UK00004211013 29 May 2025
(9, 10, 12, 13, 37, 39, 40, 41, 42, 43)

***List of cases accepted for opposition purposes as shown in Journal 2025/025 published on
20 June 2025 .***

International priority date claimed:
16 December 2024 (UNITED STATES OF AMERICA)

Class 9:
Scientific, research, navigation, surveying, photographic, cinematographic, audiovisual, optical, weighing, measuring, signalling, detecting, testing, inspecting, life-saving and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; Satellites.

Class 10:
Medical apparatus; oxygenators, oxygen inhalers, oxygen monitors and oxygen generators, all for medical use; Medical apparatus being portable life support systems for space travel comprised of oxygen supply cell stacks, water deionizer beds to produce oxygen, oxygen circulating pumps, face mask separators and controls and parts therefore for use in launch vehicles, being vehicles for launching space vehicles, spacecraft, space vehicles, and extraterrestrial and off-Earth habitats being space vehicles and structures in space.

Class 12:
Vehicles; apparatus for locomotion by land, air or water; Space vehicles; Space launch vehicles; Space stations, namely space vehicles, space platforms being space vehicles, and replacement and structural components therefor; space vehicles; spacecraft modules being mobile space vehicles for animal and human habitation, travel and commercial activities in space including research, manufacturing and exploration system testing; space vehicles, namely, space vehicles with life-supporting habitats; space vehicle parts, namely structural parts being components for guidance, navigation and control, propulsion, environmental control and life support; space vehicles being vehicles that provide structural support for space launch vehicles, spacecraft, space vehicles and space vehicle fleets, namely, rockets, rocket engines, and docking stations and adapters for docking space vehicles; space vehicles, namely, orbital space habitats, mobile commercial space stations, mobile space laboratories incorporating airlocks, and replacement and structural parts therefor; Launch vehicles being vehicles for launching space vehicles, spacecraft, space vehicles, research modules, namely artificial structures placed in orbit that can serve as a base

for a variety of activities including observation, study, and investigations, and extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents.

Class 13:
Rockets.

Class 37:
Construction services; installation, maintenance and repair services in relation to vehicles, space vehicles, space stations, space platforms, satellites, medical apparatus, rockets, aerospace engineering, propulsion systems, guidance systems, navigation systems, robotic devices, control systems, avionics, spacesuits, electricity distribution and supply, water distribution and supply, oxygen distribution and supply; mining extraction, oil and gas drilling; Construction services, namely, building and construction of space vehicles, space stations, space platforms, namely structural platforms, and space modules for animal and human habitation, travel and commercial activities in space including research, manufacturing and exploration system testing; installation and repair of space vehicles, space stations, physical structures being space platforms and space modules; spacecraft vehicle refueling services; maintenance services for space vehicles and space stations, docking stations and adapters, life-supporting physical habitats, and physical research modules being orbital facilities in which third party scientific experiments can be conducted, and physical extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents; custom building construction services, namely, custom building of extraterrestrial and off-Earth homes for humans and habitats for animal, plant, and other biological life, biological samples, and biological agents; information, consultancy and advisory services in relation to all of the above.

Class 39:
Travel consultancy services; travel agency services, namely, arranging transportation being low and high-altitude flights and space flights; transportation services, namely, spaceflight travel services for humans to travel to and from accommodations in space, namely, organization of travel, making reservations and bookings for transportation by spaceflight; transportation services, namely, providing space vehicle and space module landing and launching facilities for others; travel agency services, namely, coordinating the travel transportation arrangements for individuals and groups for low and high altitude flights and space flights; launching of spacecraft, space vehicles and space fleets, namely, satellites, space stations, research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial buildings, and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents for others; transportation of goods for others; utility services, namely, provision of universal utilities in the nature of electricity distribution and supply, water distribution and supply, oxygen distribution and supply, and life-support utilities distribution and supply; utility services, namely, provision of universal utilities in the nature of electricity distribution and supply, water distribution and supply, oxygen distribution and supply, and life-support utilities distribution and supply in launch vehicles, spacecraft, rockets, space vehicles and fleets, satellites, space stations, research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial buildings and off-Earth habitats for human, animal, plant, and other biological life,

***List of cases accepted for opposition purposes as shown in Journal 2025/025 published on
20 June 2025 .***

biological samples, and biological agents; leasing of hangar space for and on launch vehicles, spacecraft, rockets, space vehicles and fleets, satellites, space stations, research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents; leasing of maintenance space being garage space for launch vehicles, spacecraft, rockets, space vehicles and fleets, satellites, space stations, research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents; leasing of fixed and movable storage containers to commercial and residential users; leasing of fixed and movable storage containers to commercial and residential users on launch vehicles, spacecraft, rockets, space vehicles and fleets, satellites, space stations, research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents; design and mission planning namely flight planning services for space stations, space platforms, and components therefor; information, consultancy and advisory services in relation to all of the above.

Class 40:

Custom manufacturing services in relation to vehicles, space vehicles, space stations, space platforms, satellites, medical apparatus, rockets, aerospace engineering, propulsion systems, guidance, navigation, robotic devices, control systems, avionics, spacesuits, electricity distribution and supply, water distribution and supply, oxygen distribution and supply; Custom manufacturing and building services for others in the field of consumer products, consumer products necessary to support space access by humans, and space and high-altitude related products in the nature of space vehicles, docking stations, and rocket engines, all in the nature of space vehicles; custom manufacturing of spacecraft modules to provide animal and human habitat, research and commercial facilities in low earth orbit, all in the nature of space vehicles; custom manufacturing of spacecraft modules for animal and human habitation and commercial activities in space including research, manufacturing and exploration system testing, all in the nature of space vehicles; custom manufacturing and building of launch vehicles, spacecraft, and space vehicles necessary to support space access by humans, for third parties; information, consultancy and advisory services in relation to all of the above.

Class 41:

Education services; Professional human spaceflight training; conducting educational programs to promote space studies on Earth in the field of aerospace engineering and space science; providing educational STEM opportunities in the nature of seminars, workshops, and classroom activities in the fields of aerospace engineering and space science for students from kindergarten through higher education to participate in educational activities related to space; information, consultancy and advisory services in relation to all of the above.

Class 42:

Scientific and technological research, design, analysis, development, testing services; Engineering services; Providing scientific, technical, and research consulting in the field of space; Providing scientific, technical, and research consulting to governmental agencies, the military, and government-contracted

businesses in the field of space, namely, access by humans, improving space propulsion and human habitation, transportation and survivability technology, and space and high-altitude defense technologies; scientific and technological research and services, namely, research, development of technology, analysis, design, and testing, in the fields of aerospace engineering, propulsion systems, guidance, navigation, robotic devices, and control systems, avionics, structures for space applications, spacesuits, materials science, life sciences, and space science; space and spaceflight-related technical and scientific consulting services; development and establishment of testing specifications and procedures in the field of space exploration systems; design, technical engineering, research, development, and testing services in the field of space science involving space travel or the exploration of space, namely, space science instruments, environmental control systems, space life support systems, living accommodations, extravehicular activity systems in the nature of space suit components, spacecraft architecture, spacecraft structures and deployment mechanisms in the nature of mechanical systems and robotics; product research and development for others in the field of launch vehicles, spacecraft, rockets, space vehicles and fleets, satellites, space stations, research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents; scientific research for third parties in the field of space travel; engineering for third parties in the field of space travel; scientific consulting and research and technical consulting, product research and development, engineering, new product design services, and custom design of prototypes services for third parties, all in the fields of launch vehicles, spacecraft, rockets, space vehicles and fleets, satellites, space stations, research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents; scientific consulting and research and technical consulting, product research and development, engineering, new product design, and custom design of prototypes services for third parties, all in the fields of aerospace engineering, propulsion systems, guidance, navigation, and control systems, avionics, robotic devices, structures for space applications, environmental control and life support systems, spacesuits, extravehicular mobility units (EMU), exploration extravehicular mobility units (xEMU), materials science, life sciences, human and animal habitation in space, and space science; computer software design and development services; computer software design and development services for third parties in the field of launch vehicles, spacecraft, rockets, space vehicles and fleets, satellites, space stations, research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents; computer software design and development services for third parties in the field of aerospace engineering, propulsion systems, guidance, navigation, and control systems, avionics, robotic devices, structures for space applications, environmental control and life support systems, spacesuits, extravehicular mobility units (EMU), exploration extravehicular mobility units (xEMU), materials science, life sciences, human and animal habitation in space, and space science; integration for third parties of computer systems and networks for control of environmental control and life support systems for launch vehicles, spacecraft, rockets, space vehicles and fleets, satellites, space stations,

List of cases accepted for opposition purposes as shown in Journal 2025/025 published on 20 June 2025 .

research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents; product development for third parties, namely, development of propulsion systems, guidance systems, navigation systems, and control systems, avionics electronics systems, structures all for use for launch vehicles, spacecraft, rockets, space vehicles and fleets, satellites, space stations, research modules being orbital facilities in which third party scientific experiments can be conducted, and extraterrestrial and off-Earth habitats for human, animal, plant, and other biological life, biological samples, and biological agents; technical consulting and scientific consulting and research for third parties in the fields of technical, research, and manufacturing activities in space, at low and high altitude, and in other off-Earth locations; development and establishment of testing specifications and procedures for third parties in the field of space exploration systems; providing facilities for scientific research in space in the nature of specialized scientific research and technological exploration system testing facilities; infrastructure as a service (IAAS) services; infrastructure as a service (IAAS) services, namely, hosting servers in the nature of file servers and data servers for use by others in space, at low and high altitude, and in other off-Earth locations; information, consultancy and advisory services in relation to all of the above.

Class 43:

Providing temporary accommodation; providing temporary accommodation, namely, space stations for human habitation; providing temporary accommodation in space and high-altitude locations; operation of a space station, namely, providing temporary accommodation for others in a space-based physical facility; information, consultancy and advisory services in relation to all of the above.

CHIPISM

Class 1:

Chemicals and materials for use in 3D printing compatible with inkjet 3D printing technology; binding agents for use with 3D printing technologies; adhesives for use in 3D printing applications; chemical additives for altering machine functionality and performance; unprocessed synthetic resins and polymers for additive manufacturing processes.

Class 2:

Inkjet inks and printable materials for 3D printers; coatings and colouring agents for use in 3D printing applications; dyes, pigments, and filled compositions for additive manufacturing; preparations for enhancing surface finishes of 3D printed objects.

Class 7:

Parts, fittings, and components for 3D printers, namely print heads, hot ends, and extruder assemblies; devices for repairing and retrofitting 3D printer components; equipment for upgrading 3D printing systems, namely devices enabling machine parameter modifications; industrial machines and spare parts for additive manufacturing processes; devices for enhancing the performance of 3D printers; robotic mechanisms and systems for additive manufacturing.

Class 9:

USB security drives featuring encryption technology; encrypted USB devices for secure data storage and transfer; hardware-based encryption devices for storing and protecting digital keys; digital storage devices with integrated encryption capabilities; portable data storage devices with built-in encryption features; cryptographic tokens and hardware for secure data access and management; downloadable software embedded in encryption hardware for secure data handling and access control; devices for protecting confidential digital files and cryptographic keys; data security apparatus, namely, encrypted USB memory devices for storing and sharing sensitive information; radio-frequency identification (RFID) tags, electrically erasable programmable read-only memory (EEPROMs); accessories and replacement components for 3D printers, including hardware namely print heads, nozzles, and electronic control boards; hardware and software solutions for enabling compatibility between 3D printers and additional materials; downloadable software for modifying and upgrading 3D printer firmware and operating system parameters; encryption-enabled devices for protecting intellectual property associated with 3D printing; digital hardware and software systems allowing conversion of lower-spec 3D printers into higher-spec machines; software for calibrating and optimising 3D printer performance.

Class 17:

Flexible and rigid printing materials for use in 3D printing, namely thermoplastic filaments, resins, and specialty polymer materials; insulating materials and plastic compositions for additive manufacturing; sealing and thermal-protective components for 3D printing equipment and materials.

Class 42:

Encryption advisory services relating to secure data storage devices; technical support services for encryption hardware and digital security products; consultancy in the field of encrypted storage and digital security solutions; development and design of cryptographic systems integrated into portable drives; consultancy, design, and development services in the

field of 3D printing technologies and additive manufacturing solutions; technical support services for software, hardware, and devices involved in 3D printing applications; encryption advisory solutions geared toward ensuring the security, compatibility, and protection of 3DP data and consumables; development of custom firmware and software patches for modifying 3D printers and expanding material compatibility; design and optimisation of cryptographic and RFID-enabled systems for additive manufacturing processes. .
