (SAAS) featuring software for content management, automated content deployment, for providing customers and users with automated content recommendations, for automated product recommendations and for content and experience personalization; software as a service (SAAS) featuring software for developing and managing marketing campaigns and projects, sending automated messages through various online and media channels, sending automated messages to multiple recipients, sending personalized or targeted content or messages to users and customers, sending automated content recommendations through emails, sending automated personalized emails with content recommendations, sending machine-driven emails with content recommendations, personalization of user website and application experience and personalization for optimizing user online experience; software as a service (SAAS) featuring software for marketing automation, for aggregating and coordinating data from multiple online and media platforms and channels to develop and manage marketing campaigns, and for developing and managing marketing communications by sending automated messages to users and customers; software as a service (SAAS) featuring software for website analytics, website A/B testing, website multivariate testing, feature experimentation, website experimentation, experimentation in the nature of website funnel testing for conversion rate optimization, and website personalization; software as a service (SAAS) featuring software that measures the impact of website changes on user behavior using statistical methods; software as service (SAAS) featuring experimentation software to track websites, mobile websites, and software applications, in order to obtain user-related metrics, analytics and feedback that can be used to draw recommendations, strategy, insights, and predictions; software as a service (SAAS) featuring software for creating, developing and managing marketing campaigns and projects and for providing non-downloadable software tools for team collaboration, digital asset management and coordination, and resource planning; software as a service (SAAS) featuring software for the creation and management of digital content and digital experience management; software as a service (SAAS) featuring software for marketing automation and for aggregating and using data from multiple sources to send automated messages to targeted user segments for marketing purposes; software as a service (SAAS) featuring e-commerce software that allows users to sell, buy, and market products and services online via a global computer network; software as a service (SAAS) featuring software for customizing e-commerce websites, for facilitating e-commerce transactions, and for catalog, customer, order, inventory, and supply chain management; research, development, design, implementation, configuration, maintenance, updating, and upgrading of computer software for digital experience platforms, for marketing automation and orchestration applications, for content hosting and management platforms, for experimentation platforms, for user experience optimization applications, and for recommendation and personalization software; technical support services, namely, troubleshooting of computer software problems and monitoring technological functions of computer network systems; consulting services relating to deploying, implementing and configuring computer software for digital experience platforms, for marketing automation and orchestration applications, for content hosting and management platforms, for experimentation platforms, for user experience optimization applications, and for recommendation and personalization software; software as a service (SAAS) services featuring software using artificial intelligence (AI) for integrating large language models (LLMs) and AI agents to analyze, automate, and improve digital experience workflows through evaluation, management, distribution, website experimentation, website visitation experimentation, and the personalization of digital experiences; software as a service (SAAS) services featuring software using retrieval-augmented generation (RAG) for integrating large language models (LLMs) and AI agents to analyze, automate, and improve digital experience workflows through evaluation, management, distribution, web site experimentation, website visitation experimentation, and the personalization of digital experiences; software as a service (SAAS) services featuring software for querying, processing, monitoring, measuring, storing, managing, tracking and analyzing data; software as a service (SAAS) services featuring software for generating and processing streaming and batch data queries; software as a service (SAAS) services featuring software for data analytics utilizing integrated data storage and query processing; software as a service (SAAS) services featuring software for providing root cause analysis using artificial intelligence and machine learning; software as a service (SAAS) services featuring software for receiving and interpreting data expressions written using a simplified query language; software as a service (SAAS) services featuring software using artificial intelligence (AI) for agent orchestration, for agentic experimentation, for agentic content management, for agentic campaign marketing, for agentic digital asset management, for implementing multi-agent systems,

for facilitating data-driven decision making, for streamlining and managing workflows, and for enabling users to create, configure, deploy, govern, automate, and scale AI-powered agents for use in marketing, content management, digital asset management, campaign management, and experimentation; software as a service (SAAS) services featuring software for building, developing, testing, integrating, publishing, and deploying software applications, for accessing and browsing a database of software applications, for software application analytics, and for configuring, mapping, and managing transfers and syncs of data.

FROM NOW ON

Class 35:
Business management of construction projects; business management of real estate; business project management; pre-construction project management; cost management of construction projects; business consultancy relating to the housing and construction industries; business consultancy for landowners, local authorities and housing associations; business advisory services relating to modern methods of construction; business consultancy relating to precision-engineered construction; business project management of precision-engineered construction projects; business management and organisation consultancy relating to integrated development, construction and operation platforms; business feasibility studies; procurement services for others [purchasing goods and services for other businesses]; tendering services for others; organisation of tenders for the construction industry; supply chain management services; supply chain coordination for the construction industry; business management of manufacturing supply chains; logistics management [business management] for construction projects; business introduction services; commercial intermediary services in the fields of real estate, construction and manufacturing; marketing services for real estate; preparation of investor presentations and business materials; commercial management of the licensing of goods and services for others; business assistance relating to franchising; business advice relating to franchising; franchising consultancy; business management and consultancy relating to the licensing of development and construction models; provision of business management assistance to licensees of real estate development and construction business models; commercial information and advice relating to housing delivery; tenant and resident relationship management; business sustainability consultancy; preparation of environmental, social and governance reports for businesses; arranging contracts for the supply of energy; none of the aforesaid services being in the medical, pharmaceutical, cosmetic or healthcare fields.

Class 36:
Real estate development services; real estate development of precision-engineered buildings; real estate investment; real estate investment in precision-engineered housing; capital investment; investment management; fund management; asset management; real estate asset management; portfolio management; management of real estate portfolios; investment of funds for others; capital raising; raising of capital for real estate investment; raising of capital for land acquisition; raising of capital for real estate development; raising of capital for the operation of real estate; arranging finance for land acquisition; arranging finance for construction projects; financing of real estate development; financing of real estate investment; financial management of construction projects; financial project

management of real estate developments; financial structuring of real estate transactions; real estate joint venture services; financial analysis and evaluation of real estate; preparation of real estate investment reports; financial feasibility studies for real estate development; financial due diligence relating to real estate; financial monitoring of construction projects on behalf of funders; investment advisory services; financial advisory services relating to real estate; financial advisory services relating to regeneration projects; arranging of warranties for new buildings; land acquisition services; acquisition of real estate on behalf of others; real estate brokerage; arranging the sale of real estate; real estate management; property management; estate management; management of buildings; management of residential property; management of commercial property; letting of real estate; letting of residential accommodation; rental of houses; rental of single-family housing; rental of apartments; letting of build-to-rent residential accommodation; letting of student accommodation; letting of co-living accommodation; letting of commercial premises; leasing of real estate; rent collection; real estate agency services; real estate appraisal; real estate valuation; real estate consultancy; advisory services relating to real estate; Arranging finance for land, planning, development, property investment and the operation of property assets, namely arranging investment and loan finance from investors and lenders for landowners and property developers; financial advisory services relating to the funding of the acquisition, planning, development, investment in and operation of land and property for landowners and property developers; all of the aforesaid services provided to public and private landowners and estates, trusts, colleges, charities, institutions, companies, private individuals, registered social landlords and housing associations.

Class 37:
Building construction; precision-engineered construction; construction of precision-engineered buildings; construction of precision-engineered houses; construction of houses; construction of apartments; construction of apartment buildings; construction of precision-engineered commercial buildings; construction of commercial buildings; construction of residential buildings; housing construction; construction of sustainable buildings; design and build construction services; design and build development; design and build development services; construction of energy-efficient buildings; construction of low carbon buildings; construction of buildings using sustainable building materials; construction management; management contracting services in the field of construction; Pre-construction services, namely the construction services provided before the start of works on site, of the kind provided under a pre-construction services agreement [PCSA], comprising construction consultancy, buildability reviews, construction planning, sequencing and programming, construction management relating to the tendering and letting of building contracts and trade packages, site surveys and investigations, site preparation, enabling works, groundworks, excavation and earthmoving, site clearance and demolition of buildings; construction project management; construction supervision; construction logistics management; construction consultancy; construction information; construction of buildings using modern methods of construction; construction of industrialised housing; construction of building envelopes; assembly of prefabricated buildings; assembly of precision-engineered building components; erection of prefabricated buildings; installation of prefabricated houses; installation of building components; installation of external wall systems; installation of facades; installation of cladding; installation of rainscreen cladding; installation of curtain walls; construction of lightweight facades; insulating of buildings; installation of insulation; construction services using robotics; robotic construction services; on-site robotic construction services; construction services using humanoid robots; construction services using autonomous robots; robotic assembly of building components; on-site robotic assembly of building components; robotic bricklaying services; automated construction services; on-site automated construction services; construction services using automated and digitally controlled processes; rental of construction robots; rental of robotic construction equipment; installation of mechanical, electrical and plumbing systems; installation of heating, ventilation and air-conditioning apparatus; installation of renewable energy systems; installation of renewable energy generation equipment; installation of low carbon heating systems; installation of heat pumps; installation of air source heat pumps; installation of ground source heat pumps; installation of solar panels; installation of photovoltaic systems; installation of solar thermal systems; installation of battery storage systems; installation of energy storage systems; installation of electric vehicle charging stations; installation of electric vehicle charging points; installation of building energy management systems; installation of smart home systems; retrofitting of buildings to improve energy efficiency; electrical installation services; plumbing services; installation of prefabricated mechanical, electrical and plumbing modules; maintenance and repair of mechanical, electrical and plumbing systems; maintenance and repair of renewable energy systems; maintenance and repair of heat pumps; maintenance and repair of solar panels and photovoltaic systems; maintenance and repair of battery storage systems; maintenance and repair of energy storage systems; maintenance and repair of electric vehicle charging stations; robotic building maintenance services; Construction supervision and monitoring of construction work, including inspection, measurement and monitoring of construction work on site by means of robotic, automated and remotely operated equipment; building cleaning services using robots; handover of completed buildings; building defects rectification; building maintenance; building repair; property maintenance; renovation of buildings.

Class 40:
Custom manufacture of prefabricated buildings; custom manufacture of prefabricated houses; custom manufacture of building components; custom manufacture of precision-engineered building components; precision manufacturing of building components for others; custom manufacture of timber frames; custom manufacture of metal building frames; custom manufacture of external wall systems; custom manufacture of facade panels; custom manufacture of cladding; custom manufacture of prefabricated mechanical, electrical and plumbing modules; robotic manufacturing of building components for others; automated manufacturing of building components for others; custom manufacture of building components using robotic processes; custom manufacture of building components using digitally controlled processes; Custom manufacture and fabrication for others of building systems, components, sub-assemblies and pre-assemblies for residential, commercial and mixed-use buildings, across all categories of modern methods of construction, namely volumetric modular units, panelised structural systems, timber and metal frame components, wall, floor and roof panels and cassettes, bathroom, kitchen and utility pods, mechanical, electrical and plumbing [MEP] systems, modules and pre-

assemblies, facade and cladding systems and panels, bespoke foundation systems and foundation components, and components produced by additive manufacturing [3D printing]; custom metal fabrication; manufacturing services for others in the field of prefabricated buildings; Custom manufacture of building systems, components, sub-assemblies and pre assemblies for others by means of robotic and automated manufacturing equipment, whether owned, hired or leased by the applicant; rental of robotic and automated manufacturing equipment to others for the manufacture of building systems, components, sub-assemblies and pre-assemblies; consultancy in the field of custom manufacturing.

Class 42:
Architectural services; architectural design; architectural consultancy; building design; design of houses; design of apartment buildings; design of commercial buildings; design of prefabricated buildings; design of modular buildings; design of precision-engineered buildings; design of sustainable buildings; design of buildings using artificial intelligence; design of standardised building components and pattern books; town planning services; urban planning; Town planning consultancy; urban planning services; consultancy relating to the planning and layout of residential developments; urban regeneration consultancy; masterplanning services; preparation of planning applications; consultancy relating to the discharge of planning conditions; technical feasibility studies; commissioning and coordination of surveys for construction projects; engineering services; structural engineering; precision engineering services for the construction industry; precision engineering of building components; design for manufacture and assembly; design for manufacture; design for manufacture, compliance and testability; design for testability; technical consultancy relating to design for manufacture and assembly; technical consultancy relating to compliance with building regulations and standards; technical consultancy relating to warranty and building control compliance; technical consultancy relating to product accreditation and certification; coordination of factory testing and certification of building components; preparation of technical interface specifications for building systems; technical compliance auditing of buildings; technical due diligence services relating to buildings; technical monitoring of construction projects; building safety consultancy; facade engineering; design of building facades; design of external wall systems; design of building envelopes; technical consultancy relating to facade and wall systems; building services engineering; mechanical, electrical and plumbing engineering services; design of heating, ventilation and air-conditioning systems; design of electrical installations; design of plumbing installations; design of renewable energy systems; design of low carbon heating systems; design of heat pump systems; design of solar photovoltaic systems; design of energy storage systems; design of electric vehicle charging infrastructure; energy efficiency consultancy; energy auditing; Design and engineering of energy systems for buildings and developments, including heat pump, solar photovoltaic, battery storage and electric vehicle charging systems; optimisation of the energy performance and energy consumption of buildings; energy auditing; consultancy in the field of energy efficiency of buildings; remote monitoring and management of building energy systems [technological services]; post-occupancy evaluation of buildings; monitoring of building energy and operational performance; construction drafting; quantity surveying; technical project management; technical project planning; engineering project management; building surveying; quality control of buildings; quality testing of buildings and building components; design of robotic construction systems; design of on-site robotic construction processes; design of automated manufacturing processes for the construction industry; design of automated construction processes; programming of robotic systems for construction; programming of humanoid robots for construction; research and development in the field of construction robotics; research and development in the field of humanoid robotics for construction; research and development in the field of automated construction; technical consultancy relating to robotics and automation in construction; quantum computing services for the construction and property industries; design optimisation services using quantum computing for the construction industry; research and development in the field of quantum computing applications for construction; technical consultancy relating to quantum computing in construction; industrial research in the field of construction; research and development of building systems; research and development of new technologies for the construction industry; design and development of construction methods; data science services for the construction and property industries; data analytics services for the construction industry; predictive analytics services for the construction and operation of buildings; computational design services; building information modelling services; Creation of digital twins of buildings, developments, estates and places, namely computer models replicating the design, construction, performance and management of buildings, developments, estates and places; computer modelling of buildings, developments and estates; software as a service [SaaS] featuring software for creating and managing digital twins of buildings, developments, estates and places; Building information modelling [BIM] services; creating and maintaining digital records of design, construction and maintenance data for buildings, developments and estates for others; electronic data storage of information relating to buildings, developments and estates; computer-aided design services; information technology consultancy for the construction and property industries; technology consultancy for the construction and property industries; software design and development for the construction industry; design and development of computer hardware and software for the construction and property industries; software as a service [SaaS]; platform as a service [PaaS]; providing online non-downloadable software; hosting of digital platforms; development of digital platforms for the property and construction industries; artificial intelligence as a service; development of artificial intelligence software for the construction industry; development of artificial intelligence models for the design, construction and operation of buildings; machine learning services for the property and construction industries; artificial intelligence consultancy relating to construction; none of the aforesaid services being in the medical, pharmaceutical, cosmetic or healthcare fields.

Class 43:
Hotel services; provision of temporary accommodation; rental of temporary accommodation; serviced apartment services; provision of student accommodation; provision of co-living accommodation; short-term rental of accommodation; aparthotel services; booking of temporary accommodation.
