automation [RPA] software; software for industrial operation control; process control software; software for machine control; environmental control software; image recognition software; software for optical character recognition; optical barcode recognition software; optical mark recognition software; environmental monitoring software; digital image processing software; digital signal processing software; downloadable Software as a Medical Device [SaMD]; software for the operation and management of integrated circuit components; software for satellite navigation systems; downloadable software for remote monitoring and analysis; simulation software for digital calculators.

Class 10:

Lasers for medical use; laser instruments for surgical use; laser instruments for ophthalmological use; laser instruments for dermatological use; laser instruments for veterinary use; laser installations for medical use; apparatus for applying laser beams for surgical use; apparatus for applying laser beams for dental purposes; optical apparatus for medical purposes; infrared optical apparatus for medical purposes; optical ultraviolet irradiation apparatus for medical purposes; fluorescence measuring apparatus and instruments for medical use; light sources for medical use; infrared lamps for medical use; ultraviolet ray lamps for medical use; fiber-optic instruments for medical use; in vitro diagnostic apparatus and instruments for medical use; spectrum analyzers for medical diagnostic use; infrared thermometers for medical use; optical thermometers for medical examination; optical imaging apparatus for medical examination purposes; optical instruments for medical endoscopy.

Class 11:

Light sources other than for medical or photographic use; full spectrum light sources; light projectors; laser projectors; laser diode light sources; fiber-optic lighting apparatus; fiber-optic lighting installations; infrared lighting devices; infrared lamps, not for medical purposes; Luminescent light sources; electroluminescent light sources; light-emitting diode [LED] lighting apparatus; lighting installations containing light-emitting diodes [LEDs]; LED lighting fixtures; LED light bulbs; fluorescent lighting apparatus; fluorescent lamps; light discharge lamps; ultraviolet ray lamps not for medical use; ultraviolet irradiators; ultraviolet sterilizers.

Class 40:

Prototype fabrication of new products for others in the fields of optics, photonics, optoelectronics and mechatronics; custom manufacturing of chips [integrated circuits] for third parties; custom manufacture of semiconductor components, devices and circuits; custom manufacture of electronic optical components and devices; custom manufacture of industrial robots; assembling of optical, electronic, mechanical components to order of third parties; custom assembling of electronic optical components for measuring, detecting, monitoring and controlling apparatus and instruments; custom assembling of electronic optical components for communication devices and apparatus; custom assembling of electronic optical components for data processing apparatus and systems; custom assembling of electronic optical components for apparatus for recording, processing, reproduction and transmission of images; custom assembling of electronic optical components for electronic imaging devices; custom assembling of electronic optical components for navigation, guidance, targeting and

Scientific, research, navigation, surveying, photographic, cinematographic, audiovisual, optical, weighing, measuring, signalling, detecting, testing, inspecting, life-saving and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; apparatus and instruments for recording, transmitting, reproducing or processing sound, images or data; recorded or downloadable media, computer software, blank digital or analogue recording and storage media; Coin-operated mechanisms; cash registers, calculating devices; computers and computer peripherals; diving suits; diving masks; earplugs for divers; nose clips for divers and swimmers; diving gloves; underwater drainage breathing apparatus; Fire extinguishing apparatus; Software; software for visualization and digital reproduction (alternatively reproduction) of physical objects and processes in both 2D and 3D, software for simulation of process data combined with contemporary and historical data; advanced machine learning software and AI; software for simulation of event scenarios; software for enabling optimization of physical objects in terms of increased efficiency, durability, and effectiveness; computer software for data processing; sharing and collaboration software; digital platforms.

Class 38:

Telecommunications; provision of access to digital platforms; telecommunications services provided via platforms and portals on the Internet and other media; provision of access to portals and platforms on the internet and computer networks; Providing user access to portals on the Internet; providing online access to databases and data stored electronically in central files for remote consultation via the internet; providing access via computer networks to internet access software in the form of providing temporary access to a supercomputer for the purpose of running software programs; providing access to data or documents stored electronically in central files for remote consultation; digital transmission of data; transmission of digital files; communication via fiber optic networks or via analog and digital terminals; transmission services over the internet and digital transmission services for audio, video or graphic data; providing access to platforms for exchanging digital business intelligence data; providing access to internet platforms; providing access to a commercial online marketplace

for data trading and data exchange on the internet; providing access to an online marketplace for buyers and sellers of products, applications, data and services in the field of business information.

Class 42:

Scientific and technological services, namely, data analysis for data integration, contextualization and visualization of data sets for the development and design of coherent 2D and 3D data models and simulations of physical facilities and graphical user interfaces for users in the marine, oil and gas, utilities, renewable energy, chemical, electrochemistry, refining and construction industries; industrial analysis and industrial research in maritime ship design, oil and gas, supply, renewable energy, chemistry, electrochemistry, petroleum refining and construction; Design and development of computer hardware and software; computer programming; platform as a service (PaaS) with computer software platforms for use in maritime, oil and gas, utilities, renewable energy, chemical, electrochemistry, refining and construction to create computer simulations of physical facilities from relevant data sources with the aim of enabling heavy industry to stabilize, improve and optimize operations, management processes and asset maintenance; providing a web hosting platform for commercial users and developing web hosting software platforms for others; software as a service (SaaS) services with software for use in maritime, oil and gas, utilities, renewable energy, chemistry, electrochemistry, refining and construction to create computer simulations of physical facilities from relevant data sources with the aim of enabling heavy industry to stabilize, improve and optimize operations, management processes and asset maintenance; consultancy, software as a service (SaaS), design and development for and of computer software for visualization and digital rendering of physical objects and industrial plant processes in both 2D and 3D; consultancy, software as a service (SaaS), design and development for and of software for simulating process data combined with contemporary and historical data; consultancy, software as a service (SaaS), design and development of and for advanced machine learning and artificial intelligence software for the preparation, analysis, contextualization, unification, digitization, collection, delivery, processing and categorization of data and information; consultancy, software as a service (SaaS), design and development of software for simulating event scenarios for industrial plants; consultancy, software as a service (SaaS), design and development for and of software for optimizing data and information from physical objects with a view to increased efficiency, sustainability, effectiveness; consultancy, software as a service (SaaS), design and development for and of computer software for data processing.
