for connecting global computer networks; computer software for time control; multiple control signal transmission units; network controlling apparatus; communication interface units; interface software; interactive computer software accessible on computers and via mobile telephones; wireless communication apparatus; communication networks; electronic devices and computer software that allow the sharing and transmission of data and information between devices for the purposes of facilitating environmental monitoring, control, and automation; computer software that enables interaction and interface between electrical and electronic control devices; software in the field of energy; software and mobile applications for the management of energy accounts, including bill payments, tariff and product selection, monitoring usage, reviewing statements and accessing customer services; data processing software; software for controlling home and residential automation systems including heating, lighting, thermostats, air quality monitors and sensors, alarms and other safety equipment, locks, doorbells, cameras, and home monitoring equipment; software and downloadable mobile applications in the field of energy management, optimisation and efficiency; computer software and downloadable mobile applications for monitoring, analysing and optimising energy consumption; computer software for use in meter reading, monitoring and reporting; computer software for control, regulation and monitoring of charging systems for electric vehicles; data communications apparatus and software; programmable controls for lighting apparatus and instruments; solar panels; electricity storage apparatus; batteries; electric battery chargers; wireless battery chargers; power supply devices for battery chargers; battery charging equipment and apparatus; vehicle battery charging apparatus and equipment; charging stations for electric vehicles; electric apparatus for charging vehicle batteries; charging systems for electric powered vehicles; battery storage systems; charging cables for electric cars; electric car charging piles; electrical control apparatus for automatic gates for car parks; electric control apparatus for automatic gates for car parks; access control devices; alarm control panels; alarm installations; alarms; alarm sensors; analog-to-digital converters; apparatus for testing vehicle transmissions; apparatus for transmission of communications; mobile communication terminals; mobile data communications apparatus; data transmitting apparatus; security control apparatus; electronic and automatic access security apparatus; security video cameras and television monitors; intruder detection systems and apparatus; software to control building access and security systems; apparatus, equipment and instruments for measuring the efficiency, performance and consumption of car charger points; budget management and budget planning software; financial planning and management software; electronic publications, downloadable; electronic publications, downloadable, relating to energy supply, energy efficiency and related energy services; carbon monoxide detectors; leak detection apparatus; sensors and detectors, motion sensors; facial recognition and analysis software; multi-channel sound processors; sound and picture recording apparatus; cables; connection cables; plugs and adaptors; parts, fittings and accessories for the aforementioned goods.

**Class 11:**

Apparatus for heating, lighting, steam generating, drying, ventilating, air conditioning, water supply and sanitary purposes; central heating apparatus and installations; boilers; boilers being parts of central heating installations; electric central heating boiler systems; control devices for heating, lighting, steam generating, drying, ventilating, air conditioning, water

supply and sanitary installations; apparatus for controlling temperature in heating installations, namely thermostatic valves [parts of heating installations]; automatic temperature regulators [thermostatic valves] for central heating systems, namely, thermostatic valves as part of heating installations; radiator valves; wall heaters, convective heaters, water heaters, fan heaters, gas boilers, gas central heating systems, solar heating systems; lightbulbs; lighting; light installations; parts and fittings for the aforementioned goods.

**Class 35:**

Advertising; business management, organization and administration; office functions; administrative services; administration services relating to business transactions; administration services relating to commercial transactions; advertising services to promote public awareness on energy issues; customer loyalty and reward schemes; administration of consumer loyalty programs; administration of customer loyalty and incentive schemes; administration of loyalty programs involving discounts or incentives; organisation of customer loyalty schemes; organisation of loyalty and incentive schemes; organisation and management of customer loyalty programmes; organisation, operation and supervision of incentive and loyalty schemes; promoting the goods and services of others by means of a loyalty rewards card scheme; analysis of market research data; energy usage management; consulting services in the field of energy efficiency; billing services in the field of energy; utility bill management services, namely, tracking, reporting, analysing and delivering energy information in the form of utility bills and utility meter data rate schedules; provision of energy usage and billing information including the provision of such information online or electronically; utility meter reading services; meter reading of gas and electricity consumption; procurement of contracts concerning energy supply; import and export agencies in the field of energy; procurement services in the nature of purchasing energy supply for others; procurement, namely, purchasing electricity and gas for retail customers; arranging of trading transactions and commercial contracts; arranging subscriptions to a telematics, telephone or computer service for others; gas and electricity tariff information services; energy price comparison services; comparison services for prices for electric vehicle charging; provision of business information; business and advisory services relating to the purchase and/or sale of gas, gaseous fuels and electricity; tracking and monitoring energy consumption for others for account auditing purposes; assistance and consultancy services in the field of business management of companies in the energy sector; management of telephone call centres; outsourcing services; data processing and data management; administrative accounting; administrative assistance and data processing services; management advice; information, advisory and consultancy services relating to all the aforesaid services.

**Class 37:**

Construction services; mining extraction, oil and gas drilling; electrician services; installation, repair and maintenance of electricity supply apparatus and of fixtures thereof and of electrical and electronic apparatus and instruments; repair and maintenance of energy generating installations; construction, repair and maintenance of energy-using installations; installation of equipment and facilities for the collection, storage, distribution, processing of renewable energy; charging of electric vehicles; recharging services for electric vehicles; vehicle battery charging; construction of station for charging vehicles battery on public roads; electrical repairs, installation and

***List of cases accepted for opposition purposes as shown in Journal 2024/022 published on 31 May 2024 .***

contracting services for residential and commercial wiring or electrical apparatus, appliances, stereo components, and television components, electrical panels, electrical outlets, switches and light fixtures; installation, maintenance and repair of apparatus for heating, lighting, sanitation, ventilation, air conditioning and water supply; installation, maintenance and repair of central heating systems; installation of heating control apparatus; installation, maintenance and repair of pipes, cisterns, tanks, heating and potable water systems; cleaning of storage tanks; installation and maintenance of bolts, locks, grills, alarms, safes, security devices and of closed circuit television; installation, maintenance and repair of burglar alarms and security systems; installation of residential security apparatus; installation of hardware and cables for Internet access; installation of hardware for computer networks; installation, maintenance and repair of computer hardware, household devices, home electrical systems and surveillance and security systems in homes; installation of communications network instruments; installation, refurbishment, inspection, repair, maintenance and decommissioning of energy supply installations and energy production plants; installation of insulation materials; installation, repair and maintenance of gas, oil or electrical appliances or instruments using gas, oil or electricity; installation, repair and maintenance of gas, oil, electricity or water meters, air conditioning and ventilation appliances; information, advisory and consultancy services relating to all the aforesaid services.

Class 38:

Telecommunications services; electronic transmission of messages, images and signals; telecommunications and data communication services; providing access to a computer network; transmission of sound, picture and data signals; transmission of sound or visual recordings over networks; message sending via a website; providing access to web pages; electronic transmission of data and documents via the Internet or other databases; chat room services; delivery of data and messages by electronic transmission; electronic message sending; message sending, receiving and forwarding; online services, namely, message sending; communication by computer, computer intercommunication; wireless communications services; wireless transmission of data and information; wireless telephone services; providing access to an interactive user interface; providing access to an online interface; providing access to an online interface for controlling heating, water supply, lighting, sanitation, air conditioning, ventilation and security apparatus; communications by means of mobile phones, global computer networks, the internet and wireless transmission; communications by means of mobile phones, global computer networks, the internet and wireless transmission that connect to gas boilers and other apparatus for heating, lighting, steam generating, drying, ventilating, air conditioning, water supply and sanitary purposes; provision of e-mail services; alarm services, messaging services and alert services via the internet, e-mail, computer networks and telecommunications networks relating to home security and to home energy use, management and consumption; information, advisory and consultancy services relating to all the aforesaid services.

Class 39:

Transport; packaging and storage of goods; storage, distribution, transportation and delivery of electricity; storage, distribution, transportation and delivery of gas and oil; storage, distribution, transportation and delivery of electrical energy from renewable

sources; transmission, distribution and supply of electricity; transmission and supply of gas and oil; transmission and supply of electrical energy from renewable sources; arranging the storage of batteries; storage of batteries; storage of captured carbon dioxide; transport of captured carbon dioxide; subscription services relating to an electric battery charging service; subscription services relating to a charging service for electric vehicles; subscription services to a supply, storage and distribution network of gas, electricity and energy; subscription services in relation to connected homes (being homes where multiple electric devices are networked or otherwise integrated together to create a home environment that can be easily controlled); information, advisory and consultancy services relating to all the aforesaid services.

Class 40:

Generation of electricity; generation of power and of electricity; generation of energy from renewable sources; clean energy production; consultancy services relating to the generation of electrical power; production of gas and oil; processing of gas and oil; production and treatment of natural gas and oil and products thereof; information, advisory and consultancy services relating to all the aforesaid services.

Class 42:

Scientific and technological services and research and design relating thereto; industrial analysis, industrial research and industrial design services; quality control and authentication services; design and development of computer hardware and software; software development, programming and implementation; computer services; software installation; maintenance of software; creation, maintenance and hosting of websites; technical, scientific and industrial research services and consultancy, in particular in the field of energy; providing downloadable computer operating systems in the field of energy; application service provider (ASP) services featuring software using artificial intelligence for machine learning; application service provider (ASP) services featuring software for creating, authoring, distributing, downloading, transmitting, receiving, playing, editing, extracting, encoding, decoding, displaying, storing and organizing text, graphics, images, audio, video, and multimedia content, and electronic publications; providing temporary use of on-line non-downloadable software using artificial intelligence for machine learning; providing online non-downloadable software in the field of energy; advisory services relating to the use of energy, energy efficiency and energy-saving; developing of integrated energy concepts; professional consultancy relating to the conservation of energy; installation, maintenance and repair of computer software and computer programs for computer systems; consultancy in the field of energy-saving; energy auditing; technical consultancy in the field of energy saving and energy efficiency; design and development of systems for generating and using energy in an economic and efficient manner; software as a service [SaaS]; platform as a service [PaaS]; software as a service [SaaS] featuring software for machine learning; software as a service [SaaS] featuring software using artificial intelligence for machine learning; platforms for artificial intelligence as software as a service [SaaS]; software as a service [SaaS] featuring software platforms for artificial intelligence; software as a service [SaaS] featuring software for the control, regulation and monitoring of energy systems; software as a service [SaaS] featuring software in respect of power, energy management, optimisation and efficiency; software as a service [SaaS] featuring software for the monitoring, analysing and optimisation of energy

***List of cases accepted for opposition purposes as shown in Journal 2024/022 published on 31 May 2024 .***

consumption including analysing energy consumption data; software as a service [SaaS] featuring software for providing visibility of electrical equipment performance and providing raw data and analytics data sourced remotely from energy generation equipment; platform as a service [PaaS] for the control, regulation and monitoring of energy systems; platform as a service [PaaS] in respect of power, energy management, optimisation and efficiency; platform as a service [PaaS] for the monitoring, analysing and optimisation of energy consumption including analysing energy consumption data; platform as a service [PaaS] for providing visibility of electrical equipment performance and providing raw data and analytics data sourced remotely from energy generation equipment; computer services featuring platforms for the transmission and recording of data relating to energy consumption; computer services, namely SAAS services for the control, regulation and monitoring of household devices, home electrical systems, electric vehicle charging systems, surveillance systems and home security systems; computer services, namely, providing a website or app featuring technology that allows users to monitor and control residential and commercial automation systems, namely, lighting, appliances, HVAC systems, thermostats, air quality monitors and sensors, alarms and other safety equipment, locks, doorbells, cameras, electric vehicle charging systems and monitoring equipment at a remote location; cloud-based software as a service [SaaS] services featuring software for analysing electrical power consumption data at monitored locations; infrastructure as a service for electric vehicles; technical advice and expertise for production, storage and distribution of electricity installation in connection with a network of electric vehicle charge points; technical advice and information on energy control and operation in connection with a network of electric vehicle charge points; technical evaluation and estimation of energy consumption; computer programming for a network of electric vehicle charge points; research in the field of energy and energy efficiency; research and development of new products for others related to a network of electric vehicle charge points; engineering work in the field of production, management, distribution of electric power and renewable energy; design and development of apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity; design and development of batteries; preparation of technical reports; conversion of data from physical to electronic media relating to energy consumption in buildings and domestic homes; preparation of engineering or technical reports relating to energy consumption in buildings and domestic homes; providing online engineering or technical reports relating to energy consumption in buildings and domestic homes; selection, capture and storage of electronic data relating to energy consumption in buildings and domestic homes; engineering and engineering consulting services in the fields of planning and deploying electrical energy systems and analysing and managing energy system efficiency and optimization data associated with power line current monitors all for reducing electrical energy consumption; home automation services, namely, remote monitoring of heating, ventilating and air conditioning apparatus via the use of wireless, telephonic, electric and web monitoring technologies; providing technological information about environmentally-conscious and green innovations; information, advisory and consultancy services relating to all the aforesaid services.
