Class 9:
Downloadable software for the simulation of autonomous vehicle sensors in the nature of camera, radar, LiDAR and ultrasonic sensors, for the purpose of autonomous vehicle testing and development; downloadable software for running continuous integration testing on autonomous vehicle driving stacks for the purpose of autonomous vehicle development and simulation; downloadable software for analysis and querying of autonomous vehicle simulation data and vehicle logs; downloadable software for displaying autonomous vehicle simulation data, metrics and information in real-time customizable and collaborative dashboards; downloadable software for operation of virtual or live vehicles using vehicle-centric, multi-modality perception, situational awareness, guidance, navigation and controls, vehicle-to-vehicle and vehicle-to-infrastructure communication protocols and networks; downloadable software for running perception algorithms that fuse one or more of camera, LiDAR, radar, synthetic aperture radar, global position system, inertial measurement systems or alternative navigation system sensors to inform a vehicle or operator response to external objects; downloadable software for autonomous vehicle simulation, testing and analysis; downloadable software for processing, testing, troubleshooting, analyzing and visualizing data recorded in vehicle data logs for the purpose of automated and autonomous vehicle testing and development; downloadable software for the simulation and monitoring of autonomous vehicle software architecture, driving stacks and vehicle sensors for the purpose of autonomous vehicle simulation; downloadable software for simulation and testing of data recorded in autonomous vehicle data logs; downloadable software for displaying results of simulation and testing of data recorded in autonomous vehicle data logs; downloadable software for analysis, validation, editing, and management of maps for the purpose of autonomous vehicle simulation, testing, and development; downloadable software for controlling or simulating manned or unmanned air, land, sea and space vehicles used in aerospace, maritime, robotics, military, intelligence, construction, mining or agricultural applications; downloadable software for enabling custom applications on vehicles, accelerating vehicle development with reference hardware architecture, and providing next-generation consumer experiences in a vehicle; downloadable software for over-the-air (OTA) software updates, data logging, and maintaining digital twins of all vehicles and variants; downloadable software for enabling developers to easily build and test software and AI applications for vehicles; downloadable software for developing, designing, configuring, deploying, monitoring, operating, orchestrating, training, simulating, testing, validating, controlling, maintaining, optimizing, and improving intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; downloadable software for deploying and creating intelligent agents that interact with and control intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; downloadable software for operating agentic interfaces that enable artificial intelligence systems to perceive, interact with, control, and coordinate intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; downloadable software for safety verification, simulation, performance evaluation, troubleshooting, and real time decision making for intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; downloadable software for developing, deploying, configuring, managing, orchestrating, monitoring, and operating intelligent software agents and autonomous agents; downloadable software for designing, customizing, deploying, orchestrating, automating, managing, and optimizing enterprise workflows, business processes, organizational functions, and intelligent agent applications; downloadable software for integrating, uploading, processing, managing, and utilizing enterprise data, documents, workflows, and business processes for use by artificial intelligence applications and intelligent agents; downloadable software for enterprise workflow automation, business process automation, customer relationship management (CRM), human resources management, recruiting, talent acquisition, project management, and enterprise operations; downloadable software for workflow automation, workflow orchestration, data integration, and integration of enterprise software systems, databases, application programming interfaces (APIs), software development kits (SDKs), and cloud computing environments; downloadable application programming interface (API) software for integrating artificial intelligence applications, intelligent agents, enterprise software systems, databases, cloud computing environments, and engineering software; downloadable software development kits (SDK); downloadable software for enterprise governance, policy management, security management, compliance management, and lifecycle management of artificial intelligence applications and intelligent agents; downloadable software for engineering design, product lifecycle management, engineering collaboration, systems engineering, and software and hardware design and development; downloadable software for schematic verification, design validation, engineering analysis, machinery architecture design, and engineering project collaboration; downloadable software for data visualization, dashboards, analytics, reporting, and performance monitoring for managing and improving intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; downloadable software for engineering visualization, digital engineering, systems modeling, simulation, digital twin development, and collaborative engineering design; downloadable software for creating, visualizing, simulating, and analyzing digital models of physical environments, industrial facilities, machinery, infrastructure, and engineering systems; downloadable software using large language models (LLMs) for computer software code generation; downloadable software using large language models (LLMs) for language translation; downloadable software for natural language

processing, generation, understanding, reasoning, and analysis; downloadable software for detecting, recognizing, processing, analyzing, interpreting, understanding, generating, creating, enhancing, modifying, and editing text, speech, audio, images, graphics, and video content; downloadable software for converting text and data into software code; downloadable software for detecting, recognizing, processing, analyzing, understanding, generating, completing, debugging, and editing software code; downloadable software for recognizing, translating, and transcribing multilingual text and speech; downloadable software for sharing datasets for machine learning, predictive analytics, and training language, image, and multimodal artificial intelligence models; downloadable software for developing and implementing artificial neural networks, providing simulation environments for testing artificial intelligence agents, algorithms, and software, and using, customizing, fine-tuning, adapting, deploying, evaluating, and operating artificial intelligence models; downloadable software for building, using, and deploying autonomous agents, semi-autonomous agents, and intelligent agents; downloadable software for speech recognition and natural language understanding; downloadable software for orchestrating, routing, monitoring, and managing artificial intelligence models and autonomous software agents; downloadable software using machine learning for training, deploying, operating, and optimizing artificial intelligence model; downloadable software for semantic search, vector search, embedding generation, information retrieval, document indexing, and retrieval-augmented generation (RAG); downloadable software for performing inference using artificial intelligence models, machine learning models, and large language models.

Class 12:
Unmanned aerial vehicles (UAVs); military decoys being unmanned aerial vehicles; air vehicles in the nature of unmanned aerial vehicles (UAVs); drones.

Class 35:
Business consulting services; business consulting services for digital transformation; consultancy and advisory services in the field of business strategy; business consulting services in the field of artificial intelligence (AI), business efficiency, business training, software development, software implementation, and workflow optimization; business data analysis; business analysis and business strategic planning services in the technology industry; business data analysis services in the field of artificial intelligence (AI), business efficiency, business training, software development, software implementation, and workflow optimization; data processing for businesses and management; commercial assistance relating to system implementation and system integration.

Class 42:
Providing on-line non-downloadable software for the simulation of autonomous vehicle sensors, in the nature of camera, radar, LiDAR and ultrasonic sensors, for the purpose of autonomous vehicle testing and development; providing on-line non-downloadable software for running continuous integration testing on autonomous vehicle driving stacks for the purpose of autonomous vehicle development and simulation; providing on-line non-downloadable software for analysis and querying of autonomous vehicle simulation data and vehicle logs; providing on-line non-downloadable software for displaying autonomous vehicle simulation data, metrics and information in real-time customizable and collaborative dashboards; providing on-line non-downloadable software for the operation of virtual or live vehicles using vehicle-centric, multi-modality perception, situational awareness, guidance, navigation and controls, vehicle-to-vehicle and vehicle-to infrastructure communication protocols and networks; providing on-line non-downloadable software for using perception algorithms that fuse one or more of camera, LiDAR, radar, synthetic aperture radar, global position system, inertial measurement systems or alternative navigation system sensors to inform a vehicle or operator response to external objects; providing on-line non-downloadable software for controlling or simulating manned or unmanned air, land, sea and space vehicles used in aerospace, maritime, robotics, military, intelligence, construction, mining or agricultural applications; providing on-line non-downloadable software for autonomous vehicle simulation, testing and analysis; providing on-line non-downloadable software for processing, testing, troubleshooting, analyzing and visualizing data recorded in vehicle data logs for the purpose of automated and autonomous vehicle testing and development; providing on-line non-downloadable software for simulation and testing of data recorded in autonomous vehicle data logs; providing on-line non-downloadable software for displaying results of simulation and testing of data recorded in autonomous vehicle data logs; providing on-line non-downloadable software for analysis, validation, editing, and management of maps for the purpose of autonomous vehicle simulation, testing, and development; providing on-line non-downloadable software for developing, designing, configuring, deploying, monitoring, operating, orchestrating, training, simulating, testing, validating, controlling, maintaining, optimizing, and improving intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; providing on-line non-downloadable software for deploying and creating intelligent agents that interact with and control intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; providing on-line non-downloadable software for operating agentic interfaces that enable artificial intelligence systems to perceive, interact with, control, and coordinate intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; providing on-line non-downloadable software for safety verification, simulation, performance evaluation, troubleshooting, and real time decision making for intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; providing on-line non-downloadable software for developing, deploying, configuring, managing, orchestrating, monitoring, and operating intelligent software agents and autonomous agents; providing on-line non-downloadable software for designing, customizing, deploying, orchestrating, automating, managing, and optimizing enterprise workflows, business processes, organizational functions, and intelligent agent applications; providing on-line non-downloadable software for integrating, uploading, processing, managing, and utilizing enterprise data, documents, workflows, and business processes for use by artificial intelligence applications and intelligent agents; providing on-line non-downloadable software for enterprise workflow automation, business process automation, customer relationship management (CRM), human resources management, recruiting, talent acquisition, project management, and enterprise operations; providing on-line non-downloadable software for workflow automation, workflow orchestration, data integration, and integration of enterprise

software systems, databases, application programming interfaces (APIs), software development kits (SDKs), and cloud computing environments; application service provider featuring application programming interface (API) software for integrating artificial intelligence applications, intelligent agents, enterprise software systems, databases, cloud computing environments, and engineering software; providing on-line non-downloadable software for software development kits (SDKs); providing on-line non-downloadable software for enterprise governance, policy management, security management, compliance management, and lifecycle management of artificial intelligence applications and intelligent agents; providing on-line non-downloadable software for engineering design, product lifecycle management, engineering collaboration, systems engineering, and software and hardware design and development; providing on-line non-downloadable software for schematic verification, design validation, engineering analysis, machinery architecture design, and engineering project collaboration; providing on-line non-downloadable software for data visualization, dashboards, analytics, reporting, and performance monitoring for managing and improving intelligent and autonomous machines, physical systems, industrial systems, and engineering systems; providing on-line non-downloadable software for engineering visualization, digital engineering, systems modeling, simulation, digital twin development, and collaborative engineering design; providing on-line non-downloadable software for creating, visualizing, simulating, and analyzing digital models of physical environments, industrial facilities, machinery, infrastructure, and engineering systems; providing on-line non-downloadable software for using large language models (LLMs) for computer software code generation; providing on-line non-downloadable software for using large language models (LLMs) for language translation; providing on-line non-downloadable software for natural language processing, generation, understanding, reasoning, and analysis; providing on-line non-downloadable software for detecting, recognizing, processing, analyzing, interpreting, understanding, generating, creating, enhancing, modifying, and editing text, speech, audio, images, graphics, and video content; providing on-line non-downloadable software for converting text and data into software code; providing on-line non-downloadable software for detecting, recognizing, processing, analyzing, understanding, generating, completing, debugging, and editing software code; providing on-line non-downloadable software for recognizing, translating, and transcribing multilingual text and speech; providing on-line non-downloadable software for sharing datasets for machine learning, predictive analytics, and training language, image, and multimodal artificial intelligence models; providing on-line non-downloadable software for developing and implementing artificial neural networks, providing simulation environments for testing artificial intelligence agents, algorithms, and software, and using, customizing, fine-tuning, adapting, deploying, evaluating, and operating artificial intelligence models; providing on-line non-downloadable software for building, using, and deploying autonomous agents, semi-autonomous agents, and intelligent agents; providing on-line non-downloadable software for speech recognition and natural language understanding; providing on-line non-downloadable software for orchestrating, routing, monitoring, and managing artificial intelligence models and autonomous software agents; providing online non-downloadable software using machine learning for training, deploying, operating, and optimizing artificial intelligence model; providing on-line non-downloadable software for semantic search, vector search, embedding generation, information retrieval, document indexing, and retrieval-augmented generation (RAG); providing on-line non-downloadable software for performing inference using artificial intelligence models, machine learning models, and large language models; providing on-line non-downloadable software for the simulation and monitoring of autonomous vehicle software architecture, driving stacks and vehicle sensors for the purpose of autonomous vehicle simulation.

Downloadable and embedded computer software in the field of infrastructure as a service (IaaS) for cloud computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) for quantum computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), namely for the provision of hosting servers for use by others; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) offering computer software platforms for syncing, storing, archiving, and backing-up data to cloud servers; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) and technical support services for power management of data centers, heat management of data centers, energy management of data centers, cooling management of data centers, HVAC management of data centers, power grid management of data centers, localized grid management of data centers, battery storage and management of data centers; downloadable and embedded computer software in the field of platform as a service (PaaS) offering software for executing cloud computing based applications; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for implementing and deploying artificial intelligence, machine learning, deep learning and neural network algorithms, models and technology; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for training, management, deployment, testing, operation and maintenance of artificial intelligence models, artificial intelligence, machine learning, deep learning, natural language generation, statistical learning, supervised learning, unsupervised learning, data mining, data acquisition, data analysis, data integration, predictive analytics, inference computations, agentic artificial intelligence, artificial intelligence agents, large language models, small language models, diffusion models, multimodal artificial intelligence, business intelligence, computer vision, advanced visualization, image generation, video generation, voice generation, text generation, scientific data generation, financial data generation, industrial data generation, infrastructure data generation, medical data generation, artificial general intelligence (AGI), artificial narrow intelligence (ANI), and artificial super intelligence (ASI); downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for processing data, images, graphics, audio, video, and text; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for high performance computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for distributed computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for edge computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for on-premise computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for virtual machines; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data pipelines; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) platform as a service (PaaS), and software as a service (SaaS) for data storage including data lakes, graph databases, data containers, and data pipelines; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for connection of application programming interfaces (APIs); downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for quantum computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for facilitating data transmission, data collection, data analysis, and decision-making; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS), for simulation, modeling and data processing for use in data visualization, data analysis, data mining, data interpretation, predictive analytics, prescriptive analytics, accessing and editing large-scale data, interactive visual computing, video streaming, design of information graphics, and maximizing graphics processing and performance; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for general purpose computation, manipulation of collections of data, data analysis, image content analysis, video content analysis, information analysis, data transformation, data input/output, communications, speech recognition, graphics display, modeling and testing for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data management, analytics and pattern and activity recognition; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of big data for business data analytics and user behavior analytics; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of robotics; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum algorithms; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum computers; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum simulations; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for optimizing power, performance and cost for computing services, and delivering

computing services at scale; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for advanced cloud computing functions in the nature of machine learning, optimizing power, performance and cost for cloud computing services; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for operating semiconductors, computer chips, graphic processing units, tensor processing units, and central processing units; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) featuring software development tools for writing, building, running, testing, debugging, deploying, and storing software code, releasing and providing continuous delivery of software code, developing, deploying, analyzing, and debugging applications, and cloud infrastructure modeling; downloadable computer software development tools in the field of artificial intelligence; downloadable computer software development tools for use in modeling in the field of artificial intelligence; downloadable computer software development tools for use in testing in the field of artificial intelligence; downloadable computer software development tools for quantum computing; downloadable computer software development tools for data centers; downloadable and embedded computer software in the field of software as a service (SaaS) for deploying public and private cloud computing environments in the field of infrastructure as a service (IaaS); downloadable and embedded software in the field of security for computing including cyber security, fire walls, authentication, verification, authorization, encryption, decryption, security key management, security token management, and data monitoring; quantum computers; quantum computing hardware.

Class 35:
Business consultancy in the field of machine learning and artificial intelligence; business administration consulting services in the field of artificial intelligence; business data curation for artificial intelligence (AI) development; providing consumer product information for the purpose of selecting artificial intelligence (AI) hardware and software to meet the consumer's specifications; consultancy, advisory and information services relating to the aforesaid services.

Class 36:
Financial services, namely, asset management services including management of funds and investments with respect to assets including technology, computing, data and artificial intelligence systems; investment services in the fields of technology, computing, data and artificial intelligence systems; financial and investment advisory services rendered using artificial intelligence (AI); investing in technology, computing, data and artificial intelligence systems; consultancy, advisory and information services relating to the aforesaid services.

Class 42:
Infrastructure as a service in the field of cloud computing; infrastructure as a service (IaaS) in the field of quantum computing; infrastructure as a service (IaaS) provider for hosting servers for use by others; infrastructure as a service (IaaS) services offering computer software platforms for syncing, storing, archiving, and backing-up data to cloud servers; infrastructure as a service and technical support services for power management of data centers, heat management of data centers, energy management of data centers, cooling management of data centers, HVAC management of data centers, power grid management of data centers, localized grid management of data centers, battery storage and management of data centers; platform as a service (PaaS) offering software for executing cloud computing based applications; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for implementing and deploying artificial intelligence, machine learning, deep learning and neural network algorithms, models and technology; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for training, management, deployment, testing, operation and maintenance of artificial intelligence models, artificial intelligence, machine learning, deep learning, natural language generation, statistical learning, supervised learning, unsupervised learning, data mining, data acquisition, data analysis, data integration, predictive analytics, inference computations, agentic artificial intelligence, artificial intelligence agents, large language models, small language models, diffusion models, multimodal artificial intelligence, business intelligence, computer vision, advanced visualization, image generation, video generation, voice generation, text generation, scientific data generation, financial data generation, industrial data generation, infrastructure data generation, medical data generation, artificial general intelligence (AGI), artificial narrow intelligence (ANI), and artificial super intelligence (ASI); infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for processing data, images, graphics, audio, video, and text; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for high performance computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for distributed computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for edge computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for on-premise computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for virtual machines; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data pipelines; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data storage including data lakes, graph databases, data containers, and data pipelines; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for connection of application programming interfaces (APIs); infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for quantum computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for facilitating data transmission, data collection, data analysis, and decision-making; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for simulation, modeling and data processing for use in data visualization, data analysis, data mining, data interpretation, predictive analytics, prescriptive analytics, accessing and editing large-scale data, interactive visual computing, video streaming, design of information graphics, and maximizing graphics processing and performance; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for general purpose computation, manipulation of collections of data, data analysis, image content analysis, video

content analysis, information analysis, data transformation, data input/output, communications, speech recognition, graphics display, modeling and testing for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data management, analytics and pattern and activity recognition; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of big data for business data analytics and user behavior analytics; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of robotics; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum algorithms; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum computers; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum simulations; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for optimizing power, performance and cost for computing services, and delivering computing services at scale; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for advanced cloud computing functions in the nature of machine learning, optimizing power, performance and cost for cloud computing services; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for operating semiconductors, computer chips, graphic processing units, tensor processing units, and central processing units; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) featuring software development tools for writing, building, running, testing, debugging, deploying, and storing software code, releasing and providing continuous delivery of software code, developing, deploying, analyzing, and debugging applications, and cloud infrastructure modeling; providing non-downloadable computer software development tools in the field of artificial intelligence; providing non-downloadable computer software development tools for use in modeling in the field of artificial intelligence; providing non-downloadable computer software for use in testing in the field of artificial intelligence; providing non-downloadable computer software for quantum computing; providing non-downloadable computer software for data centers; software as a service (SaaS) for deploying public and private cloud computing environments in the field of infrastructure as a service (IaaS); security for computing including cyber security, fire walls, authentication, verification, authorization, encryption, decryption, security key management, security token management, and data monitoring; technical support services, namely, remote and on-site infrastructure management services for monitoring, administration and management of cloud computing applications and data centers; off-site data backup services; facilities and operational management for data centers; supply and management of power for data centers; design and development of software, databases, web services and cloud computing infrastructure; management services for data center networks; leasing of data center modules; rental of space in a computer co-location data centre infrastructure facility for others; providing cloud storage facilities for use as a data center for others; rental of data center facilities; rental of decentralized cloud storage facility for containerized data centers of others, namely rental of decentralized cloud storage facility that provides space, power, cooling, and physical security for computer servers, computer hardware, and computing networking equipment; consultancy, advisory and information services relating to the aforesaid services; consultancy, advisory and information services in the field of cloud computing networks and applications; consultancy, advisory and information services in the field of deploying cloud storage environments in the field of infrastructure as a service [IaaS]; consultancy, advisory and information services in the field of deploying cloud computing environments in the field of infrastructure as a service [IaaS]; consultancy and research in the field of quantum algorithms; consultancy and research in the field of quantum computing; artificial intelligence consultancy; computer technology consultation in the field of machine learning and artificial intelligence; technical consulting in the field of artificial intelligence.

Class 9:
Downloadable and embedded computer software in the field of infrastructure as a service (IaaS) for cloud computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) for quantum computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), namely for the provision of hosting servers for use by others; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) offering computer software platforms for syncing, storing, archiving, and backing-up data to cloud servers; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) and technical support services for power management of data centers, heat management of data centers, energy management of data centers, cooling management of data centers, HVAC management of data centers, power grid management of data centers, localized grid management of data centers, battery storage and management of data centers; downloadable and embedded computer software in the field of platform as a service (PaaS) offering software for executing cloud computing based applications; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for implementing and deploying artificial intelligence, machine learning, deep learning and neural network algorithms, models and technology; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for training, management, deployment, testing, operation and maintenance of artificial intelligence models, artificial intelligence, machine learning, deep learning, natural language generation, statistical learning, supervised learning, unsupervised learning, data mining, data acquisition, data analysis, data integration, predictive analytics, inference computations, agentic artificial intelligence, artificial intelligence agents, large language models, small language models, diffusion models, multimodal artificial intelligence, business intelligence, computer vision, advanced visualization, image generation, video generation, voice generation, text generation, scientific data generation, financial data generation, industrial data generation, infrastructure data generation, medical data generation, artificial general intelligence (AGI), artificial narrow intelligence (ANI), and artificial super intelligence (ASI); downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for processing data, images, graphics, audio, video, and text; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for high performance computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for distributed computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for edge computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for on-premise computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for virtual machines; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data pipelines; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) platform as a service (PaaS), and software as a service (SaaS) for data storage including data lakes, graph databases, data containers, and data pipelines; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for connection of application programming interfaces (APIs); downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for quantum computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for facilitating data transmission, data collection, data analysis, and decision-making; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS), for simulation, modeling and data processing for use in data visualization, data analysis, data mining, data interpretation, predictive analytics, prescriptive analytics, accessing and editing large-scale data, interactive visual computing, video streaming, design of information graphics, and maximizing graphics processing and performance; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for general purpose computation, manipulation of collections of data, data analysis, image content analysis, video content analysis, information analysis, data transformation, data input/output, communications, speech recognition, graphics display, modeling and testing for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning;

downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data management, analytics and pattern and activity recognition; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of big data for business data analytics and user behavior analytics; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of robotics; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum algorithms; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum computers; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum simulations; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for optimizing power, performance and cost for computing services, and delivering computing services at scale; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for advanced cloud computing functions in the nature of machine learning, optimizing power, performance and cost for cloud computing services; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for operating semiconductors, computer chips, graphic processing units, tensor processing units, and central processing units; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) featuring software development tools for writing, building, running, testing, debugging, deploying, and storing software code, releasing and providing continuous delivery of software code, developing, deploying, analyzing, and debugging applications, and cloud infrastructure modeling; downloadable computer software development tools in the field of artificial intelligence; downloadable computer software development tools for use in modeling in the field of artificial intelligence; downloadable computer software development tools for use in testing in the field of artificial intelligence; downloadable computer software development tools for quantum computing; downloadable computer software development tools for data centers; downloadable and embedded computer software in the field of software as a service (SaaS) for deploying public and private cloud computing environments in the field of infrastructure as a service (IaaS); downloadable and embedded software in the field of security for computing including cyber security, fire walls, authentication, verification, authorization, encryption, decryption, security key management, security token management, and data monitoring; quantum computers; quantum computing hardware.

Class 35:
Business consultancy in the field of machine learning and artificial intelligence; business administration consulting services in the field of artificial intelligence; business data curation for artificial intelligence (AI) development; providing consumer product information for the purpose of selecting artificial intelligence (AI) hardware and software to meet the consumer's specifications; consultancy, advisory and information services relating to the aforesaid services.

Class 36:
Financial services, namely, asset management services including management of funds and investments with respect to assets including technology, computing, data and artificial intelligence systems; investment services in the fields of technology, computing, data and artificial intelligence systems; financial and investment advisory services rendered using artificial intelligence (AI); investing in technology, computing, data and artificial intelligence systems; consultancy, advisory and information services relating to the aforesaid services.

Class 42:
Infrastructure as a service in the field of cloud computing; infrastructure as a service (IaaS) in the field of quantum computing; infrastructure as a service (IaaS) provider for hosting servers for use by others; infrastructure as a service (IaaS) services offering computer software platforms for syncing, storing, archiving, and backing-up data to cloud servers; infrastructure as a service and technical support services for power management of data centers, heat management of data centers, energy management of data centers, cooling management of data centers, HVAC management of data centers, power grid management of data centers, localized grid management of data centers, battery storage and management of data centers; platform as a service (PaaS) offering software for executing cloud computing based applications; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for implementing and deploying artificial intelligence, machine learning, deep learning and neural network algorithms, models and technology; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for training, management, deployment, testing, operation and maintenance of artificial intelligence models, artificial intelligence, machine learning, deep learning, natural language generation, statistical learning, supervised learning, unsupervised learning, data mining, data acquisition, data analysis, data integration, predictive analytics, inference computations, agentic artificial intelligence, artificial intelligence agents, large language models, small language models, diffusion models, multimodal artificial intelligence, business intelligence, computer vision, advanced visualization, image generation, video generation, voice generation, text generation, scientific data generation, financial data generation, industrial data generation, infrastructure data generation, medical data generation, artificial general intelligence (AGI), artificial narrow intelligence (ANI), and artificial super intelligence (ASI); infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for processing data, images, graphics, audio, video, and text; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for high performance computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for distributed computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software

as a service (SaaS) for edge computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for on-premise computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for virtual machines; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data pipelines; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data storage including data lakes, graph databases, data containers, and data pipelines; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for connection of application programming interfaces (APIs); infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for quantum computing; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for facilitating data transmission, data collection, data analysis, and decision-making; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for simulation, modeling and data processing for use in data visualization, data analysis, data mining, data interpretation, predictive analytics, prescriptive analytics, accessing and editing large-scale data, interactive visual computing, video streaming, design of information graphics, and maximizing graphics processing and performance; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for general purpose computation, manipulation of collections of data, data analysis, image content analysis, video content analysis, information analysis, data transformation, data input/output, communications, speech recognition, graphics display, modeling and testing for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data management, analytics and pattern and activity recognition; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of big data for business data analytics and user behavior analytics; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of robotics; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum algorithms; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum computers; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum simulations; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for optimizing power, performance and cost for computing services, and delivering computing services at scale; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for advanced cloud computing functions in the nature of machine learning, optimizing power, performance and cost for cloud computing services; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for operating semiconductors, computer chips, graphic processing units, tensor processing units, and central processing units; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) featuring software development tools for writing, building, running, testing, debugging, deploying, and storing software code, releasing and providing continuous delivery of software code, developing, deploying, analyzing, and debugging applications, and cloud infrastructure modeling; providing non-downloadable computer software development tools in the field of artificial intelligence; providing non-downloadable computer software development tools for use in modeling in the field of artificial intelligence; providing non-downloadable computer software for use in testing in the field of artificial intelligence; providing non-downloadable computer software for quantum computing; providing non-downloadable computer software for data centers; software as a service (SaaS) for deploying public and private cloud computing environments in the field of infrastructure as a service (IaaS); security for computing including cyber security, fire walls, authentication, verification, authorization, encryption, decryption, security key management, security token management, and data monitoring; technical support services, namely, remote and on-site infrastructure management services for monitoring, administration and management of cloud computing applications and data centers; off-site data backup services; facilities and operational management for data centers; supply and management of power for data centers; design and development of software, databases, web services and cloud computing infrastructure; management services for data center networks; leasing of data center modules; rental of space in a computer co-location data centre infrastructure facility for others; providing cloud storage facilities for use as a data center for others; rental of data center facilities; rental of decentralized cloud storage facility for containerized data centers of others, namely rental of decentralized cloud storage facility that provides space, power, cooling, and physical security for computer servers, computer hardware, and computing networking equipment; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for virtual machines; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data pipelines; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) platform as a service (PaaS), and software as a service (SaaS) for data storage including data lakes, graph databases, data containers, and data pipelines; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for connection of application programming interfaces (APIs); downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for quantum computing; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for facilitating data transmission, data collection, data analysis, and decision-making; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS), for simulation, modeling and data processing for use in data visualization, data analysis, data mining, data interpretation, predictive analytics, prescriptive analytics, accessing and editing large-scale data, interactive visual computing, video streaming, design of information graphics, and maximizing graphics processing and performance; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for general purpose computation, manipulation of collections of data, data analysis, image content analysis, video content analysis, information analysis, data transformation, data input/output, communications, speech recognition, graphics display, modeling and testing for use in the fields of artificial intelligence, deep learning, high performance computing, distributed computing, virtualization and machine learning; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for data management, analytics and pattern and activity recognition; downloadable and embedded computer software in the field of infrastructure as a service (IaaS) platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of big data for business data analytics and user behavior analytics; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for the integration of artificial intelligence and machine learning in the field of robotics; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum algorithms; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum computers; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for creating, analysing and running programs for quantum simulations; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for optimizing power, performance and cost for computing services, and delivering computing services at scale; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for advanced cloud computing functions in the nature of machine learning, optimizing power, performance and cost for cloud computing services; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for operating semiconductors, computer chips, graphic processing units, tensor processing units, and central processing units; downloadable and embedded computer software in the field of infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) featuring software development tools for writing, building, running, testing, debugging, deploying, and storing software code, releasing and providing continuous delivery of software code, developing, deploying, analyzing, and debugging

applications, and cloud infrastructure modeling; downloadable computer software development tools in the field of artificial intelligence; downloadable computer software development tools for use in modeling in the field of artificial intelligence; downloadable computer software development tools for use in testing in the field of artificial intelligence; downloadable computer software development tools for quantum computing; downloadable computer software development tools for data centers; downloadable and embedded computer software in the field of software as a service (SaaS) for deploying public and private cloud computing environments in the field of infrastructure as a service (IaaS); downloadable and embedded software in the field of security for computing including cyber security, fire walls, authentication, verification, authorization, encryption, decryption, security key management, security token management, and data monitoring; quantum computers; quantum computing hardware.

Class 35:
Business consultancy in the field of machine learning and artificial intelligence; business administration consulting services in the field of artificial intelligence; business data curation for artificial intelligence (AI) development; providing consumer product information for the purpose of selecting artificial intelligence (AI) hardware and software to meet the consumer's specifications; consultancy, advisory and information services relating to the aforesaid services.

Class 36:
Financial services, namely, asset management services including management of funds and investments with respect to assets including technology, computing, data and artificial intelligence systems; investment services in the fields of technology, computing, data and artificial intelligence systems; financial and investment advisory services rendered using artificial intelligence (AI); investing in technology, computing, data and artificial intelligence systems; consultancy, advisory and information services relating to the aforesaid services.

Class 42:
Infrastructure as a service in the field of cloud computing; infrastructure as a service (IaaS) in the field of quantum computing; infrastructure as a service (IaaS) provider for hosting servers for use by others; infrastructure as a service (IaaS) services offering computer software platforms for syncing, storing, archiving, and backing-up data to cloud servers; infrastructure as a service and technical support services for power management of data centers, heat management of data centers, energy management of data centers, cooling management of data centers, HVAC management of data centers, power grid management of data centers, localized grid management of data centers, battery storage and management of data centers; platform as a service (PaaS) offering software for executing cloud computing based applications; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for implementing and deploying artificial intelligence, machine learning, deep learning and neural network algorithms, models and technology; infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS) for training, management, deployment, testing, operation and maintenance of artificial intelligence models, artificial intelligence, machine learning, deep learning, natural language generation, statistical learning, supervised learning, unsupervised learning, data mining, data acquisition, data analysis, data integration, predictive analytics, inference computations, agentic artificial intelligence, artificial intelligence agents, large language models, small language models, diffusion models, multimodal artificial intelligence, business intelligence, computer vision, advanced visualization, image generation, video generation, voice generation, text generation, scientific data generation, financial data generation, industrial data generation, infrastructure data generation, medical data generation, artificial general intelligence (AGI), artificial narrow intelligence (ANI), and artificial super intelligence (ASI); downloadable software and mobile application software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks for use in connection with data, image, and document storage, data, image, and document management, data, image, and document access, data processing, and visualization of data in the fields of real estate, home ownership and home improvement; downloadable software and mobile application software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks for the collection, storage and analyzing of property information and customer data in the field of real estate; downloadable software and mobile application software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks for use in the storage, organization, creation and management of electronic forms, task management workflow automation, management of photo and video content, meeting legal and environmental compliance obligations, and management of workflow timelines for use in the field of residential and commercial property water damage repair and restoration; downloadable software and mobile application software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks to enable users to measure, create, annotate, view, present, and edit graphics, graphic designs, visual effects, composite images and illustrations of interior and exterior spaces of residential and commercial properties; downloadable software and mobile application software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks for use in providing financial assessments, construction information, financial statistics and valuation of residential and commercial properties and real estate.

Class 42:
Artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform data management, data integration, data warehousing, data mining, data processing, data sharing, data collection, data interpretation, data queries, data visualization, and data analytics in connection with mortgage loan applications, credit and loan risk assessments, pricing and fee information, and real property and real estate data, information, assessment and valuation; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks for use in assessment, grading and management of loan risk and fraud in the fields of mortgage lending and investing, analysis, validation and verification of credit and mortgage data, evaluation and transmission of property tax data and historical property tax data, active mortgage and tax payment details and the research and evaluation of property foreclosure data all for use by mortgage lenders and borrowers; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks in connection with the viewing of real property images and the visual assessment and evaluation of risk potential associated with the real property, for documenting and facilitating property inspections, automating application

of guidelines to property inspection data and repair estimates, generating inspection reports and damage estimates and storing data for property construction and repair; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks for collecting, maintaining, and providing property valuation information, financial valuation information and risk assessment information about structures and personal and real property, including roofs; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks to enable real estate appraisers, lenders, and mortgage brokers to place and receive real estate transaction orders, order tracking, billing, managing communication and relationships, to initiate and complete real estate transactions and to calculate real estate closing-related taxes and recording fees; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform real-time tracking of residential home repair progress and to facilitate communication between homeowners and residential home repair contractors, repair technicians, and contractor networks for the purpose of providing documentation and photos, location tracking data, and home repair project specifications and updates in the field of residential property restoration and residential property repairs; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for use as an interactive interface for receiving consumer preference information and providing information about real estate, mortgages, moving services, home services, and title services; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for modeling weather conditions, forecasting weather events, post-event weather data modeling, and historical reporting of prior weather events, and to enable an end user to research, search, and access weather hazard events affecting real property for use in connection with identifying, pursuing, and completing potential repair and replacement opportunities; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots that facilitates collaborating and communicating between borrowers and lenders and others involved in the loan process, sharing of documents and information between borrowers and lenders and others involved in the loan process, storing data, documents and records for applying for, pre-approving, processing, and obtaining loans and to enable borrowers to obtain personal financial information, credit reports, loan pricing, loan rates, and loan information; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots assisting with documenting and facilitating property inspections, automating job scope decisions, generating inspection reports, job estimates and work orders and storing data created in connection with the foregoing, in the field of property construction and repair; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to scan and analyzes aerial images of real estate properties and perform assessments of exterior and interior property risk attributes, hazards, and conditions; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for use in providing real property sellers and buyers with real property market, trends, agent, sale, listing, location, purchase, inspection, financing, moving, repair, renovation, improvement, utilities, and décor information, insights, advice, articles, videos, resources, and referrals; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots to perform complex tasks to enable a user to research, search, and access natural hazard events affecting real property and download data output for use in connection with identifying, pursuing, and completing potential repair and replacement opportunities; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for providing consumers with information about real estate service providers and for use in connecting service providers and consumers through referrals; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for tracking and monitoring weather information relating to natural disasters and catastrophic events, calculating and simulating water flow, modeling of areas likely to be inundated, and preparing related reports and technical documentation; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for enabling consumers to view and interact with digital real estate listings populated on multiple listing service platforms, allowing real estate professionals to send curated digital home listings to home buyer consumers, and engage digitally with real estate professional throughout the home buying and selling transaction; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for computer security services for protecting data and information from unauthorized access in the field of misrepresentation of property values in the real estate mortgage lending industry; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for use in providing guidelines and status monitoring for project management and task management in the field of residential and commercial property restoration and repair, and for assessing, documenting, tracking, and auditing property restoration and repair projects and data; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for calculating reconstruction cost estimates for commercial and residential structures based on property-specific characteristics for real property appraisal, assessment, inspection and lending; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for use in catastrophe modeling and risk quantification and for collecting, organizing, storing, analyzing and sharing of weather data and information for use in generating historic reports relating to hail, wind, tornado, and lightning events impacting property and property owners; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for modeling meteorological conditions, forecasting meteorological events, post-event meteorological data modeling, historical reporting

of prior meteorological events and for developing response strategies to meteorological events and natural disasters impacting property owners; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for accessing, comparing and contrasting location data characteristics consisting of livability scores, job markets, crime rates, schools, proximity to first responders within a defined property range, neighborhood characteristics, lifestyle segments, economic status, employment and demographic data of residents; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for use in performing spatial intelligence evaluation of real property locations, for searching county parcel maps and for use in the identification of current and historical lot subdivisions of real property; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for use in accessing real property data, namely, ownership and property information and data on comparables, maps, valuation and pricing data, mortgage marketing, loan recording information, lender marketing, loan recording information, lender market share information and maps; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for use in connection with an interactive computer database containing appraisal and valuation reports for real property impacted by natural disasters and other catastrophic events; artificial intelligence as a service (AIaaS) services featuring software using artificial intelligence for an AI agent-guided system and artificial intelligence chat bots for use in computer security services for protecting data and information from unauthorized access and fraudulent activities and for fraud detection and prevention.
