Treatment of Materials; Processing of recycled materials for use in manufacture; Treatment of materials for the manufacture of goods; Battery recycling processes including all hydrometallurgical processes; shredding, grinding, sieving, electrolyte solvent extraction; blending, comminution of ores, separation, leaching, acid or peroxide leaching; extracting nickel, cobalt, graphite and other metals (sulphides, hydroxides, carbonates); electrolysis, black mass processing, black mass refining, cathode and anode blending, cathode active material preparation, treatment of ores; recycling water, removing contaminants, removing sodium, removing copper and iron precipitates and aluminium precipitates and fluoride precipitates, phosphate precipitates, hydroxide precipitates; removal of gases; treatment of batteries; electric vehicle battery recycling; treatment of used vehicle batteries; recovery of metals from batteries; recovery of metals from end-of-life batteries; recovery of metals from battery materials; recovery of metals from failed batteries; recovery of metals from failed cells; recovery of metals from battery manufacturing wastes; recovery of compounds from batteries; recovery of nickel compounds from batteries; recovery of cobalt compounds from batteries; provision of information in relation to the recycling of batteries, handling of used batteries and transformation of waste; removal of casting materials, shredding or attrition of electrode materials, from end of life batteries; Extraction of minerals contained in waste residues; Extraction of elements contained in waste residues; Treatment of metals; Recycling of metals; Refining of metals; Heat treatment of metals; Recovery of precious metals; Recovery of precious minerals; Recovery of critical metals; Recovery of critical minerals; Heat treatment of ores; Treatment and processing of ores and ore concentrates; Metallurgical processing; grinding; milling; Waste processing; Processing of chemicals; Processing of iron oxides; Metal treating; Electrochemical treatment; Metal treatment; Recycling; Recycling of minerals; Waste recycling services; Treatment [recycling] of chemicals; Recycling of electric batteries; Treatment [recycling] of hazardous products; Providing information relating to the recycling of waste; Filtration of gases; Filtration of liquids; Reclamation of solids by chemical precipitation; Recycling of waste and trash; extracting nickel, cobalt, graphite and other metals; treatment of ores; recycling nitric acid; battery recycling; treatment of batteries; electric vehicle battery recycling; treatment of used vehicle batteries; recovery of metals from batteries; recovery of compounds from batteries; recovery of nickel compounds from batteries; recovery of cobalt compounds from batteries; provision of information in relation to the recycling of batteries, handling of used batteries and transformation of waste; provision of advice and consultancy in relation to the production of energy and the treatment, management, and recycling of batteries, transformation of waste; information in relation to battery recycling provided via a website; waste management, sorting and classification of waste, waste comminution, extraction of critical waste, refining of critical waste, processing waste; technical consulting in the field of battery recycling, including battery recycling utilizing hydrometallurgy; processing, extraction, treatment, and recycling of graphite, cobalt, nickel, manganese, copper, aluminium, artificial graphite, lithium, iron, titanium, rare minerals, and combinations of minerals; recovery of compounds from batteries; Technical consulting and advisory

List of cases accepted for opposition purposes as shown in Journal 2026/029 published on 17 July 2026 .

services relating to chemical processing, battery recycling, materials recovery and waste management; Provision of technical information and know-how relating to chemical processes, battery recycling and materials production.

Class 42:

Scientific and technological services and research and design relating to battery materials, battery recycling and hydrometallurgical processes; Research and development of chemical processes; research and development of materials for use in batteries; Design and development of industrial processes, plants and equipment for chemical processing, battery recycling and materials production; Engineering design services; process engineering; development and optimisation of industrial processes; Materials analysis and testing including chemical analysis and characterisation of materials.

CellMine Limited

UK00004413157 08 July 2026

(9, 42, 45)

Auspice8

Class 9:

Downloadable software applications for mobile phones; Communication, networking and social networking software.

Class 42:

Software as a service [SaaS].

Class 45:

Astrological and spiritual services.

Kwok Shing Chan

DSeek

Class 9:

Data sets, recorded or downloadable; downloadable computer software for collecting, analyzing and organizing data in the field of deep learning; mobile phone software applications, downloadable; computer software, recorded; magnetic data media; data processing apparatus; downloadable image files; computer software for authorising access to data bases; computer programs for use in remotely searching the contents of computer and computer networks; computer operating programs, recorded; computer programs, downloadable; downloadable video files; computer programs, recorded; computer software applications, downloadable; personal digital assistants [PDAs]; internet servers; computer software platforms, recorded or downloadable; computer chatbot software for simulating conversations; downloadable computer software for generating images from text using artificial intelligence; downloadable application software for virtual environments; quantum computers; microprocessors; artificial intelligence glasses; smart rings; smart cards [integrated circuit cards]; neural helmets, not for medical purposes; software as a medical device [SaMD], downloadable; computer software for operating and managing virtualized computer environments; computer software [recorded] for virtual reality systems; software for processing images, graphics and text; computer software for controlling and managing access server applications; computer software for maintaining and operating computer systems; virtual mirrors [interactive electronic displays]; user-programmable humanoid robots, not configured; humanoid robots having communication and learning functions for assisting and entertaining people; anthropoid robots with artificial intelligence for use in scientific research; humanoid robots with artificial intelligence for use in household cleaning and laundry; Artificial intelligence apparatus; artificial intelligence and machine learning software; interactive software based on artificial intelligence; software for the integration of artificial intelligence and machine learning in the field of Big Data; Software for converting natural language into machine executable commands; Artificial intelligence software for surveillance; artificial intelligence software for analysis; Artificial intelligence software for vehicles; Artificial intelligence software for healthcare; Computer software for use as an application programming interface (API); Downloadable computer software for use as an application programming interface (API); recorded and downloadable computer software development tools; downloadable computer software and programs for using language models; downloadable computer software for developing and operating artificial intelligence-based applications; downloadable software used for training and simulating artificial intelligence models; downloadable software for application and database integration; downloadable computer software and programs for natural language processing, generation, understanding, reasoning, and analysis; downloadable computer software and programs for detecting, recognizing, processing, analyzing, understanding, creating, generating, enhancing, and/or editing text, voice, speech, audio, images, graphics, and/or video; downloadable computer software and programs for conversion of text and data files into software code, for detecting, recognizing, processing, analyzing, understanding, generating and/or editing software code, and for multilingual text and speech recognition, translation, and transcription; downloadable computer software and programs for sharing datasets for the purpose of machine learning, predictive analytics, and building language and image models, for developing and implementing artificial neural networks, for simulation environments for the purpose of testing artificial intelligence agents, algorithms, or programs,

List of cases accepted for opposition purposes as shown in Journal 2026/029 published on 17 July 2026 .

and for using, customizing, fine-tuning, and adapting artificial intelligence models; downloadable computer software and programs for building, using, and deploying autonomous agents, semi-autonomous agents, and intelligent agents; downloadable computer software and programs for task automation and workflow orchestration; downloadable software for drafting, summarizing, designing, generating, creating, editing and publishing documents, written content, spreadsheets, presentations, and emails; downloadable computer search engine software; downloadable software in the nature of cloud- and edge-computing software using artificial intelligence for use in industry-specific software development and machine learning; downloadable augmented reality (ar) and virtual reality (vr) software for ai-assisted interaction, simulation, and training; downloadable computer software and programs for data processing, encryption, anonymization, and privacy-preserving machine learning; downloadable computer software and programs for multi-modal processing and understanding of text, audio, image, and video; downloadable computer software and programs for generating synthetic data and synthetic training environments; downloadable computer software and programs for retrieval-augmented generation, and knowledge graph construction; downloadable computer software for transmitting, streaming, displaying, accessing, and browsing data, information, user-generated content, digital content, computer software, computer games, audio works, visual works, and audiovisual works; downloadable computer software for transmitting, accessing, viewing, searching, uploading, downloading, sharing, integrating, displaying, purchasing, subscribing to, storing, and transferring data, computer programs, software, mobile software applications, software extensions, software plugins, intelligent agents, digital assistants, and digital media; downloadable software for developing and publishing computer programs, software, mobile software applications, software extensions, software plugins, intelligent agents, digital assistants, and digital media; downloadable software for collaborating, instant messaging, video communications, audio communications; downloadable computer software for creating indexes of information, indexes of websites and indexes of other information resources; downloadable software for providing access to the internet; downloadable computer software for accessing, browsing and searching online databases; downloadable software for database, document, and data management, for workflow management, for personal information management, and for project management; downloadable computer software for searching, browsing, accessing, processing, analyzing, monitoring, understanding, and taking action in response to websites, user interfaces, and data; downloadable computer software for using artificial intelligence for automating tasks in a user's browser; downloadable computer software for interacting with a browser to research, extract, copy, and store data; downloadable computer software for single sign-on; downloadable computer software for security, user authentication, and password and log in management and protection; downloadable intelligent personal assistant software for shopping; downloadable computer software for recommending, comparing, and selecting the products and services of others; downloadable computer software for providing information and links to retail websites of others, coupons, offers, consumer reviews, comparison shopping, and discount information, and for facilitating e-commerce transactions; computer hardware for high-speed processing and storage of data using multiple cpu's; data processing units for use in the fields of artificial intelligence, high performance

computing, and data center operations; data processing units that enable the secure transmission of compute data between servers for artificial intelligence workloads; downloadable computer software for use in assessing, monitoring, administration and management of data centers and datacenter devices, and public and private cloud computing it and application systems and resources; downloadable computer software for managing cloud computing resources; downloadable computer software for messaging, chat and social networking; downloadable computer software for transmitting, receiving, accessing, viewing, uploading, downloading, broadcasting, sharing, integrating, displaying, formatting, organizing, storing, transferring and streaming of data, text, digital media, images, audio, video, user generated content, and animations; downloadable computer software for accessing, browsing, and searching online databases and recommending multimedia content; downloadable computer software for streaming audiovisual and multimedia content to mobile digital electronic devices; downloadable computer software for developing and publishing applications for interactive streaming; downloadable virtual goods, namely, computer programs featuring badges, emoticons, emotes, and images for use in online virtual worlds; downloadable computer software for creating and editing of film, movies, video, digital audio and images; downloadable computer software for recording, editing, mixing, analysing, restoring, converting, compressing, mastering and producing digital audio; downloadable computer software for audio production and audio composition; downloadable computer software for post-production restoration, color correction, and editing of video and images; downloadable computer software for testing skills in the fields of artificial intelligence, machine learning, information technology (it), business process automation, prompt engineering, and software development; downloadable publications; computer hardware; computers and computer peripherals; earphones; headphones; smart watches; smart bands; smart jewelry; wearable computers; wearable cameras; digital media streaming devices; virtual and augmented reality headsets, goggles, glasses, controllers, and remotes; wireless communication devices for providing access to the internet and sending, receiving, and transmitting data, images, audio, video, and multimedia content; intercommunication apparatus; media players; smartphones; sound recording, reproducing, and transmitting apparatus; portable and handheld digital electronic devices for recording, organizing, transmitting, manipulating, and reviewing text, data, image, and audio files; wireless communication devices featuring voice, data and image transmission including voice, text and picture messaging, a video and still image camera, also functional to purchase audio, games, video and software applications over the air for downloading to the device; downloadable computer programs and downloadable computer software for the artificial production of software code; downloadable computer programs and downloadable computer software for the translation of text or speech from natural language to software code; Downloadable computer programs and downloadable computer software for machine-learning based language processing software; Downloadable computer programs and downloadable computer software for creating and generating software code; Downloadable computer programs and downloadable computer software for conversion of text and data files into software code; Downloadable computer programs and downloadable computer software for developing, running and analyzing algorithms that are able to learn to analyze, classify, and take actions in response to exposure to data; Downloadable computer programs and downloadable

computer software featuring autonomous AI software agents for generating, modifying, and managing computer code in an integrated developer environment (IDE).

Class 42:

Research in the field of artificial intelligence technology; research in the field of deep learning; conducting technical project studies; research in the field of artificial intelligence; conversion of computer programs and data, other than physical conversion; providing search engines for the internet; software as a service [SaaS]; platform as a service [PaaS]; blockchain as a service [BaaS]; artificial intelligence as a service [AIaaS]; online data storage services; monitoring of computer system operation by remote access; computer programming services for data processing; rental of computer software for collecting, analyzing and organizing data in the field of deep learning; providing temporary use of online non-downloadable computer software for collecting, analyzing and organizing data in the field of deep learning; rental of computer software for financial management; technical research in the field of data mining; database development services; data conversion of electronic information; computer programming; data security consultancy; updating and maintenance of computer software; development of computer platforms; quantum computing; data encryption and decoding services; off-site data backup; electronic data storage; data encryption services; providing temporary use of on-line non-downloadable single sign-on software; providing online non-downloadable computer software; computer software design; computer aided industrial design services; animation design for others; conversion of data or documents from physical to electronic media; research in the field of computer natural language processing; Artificial intelligence consultancy; software as a service [SaaS] featuring software for machine learning; software as a service [SaaS] featuring computer software platforms for artificial intelligence; software as a service [SaaS] services featuring software for machine learning, deep learning and deep neural networks; providing artificial intelligence computer programs on data networks; platforms for artificial intelligence as software as a service [SaaS]; providing online non-downloadable software using artificial intelligence (AI) for machine learning; providing temporary use of online non-downloadable chatbot software using large language models (LLMs) for computer software code generation; providing temporary use of online non-downloadable software using large language models (LLMs) for computer software code generation; providing a website featuring on-line non-downloadable software; providing temporary use of on-line non-downloadable software and applications; providing online non-downloadable software using machine learning; application service provider featuring application programming interface (API) software; software as a service (SAAS) services featuring software using artificial intelligence (AI); providing temporary use of online non-downloadable chatbot software using artificial intelligence (AI) ; providing temporary use of online non-downloadable chatbot software using large language models (LLMs); providing on-line non-downloadable software using artificial intelligence (AI); providing temporary use of on-line non-downloadable software and applications using artificial intelligence (AI); providing a website featuring non-downloadable software using artificial intelligence (AI); scientific and technological services and research and design relating thereto; industrial analysis, industrial research and industrial design services; design and development of computer hardware and software; research and development services in the field of artificial intelligence, computer science and machine learning; providing

online non-downloadable computer software for developing and operating artificial intelligence-based applications; providing online non-downloadable software used for training and simulating artificial intelligence models; providing online non-downloadable software and computer programs for natural language processing, generation, understanding, reasoning, and analysis; providing online non-downloadable software and computer programs for detecting, recognizing, processing, analyzing, understanding, creating, generating, enhancing, and/or editing text, voice, speech, audio, images, graphics, and/or video; providing online non-downloadable software and computer programs for conversion of text and data files into software code, for detecting, recognizing, processing, analyzing, understanding, generating and/or editing software code, and for multilingual text and speech recognition, translation, and transcription; providing online non-downloadable software and computer programs for sharing datasets for the purpose of machine learning, predictive analytics, and building language and image models, for developing and implementing artificial neural networks, for the purpose of testing artificial intelligence agents, algorithms, or programs, and for using, customizing, fine-tuning, and adapting artificial intelligence models; providing online non-downloadable software and computer programs for task automation and workflow orchestration; providing online non-downloadable software and computer programs for building, using, and deploying autonomous agents, semi-autonomous agents, and intelligent agents; providing online non-downloadable software and computer programs for drafting, summarizing, designing, generating, creating, editing and publishing documents, written content, spreadsheets, presentations, and emails; providing a website featuring a media aggregator and search engine for internet content; computer services, namely, providing search engines for obtaining data, images, audio and video on a global computer network; providing customized on-line web pages featuring user-defined information, which includes search engines and on-line web links to other web sites; providing online non-downloadable cloud computing software using artificial intelligence for use in industry-specific software development and machine learning; software as a service (SaaS) services featuring software using artificial intelligence for industry-specific end-to-end and cloud-to-edge solutions for software development and machine learning; providing online non-downloadable augmented reality (AR) and virtual reality (VR) software for ai-assisted interaction, simulation, and training; software as a service (SaaS) services featuring software for leveraging quantum computing resources to optimize ai model performance; providing online non-downloadable software and computer programs for data processing, encryption, anonymization, and privacy-preserving machine learning; providing online non-downloadable software and computer programs for multi-modal processing and understanding of text, audio, image, and video; providing online non-downloadable software and computer programs for generating synthetic data and synthetic training environments; providing online non-downloadable software and computer programs for retrieval-augmented generation, and knowledge graph construction; providing online non-downloadable software and computer programs for transmitting, streaming, displaying, accessing, and browsing data, information, user-generated content, digital content, computer software, computer games, audio works, visual works, and audiovisual works; providing online non-downloadable software and computer programs for transmitting, accessing, viewing, searching, uploading, downloading, sharing, integrating, displaying, purchasing,

Class 9:

Downloadable computer software; downloadable electronic publications; interactive electronic publications; computer software and computer software platforms relating to the management of energy metering; computer software and computer software platforms relating to the monitoring of energy prices for buying and selling energy off the grid; computer software and computer software platforms relating to the tracking and monitoring of energy and power usage and consumption; computer software and computer software platforms relating to the supply of energy and load balancing of electricity and energy; computer software and computer software platforms relating to balancing the supply and demand of energy and electricity, including the supply and demand of energy from solar, wind, wave, geothermal, solid waste and other renewable sources; energy control devices; regulating apparatus, electric; fuel cell systems comprised of fuel cells for battery charging and replacement; apparatus, equipment and components for generating, handling, transmitting and distributing electro-chemical power; apparatus and instruments for conducting, distributing, transforming, accumulating, regulating, adjusting and controlling electricity and fuel cells; electric power units; electro-chemical generators; power regulators; power converters; power connectors; power adapters; battery charging devices; battery terminals; communication transmission equipment; electricity conduits; control panels (electricity); distributing boxes; portable power banks; batteries (electric); rechargeable batteries; electronic storage devices; accessories; parts and fittings for the aforesaid.

Class 16:

Printed materials; printed matter; printed publications; paper and card posters; flyers, leaflets; brochures; stationery, writing implements and office supplies; printed materials relating to energy efficiency; advertising and publicity leaflets; booklets for information; information manuals; information sheets; information pamphlets; information pamphlets relating to energy efficiency; newsletters.

Class 35:

Business administration; business advice; business analysis; business data analysis; business assistance; business consultancy; business information; business management; business project management services; business organisation; business planning; business strategy; business supervision; compilation and provision of business data, information and statistics; business management assistance and business organisation and management consulting in the field of environmental protection, new energies, preservation of natural wealth and sustainable development; business consulting in the field of environmental protection, new energies, preservation of natural wealth and sustainable developments; business enquiry services relating to electrical and gas equipment and apparatus and to energy services and the generation and distribution of power, gas, water or electricity, and the compilation of data so obtained; provision of advice and information to consumers and businesses relating to efficient energy usage; provision of advice and information to consumers and businesses relating to the installation of renewable heating and energy systems; provision of advice and information in relation to the availability and suitability of energy efficient products and services; provision of advice and information relating to the reduction of carbon footprints; organisation of exhibitions for commercial and advertising purposes on environmental protection, new energies, preservation of natural wealth and sustainable development; compilation, analysis and retrieval of information and data; dissemination of information; dissemination of energy efficiency information; meter reading for billing purposes; billing services in the field of energy; market research and studies in the field of environmental protection, new energies, preservation of natural wealth and sustainable developments; procurement of contracts concerning energy supply; energy price comparison services; import-export agencies in the fields of energy and power; consulting and information on consumption of energy and power; organisation, operation and supervision of incentive and loyalty schemes; online retail and wholesale services in connection with the sale of electrical batteries and machines for the provision of electrical energy; online retail services provided via an Internet website; information, advisory and consultancy services relating to all the aforesaid.

Class 37:

Installation, repair, maintenance, servicing and dismantling of energy-saving apparatus, machines and installations; installation, repair, maintenance, servicing and dismantling of energy consumption monitoring apparatus, machines and installations; installation, repair, maintenance, and servicing of electrical appliances; installation, repair, maintenance, and servicing of batteries; installation, repair, maintenance, and servicing of installations providing electrical energy; installation, repair, maintenance, servicing and dismantling of building automation equipment; information, advisory and consultancy services relating to all the aforesaid.

Class 39:

Transport services; vehicle transport services; electric vehicle transport services; electric vehicle leasing; hire of motor vehicles; fleet management services in the field of vehicle fleets; fleet management services in the field of electric vehicle fleets; advice on travel policies for businesses; travel route planning; organisation of travel; provision of advice relating to electrification of vehicle fleets for businesses; information, advisory and consultancy services relating to all the aforesaid.

Class 41:

***List of cases accepted for opposition purposes as shown in Journal 2026/029 published on
17 July 2026 .***

Education and training services; online education services; publishing of electronic publications; publication of online publications; providing electronic publications; publication of educational texts; conducting seminars and workshops; organising conferences, exhibitions, seminars and webinars; organising and providing seminars via the internet; information, advisory and consultancy services relating to all the aforesaid.

Class 42:

Advisory, information and consultancy services relating to energy management and efficiency; energy monitoring; energy auditing; programming of energy management software; development of energy and power management systems; research in the field of energy; technical data analysis; provision of energy performance certificates; evaluation of energy saving initiatives; policy analysis relating to energy efficiency; computer services for the analysis of data; providing temporary use of non-downloadable software for analysing technical data and generating reports; design and development of software; design and development of computer database software; consultancy and advisory services relating to technical data analysis of energy consumption and distribution in the field of energy saving; platform as a service (PaaS); platform as a service (PaaS) relating to the management of energy metering, monitoring of energy prices for buying and selling energy off the grid, the tracking and monitoring of energy and power usage and consumption, the supply of energy and load balancing of electricity and energy, as to balancing the supply and demand of energy and electricity, including the supply and demand of energy from solar, wind, wave, geothermal, solid waste and other renewable sources; development of computer platforms; hosting of computer platforms on the internet; maintaining and hosting of databases; design and updating of software databases; design, installation and development of software databases; design, development and installation of computer hardware, servers and routers; providing online non-downloadable software for database management; software as a service (SaaS); software as a service (SaaS) relating to the management of energy metering, monitoring of energy prices for buying and selling energy off the grid, the tracking and monitoring of energy and power usage and consumption, the supply of energy and load balancing of electricity and energy, as to balancing the supply and demand of energy and electricity, including the supply and demand of energy from solar, wind, wave, geothermal, solid waste and other renewable sources; providing access to non-downloadable software to enable uploading, downloading, capturing, posting, showing, editing, playing, streaming, viewing, previewing, displaying, tagging, blogging, sharing, manipulating, distributing, publishing, reproducing, or otherwise providing electronic media, multimedia content, videos, movies, pictures, images, text, photos, games, user generated content, audio content, and information via telecommunication networks, the Internet and other computer and communications networks; providing access to non-downloadable software to enable sharing of multimedia content and comments among users; providing access to non-downloadable software to enable content providers to track multimedia content web messaging; development of energy and power management systems; research in the field of energy; energy efficiency management and consultancy; auditing energy consumption of buildings; energy conservation management; preparation of reports on energy consumption of buildings; auditing of energy consumption; development and implementation of processes which are intended to reduce levels of greenhouse gases in the atmosphere; industrial design services; preparation of reports;

engineering services; studies in research on environmental conservation, natural wealth and sustainable development; scientific and industrial research; studies and consulting on the environment, ecology and sustainable development; research on energy and renewable energy; expert appraisal services in the fields of the environment, energy, including new energies, natural wealth and sustainable development; technical study and advice concerning the distribution of energy consumption; technical evaluation and estimate services concerning energy consumption; technical services for collecting information from remote energy consumption calculators; environmental assessment, consultancy, monitoring services; providing advice on environment related issues; development of scientific programmes and campaigns to the public regarding environmental and conservation issues; accreditation and consultancy services relating to environmental issues and compliance with environmental requirements; consultancy in relation to the conservation of energy; providing technical advice relating to energy-saving measures; organisation of energy efficiency projects; auditing of the efficiency of operation of appliances; provision of information, advice and consultancy in relation to carbon offsetting; technology transfer services being the transfer of technical, technological, and professional know-how relating to all the foregoing services; rental of meters for the recording of energy consumption; information, advisory and consultancy services relating to all the aforesaid.

Date of International Registration: 26 March 2026
Date of Designation in the UK: 26 March 2026

International priority date claimed: 17 March 2026 (EM)
(019331953)

Class 1:
Fuel for nuclear reactors; moderating materials for nuclear
reactors.

Class 4:
Electrical energy; electrical energy from renewable sources.

Class 6:

Modular building units (metal -); modular portable building
structures [metal]; alloys of common metal; common metals
and their alloys; steel building materials; steel; steel alloys;
metal alloys for further manufacturing; additive alloys for the
production of steel; common metals and their alloys including
stainless steel.

Class 7:
Machines for generating gas by electrolysis; reactors being
industrial chemical installations; reactors for gas-solids
reactions.

Class 11:
Nuclear reactors; nuclear power plant installations; nuclear
generators; reactor vessels; steam generators; heat generating
apparatus; steam heating apparatus; industrial heating
installations.

Class 37:
Construction of nuclear reactors; construction of nuclear power
plants; installation of electrical and generating machinery;
renovation of nuclear plant; cleaning of nuclear plant; servicing
of nuclear plant; repair of energy supply installations; power
infrastructure construction.

Class 39:
Distribution of energy; distribution of renewable energy;
storage of energy and fuels; electricity distribution; distribution
and transmission of electricity; electricity supply and
distribution; consultancy services relating to the distribution of
electricity; distribution of heat.

Class 40:
Energy production; production of energy by nuclear power
plants; generation of power; production of energy by power
plants; production of electrical power from renewable sources;
electricity generating; consultancy services relating to the
generation of electrical power; generation of biogas.

Class 42:
Scientific research in the field of renewable energy; scientific
research in the field of energy; research in the field of energy;
research in the field of nuclear energy power generation
technology; computer technology consultancy; consumer
product safety testing and consultation; providing scientific
information, advice and consultancy relating to net zero
emissions; engineering services in the field of electrical power
and natural gas production; research in the field of physics;
advisory services relating to building design; research and
development services in the field of engineering.

Date of Designation in the UK: 08 May 2026

***List of cases accepted for opposition purposes as shown in Journal 2026/029 published on
17 July 2026 .
1152***

The mark consists of a circular design composed of several abstract, teardrop-shaped elements arranged symmetrically around a center point and forming a spiral pattern, all above the word "GYRUS" in a stylized font.

International priority date claimed: 10 November 2025 (US)
(99487344)

Class 42:

Software as a service (SAAS) services featuring software for orchestrating a team of artificial intelligence-based agents in an ethically aligned AI system and communicating with human users.

UniqueMinds.ai LLC

(178364)

The mark contains the colours yellow, red, purple, pink, white and black.
Yellow, red, purple, pink, white, black - for the word and figurative elements.

Class 9:

Operating computer software for main frame computers; monitors (computer hardware); computer hardware; apparatus for recording images; monitors (computer programs); computer game programs; recorded computer game programs; apparatus for recording, transmission or reproduction of sound or images; communications servers (computer hardware); electronic components for gambling machines; computer application software featuring games and gaming; computer software for the administration of on-line games and gaming; computer hardware for games and gaming; computer systems; computer operating system software; computer terminals; interactive terminals; multimedia terminals; electronic terminals for generating lottery tickets; interactive touch screen terminals; computer touchscreens; electronic display panels; liquid crystal display screens; digital signage display panels; multimedia apparatus and instruments; interactive multimedia software for playing games; computer screens; LCD large-screen displays; liquid crystal displays [LCDs] for home theatres; media streaming software; computer application software for streaming audio-visual media content via the internet; software; computer gaming software; computer software packages; computer software, recorded; software drivers; virtual reality software; games software; entertainment software for computer games; computer programs for network management; electronic

lottery tickets; computer software platforms; operating systems; interactive computer systems; operating system programs; computer game software for use with on-line interactive games; interactive casino games provided through a computer or mobile platform; electronic ticket examination machines; computer hardware and software for gambling, gambling machines, gambling games on the internet and via telecommunication network; software for slot machines, betting software, software for video slot games, for casino games, for gambling and bingo games, that can be played online and on any type of computer device, including arcade games, personal computers, portable devices and mobile phones; multimedia software.

Class 28:

Gaming machines for gambling; chips for gambling; mah-jong; arcade games; gambling machines operating with coins, notes and cards; games; electronic games; parlor games; gaming chips; gaming tables; slot machines [gaming machines]; LCD game machines; slot machines and gaming devices; coin-operated amusement machines; roulette chips; poker chips; chips and dice [gaming equipment]; gaming equipment for casinos; roulette tables; gaming roulette wheels; casino games; gambling machines and amusement machines, automatic and coin-operated; coin-operated amusement machines and / or electronic coin-operated amusement machines with or without the possibility of gain; boxes for coin-operated amusement machines, slot machines and gaming machines; electronic or electrotechnical amusement machines and apparatus, gaming machines, coin-operated entertainment machines; housings for coin-operated amusement machines, gaming equipment, gaming machines, machines for gambling; electropneumatic and electrical gambling machines (slot machines); electronic targets for games and sports; lottery tickets; lottery scratch cards; scratch cards for playing lottery games; parlor game equipment and accessories therefor, included in this class, in particular gaming tokens, chips and marbles; parlor games, game apparatus and equipment, and accessories therefor, included in this class, in particular electronic targets, backgammon games, scratch cards, playing cards, lottery cards, dice.

Class 41:

Gambling; gaming services for entertainment purposes; casino, gaming and gambling services; training in the development of software systems; provision of gaming equipment for gambling halls; providing casino equipment [gambling]; gaming machine entertainment services; providing casino facilities [gambling]; amusement arcade services; games equipment rental; rental of gaming machines; providing amusement arcade services; rental of gaming machines with images of fruits; editing or recording of sounds and images; sound recording and video entertainment services; hire of sound reproducing apparatus; provision of gaming equipment for casinos; online gambling services; entertainment services related to exploitation of amusement arcades, on-line casinos and on-line betting services via websites; online interactive entertainment; on-line casino services; online game services through mobile devices; providing online entertainment in the nature of game tournaments; sports betting services; online sports betting services; lottery services; organization of lotteries; conducting lotteries; prize draws [lotteries]; conducting lotteries for others; providing slot machine parlors; rental of slot machines [gaming machines]; providing online games and games of chance;

providing on-line information in the field of computer gaming entertainment.

Date of Designation in the UK: 28 December 2023

International priority date claimed: 20 December 2023 (CA)
(2300298)

Class 6:

Transportable buildings and structures of metal used in satellite receiving ground stations.

Class 7:

Robotic systems and tooling being parts of industrial robotic machines; industrial machines for lifting, loading, assembling and repairing of space apparatus, satellites and satellite systems and industrial robots; industrial robots for servicing, assembling and refueling of satellites and satellite systems; structural parts for industrial robots and structural replacement parts for industrial robots sold together as a unit; mechanical and electro-mechanical machine tools and attachments for industrial robots in the nature of grasping jaws, retractable drives and umbilical connectors, robotic micro conical tools, socket extension tools, robotic off-set tools, safety cap removal tools, EVR nozzle tools, multifunction tools, robotic arm actuator end effectors, nozzle tools, blanket manipulation tools, wire cutting machine tools, grippers, tool interface plates; robotic arms being parts of industrial robotic machines; grapple fixtures, being machines for securing objects to spacecraft; robotic systems comprised of robotic arms, robotic hands, end-effectors, capture devices, and robot compatible tools with integrated software to operate the robotic systems.

Class 9:

Computer hardware, namely, data and signal processing devices; multi-spectral electro-optical image sensors, namely, radar devices, infrared and ultra violet sensor devices, solid state digital cameras, and optical scanners; computer software; electronic hardcopy recording devices that produce images on photographic film from electronic digital signals; satellite ground stations, namely, satellite receiving dishes and antenna, satellite signal data processing hardware and software, video monitors, magnetic media for storage of

data, facsimile recorders, electronic hardcopy film recording devices; electric and electronic video surveillance installations; video surveillance cameras; security surveillance robots; maritime patrol radar; laboratory robots; humanoid robots with artificial intelligence; telepresence robots; space probes; radar detectors; radar receivers; radar receivers with amplifiers; radar transmitters; infrared sensors; LED position sensors; optical sensors; sensors for determining acceleration; sensors for determining temperature; sensors for determining velocity; temperature sensors; thermal sensors; velocity sensors; augmented reality software for creating maps; computer software for displaying orders and driver location on maps; communications and earth observation satellites; constellations of satellites; satellite busses; scientific, nautical, surveying, measuring apparatus and earth satellites for use in surveillance; analog and digital beam forming networks; on-board processors; satellite antennas, steerable antennas, arrays, direct radiating arrays, phased array and synthetic aperture antennas, UHF antennas and multibeam antennas; digital channelizers; beam hopping software and avionics; satellite dishes, satellite dishes for satellite transmissions, satellite receivers, satellite transmitters, satellites, satellites for scientific purposes; antenna amplifiers; antennas for radio; antennas for radio and television; antennas for television; dish antennas; microwave antennas; parabolic antennas; radio signal antennas; DC/DC converters; satellite and telecommunications systems comprised of transponders, satellite transmitters, satellite receivers, electrical and electronic relays, switching stations, and electrical and electronic controllers; antennas; satellite payload systems composed of network repeaters, transponders, microwave receivers, RF multiplexers and switches, waveguide, power amplifiers, channel processing computer hardware and automatic switching apparatus, antennas, electronic and optical reflectors, diplexers, triplexers, feed and feed networks, feed horns, support structure and pointing mechanisms, harnesses and cables, modulators, demodulators, frequency converters and generators, interface units, processors, and thermal control subsystem comprised of optical couplers and antenna filters; satellite telemetry tracking and control systems comprised satellites and satellite transmitters and receivers; computer software for operation and monitoring of satellites, telecommunication systems, and robotics; USB flash drives; scientific instruments for determining the material composition and morphology of planetary surface materials; light detection and radar (LIDAR) apparatus for object detection, ranging, measuring, targeting and mapping in relation to spacecraft and manned and unmanned vehicles; laser based metrology systems; electronic warfare command and control systems; laser weapons countermeasures apparatus and control systems for addressing location, detection and countermeasures against laser guided threats such as laser beam rider missiles, laser range finders and laser designators; electromagnetic illumination radar for naval defense; software for automated design and validation of airport landing and take-off procedures; software for automated charting and encoding for creation of air navigation charts; fixed and mobile satellite receiving ground stations; satellite subsystem components; robotic arms being parts of scientific and laboratory apparatus; electro-mechanical apparatus, namely, monochrome TV cameras, machine vision cameras, stereo cameras, and light detection and ranging systems (LIDARS), all for use with industrial robots, not specifically adapted to any particular industrial robot.

Class 10:

Surgical robots for diagnostic and surgical assistance and intervention.

Class 11:

Lighting apparatus in the nature of attachments for use with industrial robots and robotic parts, not specifically adapted to any particular industrial robot or robotic parts.

Class 12:

Trailers for transporting and temporary housing ground station components; space vehicles; unmanned aerial vehicles; spacecraft, namely, space vehicles; apparatus for locomotion by air and space, namely, airborne space platforms and spacecraft being rocket space vehicles for transporting tools used in servicing of satellites and spacecraft and structural parts and structural fittings therefor; autonomous and teleoperated unmanned ground vehicles; manned and unmanned planetary ground effect vehicles and lunar rovers for scientific exploration, prospecting and logistics on other celestial bodies.

Class 35:

Retail and online retail store services in relation to geographic and earth images captured by aircraft and satellite (geospatial and earth image provider); compiling of information into computer databases in the fields of geospatial information, human terrain information, socio-cultural information, behavioral information, and human factors information; outsourcing services in the nature of arranging service contracts for others in the field of developing and assembling satellite ground stations, airborne remote sensing systems, image analysis systems, and airline flight operations systems.

Class 37:

Inspection prior to repair, assembly, repair, maintenance and refueling services of space infrastructure, satellites, space stations and outposts operating in low, medium and geosynchronous earth orbits as well as the region of space from the Earth out to and including the region around the surface of the Moon (i.e. cislunar space), all the aforesaid provided by robots and robotic mechanisms; providing information relating to repair or maintenance of aerospace electronics via an interactive website.

Class 38:

Satellite transmission services; electronic delivery of data, images, photographs and maps via a global computer network.

Class 39:

Distribution services being transportation, supply or delivery of a payload (tool, fuel, replacement components) from a supply spacecraft in earth orbit for subsequent retrieval by a robotic servicing aircraft, for the purposes of maintenance, repair and upgrades of space infrastructure; robotic unloading and loading services of space vehicle cargo and supplies; transportation services for the rendezvous, capture, and relocation of orbital debris by means of robotic spacecraft.

Class 42:

Remote and autonomous command and control, namely, remote monitoring to ensure proper functioning of unmanned lunar outposts and platforms which serve as logistics waypoints for planetary exploration and exploitation; unmanned aerial

List of cases accepted for opposition purposes as shown in Journal 2026/029 published on 17 July 2026 .

vehicle command and control services, namely, remote monitoring to ensure proper functioning of unmanned aerial vehicles that are used for Earth observation, surveillance, and Process Exploitation and Dissemination (PED) in hostile environments; computer systems analysis; consulting services in the field of design, implementation and use of computer hardware and software systems for others which is utilized by others in the development and assembly of satellite ground stations, airborne remote sensing systems, image analysis systems, and airline flight operations systems; design of computer hardware and software, customization of computer software and consulting services relating thereto; technical monitoring, measuring and analysis of space craft activity by means of telemetry monitors; creation of control programs for automated measurement, assembly, adjustment, and related visualisation; development of computer programs recorded on software designed for use in construction and automated manufacturing (cad/cam); technical research in the field of aeronautics; providing information in the field of aerospace electronics via an interactive website; technical consulting in the field of aerospace engineering; marine chart updating; development and creation of computer programmes for data processing; image processing software design; land and road surveying; land surveying; marine, aerial and land surveying; cartography and mapping services; mapping services; design of optical and micro optical components; creation of control programs for electric operation control and drive modules; technical surveying; advisory services in the field of product development and quality improvement of software; computer hardware and software design; computer programming and software design; computer software consulting; computer software design; computer software design for others; computer software installation and maintenance; computer software project management services; consultation services relating to computer software; troubleshooting in the nature of diagnosing computer hardware and software problems [technical support services]; engineering, design, and development services in the field of satellites, satellite systems and satellite components, satellite ground systems, robots, and robotic systems and robot components; design and development of telecommunications hardware; design and development of computer software for naval defense electronic warfare and command and control and situational awareness control rooms; space-based remote earth monitoring to ensure proper functioning of space stations; interpretation of, namely, analysis of digital aerial and satellite images of the earth for others for scientific and research purposes; photogrammetry services; geospatial services, namely, graphic design services of maps and scale drawings from aerial and satellite photographs; computer modeling services, namely, evaluating algorithms for object detection from remotely sensed imagery of earth; Software as a Service (SaaS) services featuring software for receiving, collecting, displaying, processing, and analyzing data from satellites and space-based robotic systems, and providing geospatial analysis, satellite command and control, and satellite navigation; Software as a Service (SaaS) services featuring software in the field of digital imagery for use in connection with the collection, manipulation, processing, electronic formatting and distribution of aerial, geographic, and satellite imagery; Software as a Service (SaaS) services featuring software in the field of geospatial information and data, geocoding information, geographic information systems, satellite imagery, photogrammetry, mapping, location intelligence and location monitoring, namely, software for accessing, downloading,

analyzing, searching, organizing, sharing, distributing, updating, purchasing, integrating, and monitoring imagery, geospatial information, geospatial content, and location specific information; software as a service (SAAS), namely providing computer software for accessing, querying and analyzing information stored in databases, namely historical high-resolution satellite imagery of a geographic locations for scientific geospatial analysis, namely allowing users to compare previous images of a site with new images taken after a natural disaster, man-made disaster, political uprising or other event of high interest to provide historical context plus follow up with imagery of the geography; software as a service (SAAS), namely providing computer software for accessing, querying and analyzing information stored in databases, namely digital or cartographic maps for geospatial analysis; software as a service (SAAS), namely providing computer software for accessing, querying and analyzing information stored in databases, namely remotely sensed earth imagery for scientific or geospatial analysis.; Software as a Service (SaaS) services featuring technology that enables users to access and utilize online non-downloadable software tools for the purpose of searching, filtering, annotating, bookmarking, alerting, and monitoring geospatial imagery; Software as a Service (SaaS) services featuring on-line non-downloadable software tools for image editing and manipulation; providing scientific information in the fields of geospatial information and intelligence related to a database of images and geographic measurements of the earth; providing scientific information in the fields of location intelligence and geospatial intelligence; scientific research and development and consultation related thereto in the fields of geospatial information and data, geocoding information, geographic information systems, location intelligence, location-specific information, and location monitoring, geospatial information and intelligence services; scientific services for others, namely, analysis of cartography and mapping information in the field of geospatial information and consultation related thereto; computer services in the nature of electronic storage of digital aerial, geographic, and satellite images; computer services, namely, Software as a Service (SaaS) services featuring technology enabling users to conduct geographic information analysis; computer services, namely, remote operation management services for monitoring cloud computing systems of unmanned robotic enabled space platforms, satellites, and stations for scientific research and development for others; providing remote (from earth or other spacecraft) and autonomous services for the command and control of unmanned lunar outposts and platforms which serve as logistics waypoints for planetary exploration and exploitation; unmanned aerial vehicle command and control services for Earth observation, surveillance, and Process Exploitation and Dissemination (PED) in hostile environments; Software as a Service (SaaS) for the detection, classification, identification, tracking and behaviour prediction of ships and vessels based on remotely sensed optical imagery, Synthetic Aperture Radar (SAR) imagery, Radio Frequency (RF) signals and Automatic Identification System (AIS) signals.

Date of Designation in the UK: 29 April 2026

International priority date claimed: 20 November 2025 (EM)
(019279618)

Class 7:

Engines for the generation of electricity; driving devices for machines; motors, electric, other than for land vehicles; generators and aggregators; apparatus and machines for converting mechanical energy into electrical energy; mechanical transmissions [other than for land vehicles]; power supply apparatus [generators]; parts and fittings for the aforementioned goods.

Class 9:

Apparatus and instruments for conducting, producing, generating, distributing, converting, collecting, regulating, directing and storing electricity; batteries; batteries, electric accumulators, aggregates, electricity storage apparatus, voltage converters, electric power supply apparatus, all of the aforementioned goods being rechargeable.

Class 40:

Production of hydrogen; generation of energy and electricity from hydrogen; conversion of electricity into hydrogen; conversion of hydrogen into electricity; rental of equipment for the treatment and transformation of materials, for energy production and for custom manufacturing; rental of apparatus for transforming and producing energy and electricity from hydrogen; rental of batteries; rental of accumulators; rental of aggregates; energy production; consulting services including the provision of information regarding all the aforesaid services.

Class 42:

Testing the functionalities of machines; industrial testing; quality checking; technical testing services; scientific and technological services and research and design relating thereto; industrial analysis, industrial research and industrial design services; quality control and authentication services; development of energy systems and energy management systems; development and design of energy storage systems and energy generation systems; consulting services including the provision of information regarding all the aforesaid services.
