Class 12:
Vehicles for transportation on land, in the air or on water.

Class 39:
Consulting, brokerage, reservation and booking services for travel, cruises, excursions, tours, sightseeing tours, land tours for cruise passengers (provided via agencies, third-party agencies, call centers, hotlines or online); Organization of

travel, cruises, excursions, tours, sightseeing tours, land tours for cruise passengers; transportation of travelers by sea, air and road; providing information for planning and booking trips via a website, the Internet, a database, mobile devices or by telephone; providing automated check-in services for travelers; chartering, leasing, renting and lending of boats, ships and vehicles (incl. watercraft); chartering out, renting out and lending of cruise ships and yachts, land and water vehicles and bicycles; providing information on the rental of land and water vehicles and bicycles.

Class 41:
Consulting, brokerage, reservation and booking services in relation to cultural, sporting, entertainment and leisure activities and events; Organization and execution of cultural, sporting, entertainment and leisure activities and events; rental of sports equipment (excluding vehicles); simulated travel services for entertainment purposes provided in virtual environments.

Class 43:
Consulting, brokerage, reservation and booking services in relation to hotel accommodation and restaurant visits (provided via agencies, third-party agencies, call centers, hotlines or online); Catering and accommodation services; providing information about hotels and restaurants via a website, the Internet, a database, mobile devices or by telephone.

fluorescent chemicals for medical use; medical diagnostic chemical reagents and preparations for use in the detection, amplification, analysis, quantification and labelling of nucleic acids for medical use; clinical medical reagents; clinical diagnostic reagents; biological preparations and reagents for medical and therapeutic purposes; reagents for pharmaceutical, medical and veterinary use; diagnostic preparations and materials; diagnostic reagents for medical use; diagnostic test reagents; diagnostic preparations for medical purposes; diagnostic preparations for veterinary purposes; diagnostic biomarker reagents for medical, pharmaceutical and veterinary purposes; chemical or biochemical reagent test kits for medical and clinical use including preparations, agents and reagents; diagnostic testing reagent kits consisting of diagnostic reagents for clinical or medical laboratory use; diagnostic test strips for medical purposes; reagents and assay systems in the form of kits for microbiological analysis; kits for cleaning and/or separating nucleic acids for clinical or medical laboratory use; protein microarrays; biological, chemical and pharmaceutical preparations for medical, therapeutic, pharmaceutical and veterinary purposes, in particular fermentation media, proteins, cell lines and cell expression systems; chemicals and biochemicals for medical and clinical use in the field of genetics, for transferring biological molecules into living cells, integrating foreign nucleic acids into the genome of living cells and producing transfected cells, cell lines, recombinant proteins, peptides, antibodies, viruses and/or pseudo-virus particles; preparations, agents and reagents for medical use for research and for genetic diagnostics; assay kits and chemical and biochemical test kits for medical and clinical use in the field of genetics including preparations, agents and reagents for transferring biological molecules into living cells, integrating foreign nucleic acids into the genome of living cells and producing transfected cells, cell lines, recombinant proteins, peptides, antibodies, viruses and/or pseudo-virus particles; cell cultures for medical and veterinary purposes; bacteriological culture mediums; serums; pharmaceutical preparations for activating cellular function; cellular function activating agents for medical purposes; cellulose for pharmaceutical purposes; stem cells; stem cells for medical purposes; cultures for medical use; cultures of microorganism for medical use; medical products to support the growth of stem cells; sterilizing preparations; filtering preparations, materials and media for pharmaceutical, medical and sanitary purposes; air purifying preparations.

Class 6:

Metal containers for storage or transport; containers and pallets of metal for transport and packaging, of metal; metal containers for holding and transporting flexible pouches for biological, medical or pharmaceutical liquids; metal pallets; metal racks for storage of containers filled with biopharmaceutical materials; metallic frames for supporting disposable containers for biopharmaceutical materials.

Class 7:

Machine tools, power-operated tools; pumps; industrial robots; chemical handling machines; lifting and hoisting equipment, elevators and escalators; opening and closing mechanisms; packaging machines; packaging machines, namely, liquid container fillers; robotic apparatus for handling materials; filling machines; robotic filling machines; machines for filling containers in the nature of disposable plastic bags with biopharmaceutical liquids; machines and machine tools for

treatment of materials and for manufacturing; bioreactors for use in manufacturing; machines for cultivating micro-organisms, cells and other biological material; filtering machines, separators and centrifuges; filtering machines for chemical processing; filters for machines; milk filtering machines; beverage filtering machines; separating machines for chemical processing; vessel holders for centrifuges, centrifuge beakers; centrifugation chambers; housings for machines; filter housings being parts of machines; chemical industry machinery; mixing machines; mixing machines for mixing and homogenizing liquids in the pharmaceutical and chemical industries; agitators (machines); vibrators for industrial purposes; electric welding machines for welding plastics; electric welding machines for sterile connection of plastic tubes, pipes, bags, and containers; plastic cutting tool for sterile separation of plastic tubes, pipes, bags, containers; heat sealing machines for sealing plastic tubes that are used in the laboratory, pharmaceutical, medical and biomedical fields; dispensing machines; dispensing machines for emptying containers filled with biopharmaceutical liquids; control devices for machines.

Class 9:

Scientific, research, navigation, surveying, photographic, cinematographic, audiovisual, optical, weighing, measuring, signalling, detecting, testing, inspecting, life-saving and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; apparatus, instruments and cables for electricity; apparatus and instruments for accumulating and storing electricity; apparatus and instruments for controlling electricity; electrical and electronic components; scientific and laboratory devices for treatment using electricity; apparatus and instruments for recording, transmitting, reproducing or processing sound, images or data; recorded and downloadable media, computer software, blank digital or analogue recording and storage media; databases; downloadable publications, downloadable instruction manuals; application software; software for monitoring, analysing, controlling and running physical world operations; system and system support software, and firmware; virtual and augmented reality software; digital twin operating system software; digital twin software; software for digital twins, notifications and calibration functions for improving sample safety in laboratories, the efficiency of a laboratory and the reproducibility of laboratory processes; web application and server software; software, in particular for controlling apparatus, equipment and installations, for controlling processes, and for chemometric applications; computer software for operating and controlling industrial robotic machinery, biotechnological and chemical machinery for use in industrial manufacturing processes; computer software for operating and controlling laboratory devices; software for machines and apparatus for cultivating micro-organisms, cells or other biological material, mixing machines, scientific and laboratory instruments, apparatus and devices; computer software for analyzing, collecting, storing, documenting and visualizing data relating to manufacturing processes for the bio-pharma, pharmaceutical, chemical, food and beverage, petrochemical, paper, steel and mining, flat panel and fragrance industries; computer software for analyzing, collecting, storing, documenting and visualizing data related to setting up scientific experiments and analysis of the results of scientific experiments; optical devices; computers

and computer peripheral devices; display devices, image capturing and developing devices; communications equipment; data processing equipment and accessories (electrical and mechanical); data storage devices and media; scanners; printers; peripheral devices for computers, laboratory equipment and manufacturing machines, in particular printers, data input, data display, data transfer, data reproduction, data storage and control apparatus; measuring, detecting, monitoring and controlling devices; controllers and regulators; data loggers and recorders; measuring devices; distance and dimension measuring instruments; electricity measuring instruments; speed measuring instruments; temperature measuring instruments; meters for measuring gas composition and gas flow; flowmeters; cytometers, flow cytometers; spectrometers; fluorescence spectrometers and near infrared spectrometers, and apparatus for turbidity measurement; refractometers; PH meters; moisture meters; measuring apparatus using the principle of high-frequency technology, including microwave resonance technology; measuring apparatus for analysing enzymatic reactions; electrochemical measuring apparatus; conductivity measuring apparatus; apparatus for analysing biomass, pressure and temperature; ultrasound measuring apparatus for flow analysis; apparatus for measuring density; temperature controllers for controlling the temperature of biopharmaceutical materials held in containers designed for cryopreservation; surface plasmon resonance (SPR) spectrometers; spectrometer using bio-layer interferometry for determination of the affinity, kinetics, and concentration of molecules, antibodies or proteins; interferometers; biofiber optic instruments in the nature of biosensors; weight measuring instruments; weighing apparatus and instruments and parts therefor, scales of all types, including precision balances; mass comparators; load cells for use in industrial and laboratory weighing systems; mechanical, electric and electronic components for scales and weighing installations; testing weights; sensors, detectors and monitoring instruments; testing and quality control devices; electronic testing apparatus for air and liquid filters; scientific research and laboratory apparatus, educational apparatus and simulators; DNA microarrays; protein biochip microarrays; microarray slides; scientific instruments, apparatus and equipment, including laboratory equipment; microscopes, probes for scientific purposes; laboratory apparatus and instruments; chromatographs for scientific or laboratory use; chromatography apparatus and instruments; chromatography columns; chromatography columns for scientific and laboratory use; preparative chromatography apparatus and instruments;; software for piloting separation, purification or fractionation processes by chromatography; software for piloting separation or fractionation processes by preparative chromatography; laboratory apparatus for use in chromatography; laboratory apparatus and chromatography systems for use in protein purification; liquid chromatography injectors for scientific and laboratory use; chromatography columns and apparatus for packing chromatography columns for laboratory use; laboratory apparatus and instruments for use in science, research and industry, namely, for use in separating biological and chemical products; autosamplers used for sample preparation for laboratory use, sample applicators for use with the application of sample solutions to a chromatography tube for laboratory use; data storage devices for use in chromatography; apparatus for analyses for non-medical use; apparatus, devices and installations for controlling water quality;; microplate readers; microplate stackers; microplate washers; microtiter plates;

devices for reading microtiter plates; laboratory apparatus for determination of the affinity, kinetics, and concentration of molecules, antibodies or proteins; biosensors; biosensors for analyzing chemical and biological samples for measuring the presence or absence, concentration, association, affinity, binding rates, specificity and functional properties of biomolecules, namely, chemical compounds, sugars, peptides, proteins, oligonucleotides, dna, rna, aptamers, cells, virus, bacteria, antibodies and antibody fragments; laboratory filters; filter diaphragms for laboratory use; filtering units for laboratory use; filters for blood and blood components for laboratory use; laboratory apparatus for collecting and filtering airborne germs and parts therefor; containers, housings, filter housings, and filtering installations of stainless steel for laboratory, scientific, and biopharmaceutical applications, and parts therefor; liquid filter units, namely, pre-assembled filter cartridges, plastic hoses and hose connectors, sold as a set, for laboratory use; scientific apparatus, instruments and equipment for use in analysis and research of medical and pharmaceutical preparations and for treating living organisms, in particular laboratory fermenters, mechanical shakers, homogenizers, scientific apparatus having freeze-drying function, electrofusion and transfection apparatus, electrophoresis apparatus, thermostats and scientific apparatus having cooling function; disposable containers for cryopreservation of biopharmaceutical materials; protective devices and frames for use with disposable containers for biopharmaceutical materials; laboratory and scientific storage containers for biopharmaceutical material having chilling function; plastic bags, not for medical purposes, namely for cell cultivation; laboratory, biological pilot plant and biological production equipment for use in pharmaceutical and biological product laboratories and testing facilities, namely, plastic bags for use in holding biological material and related reagents; laboratory equipment, namely, liners of plastic for tanks used in holding biological material and related reagents; laboratory apparatus for freezing and thawing in clean room environments and cryopreservation; apparatus for breeding cell cultures (not for medical purposes); apparatus for cultivating micro-organisms, cells and other biological material; cell culture vessels with sensors; laboratory vessels and laboratory apparatus for cultivating, incubating, dyeing and analysing biological materials, including microorganisms, cells and tissue; laboratory shakers; platforms for laboratory shakers, in particular fitted with measuring stations for logging physical data and/or with data interfaces for exchanging data with external apparatus; laboratory centrifuges; vessel holders for laboratory centrifuges, laboratory centrifuge beakers; laboratory centrifugation chambers; apparatus for mixing biopharmaceutical media, in particular by vibration, rotation and wave motion; dosing devices, in particular single-use devices; automated liquid dispensing machines; dosage dispensers, liquid dosage devices that measure the amounts to be dispensed; liquid handling apparatus of plastic, namely, pre-assembled tubes, pipes, bags, containers and filters for pharmaceutical or biotechnology applications; pipettes, multichannel pipettes, pipette controllers, pipette tips, filters for use in pipettes or pipette tips; pipette stands; charging stations for pipettes; pipette accessories; syringes for use with pipettes; dispensers, in particular being attachments for containers; incubators; laboratory live-cell monitoring, imaging and analysis apparatus and software; laboratory cell and bead analysis apparatus; laboratory virus quantification apparatus; laboratory apparatus for antibody discovery and cell line development; laboratory apparatus for patch-clamping cells;

List of cases accepted for opposition purposes as shown in Journal 2025/051 published on 19 December 2025 .

laboratory apparatus for quantifying proteins, peptides and DNA; micro-array scanners; disposable plastic bioreactors for cell culture; bioreactors for laboratory use; bioreactors for cell culturing for scientific research; disposable plastic bioreactors for cell culture.

Class 10:

Surgical, medical, dental and veterinary apparatus and instruments; medical apparatus and instruments; diagnostic, examination and monitoring equipment; chromatographs for medical use; auxiliary medical diagnostic devices, namely electrophoresis cellulose acetate films, cellulose nitrate filters for electro-blotting, polyamide films for DNA bonding, holders for nutritive media, nutritive cardboard discs, membranes for antibody analysis, antigen analysis and antibody cleansing; diagnostic membranes; filters for use in the field of medicine; filters for medical diagnostics; filter capsules for pharmaceutical and medical purposes; bacterial filters for medical use; chromatography apparatus for medical use; chromatography columns for medical use; chromatographic columns for analytical chromatography, for medical use; chromatography instruments for medical use; chromatography plates for medical use; containers specifically adapted for medical and diagnostic use; disposable containers designed for cryopreserving biopharmaceutical materials for medical, diagnostic and clinical purposes; protective rigid housing structures specifically adapted for receiving disposable containers used in cryopreserving biopharmaceutical materials for medical and diagnostic purposes; support frames for disposable containers used in cryopreserving biopharmaceutical materials for medical, diagnostic, and clinical purposes; flexible plastic bags for biological, medical or pharmaceutical liquids; medical plastic bags designed to hold medical and pharmaceutical liquids; bags for medical purposes, namely for cell cultivation; protective devices in the nature of sleeves and frames for use with disposable containers for cryopreservation of biopharmaceutical materials; containers for biopharmaceutical liquids, non-metallic; disposable containers made of plastic for storage and transport of frozen biopharmaceutical materials; sample bag cover specifically adapted to disposable containers for biopharmaceutical materials.

Class 11:

Apparatus and installations for lighting, heating, cooling, steam generating, cooking, drying, ventilating, water supply and sanitary purposes; cooking, heating, cooling and preservation equipment, for food and beverages; cooling apparatus and appliances; containers with temperature regulators for chilling biopharmaceutical materials; drying installations; evaporators, dryers, filters and membranes as parts of industrial installations for the treatment and/or the purification of water; filters, including filter apparatus and installations, namely filters for the treatment, purification, and sterilization of biopharmaceutical liquids, water, air and gas for industrial use; filter installations of stainless steel, namely filtering installations for biopharmaceutical liquids, water, air, and gas for industrial use; filter modules, including cross-flow filtration cassettes, filter capsules, filter cartridges, filter winding modules, membranes, membrane filters, membrane adsorbers, adsorbers, filter fleeces, and filter matting, including all of the aforesaid goods being parts of air, gas, water or biopharmaceutical liquid filtering systems or being independent air, gas, water or biopharmaceutical liquid filters; air, gas,

water and biopharmaceutical liquid filtration installations for environmental technology, biotechnology, the pharmaceutical industry, the cosmetic industry, the chemical industry, and for the food and drinks industry; apparatus for removing substances from fluids; separators for the cleaning and purification of liquids; heating, ventilating, and air conditioning and purification equipment (ambient); industrial treatment installations and filters for the purification and processing of biopharmaceutical liquids, water, air, and gas for industrial use; bioreactors; fermentation installations; apparatus and installations for the purification of water, liquids or gases in the pharmaceutical, medical and laboratory fields; apparatus and installations for chemical and biopharmaceutical processing, including distillation apparatus, evaporators, heat exchangers, filtration units, and sterilization systems for industrial purposes; chromatography apparatus for industrial use; chromatography systems for use in separation and purification of pharmaceuticals, viruses, viral particles, cells, cell products, proteins, antibodies, antibody fractions, and nucleic acids, all for industrial use; refrigerating and freezing equipment; refrigerators, cooling apparatus and freezers for medical storage purposes; refrigerating containers; refrigerated shipping containers; temperature controlled shipping containers; refrigerated medical container for storage, transportation and cooling of medicines and pharmaceuticals; freezing installations and machines for freezing biopharmaceutical materials; laboratory freezers for cryogenic preservation; insulated refrigerated or heated containers for the transport and storage of temperature sensitive goods; thermally insulated cooling or refrigerated storage units for disposable containers for cryopreserving biopharmaceutical materials; non-metal and non-paper insulated refrigerated shipping containers for transporting frozen materials; non-metal and non-paper insulated shipping containers for transporting frozen materials; heaters and heating systems for thawing frozen biopharmaceutical materials; cooling and heating systems for processing biopharmaceutical materials; refrigerated and chilling containers equipped with temperature controllers for biopharmaceutical materials; sanitary installations, water supply and sanitation equipment; sterilization, disinfection and decontamination equipment; water purification, desalination and conditioning installations; equipment for de-ionising water, equipment for extracting super-purified water, and components for the aforesaid equipment; apparatus for depyrogenating solutions; water purification installations and apparatus, namely reverse osmosis units, membrane filtration units, and water filtering apparatus, including ceramic or carbon, alloy membranes and parts thereof.

Class 12:

Trolleys for transporting disposable containers for biopharmaceutical materials; lifting cars.

Class 16:

Packaging materials of plastic; flexible pouches of plastic for storing and transporting biopharmaceutical liquids; phase separating paper; chromatography paper, polyethylene-backed absorbent paper, and filter paper; lens cleaning tissue paper; bags and liners of plastic for use in holding biological material and related reagents; filter paper; creped wood pulp paper filter that is acid and alkali resistant for laboratory and industrial purposes; filter paper; glass microfiber filter papers; polyethylene-backed absorbent paper for use as a protective cover for laboratory work surfaces, as an absorbent liner for

List of cases accepted for opposition purposes as shown in Journal 2025/051 published on 19 December 2025 .

animal cages, as a liner for humidity chambers; marketing, scientific and instructional material; instruction manuals; printed matter relating to purification in life sciences.

Class 17:

Flexible pipes, tubes, hoses and fittings therefor (including valves), and fittings for rigid pipes, all non-metallic; insulation and barrier articles and materials; seals, sealants and fillers; elastomers; resins in extruded form; semi-worked plastic substances; semi-processed synthetic filtering materials.

Class 20:

Containers, not of metal, for storage or transport; containers, not of metal [storage, transport], and closures and holders thereof, not of metal; containers for biopharmaceutical liquids, non-metallic; packaging containers of plastic; non-metal and non-paper insulated shipping containers for transporting frozen materials; plastic shipping and storage boxes; crates and pallets, non-metallic; protective rigid housings made of plastic adapted for disposable nonmetallic storage and transport containers for biopharmaceutical materials; non-metallic frames adapted for disposable non-metallic storage and transport containers for biopharmaceutical materials; covers specifically adapted for disposable non-metallic storage and transport containers for biopharmaceutical materials.

Class 37:

Repair, maintenance, installation, and servicing of scientific and bioprocessing apparatus and instruments; installation, maintenance, repair and servicing of laboratory apparatus, mechanical equipment and devices, weighing apparatus and instruments, electronic precision balances, scientific apparatus and instruments, laboratory equipment; installation, maintenance, repair and servicing of electronic filter testing apparatus, water treatment apparatus and apparatus for treating aqueous solutions in laboratories, equipment for deionising water, equipment for depyrogenating aqueous solutions, filter equipment, filter installations, filter modules, fermenters, bioreactors; services for installing, maintaining (servicing) and repairing chromatographic apparatus and instruments, preparative chromatographic apparatus and instruments and chromatography columns; services for installing, maintaining (servicing) and repairing filtration machinery, equipment and installations for industrial installations, especially for ultrafiltration and microfiltration.

Class 40:

Treatment and transformation of materials, namely, custom manufacture of pharmaceuticals and of biopharmaceuticals, and providing information in the field of custom manufacturing of pharmaceuticals; treatment and transformation of materials, namely, custom biomanufacturing for others, namely, custom manufacturing of pharmaceuticals using biological organisms in the manufacturing process; treatment and transformation of materials, namely, cryogenic preservation; custom manufacture and assembly services; 3D printing services; custom manufacturing services of cell culture in the life sciences field.

Class 41:

Education, training and teaching services; providing information in the fields of education and training; teaching and training in the fields of biology, medicine, biologicals, biopharmaceuticals, pharmaceuticals and chemical analysis;

teaching and training in the fields of vaccines, growth factors, immune modulators, monoclonal antibodies, cells, cell therapies, tissues, proteins, recombinant proteins, nucleic acids, gene therapies, products derived from living culture systems, products derived from human blood, products derived from plasma; technical training relating to medical, biological, biopharmaceutical, pharmaceutical and chemical analysis; organisation of conferences, courses, trainings, seminars; arranging and conducting of conferences and seminars, in particular on product applications and management training; conducting training and seminar programs for the pharmaceutical industry, and for the food and drink industries, in particular in the fields of quality systems, validation of products and processes; organisation of conferences in the fields of medical, biological, biopharmaceutical, pharmaceutical and chemical research and development; publication services; publication of scientific research; publication of the results of clinical trials for pharmaceutical preparations; instruction services; provision of medical, biological, biopharmaceutical, pharmaceutical and chemical instruction courses; information, consultancy and advisory services for the aforementioned services.

Class 42:
