for connecting computer network users; communications software and hardware for connecting global computer, intranet and extranet networks; data collection computer and communication network systems comprised of computer hardware, computer operating software and computer software for data collection applications, namely, automated meter reading, distribution automation, two-way communications between networks and utility meters, and demand side management applications via the internet, intranet, extranets, radio frequency networks, wireless networks, telephone lines, and integrated communications networks, namely, public switched telephone networks, virtual private networks, private networks, public networks, and cellular networks, all for use in the utility, power, and energy industries; meter interface units comprised of digital, mechanical and optical sensors, encoders and transmitters; inbound, outbound, two-way communication systems, namely, computer hardware, computer operating software and computer software for data collection and remote programming applications, namely, two-way automated meter reading, distribution automation, remote communications between networks and between and among utility meters, and demand side management applications via the internet, intranet, extranets, radio frequency networks, wireless networks, telephone lines, and integrated communications networks, namely, public switched telephone networks, ip-based public networks, virtual private networks, private networks, broadband over powerline networks, public networks and cellular networks for energy data, and other utility meter monitoring points; telephone, cellular and radio transceivers, intelligent communication adapters, and switchpoints for use in the utility, power and energy industries; energy usage monitoring devices being electronic energy utilization metering devices, namely, energy meters for tracking and monitoring energy usage, meter interfaces being remote metering systems in the nature of wireless controllers to remotely monitor and control the function and status of other electrical, electronic, and mechanical devices or systems, transponders for tracking and monitoring energy usage, and data collection units and electronic instrumentation for reading and collecting energy consumption data being computer storage devices, namely, high-speed storage subsystems for storage and backup of electronic data either locally or via a telecommunications network; downloadable computer software and recorded computer software for receiving and monitoring usage and distribution information from remote sensors and meters; computer hardware and peripheral devices; mobile signal transceiver units being receivers of electronic signals for automatically reading meters and collecting telemetry data in the utility and energy industries; downloadable computer software and downloadable computer software platforms for managing water and energy costs and for optimizing water and energy procurement procedures by collecting, managing, analyzing, mining, integrating, reporting, benchmarking, validating, managing load-reduction programs, forecasting, billing, managing, analyzing, and reporting water, energy and energy-related data; downloadable computer software for distributing and accessing information and collecting and building device integration, controlling and managing water and energy, and analyzing water and energy management; downloadable firmware and device drivers for energy and distributed energy resources management; sensors for use with electric meters; wireless meter reading instruments being electricity meters.

Class 35:

Services comprising the recording of data relating to water, gas, thermal energy and electricity meter readings in a computer file; automatic billing service; providing technical information and advice relating to automatic billing; data collection and management and analysis of automated billing data; data processing services, namely, reading and recording data related to water, gas, heat, and/or electricity meters; data processing services for use in the utility, power and energy industries; utility bill management services, namely, tracking, reporting, analyzing and delivering energy information in the form of thermostat displays, web pages, or mailings; management of energy data, customer data and their energy usage, namely, measurement or verification of energy usage; promoting public awareness about energy generation, consumption, transmission, impact, conservation, and efficiency; utility meters reading services, namely, reading water, gas, thermal energy and electricity meters; remote utility meter reading; remote reading of utility meters being utility meter reading services provided online; providing business information via a website.

Class 37:

Repair and maintenance of computer hardware and software systems.

Class 38:

Telecommunication, communication and networking services, namely, electronic delivery and transmission of messages, data, documents and information via the Internet, intranets, extranets, radio frequency networks, satellite, wireless networks and telephone lines; communication services, in the nature of electronic data exchange services between computer terminals and a meter; communication services in the nature of electronic data exchange services between computer terminals and a detector; communication services in the nature of electronic data exchange services between computer terminals and a data reader; providing multiple-user access to a global computer information network; providing multiple-user access to local and wide area networks; electronic remote transmission of data relating to water, gas, thermal energy and electricity meters; remote transmission of data related to water, gas, heat and/or electricity meters by means of radio, cable, computer network being wireless electronic transmission of data via radio, cable and computer networks; communication services by means of telephone, mobile radio, satellite and cable radio transmitter in the nature of telephone, mobile radio, satellite and cable radio transmitter communication services; electronic transmission of messages and information related to flow meters by means of electronic computer communications networks; providing communication between computers and flow meters, electronic sensors, detectors, and information readers being communication services, namely, providing electronic transmission of information stored in a database via interactively communicating computer systems; telecommunications services, namely, electronic transmission of data related to remote reading of meters measuring use and transmittal of electricity, gas, water and thermal energy.

Class 41:

Provision of non-downloadable videos in the field of energy conservation and efficiency; educational services, namely, conducting on-line exhibitions and displays and interactive exhibits in the field of energy conservation and efficiency;

conducting workshops and seminars in energy conservation and energy transmission.

Class 42:

Computer programming in the fields of energy, water, and gas; providing technical information and advice relating to remote meter reading; scientific and technological services in the field of remote meter reading and automatic billing in the nature of computer programming; research and design of electricity, gas, water, energy, oil and flow meters used for remote meter reading and automatic billing; design and development of computer hardware and software; computer related services and consulting for the utilities industries, namely, computer consulting for electric, gas and water facilities management; computer software programming for others; providing technical information related to remote reading of utility meters; providing online non-downloadable computer software; providing online non-downloadable application software; providing online non-downloadable cloud-based software; cybersecurity services in the nature of restricting unauthorized access to computer and power grid systems; design and development of computer software for biometrics, identity awareness, identity protection, fraud prevention, project management, technical skills and security management; design and development of electronic data security systems; providing information in the field of energy efficiency, including energy consumption, impact and conservation.
